Domestic Tourism Survey 2011

The Domestic Tourism Survey 2011 data are in two files. The files are flat, ASCII, fixed field files, with one line of given length per record. This format was chosen so as to make the data usable with as many statistical programs as possible, and thus accessible to as wide a range of people as possible.

Users can also access, explore and download the microdata in various formats, i.e. SAS, SPSS, Stata, etc. as well as the metadata from StatsOnline at <u>www.statssa.gov.za</u> at a later stage. Other important information for users is found in the: Questionnaire Relevant publications Website (www.statssa.gov.za)

Description of variables

The description of the variables comprises the following information:

Descriptive name: This is a short English description plus the variable name in the original file used by Stats SA to construct the ASCII file.

Position of the variable: The position of the data within the record, recorded in the format (@xxx y.). '@xxx' indicates that the data begin at position (i.e. column) xxx and 'y' indicates that it is y digits wide. All data are numeric. All data are right justified.

Source: This is either the question in the questionnaire or, for derived variables, the method of derivation. Derived variables are usually found towards the end of a file.

Valid range: The range of valid values for the variable. For continuous variables this reflects the upper and lower limits as found in the data.

Not applicable: The code for 'not applicable' is provided for each variable. These are now numeric.

Missing value: A code for 'missing/unspecified' values is given for each variable.

Notes: Specific observations to be noted by users.

Most questions in the Domestic Tourism Survey questionnaire are pre-coded, i.e. there is a set number of choices from which one or more must be selected. For open-ended 'write-in' questions, the description will state that post-coding occurred and explain how this was done. Most variables have been pre-coded from the questionnaire and are not repeated in the variable description. Where the coding is not apparent, the description either provides the codes or indicates where code lists are to be found.

Linking files

The data from different files can be linked on the basis of a record identifier. The record identifier is the first field/s in each file. Each record contains a number (UqNr), which constitutes a unique household identifier. All records with a given unique household identifier, no matter which file they are in, belong to the same household. For individuals, a further two digits constitute the Person number (PersonNo). When used with the unique household identifier, a unique individual identifier is created. Again, these can be used to link records from the respective files

Methodology

Target population

The target population of the survey consists of all private households in all nine provinces of South Africa and residents in workers' hostels. The survey does not cover other collective living quarters such as students' hostels, old-age homes, hospitals, prisons and military barracks, and is therefore only representative of non-institutionalised and non-military persons or households in South Africa.

Sample design

The sample design for the DTS 2011 was based on a master sample (MS). The master sample used a two-stage, a stratified design with probability–proportional-to-size (PPS) sampling of PSUs from within strata, and systematic sampling of dwelling units (DUs) from the sampled primary sampling units (PSUs). A self-weighting design at provincial level was used and MS stratification was divided into two levels, primary and secondary stratification. Primary stratification was defined by metropolitan and non-metropolitan geographic area type. During secondary

Census enumeration areas (EAs) as delineated for Census 2001 formed the basis of the PSUs. The following additional rules were used:

Where possible, PSU sizes were kept between 100 and 500 dwelling units (DUs);

EAs with fewer than 25 DUs were excluded;

EAs with between 26 and 99 DUs were pooled to form larger PSUs and the criteria used was same settlement type; Virtual splits were applied to large PSUs: 500 to 999 split into two; 1 000 to 1 499 split into three; and 1 500 plus split into four PSUs; and

Informal PSUs were segmented.

A Randomised Probability Proportional to Size (RPPS) systematic sample of PSUs was drawn in each stratum, with the measure of size being the number of households in the PSU. Altogether approximately 3 080 PSUs were selected. In each selected PSU a systematic sample of dwelling units was drawn. The number of DUs selected per PSU varies from PSU to PSU and depends on the Inverse Sampling Ratios (ISR) of each PSU.

Allocating sample sizes to strata1

The randomised PPS systematic sampling method is described below. This procedure was applied independently within each design stratum.

Let N be the total number of PSUs in the stratum, and the number of PSUs to be selected from the stratum is denoted by n. Also, let x_i denote the size measure of the PSU i within the stratum, where i = 1, 2, 3, ..., N. Then, the method for selecting the sample of n PSUs with the Randomised PPS systematic sampling method can be described as follows: Step 1: Randomise the PSUs within the stratum

The list of N PSUs within the stratum can be randomised by generating uniform random between 0 and 1, and then by sorting the N PSUs in ascending or descending order of these random numbers. Once the PSUs have been randomised, we can generate permanent sequence numbers for the PSUs. Step 2: Define normalised measures of size for the PSUs

We denote by x_i the measure of size (MOS) of PSU i within the design stratum. Then, the measure of size for the

stratum is given by $X = \sum_{i=1}^{N} x_i$. We define the normalised size measure p_i of PSU i as

$$p_i = \frac{x_i}{X}$$
; $i = 1, 2, 3, --N$, where N_{is} is the total number of PSUs in the design stratum. Then, P_i is the

$$\sum_{i=1}^{N} p_i = 1$$

relative size of the PSU i in the stratum, and $\overline{i=1}$ for all strata. It should be noted that the value of $n \times p_i$, which is the selection probability of PSU i must be less than one.

