I. Objectives

This survey was designed to achieve the following objectives:

- Assist the World Bank in gaining a better understanding of how stakeholders in the Philippines perceive the Bank;
- Obtain systematic feedback from stakeholders in the Philippines regarding:
 - Their views regarding the general environment in the Philippines;
 - Their overall attitudes toward the World Bank in the Philippines;
 - Overall impressions of the World Bank's effectiveness and results, knowledge and research, and communication and information sharing in the Philippines; and
 - Perceptions of the World Bank's future role in the Philippines.
- Use data to help inform the Philippines country team's strategy.

II. Methodology

In October and November 2012, 1,536 stakeholders of the World Bank in the Philippines were invited to provide their opinions on the Bank's assistance to the country by participating in a country survey. Participants in the survey were drawn from among civil society organizations (NGOs, community-based organizations, faith-based organizations, academia/think tanks, and trade unions); donors (bilateral or multilateral development agencies); government (House of Representatives member or staff, Senate member or staff, judicial branch official or staff, local government unit officials or staff, national executive branch officials or staff, and project management units (PMUs) for a World Bank-supported project official or staff); government-owned corporation or financial institution official or staff; the media (press, radio, TV, web, etc.); and the private sector (banks/financial sector, private organizations or business, and consultants or contractors). A total of 328 stakeholders participated in the country survey (21%).

Respondents received questionnaires via courier, post, or email and returned it accordingly. Respondents were asked about: general issues facing the Philippines, their overall attitudes toward the Bank; the World Bank's effectiveness and results; the Bank's knowledge; working with the World Bank; the Bank's future role in the Philippines, and the Bank's communication and information sharing.

Every country that engages in the Country Survey must include specific indicator questions that will be aggregated for the Bank's annual Corporate Scorecard. These questions are identified throughout the survey report.

- A. Background Information: Respondents were asked to describe their current organization and identify their specialization, with which agency within the World Bank Group they primarily work, their exposure to the Bank in the Philippines, and their geographic location.

