	reference_require	Job Talash is collecting references to support the applications of its subscribers. References are people, such as supervisors, who can testify about your character, skills and abilities. These checks serve as an indicator of your performance to your potential employer. We will call your referee, confirm your information and then share with the employers. For example, for work related reference, a referee could be your boss or supervisor, or for educational reference a referee could be your teacher or professor. Please note that the reference should be someone who supervised your work, will remember you and can speak about your performance on the job.