Step 3: Obtain inverse sampling rates (ISRs)

Let R be the stratum inverse sampling rate (ISR). The stratum ISR is the same as the corresponding provincial ISR because of the proportional allocation within the province. It should also be noted that the proportional allocation within the province also results in a self-weighting design.

Then, the PSU inverse sampling rates (ISRs) are obtained as follows:

 $Z_{i} = n \times p_{i} \times R; i = 1, 2, 3, ---, N \sum_{i=1}^{N} Z_{i} = n \times R$ First, define N real numbers $Z_{i}; i = 1, 2, 3, ..., N$ to integer values $R_{i}; i = 1, 2, 3, ..., N$ such that each R_{i} is as close as possible to the corresponding Z_{i} value and the R_{i} values add up to $n \times R$ within the stratum. In other words, the sum of the absolute differences between the R_{i} and the corresponding Z_{i} values is minimised subject to the constraint that

¹ Source: Sample Selection and Rotation for the Redesigned South African Labour Force Survey by G. Hussain Choudhry, 2007.

the R_i values add up to $n \times R$ within the stratum. Drew, Choudhry and Gray (1978) provide a simple algorithm to obtain the integer R_i values as follows:

Let "d" be the difference between the value $n \times R$ and the sum $S = \sum_{i=1}^{N} [Z_i]$, where [.] is the integer function, then R_i values can be obtained by rounding up the "d" Z_i values with the largest fraction parts, and by rounding down the remaining (N-d) of them. It should be noted that the integer sizes R_i ; i = 1, 2, 3, ..., N are also the PSU inverse sampling rates (ISRs) for systematic sampling of dwelling units. Step 4: Obtain cumulative ISR values

We denote by C_i ; i = 1, 2, 3, ..., N the cumulative ISRs of the PSUs within the stratum. It should be noted that the PSUs within the stratum have been sorted according to the sequence numbers that were assigned after the randomisation. Then, the cumulative ISRs are defined as follows:

$$\begin{split} & C_1 = R_1, \\ & C_j = C_{(j-1)} + R_j; \quad j = 2, 3, ---, N. \end{split}$$

It should be noted that the value C_N will be equal to $n \times R$, which is also the total number of systematic samples of dwelling units that can be selected from the stratum.

Step 5: Generate an integer random number r between 1 and R, and compute n integers r_1, r_2, \dots, r_n as follows: $r_1 = r$

 $r_{2} = r_{1} + R$ $r_{3} = r_{2} + R$ \cdot \cdot $r_{i} = r_{(i-1)} + R$ \cdot \cdot $r_{n} = r_{(n-1)} + R.$

Step 6: Select *n* PSUs out of the *N* PSUs in the stratum with the labels (sequence numbers) number $i_1, i_2, ..., i_n$ such that:

$$\begin{split} & C_{i_1-1} < r_1 \leq C_{i_1} \\ & C_{i_2-1} < r_2 \leq C_{i_2} \\ & \cdot \\ & \cdot \\ & \cdot \end{split}$$

 $C_{i_n-1} < r_n \leq C_{i_n}.$

Then, the *n* PSUs with the labels i_1, i_2, \dots, i_n would get selected with probabilities proportional to size, and the selection probability of the PSU *i* will be given by R_i .

Sampling and the interpretation of the data

Caution must be exercised when interpreting the results of the DTS at low levels of dis-aggregation. Revisions to the DTS data sets based on the new population estimates involved benchmarking at national level in terms of age, sex and population group while at provincial level, benchmarking was by population group only. The sample and reporting are based on the provincial boundaries as defined in December 2005.

Coverage

The target population is private households in all nine provinces of South Africa, and residents in workers' hostels. The survey does not cover other collective living quarters such as students' hostels, old age homes, hospitals, prisons and military barracks.

Definitions of terms

A trip is a journey taken outside the usual environment of the household.

Day trip is trip on which the respondent or members of the household went for the trip and returned on the same day.

Overnight trip is a trip on which the respondent spent a day or more away from his or her usual environment.

Package trip is a trip in which two or more items are included (e.g. accommodation and transport).