II. Methodology (continued)

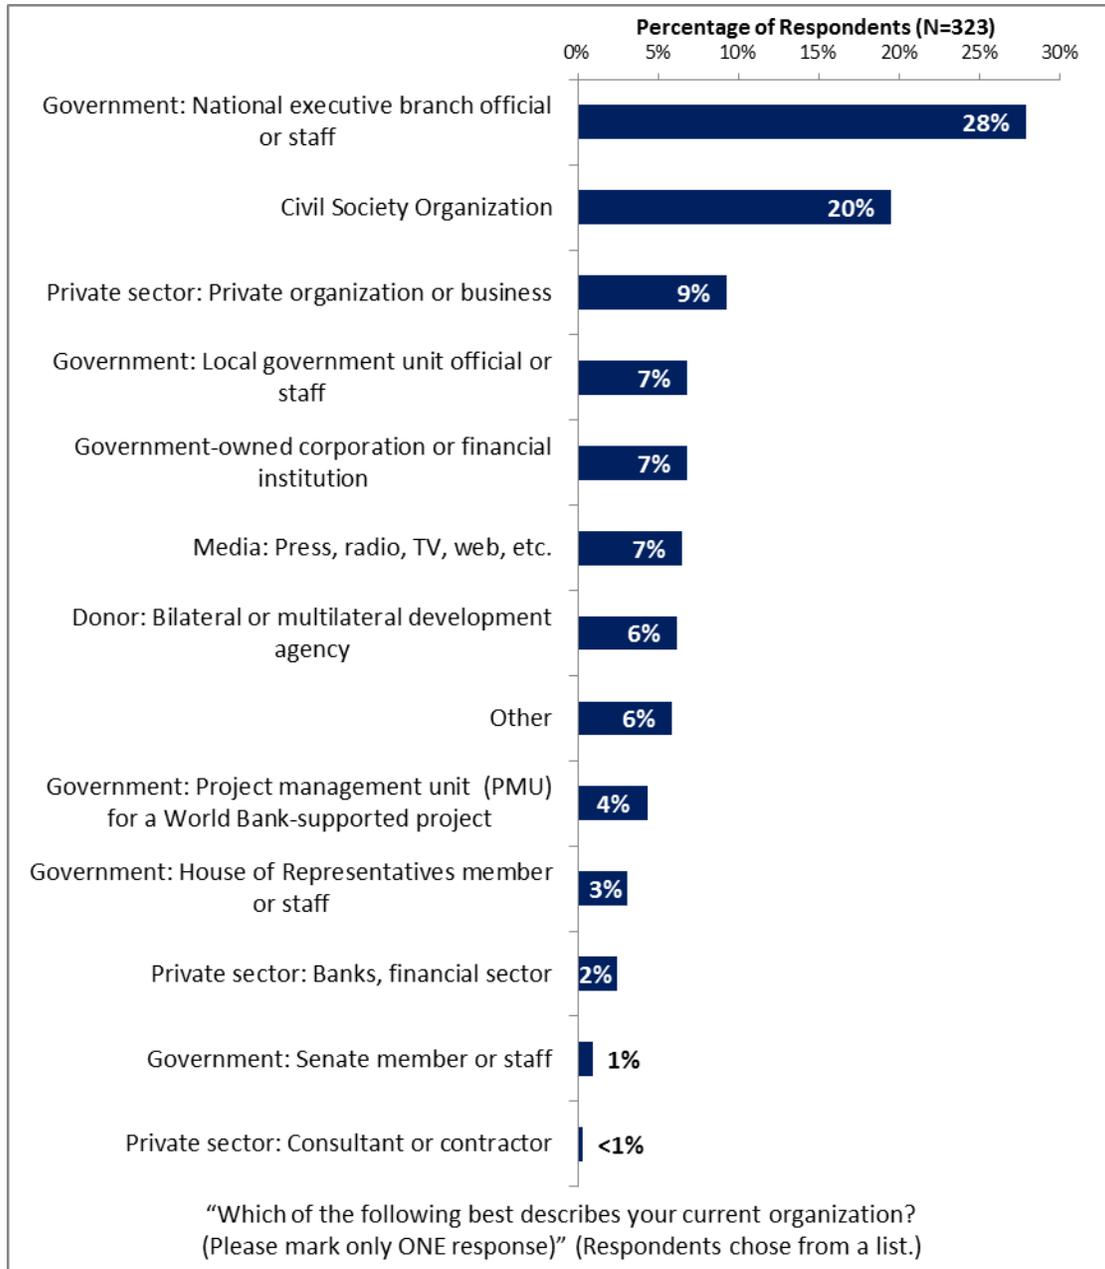

- B. General Issues facing the Philippines: Respondents were asked to indicate whether the Philippines was headed in the right or wrong direction, the most important development priorities, and which areas would contribute most to reducing poverty and generating economic growth in the Philippines.
- C. Overall Attitudes toward the World Bank: Respondents were asked to rate their familiarity with the World Bank (IBRD/IDA) and IFC, the World Bank and IFC's effectiveness in the Philippines, World Bank and IFC staff preparedness, agreement with various statements regarding the Bank's work, and the extent to which the Bank is an effective development partner. Respondents were also asked to indicate the sectoral areas on which it would be most productive for the Bank to focus its resources, the Bank's greatest values and greatest weaknesses in its work, the most effective instruments in helping to reduce poverty in the Philippines, and how they attribute slow or failed reform efforts.
- D. World Bank Effectiveness and Results: Respondents were asked to rate the Bank's level of effectiveness across twelve key development areas in the Philippines, the extent to which the Bank's work helps achieve sustainable development results in the Philippines, and the extent to which the World Bank Group meets the Philippines' need for financial instruments, knowledge services, and financial products.
