## I. Objectives

This survey was designed to assist the World Bank Group (WBG) in gaining a better understanding of how stakeholders in Sri Lanka perceive the WBG. The survey explored:

- *Overall Attitudes toward the World Bank Group*
- *World Bank Group's Effectiveness and Results*
- *The World Bank Group's Knowledge Work and Activities*
- *Working with the World Bank Group*
- *The Future Role of the World Bank Group in Sri Lanka*
- *Communication and Information Sharing*
- *Background Information*

## II. Methodology

From March to May 2015, 600 stakeholders of the WBG in Sri Lanka were invited to provide their opinions on the WBG's work in the country by participating in a country opinion survey. Participants were drawn from the office of the President/Prime Minister; office of a minister; office of a parliamentarian; ministries/ministerial departments; consultants/contractors working on WBG-supported projects/programs; PMUs; local governments; bilateral/multilateral agencies; private sector organizations; private foundations; the financial sector/private banks; NGOs/community based organizations (CBO); the media; independent government institutions; trade unions; faith-based groups; youth groups; academia/research institutes/think tanks; the judiciary branch; and other organizations. A total of 302 stakeholders participated in the survey (50% response rate).

Respondents received and returned the questionnaires via courier. Respondents were asked about: general issues facing Sri Lanka; their overall attitudes toward the WBG; the WBG's effectiveness and results; the WBG's knowledge work and activities; working with the WBG; the WBG's future role in Sri Lanka; and the WBG's communication and information sharing.

Every country that engages in the Country Opinion Survey must include specific indicator questions that will be aggregated for the World Bank Group's annual Corporate Scorecard. These questions are identified throughout the survey report.

The results in this year's Country Survey were compared to those in the Country Survey conducted in FY'12 (response rate is 54%, N=296). Data were weighted to reach the same stakeholder composition in two years, which allows for year comparisons. Stakeholder groups which were not present in both fiscal years were not included in the comparison. Respondents who belonged to the "other" stakeholder category were not included either. As a result, means of the FY'15 data and the total number of respondents in both years are slightly different from those of the original data reported in appendices A, B, C, D, E, G, and H. For the weighted stakeholder breakdown and year comparison results, please see appendix F (page 129).

### III. Demographics of the Sample

Few respondents from the office of the President, Prime Minister, office of a minister, office of parliamentarian, independent government institutions, and other organizations were included in the “Other” category. Note that there were no respondents from the trade unions and the judiciary branch.

## VI. Sectoral Importance and Effectiveness (continued)

### Drivers of Effectiveness

To determine the key drivers of respondents' ratings of the World Bank Group's overall effectiveness and ratings of its ability to help achieve development results in Sri Lanka, bivariate correlational analyses were conducted using respondents' ratings of the thirty two specific areas of effectiveness.

Correlational analyses, however, are not able to tell us exactly what is causing respondents' ratings of the World Bank Group's overall effectiveness or ratings of its ability to help achieve development results. Rather, these analyses tell us that as ratings of effectiveness in one area increase, respondents' ratings of the Bank Group's overall effectiveness increase, or as ratings of effectiveness in one area increase, ratings of the WBG's ability to help achieve development results increase. Thus, it can be inferred that respondents' perceptions of effectiveness in one specific area are related to, or drive, respondents' perceptions of the Bank Group's overall effectiveness or perceptions of the WBG's ability to help achieve development results.

- Overall Effectiveness: Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the Bank Group's overall effectiveness, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the Bank Group's overall effectiveness in Sri Lanka. The areas determined to be key drivers from these analyses were:
  - The WBG's effectiveness at environmental sustainability;
  - The WBG's effectiveness at anti corruption; and
  - The WBG's effectiveness at gender equity.
  
- Achieving Development Results: Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the WBG's ability to help achieve development results in Sri Lanka, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the WBG's ability to help achieve development results. The areas determined to be key drivers from these analyses were:
  - The WBG's effectiveness at energy;
  - The WBG's effectiveness at economic growth; and
  - The WBG's effectiveness at climate change.
