

Notes to users:

1. The data set provided contains 18 variables.
2. Users are cautioned that the following variables had a high percentage of cases where information was unspecified or unknown:
 - (a) Place of death, e.g. hospital, home, nursing home, etc. (14,3%)
 - (b) Population group (25,5%)
 - (c) Was the deceased a smoker? (54,0%)
 - (d) Was the deceased pregnant 42 days prior to death? (74,6%)

Some of these variables were also inconsistent with age and sex. Statistics South Africa hopes that provision of these variables will facilitate further analysis which can be used to improve the quality of these data.

3. Data on deaths is updated on a yearly basis to include additional death notification forms that are received by Stats SA after the publication of information for any specific year of death. In this data set, a variable, "PUBLISHED", was created to provide information on deaths that were published in 2006 and those published this year (2007). The deaths that were published in 2006 are given a value of 1 and those published in 2007 a value of 0.
