STUDY TYPE

Other Household Survey [hh/oth]

SERIES INFORMATION

Multi-Tier Framework (MTF)

ABSTRACT

The Burundi Multi-Tier Framework (MTF) survey conducted in 2021 provides comprehensive multidimensional baseline data for Burundi's energy sector. Moving beyond binary metrics, the MTF utilizes seven electricity and six cooking attributes to categorize energy access across a six-tier spectrum, ranging from Tier 0 (no access) to Tier 5 (full access). By disaggregating findings by location, socioeconomic status, and gender, the report serves as a roadmap for prioritizing policy reforms, targeted investments, and the integration of modern cooking services into national electrification strategies.

KIND OF DATA

Sample survey data [ssd]

UNIT OF ANALYSIS

- Household

Version

VERSION DESCRIPTION

Version 01: Anonymous raw dataset for public distribution.

Scope

NOTES

The survey covers the following topics:

- Identification of households
- Household characteristics
- Supply and demand of electricity
- Willingness to pay for a grid connection
- Willingness to pay for solar devices
- Household assets – electrical appliances
- Lighting sources
- Use of cooking solutions
- Household fuel consumption
- Space and water heating
- Willingness to pay for an improved cookstove
- Time use
- Health impacts

- Household economic shocks
- Consumption/ expenditure
- Household landownership and other assets
- Attitudes
- Women's empowerment
