## Identification

### SURVEY ID NUMBER

HND\_2024\_DIEM-HS-R2\_v01\_M\_v01\_A\_ESS

### TITLE

Data in Emergencies Monitoring System - Household Survey 2024

### SUBTITLE

Round 2

### ABBREVIATION OR ACRONYM

DIEM-HS-R2 2024

### COUNTRY/ECONOMY

| Name     | Country code |
|----------|--------------|
| Honduras | HND          |

### STUDY TYPE

Agricultural Survey [ag/oth]

### ABSTRACT

The Food and Agriculture Organization of the United Nations (FAO) has developed a monitoring system in 26 food crisis countries to better understand the impacts of various shocks on agricultural livelihoods, food security and local value chains. The monitoring system consists of primary data collected from households on a periodic basis (more or less every four months, depending on seasonality). FAO launched a Round 2, computer assisted telephone interview survey on 4 January 2024 to assess the agricultural livelihoods and food security of the rural population in Honduras. Data collection continued until 2 February 2024. A total of 2700 households were interviewed (150 in each department) across the 18 departments of the country. Survey estimates are representative at the administrative level 1.

For more information, see <https://data-in-emergencies.fao.org/pages/monitoring>.

### KIND OF DATA

Sample survey data [ssd]

### UNIT OF ANALYSIS

Households

## Scope

### NOTES

The survey collected information on the following areas:

- HOUSEHOLD: household information
- INCOME SOURCES, SHOCKS: income changes, shocks experienced by households
- CROP PRODUCTION: crops planted, area planted, area harvested, crop production difficulties
- CROP MARKETING: crop sale difficulties, crop sale price
- LIVESTOCK PRODUCTION: types of livestock present on holding, number of livestock, livestock production difficulties
- LIVESTOCK MARKETING: livestock sale, livestock sale difficulties, livestock sale price
- FISHERIES PRODUCTION: fish activity, comparison of fish production
- FISHERIES MARKETING: fish sale, fish sale difficulties, fish sale price
- FOOD SECURITY AND CONSUMPTION: food consumption, food utilization, coping strategies
- NEEDS ASSISTANCE: open questions on the needs for assistance

| Food and Agriculture Organization of the United Nations, Special Fund for Emergency and Resilience Activities | SFERA        |

## Sampling

### SAMPLING PROCEDURE

Surveys are designed based on country-specific needs, objectives, and constraints. They aim to achieve a 10 percent margin of error and a 95 percent confidence level at the target administrative level (admin 1 level) for key variables within the targeted populations, including agricultural households. Specifically, a total of 2700 households were interviewed (150 in each department).

### WEIGHTING

Two types of weights were applied:

- Base weights, calculated using population counts at the first administrative level (ADM1), to correct for unequal probabilities of selection across regions
- Wealth weights, applied at the ADM1 level using access to flush toilets as a proxy for household wealth, to adjust for potential response bias linked to socioeconomic status

The final weight was obtained by multiplying the base weight and the wealth weight.

## Data collection

### DATES OF DATA COLLECTION

| Start      | End        |
|------------|------------|
| 2024-01-04 | 2024-02-02 |

### DATA COLLECTION MODE

Computer Assisted Telephone Interview [cati]

## questionnaires

### QUESTIONNAIRES

A link to the questionnaire has been provided in the documentations tab.

## data\_processing

### DATA EDITING

The datasets have been edited and processed for analysis by the Food and Agriculture Organization of the United Nations, Data in Emergencies (DIEM) Hub at the Office of Emergencies and Resilience, with some dashboards and visualizations produced. For more information, see <https://data-in-emergencies.fao.org/pages/countries>.

### \*\*STATISTICAL DISCLOSURE CONTROL (SDC)\*\*

The dataset was anonymized by the Food and Agriculture Organization of the United Nations, Data in Emergencies (DIEM) Hub and reviewed by the Statistics Division, using Statistical Disclosure methods in accordance with FAO Corporate Statistical Disclosure Control Protocol. All direct identifiers have been removed prior to data submission. For more information, see

<https://openknowledge.fao.org/server/api/core/bitstreams/833ee200-0484-4f87-8f5c-b3fed4a3722b/content>.

## Access policy

### CONTACTS

| Name                                                          | Affiliation                                             | Email                 | URL                  |

### CONFIDENTIALITY

The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO.

### ACCESS CONDITIONS

Micro datasets disseminated by FAO shall only be allowed for research and statistical purposes. Any user which requests access working for a commercial company will not be granted access to any micro dataset regardless of their specified purpose. Users requesting access to any datasets must agree to the following minimal conditions:

- The micro dataset will only be used for statistical and/or research purposes;
- Any results derived from the micro dataset will be used solely for reporting aggregated information, and not for any specific individual entities or data subjects;
- The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO;
- The micro dataset cannot be re-disseminated by users or shared with anyone other than the individuals that are granted access to the micro dataset by FAO.
