ETHIOPIA: INVESTMENT CLIMATE SURVEY II

QUESTIONNAIRE FOR MANUFACTURING SECTOR ESTABLISHMENTS

26 June, 2006

ETHIOPIA INVESTMENT CLIMATE SURVEY - II

BACKGROUND AND OBJECTIVES: An earlier Firm Level Survey of Ethiopia was conducted through a collaborative effort of the World Bank and EDRI, Ministry of Trade and Industry, Ethiopian Export Promotion Agency, CSA, Ethiopian Chamber of Commerce, Ethiopian Private Industries Association, Ethiopian Investment Authority, Addis Ababa Women Entrepreneurs' Association, and UNIDO in 2002/03 period. Similar surveys have also been carried out in other developing countries. It is believed that a number of reform attempts have been done to encourage the performance of the private sector since the last survey. These include, tax reforms, streamlining business registration processes, investment in the power sector, etc. The current survey in Ethiopia is a follow-up data collection exercise to further look at the effects of past policy reforms on the business climate indicators that affect your performance and growth; identify the current microeconomic impediments and discuss policy options with the government in order to improve the investment climate in Ethiopia.

Thus, the general purpose of this survey, as it was for the previous survey and for all other surveys in developing countries undertaken with the assistance of the World Bank, is also to understand the investment climate in Ethiopia and how it affects business performance, with the objective of helping improve it. The survey will also be used to better understand conditions in the local investment climate and how they affect firm-level productivity. The goal is to advise government on ways to change policies that hinder private establishments like yours and to develop new policies and programs that support productivity growth. Your answers should reflect only your experience of doing business in your country. We will provide you with a summary report that will be directly useful to you in that it will enable you to benchmark your business and your industry against domestic and international competitors. Furthermore, the survey will provide useful information about the changes in investment climate of Ethiopia during the last few years and analyze the current investment climate in an international context; our experience in a wide range of countries is that this information can be crucial for improving the climate so that businesses can expand and their workers prosper.

GENERAL INSTRUCTIONS TO ENUMERATORS: Clearly explain to the respondent the objectives of the survey and the expected analytical outputs; Explain to him/her that the questionnaire in general consists of **15** sections as shown below. The sections generally deal with enterprise level data such as background information, production, investment, finance, labor, and capacity utilization, conflict resolution, infrastructure services, contract enforcement and productivity. These questions should be answered by the owner or managing director of the firm. If the owner/managing director is not available, try to make an appointment with him/her at a later date to conduct the interview. With the owners/managing director's permission, other well informed staff (e.g. the accountant) could also answer some parts of the questionnaire.

IT IS IMPORTANT THAT YOU STRESS THE REASONS FOR THIS INTERVIEW AND ITS CONFIDENTIALITY saying to the respondent that

We would like to stress that the information that you provided us for this survey is strictly confidential, and will remain so. When data is entered into computer, your firm will only be identified by a code number, and no information that may identify your firm or the respondent (such as name of firm and respondent, address and telephone number) will not be added, or be used in any document based on this survey. We therefore like to get a correct information for each applicable question as that helps us get a clear understanding of the current business climate in Ethiopia, and will enable policy makers identify the priority areas of concern by the business community and remove the constraints so that businesses can flourish and become more competitive.

Please state all monetary values in **Ethiopian Birr**, unless otherwise noted. More generally, the enumerator should ensure that the unit of measurement is clearly recorded at all times and consistent throughout the survey. Also, unless noted otherwise, last fiscal year refers to FY 2004/05 [i.e. **1997 EFY**].
