Burkina Faso - Recensement general de la population de 1985 - IPUMS Subset

Institut National de la Statistique et de la Démographie, Minnesota Population Center - University of Minnesota

Report generated on: April 19, 2019

Visit our data catalog at: http://microdata.worldbank.org

Sampling

Sampling Procedure

MICRODATA SOURCE: Institut National de la Statistique et de la Dmographie

SAMPLE DESIGN: Systematic sample of every 10th dwelling with a random start, drawn by MPC.

SAMPLE UNIT: Household

SAMPLE FRACTION: 10%

SAMPLE SIZE (person records): 884,797

Response Rate

UNDERCOUNT: No information is available

Weighting

Self-weighting (expansion factor=10)

Questionnaires

Overview

Single enumeration form that requested information on households and individuals.

Data Collection

Data Collection Dates

Start	End	Cycle
1985-12-07	1985-12-20	N/A

Time Periods

Start	End	Cycle
1985-12-10	1985-12-20	N/A

Data Collection Mode

Face-to-face [f2f]

DATA COLLECTION NOTES

De jure and de facto, CENSUS DAY: December 10-20, 1985, FIELD WORK PERIOD: December 7, 1985 - ?

SUPERVISION

Face to face interview (direct enumeration) conducted by trained personnel.

V91	RECTYPEP	Record type [person version]	discrete	character	

Record type (RECTYPE)
File: BFA1985-H-H

Overview	
Type: Discrete	Valid cases: 0
Format: character	Invalid: 0
Width: 1	

Description

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

Year (YEAR)
File: BFA1985-H-H

Overview	
Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 4	
Decimals: 0	
Range: 1960-2011	

Description

YEAR gives the year in which the census was taken.

IPUMS sample identifier (SAMPLE)
File: BFA1985-H-H

Overview	
Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 9	
Decimals: 0	
Range: 32197001-894201001	

Description

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

Household serial number (SERIAL)
File: BFA1985-H-H

Household serial number (SERIAL)
File: BFA1985-H-H

Overview

Type: Continuous
Format: numeric
Width: 10
Decimals: 0

Valid cases: 0
Invalid: 0

Description

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002
Colombia 1993, 2005
Costa Rica 1984, 2000
Cuba 2002
Dominican Republic 1981, 2002, 2010
Ecuador 1990, 2001
Germany 1971
Hungary 1980, 1990, 2001
Jamaica 1982, 1991, 2001
Malaysia 1970, 1991, 2000
Mexico 1995, 1990, 2000, 2005
Nigeria 2006
Panama 2000
Peru 1993, 2007
Portugal 1981, 1991, 2001
Spain 1991
Uruguay 2011
Venezuela 1990, 2001
Vietnam 1989

In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

Number of person records in the household (PERSONS)
File: BFA1985-H-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

Subsample number (SUBSAMP)
File: BFA1985-H-H

Subsample number (SUBSAMP)
File: BFA1985-H-H

Overview	
Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 0-99	

Description

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

Number of deaths in household last year (MORTNUM)
File: BFA1985-H-H

Overview	
Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

Description

MORTNUM indicates the number of deaths in the household in the past year.

Any deaths in household last year (ANYMORT)
File: BFA1985-H-H

Overview	
Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-9	

Description

ANYMORT indicates whether there were any deaths in the household in the past year.

Group quarters (collective dwelling) status (GQ)
File: BFA1985-H-H

Overview	
Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 0-99	

Description

Group quarters (collective dwelling) status (GQ)
File: BFA1985-H-H

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

Number of unrelated persons (UNREL)
File: BFA1985-H-H

Overview	
Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

Description

UNREL indicates the number of persons in the household who are unrelated to the head.

Continent and region of country (REGIONW)
File: BFA1985-H-H

Overview	
Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 11-54	

Description

REGIONW identifies the continent and region of each country.

Dwelling number (BF1985A_0001)
File: BFA1985-H-H

Overview	
Type: Continuous	Valid cases: 0
Format: numeric	Invalid: 0

File: BFA1985-H-H

4.2.4 - Completion of the household form

At the top of the household form are the following elements:

- Concession
- Household

You will write the numbers of the concessions and the households in the boxes next to them. They are noted on the second and third pages of the cover.

- Page number and number of pages
- Page number: indicates the location of the page amongst all the pages used to count that particular household.
- Number of pages indicates the total number of pages used for each household.
- Nationality of the head of household: enter the nationality declared by the head of household.
- Language currently spoken in the household: enter the language most often used in the household.
- Deaths during the last 12 months and the summary table. These tables will not be filled out until all members of the household are counted.