- E. The World Bank's Knowledge: Respondents were asked to indicate how frequently they consult Bank knowledge and research in the work they do and to rate the effectiveness and quality of the Bank's knowledge and research, including how significant a contribution it makes to development results and its technical quality.
- F. Working with the World Bank: Respondents were asked to rate their level of agreement with a series of statements regarding working with the Bank, such as the World Bank's "Safeguard Policy" requirements being reasonable and the Bank disbursing funds promptly.
- G. The Future Role of the World Bank in the Philippines: Respondents were asked to rate how significant a role the Bank should play in the Philippines' development in the near future and how effectively the different agencies within the World Bank Group collaborate. Respondents were also asked to indicate what the Bank should do to make itself of greater value in the Philippines.
- H. Communication and Information Sharing: Respondents were asked to indicate how they get information about economic and social development issues, how they prefer to receive information from the Bank, their access to the Internet, their usage and evaluation of the Bank's websites, and their usage and evaluation of the Bank's KDCs and online resource centers. Respondents were asked about their awareness of the Bank's and IFC's Access to Information policies, past information requests from the Bank, and their level of agreement that they use more data from the World Bank as a result of the Bank's Open Data policy. Respondents were also asked to indicate their level of agreement that they know how to find information from the Bank and that the Bank is responsive to information requests.