Tourism includes all trips away from ones usual environment, not just holiday/leisure trips. It also includes trips related to business, visiting friends and/or relatives, medical/health, and religious journeys amongst others.

The usual environment is defined as all places within a 40 kilometres radius of the place of usual residence of the respondent, and all places that the respondent visits at least once a week (e.g. going to work), irrespective of the distance from their usual residence.

Period of reference is the beginning of January 2010 until December 2010.

Table A. Con	Table A: Contents of the D18 2011 questionnaire		
Section	Number of questions	Details of each section	
Cover page		Household information, response details, result codes, field staff information, etc.	
Background	16	Demographic information (name, sex, age, population group, education, tourism employment)	
Section 1	17	Domestic day trips taken by the respondent and/or other household members	
Section 2	24	Domestic overnight trips taken by respondent and/or other household members	
Section 3	16	Domestic day trips taken by other household members (without the respondent)	
Section 4	23	Domestic overnight trips taken by other household members (without the respondent)	
Section 5	2	Questions for the interviewer	
All sections	96	Comprehensive coverage of all aspects of domestic tourism and expenditure	

Table A: Contents of the DTS 2011 questionnaire

Table B: Response rates per province, DTS 2011

Province	Per cent
Western Cape	95,0
Eastern Cape	98,6
Northern Cape	97,2
Free State	95,6
KwaZulu-Natal	98,3
North West	98,1
Gauteng	76,6
Mpumalanga	97,8
Limpopo	98,9
South Africa	93,9

Data file: Daytrips

Data transformation for Section 1 and Section 3.

Note to users: The DTS questionnaire had two sections for the domestic day trips taken by the respondent and other household members without the respondent. Thus section 1(domestic day trips undertaken by the respondent alone or with other household members) and section 3 (domestic day trips undertaken by other household members without the respondent). The purpose of this split was to collect as many domestic day trips as possible from the households.

Therefore the combination of section 1 and section 3 formed one dataset for domestic day trips. Only variable names for section 1 have been retained since questions in both sections were the same.

Note that expenses (monetary values) in the data are expressed as averages. Thus amount spent on the trip by the number of household members who went on a trip.

The process followed to merge the two data sets:

If the trip in Section three was more recent than the trip in Section one the data values of Section three replace the data values of Section one. This comparison was not possible for cases with missing or out of range or invalid values for the trip dates. In those cases the trip details of section one are retained.

Unique number (UqNO)

Unique Household Identifier Note: This is the unique household identifier, which can be used to link data from this file with data for the same household from other files.

Person number (PersonNO)

Person (respondent) number within Household

Valid range: 01-26

Note: The two fields above (unique number and person number) create an 18-digit unique person identifier, which can be used to link a record from this file with another record for the same individuals from other files.

Province (**Pr_code**)

South African provinces Derived variable: Derived from the first digit of the Unique Number taking the December 2005 provincial boundaries into account.

Final code list

- 1 = Western Cape
- 2 = Eastern Cape
- 3 =Northern Cape
- 4 = Free State
- 5 = KwaZulu-Natal
- 6 =North West
- 7 = Gauteng
- 8 = Mpumalanga
- 9 = Limpopo

Stayed Nights (B_NIGHTS)

В	Has stayed here (in this household) for at least four nights on average per week during the last four weeks?
	1 = Yes 2 = No \rightarrow End of questions for this person

Note to users

(@22 1.)

(@1 18.)

(@19 2.)

(@21 1.)

This question is asked for each person found in the selected dwelling. Those who are not household members (those who haven't spent at least four nights per week) would be eliminated on the second category (2 = No). The instruction in this question is to end the interview with those who have answered 'No' in this question. It is through this question where household members are identified within the selected dwelling.

Universe

Every person who normally resides in this household for at least four nights per week.

Final code list

1 = Yes2 = No

Gender (C GENDER)

(@23 1.)

Gender (C_GENDER)			
С	Is a male or a female?		
	1= Male		
	2=Female		

Note to users

This question is asked for each household member, to determine his or her gender. This question, and all consequent questions, are applicable only if there is a 'Yes' answer in the previous question, which determines whether a person is a household member or not. The enumerators are instructed not to assume the gender of the members of the households by just looking at people's names or physical appearances.

Universe

Every person who normally resides in this household at least four nights per week.

Final code list

1 = Male

2 = Female

D	What is 's date of birth and
	age in completed years?

Note to users

This question is asked to find out the ages of the household members. The instruction is to write the years in whole numbers and not in words. Must record age at last birthday or age in completed years. Moreover, these years must be completed, thus if a person is two years and six months, the instruction is to write the two completed years. For infants under one year, the instruction is to write 000.

Universe

Every person who normally resides in this household at least four nights per week.