[p. 19]

The second part of the household form is for recording the individual characteristics of each member of the household. It is comprised of 21 columns and 10 lines, each line being reserved for a member of the household.

Columns 1 to 8 concern all persons recorded in the household.

Columns 9 to 15 concern residents age 10 or older.

Columns 16 to 20 concern residents age 12 or older.

Column 21 concerns any member of the population recorded as handicapped.

The population is counted according to several characteristics.

Number of deaths in the past 12 months (BF1985A_0032)

Deaths during the last 12 months

This question, located at the top of the household form, concerns the number of deaths that happened in the household during the last 12 months (since December 1984). Put a cross in the box marked Yes or No according to whether or not a death happened in the household.

If Yes, specify the full name, sex and age (in years, months or days) of the deceased at the time of their death.

Strata (BF1985A_0046)
File: BFA1985-H-H

Overview	
Type: Continuous	Valid cases: 0
Format: numeric	Invalid: 0
Width: 5	
Decimals: 0	

Description

This variable is the strata identifier for the sample. Strata is a constructed variable that captures implicit geographic stratification resulting from the sample design. It is created by assigning a unique identifier to groups of between 10 and 19 adjacent households. Additional documentation is available on the Variance Estimation page.

Universe

Household weight (HHWT)
File: BFA1985-H-H

Overview	

Household weight (HHWT)
File: BFA1985-H-H

Type: Continuous
Format: numeric
Width: 8
Decimals: 2

Valid cases: 0
Invalid: 0

Description

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

Burkina Faso, Region 1985 [Level 1, GIS] (GEO1_BF1985)
File: BFA1985-H-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 1-20

Valid cases: 0
Invalid: 0

Description

GEO1_BF1985 identifies the household's department within Burkina Faso in 1985. Departments were the first level administrative units of the country in 1985 (currently regions). A GIS map (in shapefile format), corresponding to GEO1_BF1996 can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Burkina Faso can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level of any country refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

Burkina Faso, Province 1985 [Level 2, GIS] (GEO2_BF1985)
File: BFA1985-H-H

Overview

Type: Discrete
Format: numeric
Width: 6
Decimals: 0
Range: 1001-20029

Valid cases: 0
Invalid: 0

Description

GEO2_BF1985 identifies the household's province within Burkina Faso in 1985. Provinces are the second level administrative units of the country, after regions. A GIS map (in shapefile format), corresponding to GEO2_BF1985 can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Burkina Faso can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

Country (COUNTRY)
File: BFA1985-H-H

Overview

Country (COUNTRY)
File: BFA1985-H-H

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 32-894

Valid cases: 0
Invalid: 0

Description

COUNTRY gives the country from which the sample was drawn. The codes assigned to each country are those used by the UN Statistics Division and the ISO (International Organization for Standardization).

Strata identifier (STRATA)
File: BFA1985-H-H

Overview

Type: Continuous
Format: numeric
Width: 12
Decimals: 0

Valid cases: 0
Invalid: 0

Description

This variable is the strata identifier for the sample. The STRATA variable provides information about the sample design that can be used to improve estimation.

Person number (PERNUM)
File: BFA1985-P-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0
Invalid: 0

Description

PERNUM numbers all persons within each household consecutively (starting with "1" for the first person record of each household). When combined with SAMPLE and SERIAL, PERNUM uniquely identifies each person in the IPUMS-International database.

Marital status [general version] (MARST)
File: BFA1985-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

[program universe for et,mz samples.

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

Marital status [detailed version] (MARSTD)
File: BFA1985-P-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Overview

Age (AGE)
File: BFA1985-P-H

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Description

AGE gives age in years as of the person's last birthday prior to or on the day of enumeration.

Sex (SEX)
File: BFA1985-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 0
Invalid: 0

Description

SEX reports the sex (gender) of the respondent.

Children ever born (CHBORN)
File: BFA1985-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

CHBORN reports the number of children ever born to each woman of whom the question was asked. In most samples, women were to report all live births by all fathers, whether or not the child was still living.

Children surviving (CHSURV)
File: BFA1985-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

CHSURV reports the number of children born to a woman who were still living at the time of the census.

