Data Cleaning Description

PNPM-KDP IMPACT EVALUATION 2010 SURVEY

Final Report

Contract Number : 7153788

Conducted by SurveyMETER

June 2010

APPENDIX B1. List of Consistency Check

No	Check	The number of initial cases (field data)	The number of cases after data cleaning (the program needs to run again)	The reason why the case is still there after cleaning
1	Check household cover, make sure interview 1 is conducted before interview 2 and interview 2 is before interview 3 and so on .	0	0	
2	Check language in CRT3 and CRT4 (value must be different, except for others).	0	0	
3	Check household location (village to province) refer to loccodes 2007.			
4	Check option 1 and 5 in roster/preprinted refer to entry result. Make sure if location not updated, editor must enter with "1" if updated enter with "5" (household type 1 and 2), for household type tipe 3, all x variables is "5" (automatic).			
5	Check phone numbers (fix and handphone), no characters allowed	0	0	
6	Check parent and children age difference, must not less than 12 years old	26	20	<p>573140000 → THERE IS A NOTE ON MARGIN STATING THAT MUNARTI IS THE CHILD OF MUNA'AM</p> <p>870070000 → PQX= EDF (NO PHONE NUMBER CAN BE CONTACTED)</p> <p>766040000 → THERE IS A NOTE ON MARGIN STATING AS FOLLOWING:</p> <ul style="list-style-type: none"> TAFSIR KAMAE IS THE SECOND HUSBAND OF ADISA HOMONODE, AND KRT IS THE YOUNGER BROTHER OF ADISA'S FIRST HUSBAND JAMIR KAMAE IS THE CHILD OF ADISA HUMONODE AND HER FIRST HUSBAND. THUS, JABIR KAMAE'S AGE IS NOT THAT FAR FROM THE AGE OF KRT

				<p>627110000 → PQX = EDF (NO PHONE NUMBER)</p> <p>032150000 → MODIFICATION B4AK3_CHILD: 3 → INTO 6 (PARENTS/PARENT INLAW)</p> <p>830020000→ THERE IS NOTE ON MARGIN AT E1: RESPONDENT HAD NO IDEA ABOUT NURSIAH'S DATE OF BIRTH → HAVE BEEN CONFIRMED TO THE EDITOR IN THE FIELD</p> <p>821100000 → PQX = EDF</p> <p>433080000 ART : 03 & 07 → THERE IS INTERVIEWER'S NOTE : RELATIONSHIP WITH KRT : STEP CHILD → PQX=EDF</p> <p>900090000 → PARENT'S AGE IS 25; CHILD'S AGE IS 14 (PQX=EDF) PHONE NUMBER : CHILD STATUS, STEP CHILD</p> <p>886010000 → PARENT'S AGE IS 47; CHILD'S AGE IS 77 (PQX=EDF) : HAS NOT BEEN CONFIRMED (NON-NACTIVE PHONE NUMBER OR UNREACHBALE)</p> <p>319030000 → HAS BEEN CONFIRMED, NO IDEA ABOUT MOTHER'S AGE, NO OTHER PHONE NUMBER, MODIFICATION ON B4AK4 ART 01= 5 →2</p> <p>280120000 → PQX=EDF (NUMBER UNREACHABLE)</p> <p>905080000 → PQX=EDF (HAS BEEN CONFIRMED, KRT GAVE BIRTH AT AROUND 11 YEARS OLD)</p> <p>009100000 → 998= NO IDEA, NO PHONE NUMBER CAN BE CONTACTED</p> <p>569150000 → PQX=EDF (NUMBER UNREACHABLE)</p> <p>882050000 → PQX=EDF</p>
--	--	--	--	--

				<p>252140000 → PQX=EDF , PHONE NUMBER= NO LONGER AVAILABLE</p> <p>811010000 → PQX=EDF (NUMBER UNREACHABLE)</p>
7	Check consistency between age and date of birth, tolerance difference 3 years	0	0	
8	Check date of birth, must be before date of interview	33	0	
9	Check consistency between INHH & B4AK62 (type I)	0	0	
10	Check in roster must at least one become head of household			In separate file
11	Check consistency between name of head of HH in Block @ and name of head of HH in Block 4A.	0	0	
12	Check consistency between name of ART in cover (who answer household book) and name of ART in block 4A (if answered by ART)	0	0	
13	Check consistency of relation with head of HH in block Blok 4A and CRT1 (respondent is.. in cover).	0	0	
14	Suggestion : B6R6a option "0" changed to option "10"	-	-	
15	Check if expenditure per week is bigger than expenditure per month (B7BR1 > B7BR2)	22	0	
16	Point 25-28 : automatic calculation by program (protected)	-	-	
17	Check phone number in Blok IK, characters are not allowed in IK01 & IK03.	1	0	
18	Check CP1, if we have "A" option, make sure editor only allowed to enter A only.	0	0	

19	Check date of edit, must be after date of interview (must not otherwise).	0	0	
20	Check percentage one item consumption 2010 +/- 2 sd 2007			In separate file
21	Check consistency between name who answer MSP book with name in Block 4A.	0	0	
22	Check B2AK3 (relation with head of HH) in block 4A with CMSP1 (respondent is...)	13	0	
23	Check consistency between name of other ART who contribute interview (CMSP1a) with names in block 4A (B2AK2)	0	0	
24	Check if interview for MSP book must be conducted after interview for Household book	1	0	
25	Check languages in interview, same values are not allowed except others(CMSP2a and CMSP2b)	0	0	
26	Check, first interview must not after second interview (program protect)	0	0	
27	Suggestion : MSP08 option A-P why not A1 to P1??			
28	Check MSP10, "0" not allowed. If "0" MSP10X = 2	0	0	
29	check interviewer check between MSP11B and MSP11HX.	3	0	
30	If MSP11B has option "I", other option not allowed	0	0	
31	Check CP1, if we have "A" option, make sure editor only allowed to enter A only.	0	0	
32	Check date of edit, must be after date of interview (must not otherwise).	0	0	
33a	Check consistency between names in cover CBI1 and names in Block 4A (B4AK2)	5	0	

33b	Check consistency between names in cover CB13 and names in Block 4A (B4AK2)	101	0	
34	Check consistency in “relation with head of HH” in block Block 4A (B4AK3) with respondent (CBI2)	4	0	
35	Check CB1 and CBI3, if CBI4 = 8 then CBI1 must equal with CBI3, and vice versa	0	0	
36	Check age consistency in Block 4A (B4AK5) and age in Individu book (CBI6), age tolerance 3 years? OR without tolerance ?	19	7	Data file is same as recording in the questionnaire and have been confirmed to the respondent by phone. Constrain some phone numbers could not be in contact.
37	Check CBI7a and CBI7b (languages in interviews), must not equal,except for others.	0	0	
38	Check, first interview must not : h Check, first interview must not after second interview (program protect)	0	0	
39	Check, first interview must not after second interview (program protect)	0	0	
40	Check Interviewer check B5R2X and B5R1 option A1 to P1.	0	0	
41	Check if B5R2 = 1 but B5R3 = 0 : Not allowed .	0	0	
42	Check if B5R6 = 1 but B5R7a option 1 to 10 all entered with “0” .	0	0	
43	Check if B5R8 = 1 but B5R9a option 1 to 10 all entered with “0”	0	0	
44	Check interviewer check in B5R14X and CBI6	0	0	
45	Check interviewer check in B5R16X and (B5R14 and B5R15A)	0	0	
46	Check consistency between highest education and its particular level (B5R15A and B5R17)	55	5	181020000 → PQX=EDF , PHONE NUMBER= NO LONGER AVAILABLE 266040000 → PQX=EDF , PHONE NUMBER= HAVE PHONE BUT NOT ACTIVE

				272010000 → PQX=EDF , PHONE NUMBER= NO LONGER AVAILABLE PQX is equal to the questionnaire and had been in the confirmation to the respondent by phone. Constrain some phone numbers could not be in contact.
47	Check consistency between past/current education and education completed (B5R15A dan B5R18)	380	0	
48	Check interviewer check in B5R20X and CBI6	0	0	
49	Check interinterviewer check in B5R21X and B5R20A (first row)	0	0	
50	Check interviewer check in B5R24X and (B5R22 and B5R23)	0	0	
51	Check interviewer check in B5R26X and (B5R20A1 and B5R21)	0	0	
52	Check B5R26a and B5R26B	832	827	B5R26a is number of hours work usually and B5R26B in number of hours work this week
53	Check total B5R26B (protected)	0	0	
54	Check phone number in B5R51 (workplace) : characsters not allowed	0	0	
55	Check CP1, if we have "A" option, make sure editor only allowed to enter A only.	0	0	
56	Check date of edit, must be after date of interview (must not otherwise).	0	0	
57	Check phone numbers in FT04, FT07, FT08, FT09 characters not allowed	0	0	
58	Check consistency between FT5 and CRT1 (informant)	0	0	
59	Check FT02, must after interview of household book	0	0	
60	Check FT06, must before interview of household book	0	0	

APPENDIX B2

Total “errors” of consumption = 1.87% + 1.25% = 3.12% ← less than 5%

THE 98 % HIGHEST PER CAPITA EXPENSES (THE SITUATION OF FIRST 20 HOUSEHOLDS)

1.HHID 810080000

There are two HHMs respectively 50 years old and 55 years old. The HHH works as POLRI (Police of Republic of Indonesia) member with monthly income of Rp.3.000.000; however, spouse of HHH works as High School teacher with monthly income of Rp.4.000.000. The total area of the house is 170 m². The house is owned by the HHH. Roof uses iron sheet with brick wall and floor is not made from soil. This household uses protected well water. The house has squat toilet and uses septic tank. This household uses 900 watt PLN electricity. The total amount for food consumption in this household is Rp.435.000/week, and for non food consumption costs Rp.167.812.000 with detail as follow: House rent costs Rp.7.000.000/year, buy car and kitchen appliance costs Rp.151.900.000/year.