Final code list Day of birth (D_DAY) Valid range: 1- 31 99 = Unspecified	(@24	2.)
Month of birth (D_MONTH) Valid range: 1- 12 99 = Unspecified	(@26	2.)
Year of birth (D_YEAR) Valid range: 1901- 2011 9999 = Unspecified	(@28	4.)
Age (D_AGE)	(@32	3.)

Less than 1 year = 0 Valid range: 0 – 108 Unspecified: 999

Age group (Age_grp1)

Final code list 01 = 00 - 04 years 02 = 05 - 09 years 03 = 10 - 14 years 04 = 15 - 19 years 05 = 20 - 24 years 06 = 25 - 29 years 07 = 30 - 34 years 08 = 35 - 39 years 09 = 40 - 44 years 10 = 45 - 49 years 11 = 50 - 54 years 12 = 55 - 59 years 13 = 60-64 years 14 = 65 - 69 years 15 = 70 - 74 years 16 = 75 + years

Population group (E_POPULATION)

Е	What population group does belong to?
	1 = African/Black
	2 = Coloured
	3 = Indian/asian
	4 = White
	5 = Other

Note to users

This question is asked to determine the population group of persons from the selected dwelling. The respondent must answer for each member without any assumptions. In this instance the enumerator is also instructed not to make any conclusions which may be influenced by his observation or using people's names during the interview. This question may seem very sensitive to some respondents especially in this post-apartheid era, but it is really important to find out the composition of the South African population.

7

Universe

Every person who normally resides in this household at least four nights per week.

Final code list

- 1 = African/Black
- 2 =Coloured
- 3 = Indian/Asian
- 4 = White
- 5= Other

Marital status (F1_MARITALSTATUS)

F(i)	What is's present marital status? 1 = Married	
	1 = Married	
	2 = Living together like husba	and and wife
	3 = Widow/widower	go to G
	3 = Widow/widower 4 = Divorced or separated,	go to G
	5 = Never married	go to G

Note to users

(@38 1.)

(@37 1.)

(@35 2.)

P0352.1

This question is about the marital status of the members of the household. Both modern and traditional marriages are considered in this question. If the response is 'widow/widower', 'divorced or separated', or 'never married', the enumerator is instructed to go to Question G.

Universe

Every person who normally resides in this household for at least four nights per week.

Final code list

- 1 = Married
- 2 = Living together like husband and wife
- 3 = Widow/Widower
- 4 =Divorced or separated
- 5 = Never married
- 9 =Unspecified

Partner (F2_SPOUSEINHH)

F(ii)	Does's spouse/pa 1 = Yes	artner live in this household?
	2 = No	\rightarrow Go to G

Note to users

This question is to establish whether the househould members' spouses are part of the household. Both modern and traditional marriages are considered in this question. If the response is 'No' the enumerator is instructed to go to Question G.

Universe

This question is only applicable to those people who indicated that they are 'Married' or 'Living together like husband and wife' (F1).

Final code list

1 = Yes 2 = No 8 = Not applicable 9 = Unspecified

Spouse number (F3 WHICHSPOUSE)

spouse number (19_1/ mensi 005L)		
F(iii)	Which person is the spouse/partner of?	
	Give person number	

Note to users

This question seeks to find out which household member is married to which household member. Both modern and traditional marriages are considered in this question. The person number is recorded.

Universe

This question is only applicable to those people who indicated that they are 'Married' or 'Living together like husband and wife' (F1).

Final code list

Valid range: 1–32 88 = Not applicable 99 = Unspecified

Highest Grade (G_EDUCATION)

G	What is the highest level of education that
	has successfully completed?
	Diplomas or certificates must be of six months plus study
	duration full-time (or equivalent)to be included
	98 = No schooling
	00 = Grade R/00
	01 = Grade 1/ Sub A/Class 1

(@42 2.)

(@40

2.)

(@39 1.)

02 = Grade 2 / Sub B/Class 2
03 = Grade 3/Standard 1/ ABET 1(Kha Ri Gude, Sanli)
04 = Grade 4/ Standard 2
05 = Grade 5/ Standard 3/ ABET 2
06 = Grade 6/Standard 4
07 = Grade 7/Standard 5/ ABET 3
08 = Grade 8/Standard 6/Form 1
09 = Grade 9/Standard 7/Form 2/ ABET 4
10 = Grade 10/ Standard 8/ Form 3
11 = Grade 11/ Standard 9/ Form 4
12 = Grade 12/Standard 10/Form 5/Matric (No Exemption)
13 = Grade 12/Standard 10/Form 5/Matric (Exemption *)
14 = NTC 1/ N1/NC (V) Level 2
15 = NTC 2/ N2/ NC (V) Level 3
16 = NTC 3/ N3/NC (V)/Level 4
17 = N4/NTC 4
18 = N5/NTC 5
19 = N6/NTC 6
20 = Certificate with less than Grade 12/Std 10
21 = Diploma with less than Grade 12/Std 10
22 = Certificate with Grade 12/Std 10
23 = Diploma with Grade 12/Std 10
24 = Higher Diploma (Technikon)
25 = Post Higher Diploma (Technikon Masters, Doctoral)
26 = Bachelors Degree
27 = Bachelors Degree and post-graduate diploma
28 = Honours Degree
29 = Higher degree (Masters, Doctorate)
30 = Other (specify in the box below)
31 = Do not know