In addition, when possible, responses from respondents completing this year's country survey were compared to responses from the 148 respondents (54% response rate) who completed the survey in FY 2005 and the 337 respondents (22% response rate) who completed the survey in FY 2009. Notations and/or charts are included when these comparisons were possible.

III. Demographics of the Sample

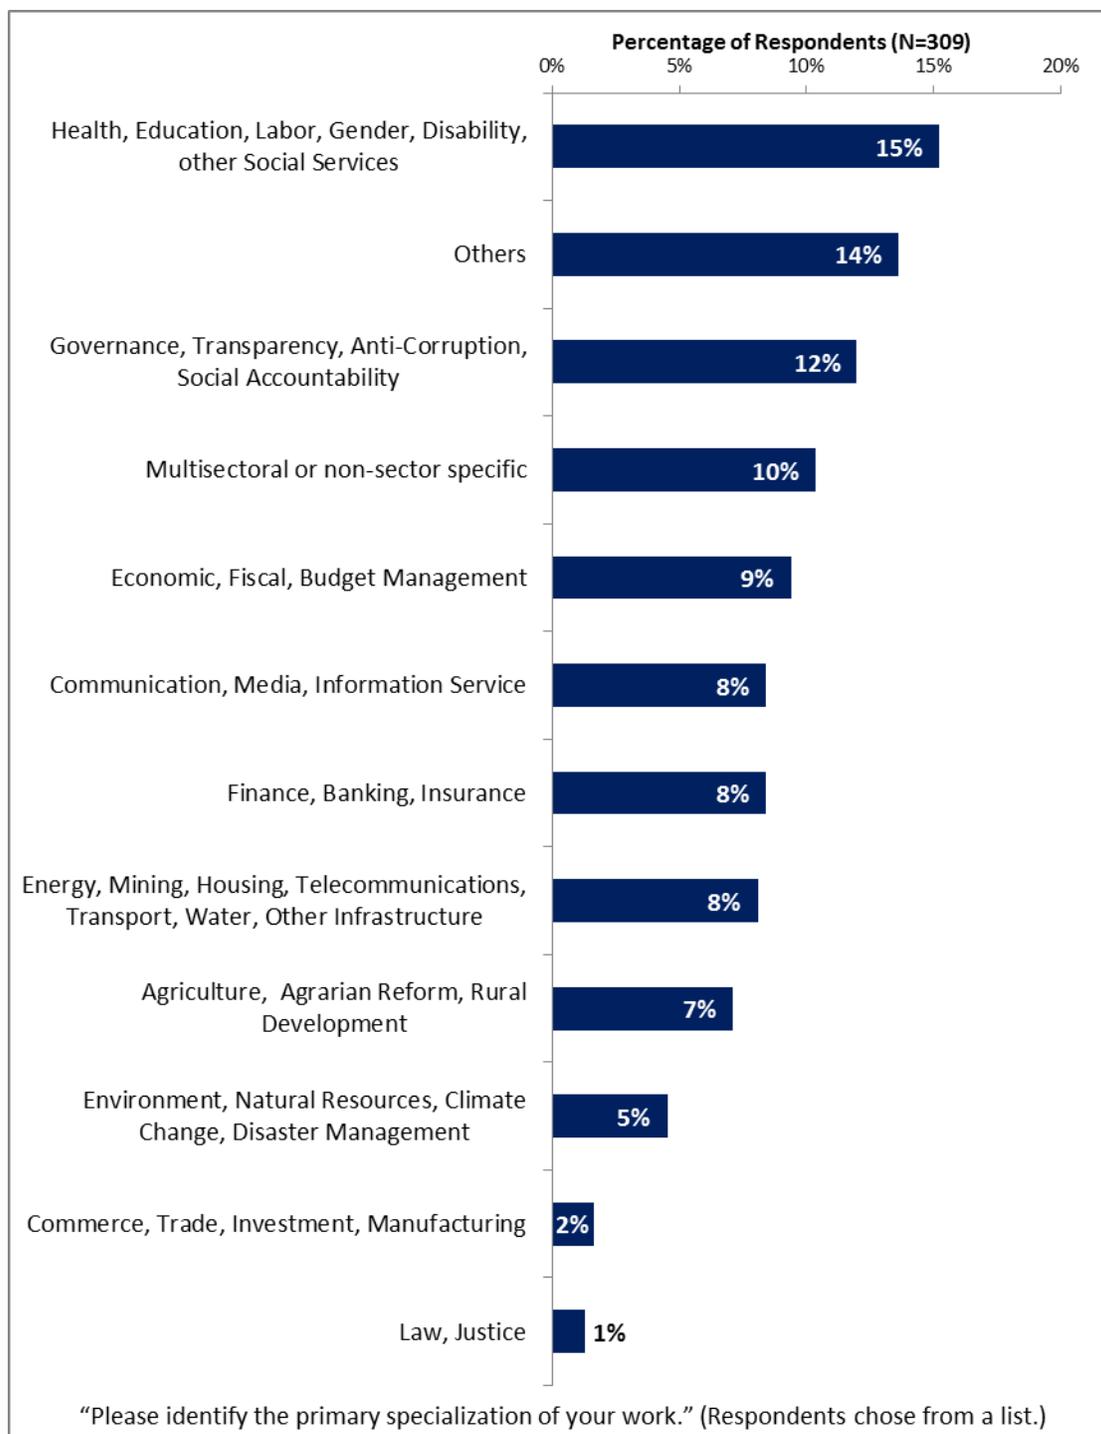

Current Position

- For further analyses, the small number of respondents from the House of Representatives was combined with those from the Senate and all respondents from private sector entities were combined into one “Private Sector” category.