2. HHID 794110000

There are two HHMs in this household respectively 44 years old and 46 years old. HHH works as staff administration in the high school with monthly income of Rp.2.290.000. Spouse of HHH works as teacher in Junior High School with monthly income of Rp.2.288.100. Total area of the house is 44 m². The status of the house is own self. It uses asbestos roof, wood panel wall and the floor is not made from dirt/soil. This household uses protected well and has its own squat toilet that is equipped with septic tank. Food consumption in this household for a week costs Rp.779.375 with detail as follow: rice Rp.98.000, yam Rp.10.000, fish Rp.100.000, meat Rp.90.000, egg and milk Rp.18.000, vegetable Rp.63.500, nuts Rp.55.000, fruit Rp.77.500, oil Rp.48.750, drink ingredient Rp.40.000, spices Rp.25.250, other consumption Rp.10.500, ready food Rp.72.875, cigarette Rp.70.000. For non food consumption for a year costs Rp.58.959.500 with detail as follow: rent for house Rp.6.780.000/year, goods and services (cosmetics, pre-paid phone, gasoline, soap) Rp.19.320.000, health expenses Rp.2.430.000, ready to wear clothes Rp.4.368.000, unexpired goods (buying laptop, electronic, jewelry ,kitchen appliances, camera) Rp.24.731.500, tax costs Rp.133.000.

3. HHID 126070000,

There are 2 HHMs in this household respectively 66 years old and 58 years old. HHH works as labor in palm oil plantation with monthly income of Rp.1.000.000. Spouse of HHH does not work at all. The total area of the house is 168 m². The status of house's ownership is own house with shingle roofing, brick wall and floor that is made from not soil/dirt. This house uses pump well and has its own squat toilet complete with its septic tank. This household uses 900 watt PLN electricity. Food consumption in this household costs Rp.196.000 in a week. For non food consumption, there are couple big expenses such as unexpired goods (buying kitchen appliances and car) Rp.80.500.000/year, paying for tax Rp.3.570.000/year; thus the total for non food consumption is Rp.95.090.000 in a year.

4. HHID 247050000,

There are 3 HHMs in this household respectively 55 years old, 50 years old and 15 years old. 1 HHM works as a teacher in Ponpes AL FATAH with monthly income of Rp.200.000. 1 other HHM works as a teacher in SMPN 3 with monthly income of Rp.3.200.000. The last HHM is still in Junior High School. The house is 72 m² with ownership status as own house.

The house uses concrete roof, brick wall, and the floor is not made of soil/dirt. This house uses protected well and has its own squat toilet complete with septic tank. This household uses 900 watt electricity that comes from PLN. Food consumption in this household for a week is as big as Rp.339.000. Meanwhile, non food consumption per year is as big as Rp.173.364.000 with the biggest expenses for : rent for house Rp.10.000.000/year, ready to wear clothes Rp.5.560.000/year, unexpired good (car) Rp.152.350.000/year.

5. HHID 720030000,

There are 2 HHMs in this household respectively 44 years old and 36 years old. 1 HHM works as worker in coal mining with monthly income of Rp.41.666.600 and 1 HHM does not work. The house is as big as 96 m² and it is owned by own self. The house has asbestos roof, brick wall and floor is not made of dirt/soil. This house uses pump well and has its own squat toilet that comes with septic tank. This household also uses 450 watt electricity that comes from PLN. Food consumption for a week in this household costs Rp.403.500. Non food consumption per year costs Rp.86.531.000/year with the biggest expenses for : rent of house Rp.6.000.000, good and service Rp.9.630.000, health expense Rp.2.920.000, unexpired goods (buying gold, vehicle, mobile phone, electronic) Rp.49.515.000, ceremony Rp.15.000.000.

6.HHID 438050000,

There is only one 44-year-old HHM in this household. HHM works in transportation for transporting cement with his or her own truck with monthly income as big as Rp.30.000.000. The total area of the house is 84 m². The house is owned by HHM himself or herself. It uses tile roof, brick wall and floor is not made of soil/dirt. This household uses bottled water to fulfill its daily necessities and has its own squat toilet. This household also uses electricity that comes from PLN as big as 1300 watt. Food consumption for a week is as big as Rp.162.250. The biggest amount is for ready to serve food that costs as big as Rp.124.000. For non food consumption per year is as big as Rp.111.104.000. The biggest amount is for: rental of the house Rp.2.500.000, good and service Rp.2.492.000, clothes Rp.1.180.000, unexpired goods (buying car and other household appliances) Rp.87.000.000, paying for yearly tax Rp.16.150.000.

7.HHID 824110000,

There is only one 61-year-old HHM in this household. HHM works in a daily necessities trading business with income of Rp.150.000/month. Total of food consumption in a week is as big as Rp.668.500. In questionnaire there is a miscalculation. In Interviewer's Note Margin for buying fruits (B7AR(8), it should be Rp.56.500 but it is written Rp.565.000 thus food consumption is only Rp.160.000/week. However, non food consumption per year is as big as Rp.6.628.000 with the most expense goes to house that costs Rp.4.800.000.

8.HHID 717090000,

There is only one 57-year-old HHM in this household. HHM works as merchant for daily necessities food with monthly income of Rp.2.250.000. HHM lives in a 100 m² house. The status of ownership is own house. It uses iron sheet roof with wood panel wall and the floor is not made of dirt. This household uses water that comes from protected well to fulfill its daily necessities. It has its own squat toilet that is equipped with septic tank. This household uses lighting as big as 900 watt that comes from PLN. One is in High School and the other one has graduated from High School. In this household, there is 1 person who works as a carpenter (labor) with monthly income as big as Rp.1.360.000,-. Last week food consumption: as big as Rp.125.000,- consists of rice, salted fish, vegetable, fruit, oil, drink ingredients, spices. Non food consumption: electricity Rp.58.000,- per month, house rental Rp.50.000,- per month, goods and services (bath soap) Rp.21.000,- per month, education expenses Rp.840.000,- per year, health expenses Rp.5.000,- per year, clothes Rp.144.000,- per year, tax Rp.2.000,- per year as well as party and ceremony expenses Rp.100.000,- per year.

11. HHID 507120000,

The total number of HHM is 6 people. HHH is 48 years old. Spouse of HHH is 46 years old. They have 2 daughters (23 and 28 years old), 2 grandchildren (7 and 1 years old). House has brick wall, not soil/not dirt floor with total area of 100 m², does not have own toilet and defecating in the river. HHH does not graduate from Elementary School and

work as farmer in field that is owned by Indonesian Forest Company (Perhutani) and has goat husbandry with total net income Rp.68.500,- per month with details as followed: rice field farmer Rp.235.000,-, corn Rp.337.000,-, cassava Rp.250.000,- then divide all three with 12 months. Spouse of HHH and two children help in the rice field as unpaid workers. Last week food consumption is as big as Rp.107.000,- consists of rice, cassava, fish, vegetable, oil and spices. Non food consumption: house rental Rp.600.000,- per year, electricity, gas bills and firewood Rp.793.000,- per year, bath soap, cosmetics and phone card Rp.205.500,- per year, shopping for clothes Rp.245.000,- per year and tax Rp.20.000,- per year.

12. HHID 507040000,

The total number of HHM is 4 people. HHH is 69 years old. Spouse of HHH is 51 years old. They have a 26-year-old child and 17-year-old child-in-law. The house has brick wall, not soil/not dirt floor with total area of 45 m². House does not equip with toilet. HHMs defecate in bushes. Lighting uses non-metered PLN electricity. HHH has never been to school. HHH works as a farmer in own field with net income of Rp.15.000,- per month with details as followed: income from rice field Rp.170.000,-, corn Rp.50.000,-, cassava

Rp.60.000,- and seeds Rp.50.000,- then subtract with expenses as big as Rp.150.000,-. The total Rp.180.000,- then divide with 12 months so it comes out to Rp.15.000,-. Wife, child and child-in-law work in the field as unpaid workers. Last week food consumption was as big as Rp.58.950,- (included rice, cassava, vegetable, tempe, cooking oil, sugar, coffee, salt and tobacco). Non food consumption: house rent approximately Rp.50.000,- per year, electricity and firewood Rp.327.000,-, soap, shampoo and toothpaste Rp.138.000,- per year. Health expenses Rp.200.000,- per year. Detergent costs Rp.35.500,- per year and does not shop clothing. Tax is Rp.5.000,- per year.

13. HHID 594110000,

The total number of HHM is 6 people. HHH is 86 years old. Spouse of HHH is 36 years old, and there are 4 other HHMs. Total area of the house is 40 m², has roof tile, has brick wall, floor is not dirt/soil. There is no toilet and lighting uses 450 watt PLN electricity. HHH did not graduate from Elementary School (up to primary 2 only); the spouse of HHH graduated from Elementary School. 3 other HHMs graduated from Elementary School and 1 HHM is still in the Elementary School. 3 people work in this household. 1 person work in own rice field with monthly income as big as Rp.241.250,-. 1 person work as vegetable seller with monthly income of Rp.50.000,-. And the other 1 person work as masseur with monthly income as big as Rp.43.000,-. Last week food consumption: rice Rp.68.500,-, vegetable Rp.6.000,-, tofu and tempe Rp.14.000,-, oil and fat Rp.5.000,-, drink ingredients Rp.7.000,-, spices Rp.2.700,-, ready served food and drink Rp.3.500,- and tobacco Rp.1.000,-. Non food consumption: electricity Rp.14.000,- per month, other goods and services Rp.14.000,- per month, education expenses Rp.24.000,- per year, health expenses Rp.15.000,- per year, clothes and detergent Rp.260.000,- per year and tax Rp.60.000,- per year.

