INTRODUCTION

Dear Director/Coordinator in charge of the project at the center,

Thank you very much for your valuable contribution.

As we informed you at the beginning of this project, the research team will conduct a study to evaluate the effectiveness of this intervention. This is extremely important to understand whether it may be beneficial to expand this program in the future or whether resources should be allocated to other interventions.

To evaluate the impact of the intervention, we are asking you and the 3rd grade mathematics teachers to complete a brief survey. We understand that this is an extremely busy period and there are many demands on your time. However, your input is crucial to find out if this intervention has made a difference in the academic performance of your students. We sincerely hope that you will help us by responding to this brief survey and encouraging the teachers we will be contacting to do the same.

Upon completion of the data analysis, we will be happy to share with you a report with the aggregate findings of our study, if requested.

When completing the survey, please note that there are no right or wrong answers. The purpose is solely to learn about your experience. Your responses will NOT be communicated to anyone. They will be used solely for research analysis and will be presented in aggregate form, along with the responses of principals/teachers from other schools. Therefore, it is very important that you answer honestly.

Thank you very much in advance for your cooperation.

Kind regards,

Carolina Lopez and Astrid Pineda