Literacy (LIT)
File: BFA1985-P-H

Overview

Literacy (LIT)
File: BFA1985-P-H

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

LIT indicates whether or not the respondent could read and write in any language. A person is typically considered literate if he or she can both read and write. All other persons are illiterate, including those who can either read or write but cannot do both.

Activity status (employment status) [general version] (EMPSTAT)
File: BFA1985-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

Activity status (employment status) [detailed version] (EMPSTATD)
File: BFA1985-P-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Occupation, ISCO general (OCCISCO)
File: BFA1985-P-H

Overview

Occupation, ISCO general (OCCISCO)
File: BFA1985-P-H

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-99

Valid cases: 0
Invalid: 0

Description

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

Occupation, unrecoded (OCC)
File: BFA1985-P-H

Overview

Type: Continuous
Format: numeric
Width: 4
Decimals: 0

Valid cases: 0
Invalid: 0

Description

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

Status in employment (class of worker) [general version] (CLASSWK)
File: BFA1985-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

Status in employment (class of worker) [detailed version] (CLASSWKD)
File: BFA1985-P-H

Overview

Status in employment (class of worker) [detailed version] (CLASSWKD)
File: BFA1985-P-H

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Decimals: 0	
Range: 0-998	

Description	

EDUCBF indicates the person's educational attainment in terms of the level of schooling completed.

Province of residence one year ago, Burkina Faso (MIGBF)
File: BFA1985-P-H

Overview	
Type: Discrete	**Valid cases: 0**
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 1-99	

Description	

MIGBF indicates the person's province of residence within Burkina Faso one year ago.

Polygamous union (POLYGAM)
File: BFA1985-P-H

Overview	
Type: Discrete	**Valid cases: 0**
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 0-99	

Description	

POLYGAM indicates whether the respondent was in a polygamous union and, in some samples, the number of wives or the rank order of the wife.

Residence status: de facto, de jure (RESIDENT)
File: BFA1985-P-H

Overview	
Type: Discrete	**Valid cases: 0**
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-9	

Description	

Residence status: de facto, de jure (RESIDENT)
File: BFA1985-P-H

RESIDENT identifies whether an enumerated person is a household resident or a visitor and whether she or he was present at the time of enumeration. This variable is available only in samples that enumerated both de facto and de jure residents. It can be used to eliminate the double-counting of persons who were enumerated both at their permanent residence and at the residence they were visiting on census night.

De jure population: present residents and absent residents.

De facto population: present residents and visitors/non-residents.

Description

This variable indicates the person's residential status in the household.

Universe

All persons

Literal question

All persons
[Questions 1-8 were asked for all persons.]

5. Residential status ___

Interviewer instructions

Residential status (BF1985A_0402)
File: BFA1985-P-H

Column five - residence status:

Residence is defined in relation to the household in which a person usually resides. Each person counted in the census must be classified in one of the four following residence status categories:

- Present Resident (RP) if he/she is present in the household;
- Absent Resident (RA) if he/she is absent from his/her usual household;
- Visitor (VIS) if he/she is a visitor in the household concerned;
- Emigrant (EM) if he/she resides outside of Burkina Faso.

[p. 22]

a) Present Resident (RP)

Someone is classified as a present resident if they have habitually lived in the household for more than 6 months and are present on the reference date. In most cases, the reference delay (six months) is sufficient for determining residence. However, there are exceptions. For example, people that have lived in a given location for less than six months but express the intention of staying there are classified as Present Residents (RP). In this case, they will not also be counted at the location they left less than six months prior.

Examples:

- A woman who has just married is a resident at her new home where she resides with her husband;
- A government worker who has been recently transferred to a new location should be counted as a resident in the new location. His/her family or household that is waiting elsewhere in order to move and join him/her will not be counted with him/her.
- A person, whether single or with a household, who has just changed their residence and intends on staying in the new location for whatever reason becomes a resident in the new location.

Other Present Resident cases:

The following persons shall be classified as "present residents", even if they have not spent the reference night in their household:

-- Doctors and other medical personnel on call;
-- Sentinels;
-- Factory workers who work overnight shifts;
-- Workers that work at night, either regularly or temporarily -- examples: truck drivers, persons commuting home during the reference night.

[p. 23]

b) Absent Resident (RA)

This is a person usually residing in the household who was absent the night preceding the interview, but whose absence was less than six months in duration. For this person, you will record "RA" in the corresponding box in column 5. The person must be absent from the household for a period of time lesser than six months.