14. HHID 490030000,

The total number of HHM is 3 people. HHH is 74 years old. Spouse of HHH is 67 years old and one 8-year-old son. Total area of the house is 50m² with roof tile, brick wall, floor not dirt/soil, does not have toilet and lighting uses non-metered PLN electricity. HHH and spouse of HHH have never been to school. Their son is still in the Elementary School. HHH works as a farmer with monthly income of Rp.250.000,- with the help of his wife whose status is unpaid worker. Last week food consumption: rice Rp.22.750,- vegetable

Rp.1.500,-, nut Rp.7.000,-, oil and fat Rp.1.300,- and spices Rp.1.000,-. Non food consumption: rent is Rp.500.000,- per year, electricity bill and firewood Rp.840.000,- per year, bathing soap Rp.36.000,- per year, education expenses Rp.15.000,- per year and tax Rp.20.000,- per year.

15. HHID 370150000,

The total number of HHM is 10 people. HHH is 55 years old. Spouse of HHH is 46 years old and 8 other HHMs. The total area of the house is 24 m2 with roof tile, wood panel wall, floor is not dirt, squat toilet and lighting uses 450 watt PLN electricity. HHH and spouse of HHH graduated from Elementary School. 1 HHM graduated from Elementary School; 1 HHM graduated from Junior High School; 1 HHM did not go to school; 5 HHMs are still at school (3 Elementary School students and 2 junior high school students). In this household, 2 people work. 1 person works as maid with monthly income of Rp.80.000,- per month. 1 person works as motorcycle taxi driver with monthly income as big as Rp.750.000,- per month. Last week food consumption was Rp.92.000,- consisted of rice, yam, salted fish, vegetable, nuts, oil, drink ingredients, spices and tobacco. Non food consumption: rent house is Rp.1.500.000,- per year; electricity and firewood Rp.576.000,- per year, goods and services is Rp.450.000,- per year; unexpired goods Rp.1.500.000,- per year; tax is Rp.10.000,- per year and party expenses is Rp.100.000,- per year.

16. HHID 678050000,

The total number of HHM is 6 people. HHH is 42 years old. Spouse of HHH is 35 years old, 3 women HHMs and one 4-year-old boy. Total area of the house is 24 m2 with bamboo wall and roof tile, soil floor, does not have toilet and lighting uses non-metered PLN electricity. HHH did not graduate from Elementary School (up to Primary 5 only); spouse of HHH has never been to school and 4 people have not gone to school. There are 2 people work in this household. HHH works in a motorcycle repair garage with monthly income of Rp.200.000,- per month while spouse of HHH works as cassava farmer with monthly income of Rp.25.000,-. Last week food consumption: rice Rp.73.500,-, vegetable Rp.7.500,-, oil and fat Rp.3.000,-, drink ingredients Rp.4.000,-, spices Rp.1.500,-, food and drink Rp.2.000,- and tobacco Rp.7.000,-. Non food consumption per year: house rent Rp.600.000,-, water Rp.600.000,-, bathing soap Rp.36.000,-, health expenses Rp.10.000,-, and ready wear clothes Rp.60.000,-

17. HHID 842050000,

The total number of HHM is 10 people. HHH is 60 years old; spouse is 58 years old, and 8 other HHMs. The total area of the house is 61 m2, with iron sheet roof, wood panel wall; floor is not dirt/soil, squat toilet and lighting uses 450 watt PLN electricity. HHH and spouse of HHH have never been to school. 1 HHM is still in the Elementary School. 2 HHMs are still in the Junior High School. 1 HHM is in MI (Islamic Elementary School). 2 HHMs have graduated from Elementary School and 2 HHM have not yet gone to school. There is only one working person in this household. That person works as a farm laborer with monthly income of Rp.63.800,-. Last week food consumption was as big as Rp.120.250,- consisted of rice, fresh fish and salted fish, egg, milk, vegetable, oil and fat, drink ingredients, spices and noodles. Non food consumption for a year: rent of house Rp. 1.200.000,-, electricity bill and kerosene Rp.216.500,-, goods and services (bathing soap, cosmetics, transportation) Rp.160.000,-, health expenses Rp.50.000,-, ready clothes Rp.105.000,- unexpired goods Rp.17.000,-, tax Rp.5.000,-.

18. HHID 842010000,

The total number of HHM is 5 people. HHH is 44 years old; spouse of HHH is 43 years old. The total area of the house is 56 m², with iron sheet roof, wood panel wall, not dirt/soil floor, does not have toilet, and lighting uses 900 watt PLN. HHH did not graduate from Elementary School (second grade) and spouse of HHH graduated from Elementary School. 1 HHM is still in the Elementary School. 1 HHM graduated from Elementary School and 1 HHM graduated from Junior High School. There are 3 people who work as laborers in the peanut farm with monthly income of Rp.237.600,-; however, 2 people are unpaid workers. Last week food consumption was as big as Rp.47.400,- consisted of rice, fresh fish, vegetable, fruit, oil, drink ingredients (sugar and coffee), spices, noodles and tobacco. Non food consumption: rent for the house is Rp.1.000.000,- per year, electricity bill, kerosene, firewood Rp.300.000,-, goods and services Rp.282.000,-, ready to wear clothes Rp.244.000,- per year, tools Rp.17.000,- per year and vehicle tax Rp.225.000 per year.

19. HHID 842020000,

The total number of HHM is 6 people. HHH is 34 years old. Spouse of HHH is 26 years old. Total area of the house is 75 m² with iron sheet roof, wood panel wall, squat toilet, lighting uses 450 watt PLN electricity. HHH and Spouse of HHH graduated from Elementary School. There are also 3 HHMs who are still in the Elementary School and 1 HHM does not go to school. There is 1 person who works as corn farmer with monthly income of Rp.127.100,-. Last week food consumption was as big as Rp.89.250,- and it included rice, fish, egg, milk, vegetable, nut, fruit, oil, sugar, tea and coffee, spices and tobacco. Non food consumption: house rental is Rp.300.000,- per year, electricity, kerosene and firewood Rp.124.500,-, goods and services Rp.71.000,- per year, education expenses Rp.50.000,- per year. Shopping for shoes and detergent Rp.120.000,-, per year; tools Rp.15.000,- per year.

20. HHID 384060000,

The total number of HHM is 5 people. HHH is 56 years old. Spouse of HHH is 36 years old and 4 other HHMs. HHH did not graduate from Elementary School (up to primary 3 only). Spouse of HHH did not graduate from MI (up to primary 1 only). 2 HHM are still in the Elementary School and 2 other HHMs have not gone to school. There is only 1 person in this household who works (spouse of HHH). She works as maid with monthly income of Rp.40.000,-. Total area of the house is 12 m² with roof tile, brick wall and not soil floor. There is squat toilet but it is owned by many people. Lighting uses non-metered PLN electricity. Last week food consumption was as big as Rp.43.400,-: yam Rp.1.500, salted fish Rp.2.000,-, meat (chicken) Rp.3.000,- vegetable Rp.7.000,-, nuts Rp.8.000,-, oil Rp.3.000,-, spices Rp.3.000,-,crackers and noodles Rp.5.600,-, food and drink Rp.28.000,-, tobacco Rp.1.200,-. Non food consumption per year: rent of house Rp.720.000,-, goods and services (bathing soap) Rp.29.600,-, school expenses Rp10.000,-, ready to wear clothes and bathing soap Rp.176.000,-.

THE DIFFERENCE EXPENDITURE 2007-2010 (98 % HIGHEST DIFFERENCE)

10 HOUSEHOLDS SITUATION

The 10 explanations of households in this case do not mean that these 10 households have a highest value because there are also households with the highest point but have been listed in the list of “the total highest expenditure (98%)” and in the list of “Highest per capita expenditures (98%)” thus there are only 10 explanations in this case. Households with the highest value that are also listed in the “list of highest total expenditures” are as follow; 106080000,675120000,322050000,407010000,752070000,242090000,800030000,346080000,251100000,906010000,061110000,220080000 . Meanwhile those who are also listed in the list of highest per capita expenditures are as follow; 810080000, 463030000, 739090000, 247050000, 135050000, 126070000, 118010000, 792100000, 794110000, 720030000, 717090000, 824110000, 341090000, 501040000, 061040000,718160000.

1.HHID 360110000

There are 2 HHMs in this household respectively 50 years old and 48 years old. Both HHM are currently working. HHM 01 works as a businessman with total income of Rp.1.100.000/month. HHM 02 works as family worker. This household lives in their own house with total area of 108 m². The house uses roof tile, has brick wall and its floor is not dirt/soil. This household uses protected well water to fulfill its daily necessities and has own toilet in the form of squat toilet and is equipped with tank/spal. This household uses lighting from PLN as big as 450 watt. Food consumption for last week cost Rp.229.500. The biggest consumption were for: clove cigarette cost Rp.50.000 and meat cost Rp.35.000. The total value of non food consumption for this household is Rp.45.128.000 per year. Couple consumptions that are considered big: electricity-gas-water bill expenses is as big as Rp.1.584.000/year; maintenance/light repair is Rp.108.000; buying good is Rp.1.016.000/year; education expenses for their child who just goes to university is as big as Rp.24.600.000; buying household appliances/tools/vehicle and electronic costs Rp.14.200.000 thus expenses for tax also increases which is Rp.358.000/year.

2. HHID 172150000

Total number of HHM in 2007 and 2010 is still the same which is 1 person. HHM does not work. According to interviewer's note, HHM's child help HHM fulfills his or her own daily necessities. This household stays in a 63 m² house. Status of the house is own self. The house uses iron sheet roof, brick wall and the floor is not made from soil/dirt. This household uses protected water well to fulfill its daily necessities. The house has own toilet in the form of squat toilet and is equipped with tank/spal. Lighting in this household uses 450 watt electricity from PLN. Weekly consumption in the household costs Rp.176.500 with the biggest consumption lies on rice which costs Rp.63.000. For non food consumption, the biggest consumption is house rent which costs Rp.24.000.000/year thus total expenditure is Rp.26.801.700.

