Data Cleaning Report

March 17th, 2021

Item	Response	Notes
Codes for missing observations in dataset	.	(dot)
Record of any corrections made	Data cleaning was performed on this dataset. Duplicates of identifiers and other minor data entry errors have been corrected for. All variables and value labels have been constructed.	
Process of de-identification	Variables including school name, student name, enumerator name, contact numbers, locations, etc. that are not relevant to this submission have been removed. The ID variable was constructed by grouping school code and the student ID in order to uniquely identify each observation. The original student ID variable has been dropped due to it's link with the SABER data and potential to link personal information of respondents.	

Official Use Only