However, in certain cases, persons absent from their household for less than six months are still not considered "absent residents" in their household. They are recorded as present residents at the location in which they are present during the census counting and will not be counted in the households to which they are linked. This is the case for persons who are part of a collective household, such as:

- Detainees in a penitentiary;
- Workers staying in the rudimentary camp of a temporary construction site;
- Members of the military staying in barracks;
- Members of a religious community living in a convent or seminary;
- Persons finding themselves in analogous situations;
- Students residing in a dormitory at the time of the census reference date.

However, if students are on vacation from school and home with their families at the time of the census, count them with their parents as visitors and in the dormitory as absent residents.

Certain categories of people absent from their household for a period longer than six months will be considered absent residents (RA) in these households. This includes women who have just given birth with their family and who are staying there for longer than six months.

c) Visitors (VIS)

This concerns persons present in the household the night before the interview but who don't live there, because their primary residence is elsewhere.

[p. 24]

For these people, it is necessary to record "VIS" in column 5. These persons should be visiting for a period less than six (6) months. In general, persons staying in hotels are "visitors".

But if they do not have a residence and they work in Burkina Faso, they are then considered present or absent residents, according to their situation on reference night (ex: a person undergoing a transfer or a foreign expert/specialist who has not yet found housing).

A person who is a member of a collective household but staying the reference night with their family should be recorded as "VIS", because they are "RA" in their establishment.

d) Emigrants (EM)

The following are considered emigrants and shall be recorded as EM in column 5:

- Persons who have been outside of Burkina Faso for more than six months.
- Persons who have been outside of Burkina Faso for less than six months and have the intention of staying there for more than six months.

Other special cases:

- Burkinabe students who are abroad shall be classified in their household as RA regardless of the length of time of their absence;
- Workers (either seasonal or permanent) who are working abroad will be counted in their households if they are absent for a period of less than six (6) months;
- Persons working abroad in lieu of military service and foreign experts/specialists whose contracts are longer than six months are counted as residents: RP or RA.
- Foreign students are counted as residents: RP or RA.
- Tourists and other foreign visitors in Burkina Faso at the time of the census will be counted as visitors in their respective ordinary or collective households if the length of

[p. 25]

their stay is less than six months.

6. Age or date of birth

____ Age in months or years
____ Date of birth

Interviewer instructions

Age (BF1985A_0403)
File: BFA1985-P-H

Column six - age or birthdate:

This column is divided into two subcolumns:

- Age in months or years;
- Date of birth.

Only one of these sub-columns needs to be filled out for each individual.

For each person, it is necessary to obtain as much precision as possible concerning the day, month and year of birth. You should consult the personal documents of those being interviewed on an as-needed basis: birth certificate, ID card, family record book.

- If the exact date is known, write it in numbers. Example: 15/10/82 for someone born on October 15, 1982.
- If only the year of birth is known, write it directly. Example: 1939 for someone born in 1939.
- If only the age is given, record the given number followed by the letter "A".

For children under a year old, record the age in months if between 1 and 12 months, followed by the letter "M", and in days if the child is less than one month old, followed by the letter "J".

Example:

3 years write 3A
8 months write 8M
25 days write 25J.

In the case that someone has no idea what their age is (or has a very vague idea), it is necessary to ask them, or the person responding for them, if they remember an important event in the history of the city or area, of which the date is well-known, in order to estimate the age of the person concerned.

In certain cases, you may ask the respondent to search their memory for another person in the area that is of a similar age to them to see if this person can either provide more information on their age or serve as a reference.

[p. 26]

You may also consult the relationship between a person's declared age (even the date) and certain other replies, such as: education, the age of their first child and the number of children for a woman, etc.

If the responses to these questions seem erroneous in comparison to the age of the individual, you must probe while with the respondent to obtain logical responses.

Economic activity

11. Employment status ____

Interviewer instructions

Employment status (BF1985A_0408)
File: BFA1985-P-H

Column eleven - occupational status:

The reference period is the week preceding the census agent's visit to the household.

Occupational status is the connection between each person and economic activity within a determined time period.

This fundamental question allows the classification of the population into two categories: active and inactive.

a) Active

The active population includes those employed and those not employed but actively seeking employment.

- A person is considered employed if they have worked at least three days during the reference period. Record: OCC.

Attention:

Farmers and their family helpers are considered employed even if the reference week falls during a period of inactivity due to climate conditions. For example after a harvest, a farmer that carries out no activity should still be considered as employed.

