

**....Dear Household**

**We shall entrust you with a ledger to record your daily expenditures for 10 days as of the day you received the ledger which includes**

- 1 -Your daily expenditures on food goods, drinks, cigarettes, ready made food orders, whether eaten inside the house or at the restaurant or at the coffee shop
- 2 Your expenditures on some of the non-food items and services that has the :characteristic of repetitiveness...which are
  - Fuel (Benzene), all kinds, for Generators and Private Cars
  - The land transport service within Province or among Provinces
  - Newspapers and Magazines
- 3 Two pages have been allocated to record your daily spending each of the 10 days separately
- 4 -In case the household consumed a certain commodity that has been self produced such as produced rice or milk, the household will record only the quantity actually consumed, not the entire production, after converting the non-standard or local units (e.g. Mug, Cup...) to Kilograms, and write the value of this quantity that the household would have to pay if they were to .buy that product
- 5 There are some goods that the household will have from the goods exchange operations such as one household giving flour and getting in return tomatoes from another household. Record the amount of tomatoes you got and current market price you would have paid
- 6 If the household bought a commodity by debts during the 10 days. Record the value of purchase as a whole within the household spending records, as soon as the commodity is attained
- 7 Do not record in the spending ledger good or services for production reasons such as spending on fuel for a taxi car (to work on) or fuel for machineries and pumps working at farms. Just record the quantity and value of fuel used for household purposes

**Your giving us the correct and accurate information will help the planners and policy makers to make the right and correct decisions to elevate the standards of your living and reduce poverty in Iraq**
