## Overview

---

Two survey instruments were provided in the IES 1990: A detailed "long" questionnaire and a "short" questionnaire without detailed classification of expenditure items. The "short" questionnaire was completed by two out of three households enumerated. The "short" and "long" questionnaires are identified separately in the variable `q_type`. "Long" questionnaires are indicated as `questionnaire = 1` and "short" questionnaires as `questionnaire = 2`.

# Data Processing

## Other Processing

---

Two out of every three households surveyed completed only a "short" questionnaire on which the more detailed classification of expenditure items did not occur. The missing data was then imputed using the corresponding data from the "long" questionnaires.