III. Demographics of the Sample (continued)

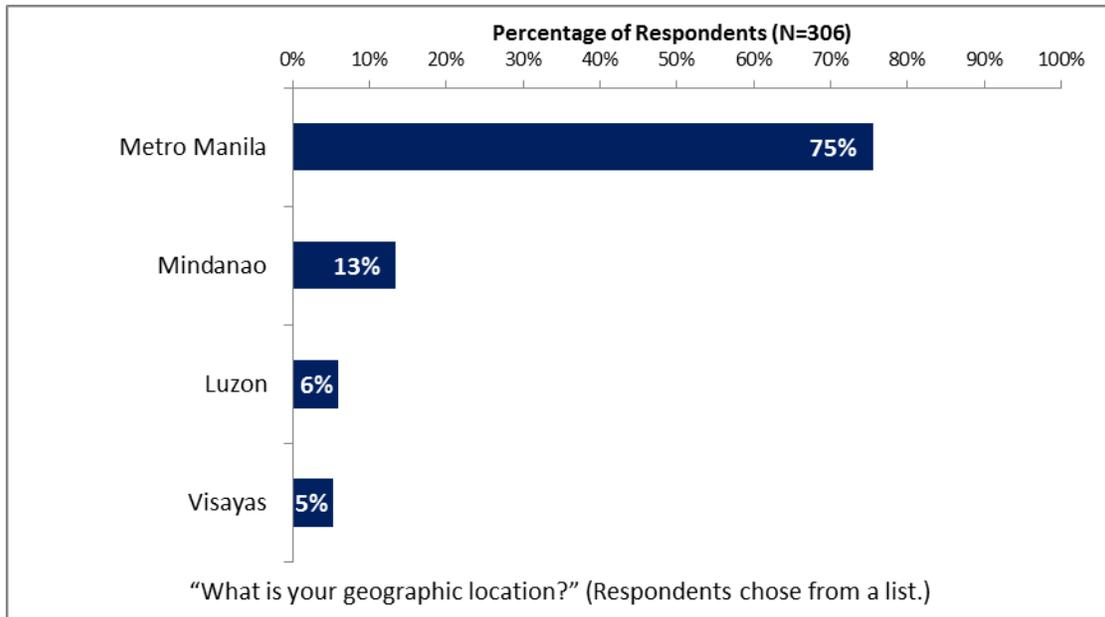

Area of Primary Specialization

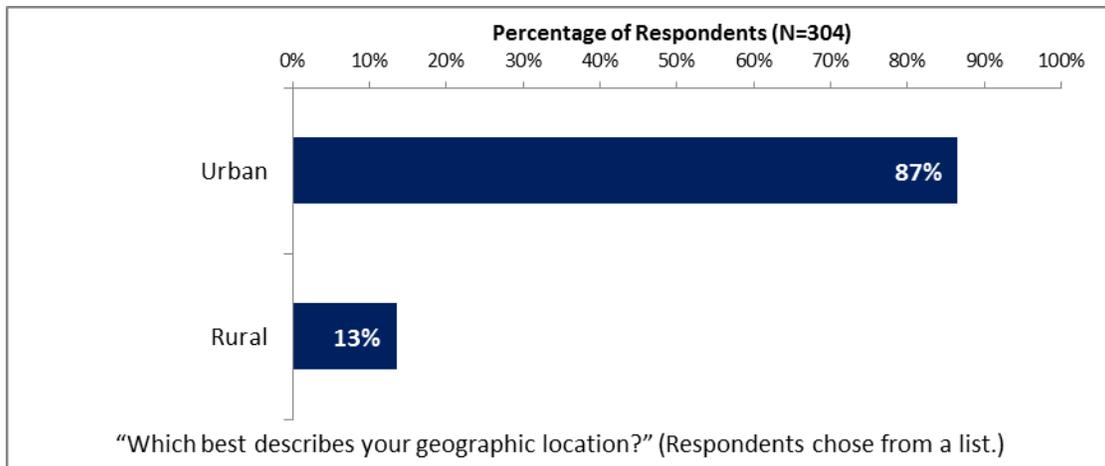

III. Demographics of the Sample (continued)

Geographic Location

- For further analyses, the small number of respondents from Mindanao, Luzon, and Visayas were combined into an “Other Areas” category. Responses across geographic locations for all country survey questions can be found in the Appendix (see page 78). Only significant differences between geographic locations in response to indicator questions will be discussed in the body of this report.

