Informed Consent

My name is _____. I am from Subah-Belleh Associates (SBA). SBA is a company owned by Liberian. We have been asked by World Bank/Government of Liberia to conduct a baseline study for the Economic Empowerment of Adolescent Girls and Young Women (EPAG) training project. I want to ask for your help, so that I can understand how good the training is and how to make it better. But first I would like to find out a little bit about you and your family and your community.

I want to ask you questions about yourself and the problems that your family and your neighbours are really facing. We will take this information and put it together with information from all the other people we talk to. Then we will use this information to tell the government and the NGOs how to make this training better and what sort of help the people in Liberia really need.

Nobody will know your name. There is no way that anyone will know the answers that you give us. When we write the report, we will tell them only the answers. We promise never to give anyone your name or the names of any of the other people we talk to.

Please note that some of the questions may be asking for something about you, that you may not want to share with others. If you feel that you do not want to answer a particular question, you have the right to not answer it and we can move on. No matter what you decide about these questions, if you answer them or if you do not answer them, you will still get to take the training.

But I hope that you will answer the questions. I am asking these questions because we really, really need this information to make the training better and to help make your life better and your family's life better.

We only want to talk to you for about one hour. Do you agree for me to ask you questions?

____ - 1 yes [proceed to household pre-consent]

____ - 2 no [confirm and terminate interview]

Household Interview Pre-Consent

Following our interview with you, I will want to administer a separate questionnaire to the head of your household. This information will be merged with the information from your interview. As with your interview, there will be no way for anyone to link their responses back to your household.

May we go ahead?

____ - 1 yes

____ - 2 no