The interviewers are instructed to recognise qualifications that have already been completed and only diploma and certificates with duration of at least six months and more.

Universe

Every person who normally resides in this household for at least four nights per week.

Final code list

98 = No schooling 00 = Grade R/00 01 = Grade 1/ Sub A/Class 1 02 = Grade 2 / Sub B/Class 2 03 = Grade 3/Standard 1/ ABET 1(Kha Ri Gude, Sanli) 04 = Grade 4 / Standard 205 = Grade 5 / Standard 3 / ABET 206 = Grade 6/Standard 4 07 = Grade 7/Standard 5/ ABET 3 08 = Grade 8/Standard 6/Form 1 09 = Grade 9/Standard 7/Form 2/ ABET 4 10 = Grade 10/ Standard 8/ Form 311 = Grade 11/ Standard 9/ Form 4 12 = Grade 12/Standard 10/Form 5/Matric (No Exemption) 13 = Grade 12/Standard 10/Form 5/Matric (Exemption *) 14 = NTC 1/N1/NC (V) Level 2 15 = NTC 2/ N2/ NC (V) Level 3 16 = NTC 3/ N3/NC (V)/Level 4 17 = N4/NTC 4 18 = N5/NTC 5 19 = N6/NTC 6

Paid Work (H1a_PDWRK)

H.(i)a	During the last calendar week (Sunday to Saturday), did Work for a wage, salary, commission or any payment in kind (including paid domestic work), even if it was for only one hour? Examples: a regular job, contract, casual or piece work for pay, work in exchange for food or housing, paid domestic work. 1 = Yes 2 = No 3 = Do not know
--------	---

(@44 1.)

Note to users

This question is applicable to all household members aged 15 years and older, regarding their involvement in economic activities in the seven days prior to the interview. This is part of the questionnaire where there would be a differentiation between the economically active population and those who are not economically active. The instruction to enumerators was that they should consider those activities that lasted for at least an hour within the last seven days. In order to be certain that the categories had been answered, there should either be a 'Yes' or 'No' answer to all of them.

Universe

All members of the households in selected dwelling units aged 15 years and older who in the last week did any work for a wage, salary, commission or any payment in kind.

Final code list

- 1 = Yes
- 2 = No
- 3 = Do not know
- 9 = Unspecified

Own Business (H1b_OWNBUSNS)

H(i)b	During the last calendar week (Sunday to
	Saturday), did run or do any kind of
	business, big or small, for him/herself or with
	one or more partners, even if it was for only one
	hour?
	Examples: Commercial farming, selling things
	making things for sale, construction, repairing
	things, guarding cars, brewing beer, collecting
	wood or water for sale hairdressing, crèche,
	businesses, taxi or other transport businesses,
	having a legal or medical practice, performing
	in public, having a pubic phone shop, etc.
	1 = Yes
	2 = No
	3 = Do not know

(@45 1.)

This question is applicable to all household members aged 15 years and older, regarding their involvement in economic activities in the seven days prior to the interview. This is part of the questionnaire where there would be a differentiation between the economically active population and those who are not economically active. The instruction to enumerators was that they should consider those activities that lasted for at least an hour within the last seven days. In order to be certain that the categories had been answered, there should either be a 'Yes' or 'No' answer to all of them.

11

Universe

The purpose of the question is to find out about the final destination of the member(s) of the household. The member(s) of the household was asked to tick the Province and the District that was visited and write the place name of the town/s that was visited during the trip. The place names of the town/s are included in the final datasets but not in a coded format and were not standardised. Only spelling errors were corrected and released as it was received from the field. The updated codelist for placenames will be available after Census 2011. The next wave of this survey will released in a code format.

