

## Using the Tanzania Health PETS/QSDS Data Set

The Tanzania PETS/QSDS data set is a survey of 175 health facilities, 135 of which are located in rural areas. The health facilities are located in 7 regions, identified in variable 'zone'. Variable labels are in English.

All files include a variable named 'hfacility\_code', which represents the health facility identifier. All files can therefore be merged using that variable. Variable 'pweight' represents the sampling weight for each health facility.

<b>FILE</b>	<b>DESCRIPTION</b>
Health module 1.dta	General data on structure, staff, stocks and budgets
Health module 2.dta	Detailed data collected on up to 10 staff members per health facility during an announced visit.
Health module 3.dta	Detailed data collected on up to 10 staff members per health facility during a follow-up, unannounced visit.
Health module 4.dta	Patient visit log
pcsimul.dta	Medical case simulation questionnaire dataset. Each observation contains 5 patient simulations.
