

South Africa - Attitudes of White South Africans Towards the Truth and Reconciliation Commission 1996

Gunnar Theissen - Free University of Berlin , Brandon Hamber - Centre for the Study of Violence and Reconciliation

Report generated on: May 5, 2014

Visit our data catalog at: <http://microdata.worldbank.org>

Sampling

Sampling Procedure

A random sample of adult (18+) white South African households with a telephone (1996: 89%) was derived from a complete set of the latest edition of official Telkom phone books. The "next-birthday-method" was used for intra-household respondent selection (the respondent in the household is selected randomly by interviewing that member of the household, whose birthday is next). Black, Indian and Coloured respondents were excluded through an introductory question.

Response Rate

A maximum of six contact attempts were made at different times to speak to the selected respondent. The response rate was 56 Percent. See Theissen (1997, Chapter 4) for further details.