Purpose of trip (Q18mainp)

	· · · · · · · · · · · · · · · · · · ·
1.8	What was the main purpose of this trip?
	01 = Leisure/vacation/holiday
	02 = Shopping – business
	03 = Shopping - personal
	04 = Sporting – spectator
	05 = Sporting - participant
	06 = Visiting friends and/or family
	07 = Funeral
	08 = Business or professional trip
	09 = Business conference
	10 = Study/educational trip
	11 = Medical
	12 = Wellness (e.g. spa, health farm)
	13 = Religious
	14 = Other

Note to users

This question determines the main purpose of the trip in the absence of which the trip would not have been made or the given destination would not have been visited. A person may be travelling for a certain purpose on a trip, but find herself/himself also having undertaken certain businesses along the way or at the place of the destination. Example would be a person who attended a funeral service, but also having met a business partner to discuss some new business deals/ proposals on his way to the funeral, or having attended a party of some sort after the funeral. The business and the party may not be mentioned as reasons or some of the reason, but only the main reason, which is the funeral.

Data file: Overnight

Data transformation for Section 2 and Section 4.

Note to users: The DTS questionnaire had two sections for the domestic overnight trips taken by the respondent and other household members without the respondent. Thus section 2(domestic overnight trips by the respondent) and section 4 (domestic overnight trips by other household members without the respondent). The purpose of this split was to collect as many domestic overnight trips as possible from the households.

Therefore the combination of section 2 and section 4 formed one dataset for domestic overnight trips. Only variable names for section 2 have been retained since questions in both sections were the same.

Note that expenses (monetary values) in the data are expressed as averages. Thus amount spent on the trip by the number of household members who went on a trip.

The process followed to merge the two data sets:

If the trip in Section four was more recent than the trip in Section two the data values of Section four replace the data values of Section two. This comparison was not possible for cases with missing or out of range or invalid values for the trip dates. In those cases the trip details of section two are retained.

Unique number (UqNO) (@1 1	18.)
Unique Household Identifier Note: This is the unique household identifier, which can be used to link data from this file with data for the same household from other files.	

Person number (PersonNO)

Person (respondent) number within Household

Valid range: 1–26

Note: The two fields above (unique number and person number) create a 18-digit unique person identifier, which can be used to link a record from this file with another record for the same individuals from other files.

Province (Pr_code) (@21 1.) South African provinces Derived variable: Derived from the first digit of the Unique Number taking the December 2005 provincial boundaries

Derived variable: Derived from the first digit of the Unique Number taking the December 2005 provincial boundaries into account.

Stayed Nights (B_NIGHTS)

B Has stayed here (in this household) for at least four nights on average per week during the last four weeks?

(@22 1.)

(@19

2.)

32

1 = Yes	
2 = No	\rightarrow End of questions for this person

This question is asked for each person found in the selected dwelling. Those who are not household members (those who haven't spent at least four nights per week) would be eliminated on the second category (2 = No). The instruction in this question is to end the interview with those who have answered 'No' in this question. It is through this question where household members are identified within the selected dwelling.

Universe

Every person who normally resides in this household for at least four nights per week.

Final code list

1 = Yes

2 = No

Gender (C_GENDER)

С	Is a male or a female?
	1= Male
	2=Female

(@23 1.)

Note to users

This question is asked for each household member, to determine his or her gender. This question, and all consequent questions, are applicable only if there is a 'Yes' answer in the previous question, which determines whether a person is a household member or not. The enumerators are instructed not to assume the gender of the members of the households by just looking at people's names or physical appearances.

Universe

Every person who normally resides in this household at least four nights per week.

Final code list

1 = Male

2 = Female

	D What is 's date of birth and	
age in	completed years?	

Note to users

This question is asked to find out the ages of the household members. The instruction is to write the years in whole numbers and not in words. Must record age at last birthday or age in completed years. Moreover, these years must be completed, thus if a person is two years and six months, the instruction is to write the two completed years. For infants under one year, the instruction is to write 000.

Universe

Every person who normally resides in this household at least four nights per week.

Trip inside country (Q21AOVERNSA)

	During the months of January 2010 to December 2010, have you	
	taken any	overnight trips inside South Africa?
	1 = Yes	\rightarrow Go to 2.1b
	2 = No	\rightarrow Go to 2.2
	1	

Note to users

The purpose of the question is to find out whether the member(s) of the household did take an overnight trip, a trip whereby they spent at least one night or more inside the borders of South Africa. If the respondent(s) answered 'Yes', skip to Q 2.1b,

If the response is 'No" skip to Q 2.2

Universe

All members of the household by whether they took overnight trips

Final code list

1 = Yes 2= No

Number of overnight trips (Q21BOVERNSA)

2.1.b	How many overnight trips did you take inside South Africa from
	January 2010 to December 2010?

(@52 3.)

Note to users

The question seeks to find out the number of overnight trips the member(s) of the household spent in South Africa from beginning of January 2010 to the end of December 2010.

