ABSTRACT

As part of the Adaptive Safety Net Project, the Government of Niger (with support from the World Bank and the Sahel Adaptive Social Protection Program) launched the implementation of productive inclusion measures to foster more productive livelihoods and improve resilience of cash transfer beneficiary households.

This deposit includes data from individual-level surveys (intervention timepoint and endline timepoint) and administrative data from an embedded experiment on single-session agency interventions within the Full and Psychosocial arms of the trial reported in the following paper: Bossuroy, Thomas; Goldstein, Markus; Karimou, Bassirou; Karlan, Dean; Kazianga, Harounan; Pariente, William; Premand, Patrick; Thomas, Catherine; Udry, Christopher; Vaillant, Julia; Wright, Kelsey. 2022. "Tackling Psychosocial and Capital Constraints Opens Pathways out of Poverty". It also includes ancillary data with predictions from a U.S. sample on women's models of agency in Niger. These two datasets are published along with the related paper: Thomas, C.C., Premand, P., Bossuroy, T., Sambo, A. S., Markus, H.R., & Walton, G.W. 2025. "How Culturally Wise Interventions Can Help Reduce Poverty."

Coverage

GEOGRAPHIC COVERAGE

The study focuses on a sub-sample of communes in all five regions chosen for the second phase of the Niger Adaptive Safety Net project (Dosso, Maradi, Tahoua, Tillabery, and Zinder). 6 communes were selected for the study, covering 33 villages across the 5 regions where cash transfer beneficiaries were eligible to receive complementary productive inclusion measures. In each sample village, approximately 80 households were included in this experiment.

Sampling

SAMPLING PROCEDURE

Cash transfer beneficiary households were chosen by either proxy means testing, community-based targeting, and a formula to proxy temporary food insecurity (as described in Premand and Schnitzer, 2021). Cash transfer beneficiary households were later assigned to either a control group or 3 productive inclusion treatment arms. All three treatment arms include a core package of group savings promotion, coaching, and entrepreneurship training, in addition to the regular cash transfers from the national program. The first variant also includes a lump-sum cash grant ("capital" package). The second variant substitutes the cash grant with psychosocial interventions ("psychosocial" package). The third variant includes the cash grant and the psychosocial interventions ("full" package). The control group only receives the regular cash transfers from the national program. For details on this main trial, see Bossuroy et al. (2022).

For the experiment on single-session agency interventions that was embedded within the main program, the sample included all program participants in a non-random subset of 33 villages in 6 communes ($n = 2,628$). Randomization was stratified by the timing of the delivery of the multi-faceted program described above (Early: February-March / Late: April), the main trial treatment arm (Full or Psychosocial), and participation in the main trial baseline survey (Yes/No). Randomization occurred at the individual level. The study was powered for a minimum detectable effect (MDE) size between each of the psychosocial interventions and the control condition of Cohen's d of 0.14 and the psychosocial interventions (pooled) and the control condition of Cohen's d of 0.11, with 80% power using a two-tailed independent samples t -test at $\alpha = .05$. This target MDE required $n = 613$ for each of the two psychosocial intervention arms and 1,192 for the control arm. Assuming a rate of 8% for attrition, our target sample size was $n = 2,628$ ($n = 1,296$ for the control condition and $n = 666$ for each of the treatment conditions).

For the ancillary data containing predictions from a U.S. sample, we recruited 302 respondents based in the U.S. from CloudResearch's MTurk Toolkit platform to take a descriptive survey.

RESPONSE RATE

The original sample for the embedded experiment included 2628 households, of which 2,493 participated in the endline survey (94.9%). Of the 1,332 randomized to one of the two intervention conditions, 1,276 participated in the intervention.

DATA COLLECTION MODE

Face-to-face [f2f]

SUPERVISION

Data collection was supervised by field coordinators from Sahel Consulting, and the co-authors. The supervision team also worked in collaboration with the safety nets unit. Thorough quality control procedures were put in place, with systematic verifications of questionnaires by enumerators and supervisors. Additional verifications, including household visits, were undertaken by the coordination and quality control teams continuously over the full survey period.

