## Identification

### SURVEY ID NUMBER

PAK\_2024\_DIEM-HS-R6\_v01\_M\_v01\_A\_ESS

### TITLE

Data in Emergencies Monitoring System - Household Survey 2024

### SUBTITLE

Round 6

### ABBREVIATION OR ACRONYM

DIEM-HS-R6 2024

### COUNTRY/ECONOMY

Name	Country code
Pakistan	PAK

### STUDY TYPE

Agricultural Survey [ag/oth]

### ABSTRACT

The Food and Agriculture Organization of the United Nations (FAO) has developed a monitoring system in 26 food crisis countries to better understand the impacts of various shocks on agricultural livelihoods, food security and local value chains. The Monitoring System consists of primary data collected from households on a periodic basis (more or less every four months, depending on seasonality). FAO launched the sixth round of the DIEM-Monitoring household survey in Pakistan to assess rural agricultural livelihoods and food security. Data collection took place from 14 August to 4 September 2024. A total of 6292 households were surveyed across 24 rural districts in Sindh, Balochistan, and Khyber Pakhtunkhwa provinces. The sample was representative at the district level and was weighted using demographic data.

For more information, see <https://data-in-emergencies.fao.org/pages/monitoring>.

### KIND OF DATA

Sample survey data [ssd]

### UNIT OF ANALYSIS

Households

## Scope

### NOTES

The survey collected information on the following areas:

- HOUSEHOLD: household information
- INCOME SOURCES, SHOCKS: income changes, shocks experienced by households
- CROP PRODUCTION: crops planted, area planted, area harvested, crop production difficulties
- CROP MARKETING: crop sale difficulties, crop sale price
- LIVESTOCK PRODUCTION: types of livestock present on holding, number of livestock, livestock production difficulties
- LIVESTOCK MARKETING: livestock sale, livestock sale difficulties, livestock sale price
- FISHERIES PRODUCTION: fish activity, comparison of fish production
- FISHERIES MARKETING: fish sale, fish sale difficulties, fish sale price
- FOOD SECURITY AND CONSUMPTION: food consumption, food utilization, coping strategies
- NEEDS ASSISTANCE: open questions on the needs for assistance

## Coverage

### GEOGRAPHIC COVERAGE

National coverage

UNIVERSE

Entire population

## Sampling

### SAMPLING PROCEDURE

Surveys are designed based on country-specific needs, objectives, and constraints. They aim to achieve a 10 percent margin of error, a 95 percent confidence level, administrative-level granularity, and sufficient sample sizes for key target populations, including agricultural households.

The survey applied a stratified sampling design targeting 24 rural districts across Sindh, Balochistan, and Khyber Pakhtunkhwa provinces. The sampling was representative at the district level. Households were selected to capture variability across agricultural settings (e.g., irrigated, rainfed, desert zones) and types of livelihood engagement (crop, livestock, mixed, and non-agricultural).

### WEIGHTING

Weighting was applied using demographic information to ensure that results are representative of the rural populations within the selected districts. Adjustments considered key variables such as household size and structure to align the sample with population distributions. Weights allow for valid estimation of food security and livelihood indicators at the district level.

## Data collection

### DATES OF DATA COLLECTION

Start	End
2024-08-13	2024-09-24

### DATA COLLECTION MODE

Face-to-face paper [f2f]

## questionnaires

### QUESTIONNAIRES

A link to the questionnaire has been provided in the downloads tab.

## data\_processing

### DATA EDITING

The datasets have been edited and processed for analysis by the Food and Agriculture Organization of the United Nations, Data in Emergencies (DIEM) Hub at the Office of Emergencies and Resilience, with some dashboards and visualizations produced. For more information, see <https://data-in-emergencies.fao.org/pages/countries>.

### \*\*STATISTICAL DISCLOSURE CONTROL (SDC)\*\*

The dataset was anonymized by the Food and Agriculture Organization of the United Nations, Data in Emergencies (DIEM) Hub and reviewed by the Statistics Division, using Statistical Disclosure methods in accordance with FAO Corporate Statistical Disclosure Control Protocol. All direct identifiers have been removed prior to data submission. For more information, see <https://openknowledge.fao.org/server/api/core/bitstreams/833ee200-0484-4f87-8f5c-b3fed4a3722b/content>.

## Access policy

### CONTACTS

Name	Affiliation	Email	URL

### CONFIDENTIALITY

The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO.

### ACCESS CONDITIONS

Micro datasets disseminated by FAO shall only be allowed for research and statistical purposes. Any user which requests access working for a commercial company will not be granted access to any micro dataset regardless of their specified purpose. Users requesting access to any datasets must agree to the following minimal conditions:

- The micro dataset will only be used for statistical and/or research purposes;
- Any results derived from the micro dataset will be used solely for reporting aggregated information, and not for any specific individual entities or data subjects;
- The users shall not take any action with the purpose of identifying any individual entity (i.e. person, household, enterprise, etc.) in the micro dataset(s). If such a disclosure is made inadvertently, no use will be made of the information, and it will be reported immediately to FAO;
- The micro dataset cannot be re-disseminated by users or shared with anyone other than the individuals that are granted access to the micro dataset by FAO.