Universe

All members of the household who took overnight trips inside South Africa

Final result code

Month of trip

2.3	Can you tell me which month(s) these trips took	NUMBER
	place?	OF TRIPS

Record number of trips per month. If exact months are not known, help respondent to make rough estimates.	
1. January	
2. February	
3. March	
4. April	
5. May	
6. June	
7. July	
8. August	
9. September	
10. October	
11. Novermber	
12. December	
Total (Add 1-6 to confirm Total)	

The question seeks to find out the number of trips taken in each month or months from the month of January 2010 to December 2010. The instruction to the interviewer is to record the number of all trips taken.

Ĩ			
<u>Main tran</u>	usport (Q211Transp)	(@172	2.)
	What was the main type of transport used to reach the		
	nain destination?		
	his is the transport used for the longest part of the		
	ourney in terms of distance to reach the destination.		
_	= Aircraft = Bus		
-	= Car		
-	= Motorcycle/scooter		
	= Bicycle		
	= Taxi		
_	= Train		
8=	= Other, Specify		

Notes to the user

The purpose of the question is to find out the main transport that was used to travel to the destination. This should be the transport that covered most or longest part of the journey in kilometres, before reaching the destination. An example would be a situation where the family fly to a destination for a holiday, and then rent a car upon their arrival to travel to the hotel. In this case, the main type of transport would be an Aeroplane.

Trip b	ookings (Q214BOOK) (@187	1.)
2.14	How was the trip booked? Was it through	
	1 = A Tour operator	
	2 = A Travel gent	
	3 = Booked independently	
	4 = No booking necessary Go to 2.17	
	5 = Did not make booking myself, don't know Go to 2.17	

The aim of the question is to find out which methods the members of the household used to book their trip, if any bookings were necessary for their trip. The traveller (s) might make booked for himself/herself or used agents such as the Tour Operator who generally provides package trip for clients or Travel Agents who are intermediaries between the client and the Tour Operator and also deals with package deals to make the bookings for him or her. If the answer is option 4 or 5, then the interviewer is instructed to go to Q2.17 as a skip instruction.

Universe

To the members of the household who took overnight trip(s) in South Africa.

Final code list

- 1 = Tour operator
- 2 = Travel agent
- 3 = Booked independently
- 4 = No booking necessary
- 5 = Did not make booking myself, don't know
- 8 = Not applicable
- 9 = Unspecified

Methods of booking (Q215METHD)

2.15 What method was used to book? 1 = Personal visit to travel shop 2 = Entirely by telephone

- 3 = On the internet
- 4 = Through fax/ post
- 5 = Don't know

Notes to the user

The question seeks to find out the manner by which the member(s) of the household made their booking for the trip. That is if they went personally to the offices of Tour Operator or Travel Agents to make the bookings or whether they just made telephone calls, fax or through the internet for their travel arrangements.

Universe

To the member(s) of the household who took overnight trip(s) in South Africa and who made bookings for their trip.

Final code list

- 1 =Personal visit to travel shop
- 2 = Entirely by telephone
- 3 = On the internet
- 4 = through fax/ post
- 5 = Don't know
- 8 = Not applicable
- 9 =Unspecified

Period of booking (Q216DURATN)

2.16	How long before the trip was the booking
	made?
	1 = Under two weeks
	2 = Two to four weeks
	3 = One month
	4 = Two months
	5 = Three months

(@189 2.)

(@188 1.)

6 = Four months
6 = Four months 7 = Five months
8 = Six months or more
9 = Don't know

The aim of the question is to find out the time-frame in days and weeks, the period it has taken before the trip was confirmed i.e. the member(s) was informed that he/she has secured the booking for the trip.

Universe

To the member(s) of the household who took overnight trip(s) in South Africa and who made bookings for their trip.

Final code list

1 = Under two weeks

- 2 = Two to four weeks
- 3 = One month
- 4 =Two months
- 5 = Three months
- 6 = Four months
- 7 = Five months
- 8 =Six months or more
- 9 =Don't know

88=Not applicable

99 = Unspecified

Package trip (Q2171PACK)

(@191 1.)

2.17.1	expense items, such as transport and accommodation, included in an all-inclusive price)?	
	1 = Yes 2 = No 3 = Don't know	$ \rightarrow Go \text{ to } Q2.18 \rightarrow Go \text{ to } Q2.18 $

Notes to the user

The question wants to establish whether the trip was a package which included more than two expense item. This is a follow up question from the skip instruction in Q2.14 for the people who responded that they did not make the booking by themselves or did not know how their trip bookings were made. There is a skip instruction to go to Q2.18 if their last trip was not a package.

Universe

To the member(s) of the household who took overnight trip(s) in South Africa.