3. HHID 413110000

Total number of HHM in 2007 is 4 people; however the total number of HHM in 2010 is 2 people. One is 70 years old and the other one is 13 years old. This household stays in a 378 m² house that is owned by HHM himself/herself. The house uses roof tile and has brick wall. Its floor is not made of dirt/soil. This household uses pipe/running water to fulfill its daily necessities. It has its own toilet in the form of squatting toilet and is equipped with tank/spal. Lighting in this household uses 900 watt PLN electricity. Food consumption in this household

costs Rp.223.850/week with the highest consumption for meat Rp.34.000, egg and milk Rp.37.000, ready to eat food and drink Rp.36.000. For non food consumption in this household, it costs Rp.61.024.000 with the highest consumptions for electricity-gas-water bill which costs Rp.2.064.000, buying goods and services that costs Rp.4.128.000, health expenses that cost Rp.50.880.000 which is for HHM 01 who stayed in the government and private hospital for 35 days. None of this HHM is working according to the interviewer's note. HHMs get money from his or her child in order to fulfill their expenses.

4. HHID 749110000

There are 4 HHMs in 2007 but only 3 HHMs in 2010. This household occupies an 84 m² house. The status of the house is own house. The house uses iron sheet roof with brick wall and the floor is not made of dirt. This household uses protected well spring to fulfill its daily necessities and has its own squat toilet that is equipped with septic tank. This household uses lighting that comes from PLN as big as 450 watt. Food consumption in this household for a week is as big as Rp.472.350 per week. The biggest food consumptions are for fruit Rp.51.000; fish Rp.75.000; alcohol drink Rp.90.000; tobacco/cigarette Rp.140.000. Non food consumption is as big as Rp.78.265.388 with the most consumption for electricity-kerosene-water bill which costs Rp.2.518.000/year, buying goods and services Rp.27.564.000, buying clothes-shoes-detergent costs Rp.2.670.000. The biggest expense is for buying motor vehicle which costs Rp.2.020.000. In 2010, there is an expense for health insurance that costs Rp.231.388. HHM 01 works in the health department with income as big as Rp.2.900.000/month. HHM 02 works in a shop with income as big as Rp.500.000/month.

5. HHID 883160000

There were 6 HHMs in 2007; however, there are only 4 people in 2010. HHM 02 does not only work as household's care taker. Regarding food consumption, interviewer made a mistake in adding couple food consumption variables: B7AR(1) is written Rp.280.000/week, it should be Rp.40.000/week, B7AR(3) is written Rp.700.000/week, it should be Rp.140.000/week, B7AR(4) is written Rp.330.000/week, it should be Rp.210.000/week, B7AR(5) is written Rp.37.500/week, it should be Rp.7.500, B7AR(6) is written Rp.150.000/week, it should be Rp.26.500/week, B7AR(8) is written Rp.245.000/week, it should be Rp.35.000/week, B7AR(10) is written Rp.82.000/week, it should be Rp.16.000/week, B7AR(11) is written Rp.14.000/week, it should be Rp.2.000/week. Therefore, total consumption in a week should be Rp.1.854.000, but in reality it should be Rp.493.000/week. For non food consumption per year is as big as Rp.5.410.000/year, this happens because there is a big expense on electricity-gas-firewood that costs Rp.2.550.000.

6. HHID 015130000

There were 2 HHMs in 2007. However there is only 1 HHM in 2010. This household occupies a house with total area of 54 m². The house is owned by HHMs themselves. It uses iron sheet roof, wood panel wall, and the floor is not made of soil/dirt. This household uses protected well water to fulfill its daily necessities. It has its own squat toilet that is equipped with septic tank. Lighting in this household uses 450 watt PLN electricity. Total food consumption in this household for a week costs Rp.440.500/week. The biggest food consumption is for buying ready food and drink which costs Rp.303.000. However for non food consumption, the total number increases in a year because there is a possibility that interviewer entered education expense for non HHM which cost Rp.100.000/month and Rp.3.700.000/year. For this case, there will be data modification. Supposedly, education expense for 1 month and 1 year is not included. Interviewer is mistakenly interpreting the concept. Actually this household has been revisited but could not be revisited that day because respondent was out of the house that day. Health expense is Rp.600.000 for one year. HHM 01 works in a farm with monthly income of Rp.1.255.000.

7. HHID 020030000

There are 2 people in this household during 2007 as well as 2010. This household occupies a 63 m² house. The status of the house is own house with iron sheet roof and brick wall. The floor is not made of dirt/soil. This household uses rain water to fulfill its daily necessities. It has its own squat toilet that is equipped with septic tank. Lighting uses 450 watt PLN electricity. Food consumption that is considered big is for fish consumption which costs Rp.49.500. For non food consumption, the highest expense is for health expense which costs Rp.50.250.000 because HHM 01 has to stay in a private hospital for 60 days and in a government hospital for 30 days. For electricity-kerosene expense, it costs Rp.1.956.000/year. For buying goods and services, it cost Rp.2.040.000/year. HHM 02 works in an agricultural field with monthly income of Rp.190.000; however HHM 02 works as family worker.

8.IDRT 044090000

There were 4 HHMs in 2007 meanwhile there are only 2 HHMs in 2010. HHM 01 works as a rice field farmer with monthly income of Rp.1.410.857. This household supposedly needs to be revisited, but when this household was revisited, respondent was not at home. Respondent has a small hut in his or her rice field. Respondent lives there for couple days and the distance is quite far approximately 7 km to respondent's place. There are couple variables that need to be modified such as B7AR(13) from Rp.554.500 becomes Rp.154.500 because the value of Rp.400.000 is actually rice pack that is not consumed by non HHM, thus the total food consumption changes from Rp.973.000 to Rp.573.000. Modify data for variable in B7BR1(17a) from Rp.605.000 to Rp.25.000, B7BR2(17a) from Rp.7.260.000 to Rp.300.000. Rent of house is Rp.25.000/month or Rp.300.000/year, however other value is for non HHM rental. Modify variable B7BR1(24) from Rp.180.000 to 0, B7BR2(24) from Rp.720.000 to 0. There is a big expense for 1 year education that cost as big as Rp.10.256.000 for child's education whose is not HHM anymore (move 07/2008 and 07/2009) but it cannot be modified because there is an assumption that the child who moves out in within the last one year range (27/2009). In the food consumption, there is a big value which is rice consumption as big as Rp.120.000 and fish Rp.77.000. After being modified, food consumption becomes Rp.573.000/week and non food consumption becomes Rp.18.071.000.

10. HHID 430090000

There were 4 people in this household in 2007; however there are only 2 people in this household in 2010. HHMs are 30 years old and 18 years old. HHM 01 works as supervisor for housing labors project with monthly income of Rp.4.000.000. HHM 05 does not work. HHM 01 gets divorce with HHM 01, and then HHM 02 with the children (HHM 03 and HHM 04) moved out in the month of 98/2009. Food consumption for a week in this household costs Rp.526.300 with the most expenses go to drink ingredients Rp.50.000, ready to eat food Rp.48.000 and tobacco/cigarette Rp.242.000. However, for non food consumption costs as big as Rp.34.796.000 with the most expenses go to good and service Rp.14.790.000 (for phone credit Rp.860.000x12=Rp.10.320.000), health expenses Rp.2.194.000 (HHM 05 was hospitalized in the private hospital Rp.2.200.000), unexpired goods, buy tools-mobile phone-refrigerator Rp.10.000.000.

Explanation on lookup result checking 5 cases per items

Case Type A (Greater than 2 Deviation Standard)

Code	Label (In English)	Explanation on lookup result	The Solution
1	Cereals	Mistaken concept, as the rice noted is rice bought by respondent, not the consumed rice.	Modification made after confirmation to respondent
		The growing number of art has increased the amount of rice consumption	No modification
2	Tubers	The numbers noted on the questionnaire (17.000, 15.500, 14.700, 23.000, 25.000) are still reasonable. Maybe it is because the value in 2007 was small, and it is considered as great now. The food on this item is consumed by household irregularly, sometimes a little, sometimes many, and sometimes nothing at all, that makes great fluctuation.	No modification
3	Fish	If we examine the interviewer's notes on the margin, this household consumes fish everyday. Thus, it is normal if the consumption value for fish is great.	No modification
4	Meats	This household consumed cow/lamb meat which is more expensive than the other meat.	No modification
5	Egg and milk	There are new art, a toddler, in this household that it increases the consumption expense for milk.	No modification
6	Vegetables	There are some items of food that have expensive prices such as chilly and pepper that also increase food expense.	No modification
		They have great expenses as there are many food items to be consumed.	No modification
7	Pulses	The expense value is still reasonable considering the amount and the composition of the household members.	No modification
8	Fruits	There are big expense for expensive fruit like durian and also many other kind of fruit that consumed in this household during the last one week (it was fruit harvest time)	No modification
9	Oil and Fat	The great amount of frying oil is due many food materials that need to be fried before they consume. We have confirmed it to respondent, and the amount written on the questionnaire is indeed correct.	No modification
10	Beverage Ingredients	The great amount of frying oil is due many food materials that need to be fried before they consume. We have confirmed it to respondent, and the amount written on the questionnaire is indeed correct.	No modification