DATA COLLECTION NOTES

Data used in this study was collected using Android tablets and the SurveyCTO Platform developed by Doherty, Inc, versions 2.0 - 2.6.

Questionnaires

QUESTIONNAIRES

Household surveys were collected in 2 survey rounds as described above. See Thomas et al. (2025) and attached codebooks for details. All materials were translated to French and then to local languages, Zarma and Hausa. It was delivered aloud in the preferred language of the respondent. French was the primary language of material development; wording in English in this questionnaire is approximate. The English versions of the questionnaires are available for download, as well as instruments from SurveyCTO in French.

V454	cd1_r	Feeling Bothered by Daily Life in the Last 7 Days (reversed)	I will now ask you about how you have felt over the last seven days. Please think about the last 7 days. I will ask you questions about how you have felt during this time. For each question, you will tell me how many days you felt like that during the last 7 days. Please note that the answers you give will be treated confidentially. Okay? We will use the rocks to represent the number of days. If you put all the rocks (put 7 rocks), it means that it happens every day. If it happened four times during the last week, we can put 4 rocks. If it's never, we put nothing (no rock). For example, if you ask me how many days in the last week I'm in a car, I'll say 4 days, so I put 4 rocks. Another example: if you ask me how many days in the last week I went looking for water, I will answer every day, so I put all 7 rocks. Finally, if you ask me how many days during the last week I have been working in the fields, I will never answer, so I do not put any rock. Can we start? Tell me, in the last seven days, how many days did you feel that: The details of daily life bothered you more than usual.

At the bottom are the people with the lowest status who have the least money, the least education and the activities / jobs that are least respected or who do not have a job / activity. The higher you are on this staircase, the closer you are to the people at the top. The lower you are, the closer you are to people who are at their lowest. And you, can you point me to what stair step you are these days?
V477	stair_respect	Self-evaluation of Respect on Ladder	Now, the staircase is how much you are a respected person in the community. At the top (pointer) there are the most respected people, like the village chief and religious leaders, and down (point) there are the least respected people, such as the excluded. Can you point me to what stair step you are on these days?
V478	stair_good_today	Self-evaluation of Goodness on Ladder	Can you point me to what step of the stairs you are on?

LITERAL QUESTION

You are invited to participate in a research study on the perspectives and perspectives of people living in rural areas of Niger. This study is conducted by a research team at Stanford University in the United States who is studying development. You will be asked to participate in an interview. You will be asked questions about your perspective on development, your economic activities, your home and community, and your hopes and thoughts about the future . Your participation will take about 45 minutes. The risks associated with the research study are the discomfort to answer certain questions. The benefits that can reasonably be expected from this study are to understand the needs and goals of this community and to improve development programs. We do not guarantee you will receive benefits from this study. Please, understand that your participation is voluntary . If we start and want to stop because you are uncomfortable or for some other reason, we can stop. Also, you may refuse to answer a question if you feel uncomfortable. Your participation in this study will not affect your participation in the social safety net program or other forms of assistance You have the right to stop participating at any time without penalty, without any negative consequences. Your privacy and the confidentiality of the information you provide will be retained in all published and written data resulting from the study. If you complete the interview, but later decide that you do not want us to use your answers, you can let us know and we will delete your answers. If you share your phone number, we can come back to make sure you were the one who was interviewed instead of someone else by mistake.

I will provide you with my contact information if you have any questions about this study or any other question. The page I give you has the coordinates of Stanford Institutional Review Board (IRB) if you have questions about your rights as a participant. Locally, you can also contact Sahel Consulting Group at adamousalim@yahoo.fr or + 227 92 51 86 29 who can contact Stanford IRB on your behalf and answer any questions you may have regarding this study. To participate in the study, one must be available for the next 45 minutes without interruption. Do you agree to participate in the study? Questions: If you have any questions, concerns or complaints about this study, its procedures, risks and benefits, you can contact the Protocol Manager, Catherine Thomas at +1 (601) 750- 1960. Locally, you can also contact Sahel Consulting group at adamousalim@yahoo.fr or + 227 92 51 86 29 who can answer any questions you may have about this study and help you contact the Stanford IRB. LITERAL QUESTION