Final code list

- 1 = Yes
- 2 = No
- 3 = Do not know
- 8 = Not applicable
- 9 =Unspecified

Cost of package trip (Q2172COST)

2.17.2	How much did this package trip cost?	RANDS
	Give the total cost of the package of all	
	persons in the group.	

(@192 6.)

Notes to the user

This is the cost of the package trip referred to in Q2.17.1. The amount should be in Rand Value of the trip taken by the member(s) of the household who went on the trip. The interviewer must ensure that the specific cost allocated to each person is accounted for in the total package amount.

59

Universe

To the member(s) of the household who took overnight trip(s) in South Africa whose last trip was a package trip.

Final code list

Valid range: 0-237250 888888 = Not applicable 999999 = Unspecified

Included items in package

2.17.3	Please indicate which of the following items were included in the	INCLUDED		
	package.			Don't
		Yes	No	know
	1. Airfare			
	4. Land transport			
	3. Accommodation			
	4. Food and beverages			
	5. Recreation and entertainment (e.g. payments to a zoo etc)			
	6. Travel insurance			
	7. Shopping			
	8. Other, Specify			

Notes to the user

This is a multiple question which refers to the member(s) of the household. The aim of the question is to attribute the cost of the package amount from Q2.17.2 to the different elements included in the package price. It also seems as a check to that individual expenditure items are not recorded twice in Q2.17.2.

Universe

To the member(s) of the household who took overnight trip(s) in South Africa whose last trip was a package trip.

Final code list Airfare package_item1 (Q2173AIR) 1 = Yes 2 = No 8 = Not applicable 9 = Unspecified	(@198	1.)
Land transport package_item2 (Q2173LANDT) 1 = Yes 2 = No 8 = Not applicable 9 = Unspecified	(@199	1.)
Accommodation package_item3 (Q2173ACCOM) 1 = Yes 2 = No 3 = Do not know 8 = Not applicable 9 = Unspecified	(@200	1.)
Food and beverages package_item4 (Q2173FOOD) 1 = Yes 2 = No 8 = Not applicable 9 = Unspecified	(@201	1.)

Recreation and entertainment package_item5 (Q2173RECRE) 1 = Yes 2 = No 3 = Do not know 8 = Not applicable 9 = Unspecified	(@202	1.)
Travel insurance package_item6 (Q2173TRAVIN) 1 = Yes 2 = No 3 = Do not know 8 = Not applicable 9 = Unspecified	(@203	1.)
Shopping package_item7 (Q2173SHOP) 1 = Yes 2 = No 3 = Do not know 8 = Not applicable 9 = Unspecified	(@204	1.)
Other package_item8 (Q2173OTHR) 1 = Yes 2 = No 3 = Do not know 8 = Not applicable 9 = Unspecified	(@205	1.)
Amount spent2.19How much money did you and/or other members of your household spend on the following before the trip? 01 = Food for the trip 04 = Gifts 03 = Travel insurance 04 = Other financial services 05 = Servicing the vehicle 06 = Checking/ servicing alarm systems 07 = Hiring security 08 = Hiring house sitter 09 = Clothing 10 = Toiletries 11 = Luggage 14 = Medical supplies/ inoculations 13 = Electrical appliances e.g. adapters 14 = Other, Specify		

The aim of the question is to try and relate every cost to the relevant item. For example if the people did use the car for the trip, then the cost will be allocated to the petrol, if anyone of them did consult a doctor or bought any medication, then it will be for medical supplies etc. It is also possible that one member of the household might have incurred the majority of spending on behalf of other members by purchasing food and beverages for all, and then the total expenditure for food must be allocated only to that person who paid for the others, not to the beneficiaries. The interviewer must, where possible, allocate every cost necessary to the person who paid for it. When recording the amount, the Interviewer must start with the last digit from the right to the left.

Money spent on trip

2.20	How much money did you and/or other members of your household spend on the following on the
	trip?
	01 = Airfare
	02 = Train
	03 = Land transport (fuel, Kombi, bus/train tickets, car hire, toll fees)
	04 = Car hire
	05 = Accommodation
	06= Food and beverages
	07= Recreation/ entertainment (sports, game parks and amusement parks)
	08 = Cultural services (performing arts/ museums)
	09 = Medical expenses
	10 = Shopping
	11 = Tour guide
	12 = Other, Specify
	TOTAL

Note to users

The aim of the question is to find out the total expenditure on the trip by all members of the household who took the package trip and those who did not take the package trip. The interviewer must ensure that all the expenses are included and even expenses that were paid for by another party on behalf of the members such as the host, employer or the company, not forgetting tips and taxes where applicable.
