STUDY TYPE
Administrative Records, Health (ad/hea]

ABSTRACT
Collected data from the South India Community Health Study (SICHS), which covers a rural population of 1.1 million individuals residing in Vellore district in Tamil Nadu. The study includes a census of all 298,000 households drawn from 57 castes and a detailed survey of 5,000 representative households. The census, completed in 2014, provides a comprehensive demographic and socioeconomic profile of the study area. The household survey, conducted in 2016, collected information on marriage patterns, including within-caste marriage, close-kin marriage, arranged marriage, and migration of spouses between villages.

The SICHS was designed to examine a variety of socioeconomic phenomena and health problems, including the treatment of tuberculosis. The study area thus comprises three Tuberculosis Units (TU's) within Vellore district that were purposefully selected to be representative of rural South India.

Scope

NOTES
SICHS provides a rich dataset on demographics, socioeconomic status, marriage patterns in rural Tamil Nadu. It enables detailed caste-based and economic analyses on social behaviors and long-term wealth indicators

Coverage

GEOGRAPHIC COVERAGE

Vellore district, Tamil Nadu, India.

UNIVERSE

Rural population of 1.1 million individuals in Vellore district, Tamil Nadu.

Sampling

SAMPLING PROCEDURE

South India Community Health Study (SICHS) has two components:

A census of all 298,000 households drawn from 57 castes residing on the study area, completed in 2014.
A detailed survey of 5,000 representative households, completed in 2016.

The sampling frame for the household survey included all ever-married men aged 25-60 in the SICHS census plus (a small number of) divorced or widowed women with “missing” husbands who would have been aged 25-60, based on the average age-gap between husbands and wives. The sample was subsequently drawn to be representative of each caste in the study area, excluding castes with less than 100 households in the census.