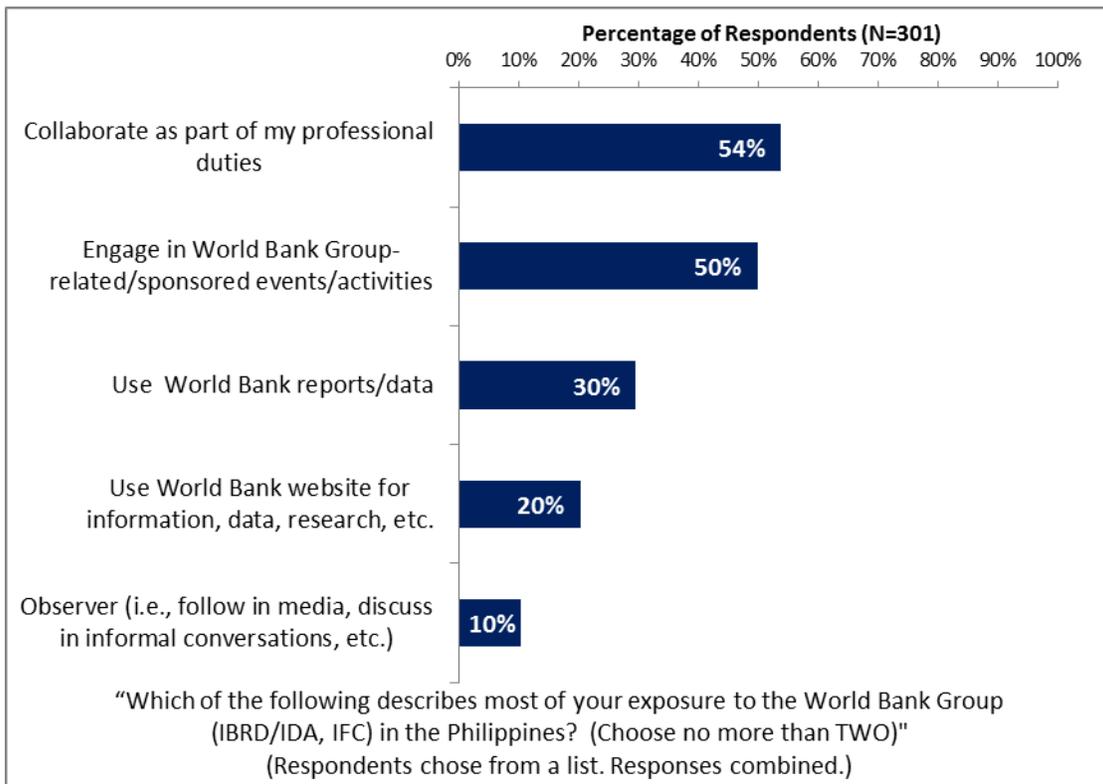

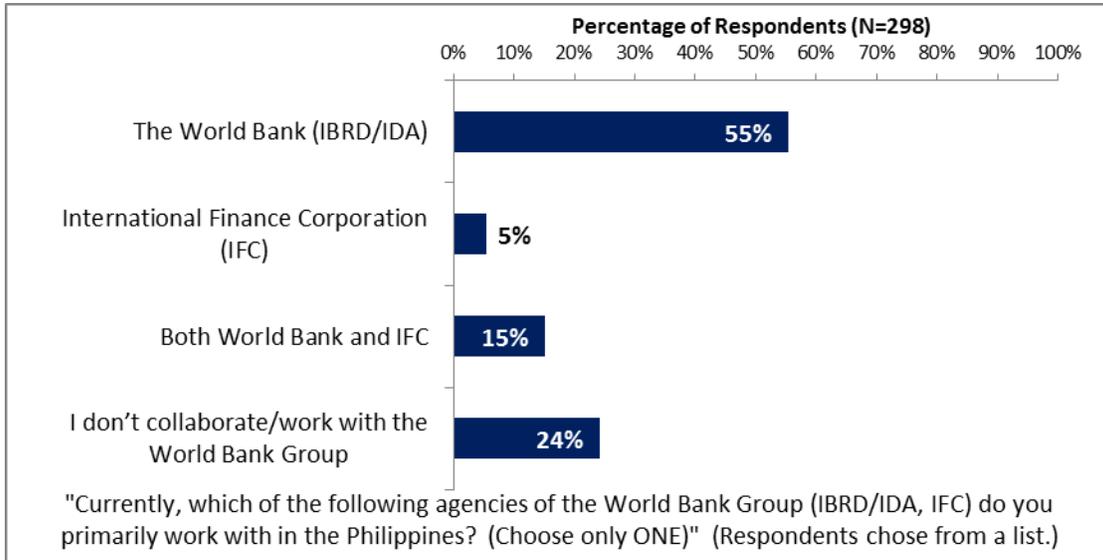

- Although not discussed in the body of this report, responses across geographic locations, in terms of urban and rural areas, for all country survey questions can be found in the Appendix (see page 89).

