

Zambia 2002 General School Questionnaire Data Use Guide

**Using the Expenditure and Service Delivery Survey :
Education Sector Data Set**

Introduction

The Zambia Expenditure and Service Delivery Survey (ESDS) data set is a survey carried out in 2002 in 182 primary schools (Grades 1-7) and basic schools (grades 1-9) in 33 districts. It describes and analyzes resource flows to these schools from three sources: rule-based funding from the center, discretionary funding from district and provincial education offices, and household spending on education.

The objective of this study was to investigate the different resource flows in the financing of the public primary education sector.

Using the Education Sector Data Files

The Zambia data set is composed of 10 distinct questionnaires and 13 datasets. Among which headteacher1, headteacher2 and headteacher_matching use the HeadTeacher questionnaire; PEO_PartII (section 1,3, 4 and 5) and PEO_districts (section 2 and section 6) use the same PEO Part II questionnaire.
