Sampling

Sampling Procedure

For the purpose of this study, multi-stage cluster sampling was used as no sampling frame containing all members in the universe or population exists. The sample was drawn in stages, with wards being selected at the first stage, dwelling units within the wards being selected in the second stage and respondents selected at the third stage.

Phase 1

The wards formed the primary sampling units (PSUs). A random starting point(s) was used as a method to select the dwelling units to be surveyed. A total number of 602 wards in 4 provinces (Gauteng 448 wards), (Mpumalanga 72 wards), (North-West 70 wards) and (Free State 12 wards) were completed. A total of 6639 interviews were completed in these wards.

Phase 2

During the second phase, the field teams were required to complete a certain number of interviews, depending on the population size of that particular ward. The teams had to complete for an example in ward X 3 interviews and in ward Y they had to complete 33 interviews. This meant that the field teams had different target number of interviews that they needed to complete in all the pre-selected wards. Ward maps were obtained before fieldwork commenced, and random starting points were identified, marked and numbered on the map. This allowed for the random selection of one (if more than one existed) starting point. The field managers concerned will firstly identify where the starting point(s) is/are on the ground. Once that has been established he/she will from the starting point count 20 households from the starting point moving to his/her left. The 20th household that he/she has selected was the household where the interviews were supposed to take place. Thereafter, the next 20th household was selected and approached until the target number of interviews was obtained.

The following process of household selection was adhered to:

From the starting point 20 houses were counted in a ward. However, if there were:

- 1-5 target number of interviews to be completed in a ward; 01 starting point was used;
- 6-10 target number of interviews to be completed in a ward; 02 starting points were used;
- 11-15 target number of interviews to be completed in the ward; 03 starting points were used;
- 16-20 target number of interviews to be completed in the ward; 04 starting points were used;
- 21-25 target number of interviews to be completed in the ward; 05 starting points were used; and
- 25 and above target number of interviews to be completed in a ward; 06 starting points were used

In the case of a household refusal or if a selected respondent was mentally disabled, the household was immediately substituted with the household on the left. If still there was no interview completed then another substitution, going to the right of the originally selected household, was done. In case of non-contact whereby there was no-one home after two visits at two different times (afternoon and evenings) on the same day, the same substitution method was followed. Therefore, at least two-revisits at different times were done in cases where selected dwelling units, households or individuals were not at home i.e. non-contact. However, in some cases households visited after 19:00 on the day were substituted as agreed to in order to ensure that all the target number of households would be completed in the allocated time per ward.

Phase 3

For the purpose of this study, one randomly selected household respondent was selected per household. All household members qualified if they met the following criteria:

- Resident(s) of the household irrespective of nationality but excluding nonresidents and visitors; and
- 18 years of age or older
- In the event of a child headed household (all household members are under 18 years old), the oldest child was assumed to be the head of household, and should be interviewed

If more than one eligible person was found per dwelling unit, the ideal and most practical and accurate method of random selection of an individual was the use of a KISH grid. One individual per household was selected using the KISH grid after a comprehensive listing exercise was completed of all eligible individuals at the dwelling unit. Once the respondent had been selected the fieldworker will follow up only that person per household. If selected, substitutions could not be made where there were refusals or non-contact over a period of a day after two or more re-visits on the same day.

Questionnaires

Overview

The survey instrument (questionnaire) which was used was provided by the GCRO. The instrument was similar to the questionnaire used for the initial Quality of Life survey, with new questions being added only where questions from the previous survey were removed. This was done with the intention of keeping the duration of the survey the same as the initial one. The survey instrument was a 20 page questionnaire, broken up into 12 sections. The bulk of the possible answers were pre-defined, such that most of the survey could be answered using a combination of tick-boxes or by writing down a number answer from a predefined set. To this end there are not many open - ended questions in the survey.

The survey instrument was reformatted by Data World to ensure optimal flow, as well as to cater for the technology platform which was used to conduct the surveys.

DATA COLLECTION NOTES

Fieldwork commenced on 15 August 2011. Initially there were 5 teams, consisting of 9 field workers and 1 team leader / supervisor per team. The teams generally were broken up 50:50 in ratio of male and female. The second fieldwork teams began on field on 01 September 2011, these were an additional 10 field workers, who were broken up into 2 teams of 5 each. The third fieldwork team began fieldwork on 17 October 2011. These were an additional 50 resources, which were broken up into 10 teams of 5 each.

A set of "mop-up" teams was assembled by reassigning fieldworkers, as the major work began tapering off, to revisit wards and make up shortfalls in the number of required surveys as best as possible. The first mop-up teams (10 field workers) began in October 2011, with another 20 field workers conducting mop-ups from the November 2011.

The bulk of the fieldwork was complete by the end of November 2011, with a few wards being visited in early December as initial visits, and mopping up going on until 15 December 2011.

Data Appraisal

Other forms of Data Appraisal

The survey company, Data Research Africa, utilised a range of quality control measures during fieldwork for the survey. In the field, fieldworkers checked completed questionnaire schedules immediately after interviews to ensure that all questions were answered and relevant skips were followed. The checked questionnaires were then handed to field or office managers who, whilst in field, performed a second quality check on each questionnaire. They focused on skip patterns, as well as on ensuring that answers corresponded with previous responses and followed a logical process.