III. Demographics of the Sample (continued)

Collaboration with and Exposure to the World Bank

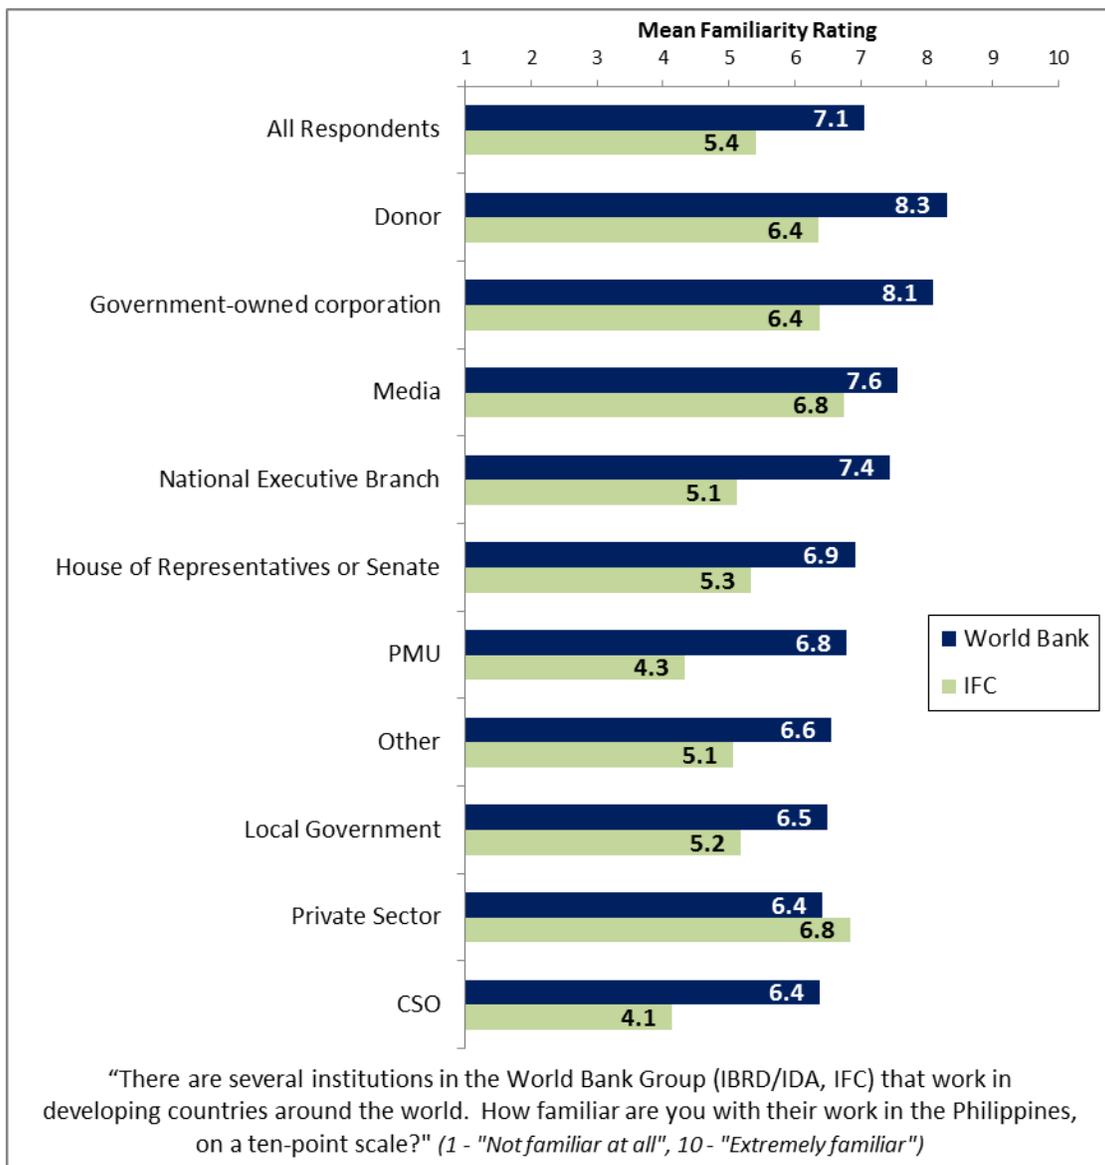

- Differences in responses to the indicator questions, based on levels of collaboration and exposure to the World Bank in the Philippines, can be found in the Appendix (page 102). Please note that where these factors appear to have a significant relationship with overall views of the Bank, it is highlighted in yellow in that table.