Code	Label (In English)	Explanation on lookup result	The Solution
11	Spices	Respondent who answered the questionnaire was male that he made estimation which were too far from the reality.	No modification
		The purchase of various spices is usually in great amount at once. Thus, respondent could not estimate the exact amount they have consumed for the last one week and their estimation was too big.	
12	Others consumption	If we look at the amount and the number of the art, the value for chips and noodles are reasonable (18.000, 28.000, 38.000, 48.000)	No modification
13	Prepared foods and beverages	The value for this item is big because the value of food materials (raw food) is small.	No modification
14	Alcoholic beverages	There is a great value in this item but it has not confirmed yet (margin notes $1.500 \times 7 \times 30 = 315.000$). The other value noted on the margin (14.000 and 10.000) are still reasonable because some household in certain areas consume this kind of food/drink regularly (tuak/traditional drinking water contains alcohol)	As the interviewers are riris/wahyu, this household are revisited.
15	Tobacco and betel	There is addition of male art in this household that increased value for this item. There are some RT consume cigarette for 3 to 4 packs a day and we assumed there are more than one art in that RT who smoke.	No modification
16	Total food expenses	The addition of ART is significantly influence the food amount of last one week.	No modification
		There are several mistakes in the calculation of value noted on the margin that the value was greater than it should be.	No modification
		Interviewer made mistake in writing down the food purchased, rather than the food consumed.	No modification
17a	Housing expenditure	The prices mentioned are mostly the house owner's estimation. It was probably greater than it should be. But if we asked to other people, we might get different price estimation.	No modification
		Interviewer's fault was in calculating the rental house price for a year. For instance, the estimation of house rental price monthly is 30.000, but he wrote 3.600.000 annually.	Data modification

Code	Label (In English)	Explanation on lookup result	The Solution
17b	Household facility	There are some interviewers who included packed water purchase into 17b. In fact, it should be included in option of instant food/water.	As long as there is no double counting, no data modification was made.
		There are extra expenses for fuel or gasoline for non-electrified households (gen set, gasoline lamp, other from PLN) spent more than those who use electricity from PLN.	No modification
		There are households who have expense for water, maybe mineral water. But they answered b6r6a about drinking water source is protected well, and b6r7 about not buying drinking water. Thus, we have tried to confirm it to respondent to gain more information about this case but the phone number is unreachable.	We have tried to contact respondent via phone, but we failed. Thus, we did nothing for this case.
17b	Household facility	Findings in 17b for out of range cases: (A) Findings in idrt 643100000 (but this idrt did not appear on the list from Lia. A. Is where respondent's expenses for electricity per month is considered too big, 500.000/month. Based on this finding, we made confirmation to respondent via phone and we learned that the expense mentioned above is the electricity expense including electricity of their home industry (convection). The expense for the household itself is only about 225.000.per month. The mistakes made is significantly influenced the value in the column of the questionnaire.	We made data modification after confirmation to the household/respondent via phone.
17c	Housing maintenance expenditure	Mistaken concepts occurred on house maintenance and minor repair. Some interviewers included house major repair, and even included building new house. We found this information based on the interviewer's notes on the margin and also on the result of the confirmation to respondent.	We make modification on the data if we can make confirmation to respondent, and we also make modification on the data based on interviewer's explanation if respondent is unable to reach.

Code	Label (In English)	Explanation on lookup result	The Solution
18	Miscellaneous goods expenditure	First; there are households that have big expense for recreation	No modification
		Second; some households have high telephone bill (maybe it related to household member's way of life)	No modification
		Third; some household have high expense of their transportation cost. However, this is a reasonable case as there are several households paid vehicle tax with large amount. From this, we can assume that these households have more than one vehicle, maybe motorcycles or cars and also the fuel cost. Beside that, it is can be cause by there is a school age art in the household.	No modification
		Fourth, although the nominal is small, we found mistaken calculation on the margin.	Data Modification.
		Fifth; there are cases of consumption expense that is considered as too high. For instance, detergent for 3 ART is 53.500. for the last month is considered too high. Although there are some calculation notes on the margin, we could not find any clearer information to explain this case.	We left the data as it is because there is no other information found. Beside that, the nominal was not too high.
18	Miscellaneous goods expenditure	Interviewer also made mistake in putting the transportation expense which should be written on individual book (employment section), rather than on consumption section item 18. On the interviewer's note of consumption section item 18, he/she wrote transportation expense for 10 days multiplied by 10 liter of fuel (5000) and multiplied again by 12. This value should be noted on the employment section, because it related to respondent's job that is to collect fish in the sea.	The transportation value in column 1 was excluded from item 18, and so was for column 2. (Data modification was made to b7br1 item 18 from 509.000 into 9.000. and b7br2 item 18 from 6.108.000 into 108.000.
19	Education expenditure	There is one art in this household who is still studying in college (diploma/bachelor degree) that usually cost more than 2 million a year.	No modification
		Mistaken concept occurred to pocket money which is included in education fee. Mistaken concept also occurred to education fee for child who has moved out (no longer ART in the household)	Modification was made after we confirmed it to interviewer/respondent

Code	Label (In English)	Explanation on lookup result	The Solution
20	Health expenditure	There were one or more than one art in the household who have been hospitalized in the last one year due to illness such as stroke, hypertension, lung, dengue, tuberculosis, brain damage, and accidental injuries.	No modification
		Interviewer made mistake in writing the amount of doctor cost. He/she wrote 50.000.000 rather than 50.000.	Modification was made after we confirmed it to interviewer/respondent
21	Clothing expenditure	There is addition of ART in the household that increased value on option 21.	No modification
		There was a party/ceremony in the household in the last one year that increase the expense for clothing related to that party/ceremony	No modification
		The household members tend to buy cloth several times in the last one year. It can be seen from the interviewer's notes on the margin about. No wonder the amount was great.	No modification
22	Durable goods expenditure	There was purchase for electronic stuffs, jewelry, vehicles, and furniture in the last one year (the vehicles worth more than 10 million)	No modification
23a	Taxes	The tax amount is high because they have vehicle, whether motorcycles or cars. Motorcycle tax usually cost more than 100.000, while car tax usually more than 1 million.	No modification
23b	Insurance	First, there is value of insurance premi on the margin notes that belong to investment such as prudential, bumi putera dan other education insurance. It should be excluded from item 23b.	Modification on the data into 0
		Second: the value noted on the margin included insurance claim received by respondent. This information gathered from confirmation to respondent itself and we should not include this in item 23b.	Modification on the data into 0
		Third; the value noted was the estimation of jamkesmas. This information gathered from conformation to respondent via phone and we should not include it in 23b.	Modification on the data into 0
		Aside from those issues, we also found households with unreasonable value of expense, if we look at the nominal and the number of ART. However, there is no mistaken concept made by interviewer.	No modification

Code	Label (In English)	Explanation on lookup result	The Solution
24	Festivities and ceremonies expenditure	For party/ceremony that cost 2-3 million, we checked again the questionnaires and we found no mistakes on that value. The expense was for non-food expense (based on margin notes)	No modification
		The mistaken concepts found in the household are as follow: 1. interviewer included the charity of other's wedding party 2. interviewer included all expense spent for a party/ceremony including food expense. In this case, there are usually no margin notes about food expenses.	Modification was made after we confirmed it to interviewer/respondent
25	Total non food	In the last one month, household purchased vehicles and electronic stuffs that usually cost at least 13 million for vehicle, and electronic stuff for at least 1 million	No modification
		The high estimation of the rental house price reaches 5 million per month or 60 million per year.	No modification
		High expense for telephone bill and transportation cost	No modification
25	Total non food	The addition of ART causes increase of the food expense, particularly for option 18, 19, 20, 21, and 22.	No modification
		This household held party/ceremony that cost a lot of money for food.	No modification
26	Average montly food expenditure	The addition of new ART in the household increased the expense for food even greater.	No modification
		Interviewer made mistakes in calculating the value noted on margin. When we re-calculate it, we found differences with the calculation conducted by PIP.	Modification was made based on the calculation on the margin.
		The estimation of fruit prices were too high. They did not know exactly the prices of fruits because they usually pick them on their own garden or given by others.	No modification
27	Average montly non food expenditure	Household spent a lot of money in the last one year for vehicles, hospital cost (some ART was hospitalized), part/ceremony, and education fee as there is one art who is still studying in at college.	No modification
		The addition of ART in the household increased the expense value for this item.	No modification

Code	Label (In English)	Explanation on lookup result	The Solution
28	Average montly household expenditure	RT/KRT moved out and lived with other household member who have large ART number (more than 4 members). Thus, the characteristic of the household written on the questionnaire is the characteristic of the new household that they are living in, rather than those of the old household.	No modification
		The addition of new ART in this household increased the expense value for this item.	No modification
		Explanation on option 26 and 27 is also for option 28.	No modification

Cases Type B (smaller than 2 Deviation Standard)

Code	Label (In English)	Explanation on lookup result	The Solution
1	Cereals	Household usually consume other food that contain carbohydrates such as cassava (3000), noodles (21.000) beside rice and grain (73.500). That is why the consumption of grain in that household with 4 art is below the range.	No modification
		Interviewer made mistakes in calculating the value on the margin and he/she wrote greater value than it should be.	Data Modification
2	Tubers	Most of the value are 0 or small because household never or rarely consume food in this item. .	No modification
3	Fish	The value for fish in this household is small because they consume other meat such as chicken, eggs, or soya bean cakes.	No modification
4	Meats	The value for meat in this household is small because they substituted it with other food such as fish, eggs, and so on.	No modification
5	Egg and milk	The small consumption value caused by no toddler anymore in this family that they did not spend money for milk, and also because they choose cheaper food to eat.	No modification
Code	Label (In	Explanation on lookup result	The Solution