- Workers that are sick, on vacation or laid-off during the reference period are also considered employed; a person who already works and is in training during the census counting is also considered employed.

- A person is considered not employed but actively looking if they did not work at all or worked less than three days during the reference period, but who are searching for employment. Two categories are distinguished:

[p. 29]

- Persons who worked previously but lost their job and are looking for employment during the reference period. For this category, record: CHO.

- Persons who have never worked, that is to say persons who are searching for their first job. For this category, record: QUE.

b) Inactive

Inactive persons are those that follow within the following classifications:

- Persons taking care of the household: POF
- Students: ETU
- Retired persons: RET
- Stockholders: REN
- Sick persons: INV
- Other inactive persons: AUT.

Some precisions

- Persons taking care of the household (POF):

These are persons of either sex that are not exercising any form of economic activity (neither agricultural, artisanal nor commercial), and who perform household tasks at their place of residence, such as housewives or family members taking care of the household and the children. However, domestic workers that receive remuneration should be classified as employed because they are part of the active population.

Attention: In rural areas, a woman that takes part in cultivation or livestock farming as well as performing household duties is employed.

- A wife that aids her husband or another household member in their profession or performs a paid activity (dying, cutting/styling hair, pottery) is considered employed, even if she also takes care of the household.

[p. 30]

- A woman who, for example, goes to the market in the morning to sell produce or other products and then returns to do housework is also considered employed.

- Students (STU):

A person of either sex is in this category if they perform no economic activity and frequent an establishment of private or public education to receive schooling at any level.

For persons in this category, refer to the situation of the person during the 1985/1986 school year.

For persons taking night or literacy classes, the following situations may arise:

- The person has a job they attend during the day. They should be recorded as employed.
- The person does not have a job. They should be recorded as CHO, QUE, POF, etc. based upon their situation.

- Retired (RET):

A person of either sex is in this category if they perform no economic activity and their resources come principally from a pension, state-funded or otherwise, resulting from previous activity.

If a person claiming to be "retired" performs an economic activity that earns them more money then their pension, this person should be considered employed.

- Stockholder (REN):

A person is in this category if they perform no economic activity and their primary resources come from placement of funds and assets, notably real estate.

[p. 31]

- Sick persons (INV):

A person of either sex is in this category if they have a physical or mental illness that prevents them from working. Nevertheless, sick persons who work should be classified as employed.

- Other inactive persons (AUT):

An inactive person of either sex is in this category if they perform no economic activity and are not classified in any of the categories mentioned above. Classified in this category in particular are children older than 10 years of age who do not attend school and are not economically active, and elderly persons who no longer work and have no pension or personal fortune and depend on the charity of family or others.

N.B.: Every person 10 years of age and older must have an occupational status recorded in column 11.

Principal occupation (BF1985A_0409)
File: BFA1985-P-H

Literal question

Residents 10 years of age and older
[Questions 9-15 were asked for residents age 10 and older.]

Economic activity

12. Principal occupation ____

Interviewer instructions

Attention: Columns 12 to 15 only apply to those persons employed or unemployed but looking for employment (OCC and CHO). In each case, they should describe their last job. For the other categories (QUE, POF, ETU, RET, INV, AUT), record a dash in these columns.

Column twelve - principal occupation:

- For an employed person, the principal occupation corresponds to the type of work actually performed during the reference period to which the person dedicated the most of their time.

- For people unemployed but looking for a job, we will consider their last job worked as their principal occupation (this applies to those who have previously been employed). It is concerned with the profession performed by the person being counted, not their rank, function or the job they were trained to do.

[p. 32]

Notes:

If the person being interviewed is a government worker, it is necessary to probe the person in order to obtain a detailed description of the work they perform.

- Ask the following question: "What do you do for a living?" Then record the principal occupation with as much precision as possible.

Attention: In rural areas, the principal occupation is that performed during the rainy season.

Situation of principal occupation (BF1985A_0410)

Economic activity

13. Employment situation in principal occupation ____

Interviewer instructions

Attention: Columns 12 to 15 only apply to those persons employed or unemployed but looking for employment (OCC and CHO). In each case, they should describe their last job. For the other categories (QUE, POF, ETU, RET, INV, AUT), record a dash in these columns.

Column thirteen - situation within principal occupation:

This is a person's situation in relation to their current principal occupation, or previous principal occupation if the person is unemployed but looking for work.