I will now ask you about how you have felt over the last seven days. Please think about the last 7 days. I will ask you questions about how you have felt during this time. For each question, you will tell me how many days you felt like that during the last 7 days. Please note that the answers you give will be treated confidentially. Okay? We will use the rocks to represent the number of days. If you put all the rocks (put 7 rocks), it means that it happens every day. If it happened four times during the last week, we can put 4 rocks. If it's never, we put nothing (no rock). For example, if you ask me how many days in the last week I'm in a car, I'll say 4 days, so I put 4 rocks. Another example: if you ask me how many days in the last week I went looking for water, I will answer every day, so I put all 7 rocks. Finally, if you ask me how many days during the last week I have been working in the fields, I will never answer, so I do not put any rock. Can we start? Tell me, in the last seven days, how many days did you feel that: The details of daily life bothered you more than usual.

LITERAL QUESTION

You are invited to participate in a research study on the perspectives and perspectives of people living in rural areas of Niger. This study is conducted by a research team at Stanford University in the United States that studies development. You will be asked to participate in an interview. You will be asked questions about your perspective on development, your economic activities, your home and community, and your hopes and thoughts about the future. With your permission, the chat can be recorded with the audio. These records will be transcribed for data analysis purposes and destroyed after completion of the study. Your participation will take about 1.5 hours. The risks associated with the research study are the discomfort to answer certain questions. The benefits that can reasonably be expected from this study are to understand the needs and goals of this community and to improve development programs. We do not guarantee you will receive benefits from this study. Please, understand that your participation is voluntary. If we start and want to stop because you are uncomfortable or for some other reason, we can stop. Also, you may refuse to answer a question if you feel uncomfortable. Your participation in this study will not affect your participation in the social safety net program or other forms of assistance. You have the right to stop participating at any time without penalty, without any negative consequences. Your privacy and the confidentiality of the information you provide will be retained in all published and written data resulting from the study. If you complete the interview, but later decide that you do not want us to use your answers, you can let us know and we will delete your answers. If you share your phone number, we can come back to make sure you were the one who was interviewed instead of someone else by mistake. I will provide you with my contact information if you have any questions about this study or any other question. The page I give you has the Stanford Institutional Review Board (IRB) contact information if you have questions about your rights as a participant. Locally, you can also contact Sahel Consulting group at adamousalim@yahoo.fr or + 227 92 51 86 29 who can contact the Stanford IRB on your behalf and answer any questions you may have about this study. To participate in the study, one must be available for the next 1.5 hours without interruption. Do you agree to participate in the study? Questions: If you have any questions, concerns or complaints about this study, its procedures, risks and benefits, you can contact the Protocol Director, Catherine Thomas at +1 (601) 750-1960. Locally, you can also contact Sahel Consulting group at adamousalim@yahoo.fr or + 227 92 51 86 29 who can answer any questions you may have regarding this study and help you contact the Stanford IRB. Independent Contact: If you are not satisfied with the way this study is conducted, or if you have any concerns, complaints or general research questions or your rights as a participant, please contact the Stanford Institutional Review Board (IRB). Someone independent from the research team at +1 (650) 723-2480. You can also write to the Stanford IRB, Stanford University, 3000 El Camino Real, five Palo Alto Square, 4th Floor, Palo Alto, CA 94306. Does the respondent consent?

Questions and instructions

LITERAL QUESTION

Q7.1 What alternative strategies could you take if you encounter these two obstacles? Let's start with the first obstacle you identified: (INSERT OBSTACLE 1 HERE). What is one strategy you could use to overcome this obstacle? We want to fill in the sentence: "If I meet this obstacle of (INSERT OBSTACLE 1 HERE), I will (INSERT STRATEGY TO OVERCOME OBSTACLE 1 HERE)." Thus, to summarize, "If I meet this obstacle of (INSERT OBSTACLE 1 HERE), I will (INSERT STRATEGY TO OVERCOME OBSTACLE 1 HERE)." (For example, what new products could you buy, how can you be persistent, what new information might you be looking for that others do not know?)