	English)		
6	Vegetables	The reduction of art number in this family influenced the consumption value for this item.	No modification
		As the vegetables were picked up from their own garden, they did not know the price exactly and made estimation that too high.	No modification
7	Pulses	The small value of food expenses are still reasonable because after we checked the other food items, we found that there are other foods containing protein that have greater value.	No modification
8	Fruits	They could not consume fruit all the time because they need to wait until it harvest time, and they made estimation of the fruit price that is too low.	No modification
9	Oil and fat	The consumption of frying oil is small because they did not really need it to fry their raw food. After we examined the instant food items, we found the value is great indeed.	No modification
10	Beverages ingredients	Food consumption value for sugar, coffee, and tea is still reasonable for the number of ART in the household.	No modification
11	Spices	HH bought usually bought large amount of spice for stock. Small value probably because weekly consumption was too little.	No modification
12	Others consumption	Consumption for this item (<i>kerupuk, mie, makaroni</i>) was small because other carbohydrate consumption like rice, wheat and potate was relatively bigger.	No modification
13	Prepared foods and beverages	Consumption for this item was affected by existence/non existence of school children (pocket money included in this item). Small hh consumption also affected small consumption for this item	No modification
14	Alcoholic beverages	Spouse of hh head answered for this book so probably didn't know much about consumption of this item	No modification
15	Tobacco and betel	Member of hh moved out (male) and it probably decreased consumption of this item accordingly	No modification
16	Total food expenses	Reduced ART number because died or moved out also reduce food consumption in a week	No modification
		Mistake by interviewer in calculating margin. Inputed value was smaller than real value	Modified

Code	Label (In English)	Explanation on lookup result	The Solution
17a	Housing expenditure	First : value in pqx as inputed value. Second : No additional information on this item. Most ownership is own ownership so rent value was based on respondent's estimation which related to respondent's perception and was hardly measurable.	No modification
17b	Household facility expenditure	For past one month, a household paid only for electricity and kerosene in a very little amount. we refer to their food consumption and found that this household rarely cooked and mostly consumed cooked dishes. This hh didn't have home telephone line	No modification
		A household paid very little amount for electricity but an information said respondent enjoyed electricity from PLN without a meter. Kerosene consumption was normal. No phone bill because didn't have fix telephone line. No indication for misconception. Expenditures seemed relevant with number of ART and hh condition A	No modification
		Normal consumption value for electricity, gas, kerosene, fire wood. Hh didn't have fix telephone line	No modification
17b	Household facility expenditure	one household had illogical consumption for kerosene Rp. 60.000,- (5.000 x 12). Awkward note in cp margin B7BR1, it said expenditure for kerosene in pasts month=10 x 500, and for 12 month= 5000 x 12. Awkward value for kerosene Rp 500. After reconfirmed to respondent, expenditure for kerosene=2 kg/day (local preference unit for kerosene is kg), rp 5000/kg. ART03 also informed that the HH consumed kerosene 2 kg/day. This consumption was relevant with member of ART(8 persons), building 130m2, and electricity consumption 122.000 per month	Modified data after reconfirmed to respondent
17c	Housing maintenance expenditure	Value in pqx as in inputed value. Only one household recorded value (300.000), other household=0. These households probably didn't renovate in past 12 months (in our concept) .	No modification
18	Miscellaneous goods expenditure	First : consumption decreased as member of HH decreased	No modification
		second: if HH didn't have private vehicle (motor/car) interviewer didn't probe much for transport expenditure	No modification

Code	Label (In English)	Explanation on lookup result	The Solution
18	Miscellaneous goods expenditure	Third ; interviewer didn't much probe for item by item in good/service, especially for bathing utilities. Some interviewers even only recorded expenditure for bathsoap (see margin). interviewer only considered bathsoap instead of bathsoap and other bathing utilities	No modification
		For 18(2), interviewer seemed to multiply value in items 18(1) by 12. Though expenditure should differ for each item per month	No modification
19	Education expenditure	Expenditure for education depended on members of hh who still studied. For value below range, probably because no more ART studied in 2010	No modification
		Hh paid no school fee for elementary and secondary school because they're free. HH only paid for books, additional course, extracurricular, etc.	No modification
20	Health expenditure	There were some cases of different values between individual book and household book on health expenditure. However since the information came from different respondent, there were no changes for these cases	No modification
20	Health expenditure	It was also possible that interviewer didn't probe much as in individual book, health expenditure was significant but in hh book the expenditure was small. But these cases sometimes happened as the information came from different respondent with different knowledge.	No modification
21	Clothing expenditure	First : no purchase of clothes. Normally, cloth purchase contribute large portion of expenditure.	No modification
		Second : though below range but the expenditure looked normal, no additional information	No modification
		Third : interviewer forgot/didn't ask or record expenditure on washing soap because there's one case with expenditure for washing soap in past 12 months=0. This was impossible because a household must at least spend for washing soap. An interviewer named zuhad included washing soap expenditure in column 1 (past 1 month) but also entered the value in column 2 (past 1 month) without multiplying it by 12. But this was possible because value of bathsoap was included in item 18	No modification

Code	Label (In English)	Explanation on lookup result	The Solution
21	Clothing expenditure	fourth, there is one ART who moved out that influenced the small amount of household consumption value.	
22	Durable goods expenditure	Most value= 0, no expenditure for this item	No modification
		HH only bought small/cheap HH equipments like broom, umbrella, kitchen utensils, etc, worthed less than Rp 100.000	No modification
23a	Taxes	Inputed value as margin note. No indication of misconception	No modification
23b	Insurance	Most value = 0 because no expenditure for this item. Refer to individual book, respondents work as farmer or civil servant (PNS). Some PNS has asks but asks is not included in this item	No modification
24	Festivities and ceremony expenditure	Most value = 0, because the ceremony/party was incidental, not always held in a household	No modification
25	Total non-food	Probably lack of probing, health expenditure not matched with individual book. Many items with "0" value because there were no expenditures on those items. For example : tax (living in official house and didn't have private vehicle), didn't pay for housekeeping, no party expenditure and no education expenditure..	No modification
		Significant value in item 22. There's also case when interviewer inputed month expenditure to year expenditure. Example : in past 1 month, respondent bought computer desk Rp 550.000 and bought handphone Rp 850.000 in past 12 months, but interviewer only recorded handphone purchase as respondent's expenditure in past 12 months	Modified data in item 22 column 2
26	Average montly food expenditure	Households interviewed by Riris, North Sumatera	All items for consumption are revisited because interviewer misconcept.

Code	Label (In English)	Explanation on lookup result	The Solution
26	Average montly food expenditure	Average expenditure for food/month matched with details in B7AR, based on margin notes there's no miscalculation : Rp. 233.250,for each items, was normal for 3 ART : KRT=55 years old, PKRT=49 years old and 1 new ART baru, grandchild 3 years old . Additional information : KRT's difference name between 2007 and 2010, new ART (ART 03) has lived in the household since November 2006	No modification
		Total expenditure for food in a month matched with detail in B7AR. Little mistake in margin calculation : cp margin B7ARX(6)= Rp. 88.000,- but it was written Rp 85.000. HH didn't consume meat. Meat price was relatively higher. HH consumed more vegetables which were cheaper than meat. HH expenditure for food was relatively small, probably because HH tended to cook themselves. Additional information : see individual book, ART 01 works as farm labor. In past 1 month worked for 7 days.	Modiefied data : B7AR row 6, from rp.85.000 corrected to rp.88.000
27	Average montly non-food expenditure	For item 17b, this HH only had electricity expenditure, probably because HH used non purhcase firewood, HH didn't consumed gas and bought water. Electricity consumption in the past 12 months was little because HH only subscribed 450 Watt power from PLN. House maintenance=0, this was possible, as well as for insurance, party and ceremony utensils.in column past 12 months, we found a doubtful information in margin for school fee. The result affected item 25/27. In the HH, only one ART went to school, madrasah aliyah, grade 3,but the information in margin=73.000x8(should be multiplied by 12 months). reconfirmation from ART 04 (16/04/10 at. 08.35) said that the school fee was paid in advance for 1 year, so the difference 73.000 x 4 months in column past 12 months = 292.000. Other items were ok.	Reconfirmation to respondent for school fee. Modified answer in B7BR2 (item 19) from 1.324.000 to 1.616.000

Code	Label (In English)	Explanation on lookup result	The Solution
27	Average montly non-food expenditure	Related item for item 19 (education cost), seemed awkward : 3 ART in this HH went to school, 2 were in elementary school and 1 in university/semester 1. Education expenditure in 1 past month column=0, in past 12 months= 57.500. Reconfirmed to respondent by phone on 19/04/10 at 07.000 am : for 12 past month column=57.000 only for 2 ART in elementary school, while for ART in university was not recorded yet : admission fee Rp.1.500.000 and school fee Rp.425.000 x 2 semester, they were all paid so should be recorded in 12 past month column. For health item, the value was little but it's relevant with information in individual book. For item 17,the value was also little (respondent's perception). For insurance, party and ceremony=0 but it's OK. Other items were OK referring to number of ART, 15, (9 new ART, 5 children)	For item 19 (education cost) reconfirmed to respondent and data modified
27	Average montly non-food expenditure	2 HH with 2 ART moved out, education cost=0, because no ART in these HH went to school. For insurance and ceremony item= 0. Values for other items were OK, though we found few mistakes in the calculation. For item 17b in past 12 month column= rp.1.236.000 but according to notes in margin it should be Rp 1.245.600, so average expenditure for non food in a month=1.686.233 instead of 1.685.433.	Modified B7BR2 (17b) from 1.236.000 to 1.245.600
28	Average montly household expenditure	Average HH expenditure in a month decreased compared to 2007. Referring to information in questionnaire, KRT died in past 12 months.For item 24 (party and ceremony)=0 and this was normal. So was for item 17c (house maintenance and little repair), for item 15, tobacco and betel, may be because KRT had died. In general, HH expenditure decreased because number of ART decreased. In B7AR.15 for item 18(miscellaneous goods and services) B7BR1 and B7BR2, interviewer probably didn't probe well for bathing utensils because only recorded bathing soap, other utensils were possible, either for transportation cost. Other items were OK concerning number of ART and normal expenditure in a month	No modification

