STUDY TYPE

Agricultural Survey [ag/oth]

ABSTRACT

The Food and Agriculture Organization of the United Nations has developed a monitoring system in 26 food crisis countries to better understand the impacts of various shocks on agricultural livelihoods, food security and local value chains. The Monitoring System consists of primary data collected from households on a periodic basis. The survey was conducted in 13 prioritized departments of the country: Antioquia, Arauca, Atlántico, Bolívar, Boyacá, Cesar, Chocó, Córdoba, La Guajira, Magdalena, Nariño, Putumayo and Sucre. Data were collected through computer-assisted telephone interviews applied to a panel of informants corresponding to the third monitoring round (July 2022) and face-to-face interviews covering a sample of the panel. The final sample consisted of 4390 rural household surveys.

For more information, see <https://data-in-emergencies.fao.org/pages/monitoring>.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

Households

Scope

NOTES

The survey collected information on:

- HOUSEHOLD: household information
- INCOME SOURCES, SHOCKS: income changes, shocks experienced by households
- CROP PRODUCTION: crops planted, area planted, area harvested, crop production difficulties
- CROP MARKETING: crop sale difficulties, crop sale price
- LIVESTOCK PRODUCTION: types of livestock present on holding, number of livestock, livestock production difficulties
- LIVESTOCK MARKETING: livestock sale, livestock sale difficulties, livestock sale price
- FISHERIES PRODUCTION: fish activity, comparison of fish production
- FISHERIES MARKETING: fish sale, fish sale difficulties, fish sale price
- FOOD SECURITY AND CONSUMPTION: food consumption, food utilization, coping strategies
- NEEDS ASSISTANCE: open questions on the needs for assistance

Sampling

SAMPLING PROCEDURE

The survey was conducted in 13 prioritized departments of the country: Antioquia, Arauca, Atlántico, Bolívar, Boyacá, Cesar, Chocó, Córdoba, La Guajira, Magdalena, Nariño, Putumayo and Sucre. The final sample consisted of 4 390 rural household surveys in the 13 prioritized departments.

Surveys are designed based on country-specific needs, objectives, and constraints. The sample design ensures a 10 percent margin of error and a 95 percent confidence level at the target administrative level, and aims to achieve these precision levels for key variables within the targeted populations, including agricultural households.

WEIGHTING

Data were weighted by demographics (based on the total population per stratum) and a wealth proxy (access to drinkable water) at administrative level 1.

DATA COLLECTION MODE

Computer Assisted Telephone Interview [cati]

DATA COLLECTION NOTES

Data were collected through computer-assisted telephone interviews applied to a panel of informants corresponding to the third monitoring round (July 2022) and face-to-face interviews covering a sample of the panel.

data_processing

DATA EDITING

The datasets have been edited and processed for analysis by the Data in Emergencies Hub (DIEM) team at the Office of Emergencies and Resilience, FAO, with some dashboards and visualizations produced. For more information, see

<https://data-in-emergencies.fao.org/pages/countries>.

STATISTICAL DISCLOSURE CONTROL (SDC)

The dataset was anonymized by the Food and Agriculture Organization of the United Nations, Data in Emergencies (DIEM) Hub and reviewed by the Statistics Division, using Statistical Disclosure methods in accordance with FAO Corporate Statistical Disclosure Control Protocol. All direct identifiers have been removed prior to data submission. For more information, see

<https://openknowledge.fao.org/server/api/core/bitstreams/833ee200-0484-4f87-8f5c-b3fed4a3722b/content>.

CONFIDENTIALITY

The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO.

ACCESS CONDITIONS

Micro datasets disseminated by FAO shall only be allowed for research and statistical purposes. Any user which requests access working for a commercial company will not be granted access to any micro dataset regardless of their specified purpose. Users requesting access to any datasets must agree to the following minimal conditions:

- The micro dataset will only be used for statistical and/or research purposes;
- Any results derived from the micro dataset will be used solely for reporting aggregated information, and not for any specific individual entities or data subjects;
- The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO;
- The micro dataset cannot be re-disseminated by users or shared with anyone other than the individuals that are granted access to the micro dataset by FAO.
