AIDS is a very serious illness. The HIV test is being done to see how big the AIDS problem is in Liberia. For the HIV test, we need a few drops of blood from a finger. The equipment used in taking the blood is clean and completely safe. It has never been used before and will be thrown away after each test. No names will be attached so we will not be able to tell you the test results. No one else will be able to know the test results either. If you want to know whether you have HIV, I can tell you the nearby facilities that offer counseling and testing for HIV. Do you have any questions? You can say yes to the test, or you can say no. It is up to you to decide. Will you give some drops of blood for the HIV test? (allow NAME OF ADOLESCENT to take the HIV test?) We would also like to store part of the blood sample at the laboratory for further tests in the future. We are not certain about what tests might be done. The blood sample will not have any name or other data attached that could identify (you/NAME OF ADOLESCENT). You do not have to agree. If you do not want the blood sample stored for later use, (you/NAME OF ADOLESCENT) can still participate in the HIV testing in this survey. Will you allow us to keep the blood sample stored for later testing or research?
