

REPRODUCTIVE HEALTH SURVEY – Paraguay 2008

The files of the Reproductive Health Survey of Paraguay 2008 are in the following structure of directories and files:

| Paraguay 2008 | | | |
|--------------------------|---|------------------------|--|
| ..\Females | | | |
| ..\Final_Report | PARAGUAY-2008 - ENCUESTA NACIONAL DE DEMOGRAFIA Y SALUD SEXUAL Y REPRODUCTIVA.pdf | | Contains the final report in PDF format |
| ..\Questionnaires | Cuestionario_Paraguay 2008_Nombre de variables.pdf | | Contains the household and the individual questionnaires in PDF format, and includes variable names for all variables in the questionnaires. |
| ..\SAS | ..\Data | py08f_creadas.sas7bdat | This file is a SAS dataset and contains all questionnaire variables and created variables. This files has: 6540 women of reproductive age (WRA 15-44 years) with completed interview. (RESULT=1) |
| | | py08f_hijos.sas7bdat | SAS dataset that contains one record for each live birth, in the births history. This file has: 11638 live births |
| | ..\Formats | formats.sas7bcac | This is the SAS catalog of formats |
| ..\Sasprogs | \File_creation | py08f_creadas.sas | This SAS syntax file contains the definitions of new variables based on variables in the questionnaire. This file contains the following variables that are needed to weight the data: <i>PESOENT - defines the relative weights assigned for each stratum in the sample.</i> <i>PESOMEF - weight variable that should be used in all calculations for women with a completed interview, which takes into account the strata weight and the number of women of reproductive age in the household (only one woman 15-44 was selected per household).</i> |

PESOHJO - another weight variable to be used for analyses on variables collected for just one randomly selected child under 5 (**Use in questions 455 thru 491 in the questionnaire**). Using this weight gives results that are representative of all children under 5 (it compensates for unequal probabilities of selection).

| | | |
|----------|---------------------|---|
| | py08f_haga_hijo.sas | This is a SAS syntax file that reads from “py08f_creadas.sas7bdat” and creates the SAS dataset “py08f_hijos.sas7bdat”, which contains one record for each live birth in the births history. |
| | setlib.sas | This SAS syntax file defines the directories in which the SAS datasets and format library are located. (users must change the path according to their own structure) |
| ..\SPSS | py08f_creadas.sav | Contains the data for women in SPSS format |
| | py08f_hijos.sav | Contains the data for live births in SPSS format |
| ..\STATA | py08f_creadas.dta | Contains the data for women in STATA format |
| | py08f_hijos.dta | Contains the data for live births in STATA format |