The possible categories and their codes are:

Employer, Boss -- EMP
Independent -- IND
Salaried -- SAL
Apprentice -- APP
Family helper -- AIF
Other -- AUT.

Employer, Boss (EMP): This is an active, employed person who runs their own economic enterprise or exercises a profession for their own well-being. To this effect, they employ one or more persons that are paid.

A person that employs one or more domestic workers is not an employer, even if the person pays them.

Independent (IND): This is an active person that is self-employed but does not employ anyone else. They may, however, have family helpers or non-paid apprentices.

Salaried (SAL): This is a person that works for a public or private employer and who in return receives a salary in cash or in benefits.

Family helper (AIF): This is a person who works for a business owned by a family member and does not receive compensation, a salary or any remuneration. Family helpers are most often found in agriculture, commerce and transport; they are generally given room and board and, from time to time, receive gifts.

Other (AUT): These are persons whose occupational situations cannot be classified in any of the categories mentioned above.

Secondary occupation (BF1985A_0411)
File: BFA1985-P-H

14. Secondary occupation ____

Interviewer instructions

Attention: Columns 12 to 15 only apply to those persons employed or unemployed but looking for employment (OCC and CHO). In each case, they should describe their last job. For the other categories (QUE, POF, ETU, RET, INV, AUT), record a dash in these columns.

Column fourteen - secondary occupation:

A person's secondary occupation is that which takes the most of his/her time after his/her principal occupation.

It is necessary to try and obtain the most detailed information possible about the work performed.

Example of a secondary occupation: an accountant that teaches accounting courses in an educational institution.

Attention:

- In a rural setting, the secondary occupation is that performed during the dry season.
- No one may have a secondary occupation if they have not already claimed a principal occupation.
- The secondary occupation may not be housewife (POF) or student (ETU).

MIGRATE1 indicates the person's place of residence 1 year ago. The first digit records movement across major administrative divisions and countries; the second digit reports movement across minor administrative divisions.

Years of schooling (YRSCHOOL)
File: BFA1985-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

Years of schooling (YRSCHOOL)
File: BFA1985-P-H

YRSCHOOL indicates the highest grade/level of schooling the person had completed, in years. Only formal schooling is counted. YRSCHOOL accounts for the number of years of study, regardless of the track or kind of study. Information on degree and/or technical track is available in EDATTAIN. Years of schooling for Israel, categorized into intervals, are given in YRSCHOOL2.

Users should pay close attention to the top-codes in each sample, as discussed in the comparability section.

Educational attainment, international recode [general version] (EDATTAIN)
File: BFA1985-P-H

Overview	
Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

Description

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

Description

Educational attainment, international recode [detailed version] (EDATTAIND)
File: BFA1985-P-H

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

Number of births last year (BIRTHSLYR)
File: BFA1985-P-H

Overview	
Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

Description

BIRTHSLYR indicates whether any -- and in most cases how many -- children were born to a woman in the past twelve months.

Age, grouped into intervals (AGE2)
File: BFA1985-P-H

Overview	
Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 1-98	

Description

AGE2 gives computed years of age grouped into intervals.

Year [person version] (YEARP)
File: BFA1985-P-H

Overview	
Type: Continuous	Valid cases: 0
Format: numeric	Invalid: 0
Width: 4	
Decimals: 0	

Description

[This file is just a placeholder. See the household version of the variable.]

IPUMS sample identifier [person version] (SAMPLEP)
File: BFA1985-P-H

Overview	
Type: Continuous	Valid cases: 0
Format: numeric	Invalid: 0
Width: 9	
Decimals: 0	

Description

[This file is just a placeholder. See the household version of the variable.]

Household serial number [person version] (SERIAL)
File: BFA1985-P-H

Overview	
Type: Continuous	Valid cases: 0
Format: numeric	Invalid: 0
Width: 10	
Decimals: 0	

Description

[This file is just a placeholder. See the household version of the variable.]

Country [person version] (COUNTRYP)
File: BFA1985-P-H

Overview	
Type: Continuous	Valid cases: 0
Format: numeric	Invalid: 0
Width: 3	
Decimals: 0	

Description

[This file is just a placeholder. See the household version of the variable.]

Record type [person version] (RECTYPEP)
File: BFA1985-P-H

Overview	
Type: Discrete	Valid cases: 0
Format: character	Invalid: 0
Width: 1	

Description

[This file is just a placeholder. See the household version of the variable.]
