Sampling

Sampling Procedure

Number of units: Ethiopia: 1,875 (12-year-olds), 908 (19-year-olds); India: 1,915 (12-year-olds), 952 (19-year-olds); Peru: 1,902 (12-year-olds), 635 (19-year-olds); Vietnam: 1,932 (12-year-olds), 887 (19-year-olds)
More detailed information on survey design and sampling is available at http://www.younglives.org.uk/content/our-research-methods

Weighting

No weighting used.
Questionnaires

Overview

The Older Cohort Household Questionnaire (age 19) includes sections on:
- Parental background; Household and child education
- Livelihoods and asset framework
- Household food and non-food consumption and expenditure
- Social capital; Economic changes and recent life history
- Socio-economic status

The Older Cohort Child Questionnaire (age 19) includes sections on:
- Parents and Caregiver update; Mobility
- Subjective well-being
- Education
- Employment, earnings, and time-use
- Feelings and attitudes
- Household decision-making
- Marital and living arrangements
- Fertility; Anthropometry
- Health and nutrition

The Older Cohort Cognitive Tests (age 19) includes
- Mathematics test
- Reading comprehension test

The Older Cohort Self-Administered Questionnaire (age 19) includes sections on:
- Relationship with parents
- Smoking, Violence, Alcohol, Sexual behaviour (administered in Peru only)

The Younger Cohort Household Questionnaire (age 12) includes sections on:
- Parental background
- Household and child education
- Livelihoods and asset framework
- Household food and non-food consumption and expenditure
- Social capital
- Economic changes and recent life history
- Socio-economic status
- Health
- Anthropometry (for the study child and a sibling)
- Caregiver perceptions and attitudes

The Younger Cohort Child Questionnaire (age 12) includes sections on:
- Schooling
- Time-us
- Health
- Social networks
- Feelings and attitudes

The Younger Cohort Cognitive Tests (age 12) include:
- Peabody Picture Vocabulary Test (administered to the study child and a sibling)
- Mathematics test
- Reading comprehension test. In Ethiopia and Peru only: a computerised cognitive skill (Executive Functioning) test administered on touch-screen tablet computers for the study child and a younger sibling. In Ethiopia only an additional English and Amharic reading test.

The Community Questionnaire (administered in the main communities where Young Lives children live) includes sections on:
- General characteristics of the locality
- Social environment
- Access to services; Economy
- Local prices
- Social protection
- Educational services
- Health services; Migration

The Mini-community questionnaire (administered in communities into which one or study children moved) includes sections on:
- General characteristics of the locality
- Social environment
- Access to Services
- Economy
- Local prices

Data Processing

Other Processing

Data Archive Processing Standards

The data were processed to the UK Data Archive’s B standard. A substantial series of checks was carried out to ensure the quality of the data and documentation. Firstly, checks were made that the number of cases and variables matched the depositor's records. Secondly, logical checks were performed on a sample of the remaining nominal (categorical) variables to ensure they had values within the range defined (either by value labels or in the depositor's documentation). Thirdly, any data or documentation that breached confidentiality rules were altered or suppressed to preserve anonymity.

Data conversion information

From January 2003 onwards, almost all data conversions have been performed using software developed by the UK Data Archive. This enables standardisation of the conversion methods and ensures optimal data quality. In addition to its own data processing/conversion code, this software uses the SPSS and StatTransfer command processors to perform certain format translations. Although data conversion is automated, all data files are also subject to visual inspection by a member of the Archivist’s Data Services team.

With some format conversions, data, and more especially internal metadata (i.e. variable labels, value labels, missing value definitions, data type information), will inevitably be lost or truncated owing to the differential limits of the proprietary formats. A UK Data Archive Data Dictionary file (generally in Rich Text Format (RTF)) is usually provided for each data file, enabling viewing and searching of the internal metadata as it existed in the originating format. These files are called: [data file name]_UKDA_Data_Dictionary.rtf