Code	Label (In English)	Explanation on lookup result	The Solution
28	Average montly household expenditure	There's awkwardness in margin information so this hh was reconfirmed by phone. In B7BR1 and B7BR2 no 17b, electricity bill= Rp 3.500/month after reconfirmed, respondent answered Rp 35.000/month. Respondent had fixed telephone line but no phone bill, after reconfirmed respondent answered Rp 40.000/month, for gas, respondent said Rp 15.000 but in pqx=14.000. no 18= miscellaneous good and services, respondent paid 3x 4.500/ month for shampoo, but in pqx=1.500 only for bathsoap, for shampoo not recorded yet., for handphone account= Rp1.500/week, after confirmation Rp 5.000/day. Item No 19 for education cost = Rp5.000, after reconfirmation=Rp7.500/month (religious school in the evening). For stationeries and books in past 12 months =Rp45.000, after reconfirmation=Rp200.000. Item no 21,clothes=RP12.000 in past 1 month, after reconfirmation,respondent had spent Rp 500.000 in last february/march. In past 12 months in pqx=Rp504.000 but after reconfirmation, respondent had just spent Rp1.000.000 only for Lebaran day purpose. Item. no 22 (durable goods)=0, after reconfirmation, 6 or 7 months ago respondent bought a tv set rp Rp1.200.000.Reconfirmation on Friday, 16 april 2010 at 13.48 wib. Previous respondent was male but in reconfirmation the respondent was female. This probably the reason for value below range	Reconfirm ed to HH by phone and modified data
28	Average montly household expenditure	In some HH there were miscalculation, B7AR no 11 in pqx= 7.000 but in calculation B7AR= 8.000. Mistake in addition operation, in pqx B7BR1 no 17 b=163.000,should be 393.000. In B7BR2 in pqx= 1.648.000,should be 4.408.000. Other addition mistak, in pqx B7BR2 no 18 =1.944.000, should be 2.064.000. All expenditure data were checked and they were the only mistaken data. Other value for other items were OK. In average HH experienced decrease in monthly expenditure relative to 2007. For item 5 (egg and milk), probably because ART no longer consumed baby's milk as ART had grown up. Or probably because interviewer didn't probe enough.	Modified data as corrected calculation

APENDIX B4 FLAG NOTES OF INCORECT DATA

No	Flag	Idrtc	Note
1	2	291010000	<p>Household head is SAHAK, but the correct name household head is HASAN.</p> <p>Case : Mistaken KRT, ALL OTHER ART CORECT, name of the ART was mistakenly exchanged with the neighbor's name.</p> <p>IDRT 291010000 with the number of ART is 10, all the ART names in the enumerated area were correct (except the KRT name). The mentioned KRT, SAHAK, is actually HASAN. He confessed that he has been interviewed in 2007.</p> <p>This IDRT was interviewed with the new KRT, HASAN. While SAHAK is considered moved (INHH=3) and the New ART, HASAN (INHH=5) is written as KRT.</p> <p>For KRT names in Blok II are replaced from 2002, 2007 and 2010.</p>
2	2	291080000	<p>Household head is TAMLIN, but the correct name household head is YANCIK.</p> <p>Case : Mistaken KRT, ALL OTHER ART NAMES CORECT, KRT names was mistakenly exchanged with the neighbor's name.</p> <p>IDRT 291080000 with the number of ART is 4, all ART names are correct and mentioned in the enumerated area (except KRT). The mentioned KRT, TAMLIN is wrong because TAMLIN is the name of the neighbor and the correct name is YANCIK. He confessed that he has been interviewed in 2007.</p> <p>This IDRT was interviewed with new KRT, YANCIK. While the name TAMLIN is considered moved (INHH=3) and the new ART YANCIK (INHH=5) is written as KRT.</p> <p>For KRT names in Blok II were replaced from 2002, 2007 dan 2010 .</p>
3	2	320030000	<p>Household head is DUL NAWAWI, but the correct name household head is KUSNI.</p> <p>Case : Unknown KRT, but ALL THE ART NAMES CORRECT.</p> <p>IDRT 320030000 with the number of ART is 8, all the names are corect and mentioned in enumerated area, except the KRT name. The corect KRT is KUSNI. According to KUSNI, he is the one who had been interviewed in 2007. meanwhile, DUL NAWAWI has never been in this area.</p> <p>This IDRT was interviewed by replacing DULNAWAWI into KUSNI. For KRT name in Blok II was changed in 2002, 2007 and 2010.</p>
4	2	320080000	<p>Household head is SURYADI, but the correct name household head is NAJIDIL ASYKAR.</p> <p>Case : Unknown KRT, but ALL THE OTHER ART CORRECT.</p> <p>IDRT 320080000 the number of ART is 2, all names were correct but the KRT is wrong.</p>

			<p>The correct name for KRT is NAJIDIL ASYKAR. He confessed that he has been interviewed in 2007. while the name of SURYADI has never been in this area.</p> <p>This IDRT was interviewed by replacing the name SURYADI into NAJIDIL ASYKAR. For KRT name in Block II was replaced in 2002, 2007 and 2010.</p>
5	2	320100000	<p>Household head is KHAIRUDIN, but the correct name household head is JUPRIS.</p> <p>Case : Unknown KRT, but ALL THE OTHER ART CORRECT.</p> <p>IDRT 320100000 jumlah ART 5, the names are corect and mentioned in the enumerated area. But the KRT name, KHAIRUDIN, is wrong and the corect one is JUPRI S. He has been interviewed in 2007 and the name KHAIRUDIN has never been in this area.</p> <p>This IDRT was interviewed by replacing the name KHAIRUDIN into JUPRI S. For KRT name in Block II was replaced in 2002, 2007 and 2010.</p>
6	2	320110000	<p>Household head is BURDAN, but the correct name household head is IBNU HAJAR.</p> <p>Case : Unknown KRT, but ALL THE OTHER ART CORRECT.</p> <p>IDRT 320110000 jumlah ART 4, the names are corect and mentioned in the enumerated area. But the KRT name, BURDAN, is wrong and the corect one is IBNU HAJAR. He has been interviewed in 2007 and the name BURDAN has never been in this area .</p> <p>IDRT was interviewed by replacing the name BURDAN into IBNU HAJAR. For KRT name in Block II was replaced in 2002, 2007 and 2010.</p>
7	3	034070000	<p>Household head is LERMINA BR SIJABAT</p> <p>Case : Unknown RT</p> <p>IDRT 034070000 KRT LERMINA BR SIJABAT with other ART TONI SIJABAT, RUNNI BR GIRSANG and JONNI SAGALA :no one in the neighborhood knows the name of the member of that household. The effort to search this household has been conducted since the process of the license, the main survey and the revisit of tracking. The informant contacted, from the head of the village and its people, to respondents who were interviewed in the main survey or tracking, and also the closest neighbor written on the list to all people around the enumerated area.</p> <p>Address, route or explanation of the location written on the list has been searched. However, no result was found about those names. There were similar names found in a household, yet the other ART names did not match and they confessed that they did not know those names and never been interviewed by interviewer from SEDAP in 2007. The names found are: Lerpiana Br Sijabat and Lermina brs Siboro.</p> <p>→ This RT not interviewed.</p>
8	3	770010000	<p>Household head is RAPIAH</p> <p>Case : Unkown RT</p> <p>IDRT 770010000 KRT RAPIAH with OTHER ART is BAU INTANG.</p> <p>KRT and ART are unknown. Two days of searching for them has given no result although</p>

			<p>many people such as head of village, head of surrounding, respondent and villagers have given their aid to find her. The address and location information are different because the address mentioned is in the other village. The search of that address has been conducted several times, but the household with characteristics as in preprinted was not found.</p> <p>And then the search was conducted again in Batangmata village based on the information of location, but the name was not there and the people around there were clueless and never heard the name in this village before. The name of the closest neighbor was unknown too.</p> <p>→ RT not interviewed</p>
9	3	770020000	<p>□ Household head is FAISAL.</p> <p>Case : Unknown RT.</p> <p>IDRT 770020000 KRT FAIZAL with OTHER ART NURBAITI, ANDI FARHENI and SUWANTO.</p> <p>KRT and ART are unknown. The address mentioned is different from the location information. The search has been conducted, yet no result found. There is Faisal in Batangmata village but the PKRT and ART are different. Beside that, the date of birth is different, and they have never been interviewed in 2007 by the Team from SEDAP. The PKRT of this household is Nurlia, not Nurbaeti as written on the preprinted.</p> <p>→ RT not interviewed.</p>
10	3	771090000	<p>Household head is MARISA.</p> <p>Case : Unknown RT.</p> <p>IDRT 771090000 KRT MARISA with OTHER ART is HASRAWATI.</p> <p>The unknown name has been inquired to the head of the village but no one knows about her and everybody assumed she never lived in this village. The address has been visited some times, still no one knows her. The information of the location and the address on the preprinted are correct, but the closest neighbor on the preprinted is wrong.</p> <p>→ RT not interviewed</p>
11	3	799060000	<p>Household head is JUMA.</p> <p>Case : Unknown RT.</p> <p>IDRT 799060000 KRT JUMA with OTHER ART are WATI, SYAMSUDDIN, SYAMSIAR.</p> <p>KRT name is Juma and PKRT is Wati, We have searched from tracking the information of location to the confirmation of the people surrounding, and even check out the newest data of eligible people in 2010 election, but no result was found. There were about 7 names of Juma in that village , but after we checked them, no one was match with the characteristic of the household. The PKRT, ART and their ages were all different.</p> <p>→ This RT not interviewed</p>
12	3	800140000	<p>Household head is LALANG.</p> <p>Case : Unknown RT.</p> <p>IDRT 800140000 KRT LALANG with OTHER ART is SITTI.</p>