ID	Name	Label	Type	Format	Question
V248	A_10_10	Participation in past year - youth organisations / clubs	discrete	numeric	
V249	A_10_11	Participation in past year - savings club (stokvel)	discrete	numeric	
V250	A_10_12	Participation in past year - political party	discrete	numeric	
V251	A_10_13	Participation in past year - student organisation	discrete	numeric	
V252	A_10_14	Participation in past year - street / block committee	discrete	numeric	
V253	A_10_15	Participation in past year - tribal / clan association	discrete	numeric	
V254	A_10_16	Participation in past year - business / professional organisation	discrete	numeric	
V255	A_10_17	Participation in past year - Cultural organisation	discrete	numeric	
V256	A_10_18	Participation in past year - Burial society	discrete	numeric	
V257	A_10_19	Participation in past year - Any other NGO or community based organisation	discrete	numeric	
V258	A_10_20	Participation in past year - Other	discrete	numeric	
V259	A_11_1	Where do you usually go for medical care	discrete	numeric	
V260	A_11_2	If not using public healthcare facilities, what is the main reason	discrete	numeric	
V261	A_11_3	Are you personally covered by medical aid or medical insurance	discrete	numeric	
V262	A_11_4	What is the biggest health problem facing your community	discrete	numeric	
V263	A_11_5	How often does your health status prevent you from doing daily work	discrete	numeric	
V264	A_11_6	How often does your health status prevent your from taking part in your usual so	discrete	numeric	
V265	A_11_7	Satisfaction - health services that government provides	discrete	numeric	
V266	A_12_1	Highest level of education completed	discrete	numeric	
V267	A_12_2	Current age	discrete	numeric	
V268	A_12_3	Do you have any kind of disability	discrete	numeric	
V269	A_12_4	How many people live in this household	discrete	numeric	
V270	A_12_5	Who is the head of this household	discrete	numeric	
V271	A_12_6	How many household members under 18 years old	discrete	numeric	
V272	A_12_7	Total monthly income by all household members	discrete	numeric	
V273	A_12_8	Income into household - Formal employment	discrete	numeric	
V274	A_12_9	Income into household - Informal employment	discrete	numeric	
V275	A_12_10	Income into household - govt grants including pensions	discrete	numeric	
V276	A_12_11	Income into household - support from family / remittances	discrete	numeric	
V277	A_12_12	Income into household - support from friends	discrete	numeric	
V278	A_12_13	Income into household - Renting out dwelling / flat / garage / etc.	discrete	numeric	
V279	A_12_14	Income into household - Savings / returns from investment	discrete	numeric	

ID	Name	Label	Type	Format	Question
V280	A_12_15	Does household give support or money to any other household, such as relatives I	discrete	numeric	
V281	GPSSource		discrete	character	
V282	WeightGCRO		contin	numeric	
V283	Recode_1_19	Spend on rates & services	discrete	numeric	
V284	Recode_2_2	When moved into Gauteng	discrete	numeric	
V285	Recode_2_7	When moved into dwelling	discrete	numeric	
V286	Recode_4_16	Household spend on transport p/m	discrete	numeric	
V287	Recode_8_2	Age of business in years	discrete	numeric	
V288	Recode_8_19	Hours worked per week	discrete	numeric	
V289	Recode_12_2	Age	discrete	numeric	
V290	Recode_12_4	Household size	discrete	numeric	
V291	Munic2011	Municipality 2011	discrete	numeric	
V292	Munic2006	Municipality 2006	discrete	numeric	
V293	Race	Race	discrete	numeric	
V294	Sex	Sex	discrete	numeric	
V295	Origins	Origins	discrete	numeric	
V296	MemberofCSO	Member of CSO	discrete	numeric	
V297	Satisfaction	Life Satisfaction	discrete	numeric	
V298	Education	Education	discrete	numeric	
V299	DwellingType	Dwelling Type	discrete	numeric	
V300	EmploymentStatus	Employment Status	discrete	numeric	
V301	WCheck	Ward_MunicPrecision	discrete	numeric	
V302	F_Ward	DummyWard	contin	numeric	
V303	Flag		discrete	character

 Range: -2-12

Valid cases: 0
 Invalid: 0

Household spend on transport p/m (Recode_4_16)

File: GCRO 2011_28Feb12noGIS

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: -2-8

Valid cases: 0
 Invalid: 0

Age of business in years (Recode_8_2)

File: GCRO 2011_28Feb12noGIS

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: -2-8

Valid cases: 0
 Invalid: 0

Hours worked per week (Recode_8_19)

File: GCRO 2011_28Feb12noGIS

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: -2-8

Valid cases: 0
 Invalid: 0

Age (Recode_12_2)

File: GCRO 2011_28Feb12noGIS

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: -2-12

Valid cases: 0
 Invalid: 0

Household size (Recode_12_4)

File: GCRO 2011_28Feb12noGIS

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: -2-8

Valid cases: 0
 Invalid: 0

Municipality 2011 (Munic2011)

File: GCRO 2011_28Feb12noGIS

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 11-22

Valid cases: 0
 Invalid: 0

Municipality 2006 (Munic2006)

File: GCRO 2011_28Feb12noGIS

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 11-22

Valid cases: 0
 Invalid: 0

Race (Race)

File: GCRO 2011_28Feb12noGIS

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-5

Valid cases: 0
Invalid: 0

Sex (Sex)

File: GCRO 2011_28Feb12noGIS

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 0
Invalid: 0

Origins (Origins)

File: GCRO 2011_28Feb12noGIS