			<p>KRT name is Lalang and PKRT is Sitti. We have searched from tracking the information of location to the confirmation of the people surrounding, but no result was found. There were only 2 names of Lalang in that village, one is male and the other is female. The first Lalang has moved from village Bantimurung, he moved to Jenetaesa. After we came to that household, we found many differences of what was written on the preprinted. The name of PKRT and the number of ART were different. When they were in Kalibarang village, the number of ART are greater than what is mentioned on the preprinted which is only 2 ART. After the team search from the closest neighbor 's name and the informant on IK 01 to the name of the previous owner of the ricefield that he used to plough on, there was no one who knows that name.</p> <p>→ This RT not interviewed</p>
13	3	850010000	<p>Household head is KAMARUDDIN.</p> <p>Case : Unknown RT.</p> <p>IDRT 850010000 KRT KAMARUDIN with ART BAYA, NURMAN AND RUSMAN.</p> <p>In this enumerated area, there are several similar names. Hhowever, none of them has the same characteristics with those written on the preprinted. The information on the preprinted mentions that the closest neighbor is A SITI and nearby the posyandu (Integrated Service Center). There is KHAIRUDIN as KRT and his spouse named GUSTI, not BAYA. Beside that, the date of birth is also different from those of on the preprinted. The effort to find this IDRT has involved almost all the village officers, yet no one knows about the household.</p> <p>→ This RT not interviewed</p>
14	3	854030000	<p>Household head is MARI.</p> <p>Case : Unknown RT.</p> <p>IDRT 854030000 KRT MARI with OTHER ART is ANNISA.</p> <p>No one knows about this KRT. All information has been questioned to the local village head and its spouse, head of the surrounding, and to the people who work as enumerator or population census in this village, yet still no result.</p> <p>There were similar names, but they all have different characteristics. There were also the same names, but they have died and the ART names were different from those on the preprinted. The route, address and the closest neighbor were also different.</p> <p>→ This RT not interviewed</p>
15	3	854080000	<p>Household head is SUARDI.</p> <p>Case : Unknown RT.</p> <p>IDRT 854080000 KRT SUARDI with OTHER ART are MULIATI, BACO and SARNIA .</p> <p>No one knows about this KRT. All information has been questioned to the local village head and its spouse, head of the surrounding, and to the people who work as enumerator or population census in this village, yet still no result.</p> <p>There were similar names, but they all have different characteristics. There were also the same names, but they have died and the ART names were different from those on the preprinted. The route, address and the closest neighbor were also different</p>

21	3	879120000	<p>Household head name is Y. RUPPU.</p>

			<p>Case : Unknown RT.</p> <p>879120000 kRT Y. RUPPU with ART VICTOR RUPPU.</p> <p>There was only one name of V. RUPPU in three villages of Silanan and has moved to Kupang since 20 years ago. While the parent occupying the abandoned house confesses that they have never been interviewed and never knew of Victor Ruppup as written on the preprint. The search of that name has been conducted based on the explanation of respondent's house which is ± 60 m from SD Silanan. However, there was no respondent living there, only the foster parent of V. Ruppup who has moved to Kupang. On preprint, respondent is about 74 years old, and the son is about 34 and this is not match with the data on preprint that mentions V Ruppup is about 34 years old and the child is about to go to college.</p> <p>→ This RT not interviewed.</p>
22	3	888010000	<p>Household head name is MASNUR.</p> <p>Case : Unknown RT.</p> <p>IDRT 888010000 KRT MASNUR with OTHER ART MARYUNI.</p> <p>The closest neighbor is Andarias Aso and the address match with those on the preprint. Andarias Aso was also as respondent. After team inquired the name of the KRT to respondent, he confessed that he did not know. Team also inquired to the officers of the KPMD in PNPM who possess all data of the villagers, yet they did not find the name.</p> <p>→ This RT not interviewed</p>
23	3	888020000	<p>Household head name is JARNO.</p> <p>Case : Unknown RT.</p> <p>IDRT 888020000 KRT JARNO with OTHER ART are SURIANI, SITA.</p> <p>According to the map of the respondent's enumerated area, its location is near to the House Hold 1. when the license was being processed, the chief of the neighborhood confirmed that respondent is still living in this village. However, after team re-confirm it, the head did not know the name. This village is a mining area, so there are many outsiders (outside Sulawesi) who came into this area to work. Team has also inquired to several boarding house occupied by those miners, yet no one knows about that KRT name.</p> <p>→ Thus RT not interviewed</p>
24	3	889010000	<p>889 01 00 00 Johan</p> <ul style="list-style-type: none"> • Respondent : Johan/KRT • Old KRT Ld Laki died on February 2005. • New KRT, Johan joined household since 2002. • Closest neighbor named Muh Aras is unknown. • There were 3 ART in 2007, while in 2010 are 7 ART. One ART was born after year 2007. • ART date of birth is unknown.

			<ul style="list-style-type: none"> • No confirmation by interviewer whether respondent was interviewed in 2007 or ever received gift or not. • No sticker of SEDAP.
25	3	889020000	<p>889 02 00 00 Abdul Muis</p> <ul style="list-style-type: none"> • Respondent : Abdul Muis(La Muisi)/KRT. • The correct name KRT is Abdul Muis. It has been confirmed and we learned that La Muisi is only the nick name. • Closest neighbor named La Pomburu is unknown. • The address of dusun does not match. • All ART names do not match, except the KRT. • All ART date of birth do not match. • There were 8 ART in 2007, while in 2010 are 8 ART. • No confirmation by interviewer if respondent was interviewed in 2007 or ever received gift or not. • No sticker of Sedap.

			<ul style="list-style-type: none"> • ART was 17 years old in 2007, and respondent has a school age child (high school) in Toraja. After confirmation, the name does not match. • ART 3 was 3 years old in 2010, was born in 2006. It supposed to be noted in 2007. • After confirmation to KRT, they said they have never been interviewed before. • No gift from SEDAP, neither sticker.
66	3	893080000	<p>idrt 893080000 krt Iyando (25 February 2010)</p> <p>Information Location :</p> <p>Data year 2007 from the village hall of Labasa about 150 m, mean while, in visit 2010 the location is from Poliklinik Kalawesi +/- 100 m to the south.</p> <p>Address :</p> <p>Data year 2007, the address is Labasa village, Tongkuno, Muna while visit in 2010, the address is dusun II desa Labasa, Tongkuno Selatan, Muna</p> <p>Route :</p> <p>Data year 2007 respondent's house +/- 150 m to the south from village hall of Labasa, and the route match to respondent's location.</p> <p>Neighbor :</p> <p>In 2007 the closest neighbor named Rusmin, while in 2010 the closest neighbor named La ode Im. But interviewer did not confirm if respondent knew the name of the neighbor in 2007.</p> <p>Dusun :</p> <p>Data year 2007 did not mention any dusun (w), whereas in 2010 respondents included the house into dusun II because of all respondents lived in the dusun II.</p> <p>Sticker:</p> <p>No sticker sedap year 2007 attached at the household</p> <p>Souvenir :</p> <p>Interviewer did not confirm in 2010 if respondent received souvenir of table cloth in 2007 visit</p> <p>Number of ART :</p> <p>Interview is carried out with the krt. Pkrt and other art of all household member were confirmed to the krt, pkrt, and other art. There is a different number of art between year 2007 and 2010. There were 4 unknown art in 2007 in this household, they were risnawati, mariam, murham, and ilhamudin. While in 2010 there are 6 art; iyando (krt), Hadis, wa impala (pkrt), sakura, nur fadilah, faris, and fatwan.</p>
67	3	893090000	<p>Identification of Interviewed HH:</p> <p>HHID 893090000 HHH matius lahota (25 February 2010)</p> <p>Notes about Household's Location:</p> <p>In 2007, note about Household's Location was written as +/- 500 m from Pentecost Church Labasa Village. In 2010, the note of location has been changed to south side of Kalawesi Polyclinic approximately 300 m. According to</p>

		<p>information from head of the village in Labasa Village, there is not Pentecost Church in this village. There is church but not in Labasa Church.</p> <p>Household's Address:</p> <p>In the year of 2007, the address was only Labasa Village, tongkuno, muna and there is no dusun address. In the year of 2010, respondent's address is included under dusun II labasa village.</p> <p>Route :</p> <p>Route is the same with respondent's address which is approximately 165 m south side of the head of village's office and the house is located on the side of the road.</p> <p>The nearest neighbor :</p> <p>There is a difference between data in the year of 2007 and 2010. The name of the neighbor in 2007 was Albertus. Interviewer does not confirm the name of the neighbor in 2007. Interviewer directly asks the name of the neighbor in 2010 which is Amandus.</p> <p>Dusun :</p> <p>In the year of 2007, the name of dusun was not listed (w), in the year of 2010 is included in dusun II.</p> <p>Sticker :</p> <p>Sticker sedap in the year 2007 is no where to be found pasted in respondent's house.</p> <p>Souvenir :</p> <p>Interviewer does not ask for confirmation whether interviewee was given a table cloth in 2007.</p> <p>Probing total number of HHM in the year of 2007 :</p> <p>Interviewer does not do confirmation regarding total number of HHM in the year of 2007</p> <p>HHM who lives in this house :</p> <p>In this household, all books are answered by spouse of the HHH which is Elisabeth Ilarita because HHH (Matius Lahota) is going out of town to Ambon. All HHM's names are being confirmed by spouse of the HHH. There are 3 names in the 2007 preprinted that are unknown which are Yohanis, Yoyakim and Rosdiana. According to their ages, they should be respondent's children. However after interviewer confirms to her, she does not know those names and there is no any similarity between the name in 2007 and 2010 which are marius surea teratai, fransiscus valentino, delon gionaldo rivera rivera, dan putriana clara da silva. Their date of birth are also different. There is a change between the name of HHH in 2007 and the name of HHH in 2010 from matius becomes matius lahota. There is also a change in the name of spouse of HHH from elisabeth to elisabeth ilarita. The ratio between total number of HHM in 2007 and 2010 is about the same in which in the year of 2007 there was 5 HHMs, and in the year of 2010 there is 6 HHMs with the addition of HHM that was born in 2008 in the month of August.</p>