III. Demographics of the Sample (continued)

Familiarity with the World Bank Group

- Respondents indicated significantly higher levels of familiarity with the World Bank compared to the IFC.
 - Respondents in this year’s survey indicated significantly higher levels of familiarity with the World Bank compared to respondents in the FY ’05 country survey (6.3), but statistically similar levels of familiarity compared to respondents from the FY ’09 country survey (6.9).

III. Demographics of the Sample (continued)

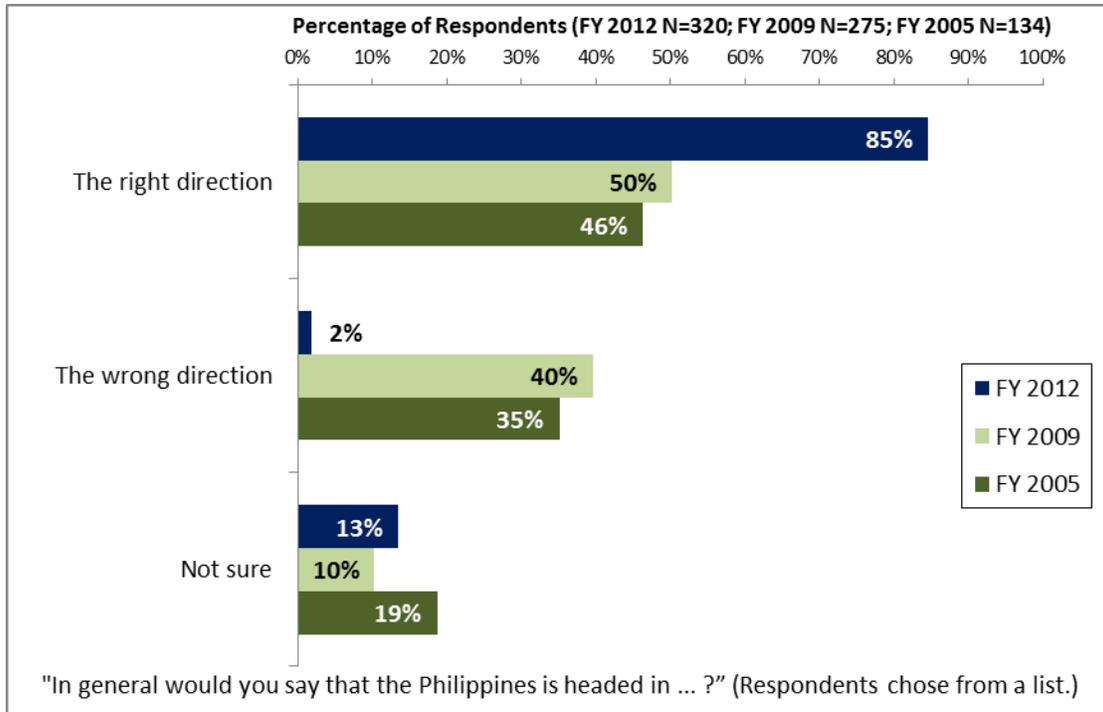

Familiarity with the World Bank Group (continued)

- Donors and respondents from government-owned corporations had the highest levels of familiarity with the World Bank whereas respondents from private sector and CSOs had significantly lower levels of familiarity. In contrast, respondents from private sector and the media had the highest levels of familiarity with the IFC whereas respondents from PMUs and CSOs had significantly lower levels of familiarity with the IFC.
- Respondents from Metro Manila had significantly higher levels of familiarity with the World Bank (7.2) and the IFC (5.6) compared to respondents from Other Areas (6.3 and 4.7, respectively).
- Respondents' ratings of familiarity with the World Bank (IBRD/IDA) were significantly, moderately correlated with respondents' ratings of familiarity with IFC.
 - Respondents' ratings of familiarity with the World Bank (IBRD/IDA) were significantly, moderately correlated with their perceptions of the World Bank's (IBRD/IDA) overall effectiveness in the Philippines, and had small, but significant correlations with the Bank's ability to help achieve sustainable development results, and the Bank's relevance to the Philippines' development.
 - Respondents' ratings of familiarity with the IFC were significantly, strongly correlated with their perceptions of the IFC's overall effectiveness in the Philippines.

IV. General Issues facing the Philippines

Headed in the Right Direction

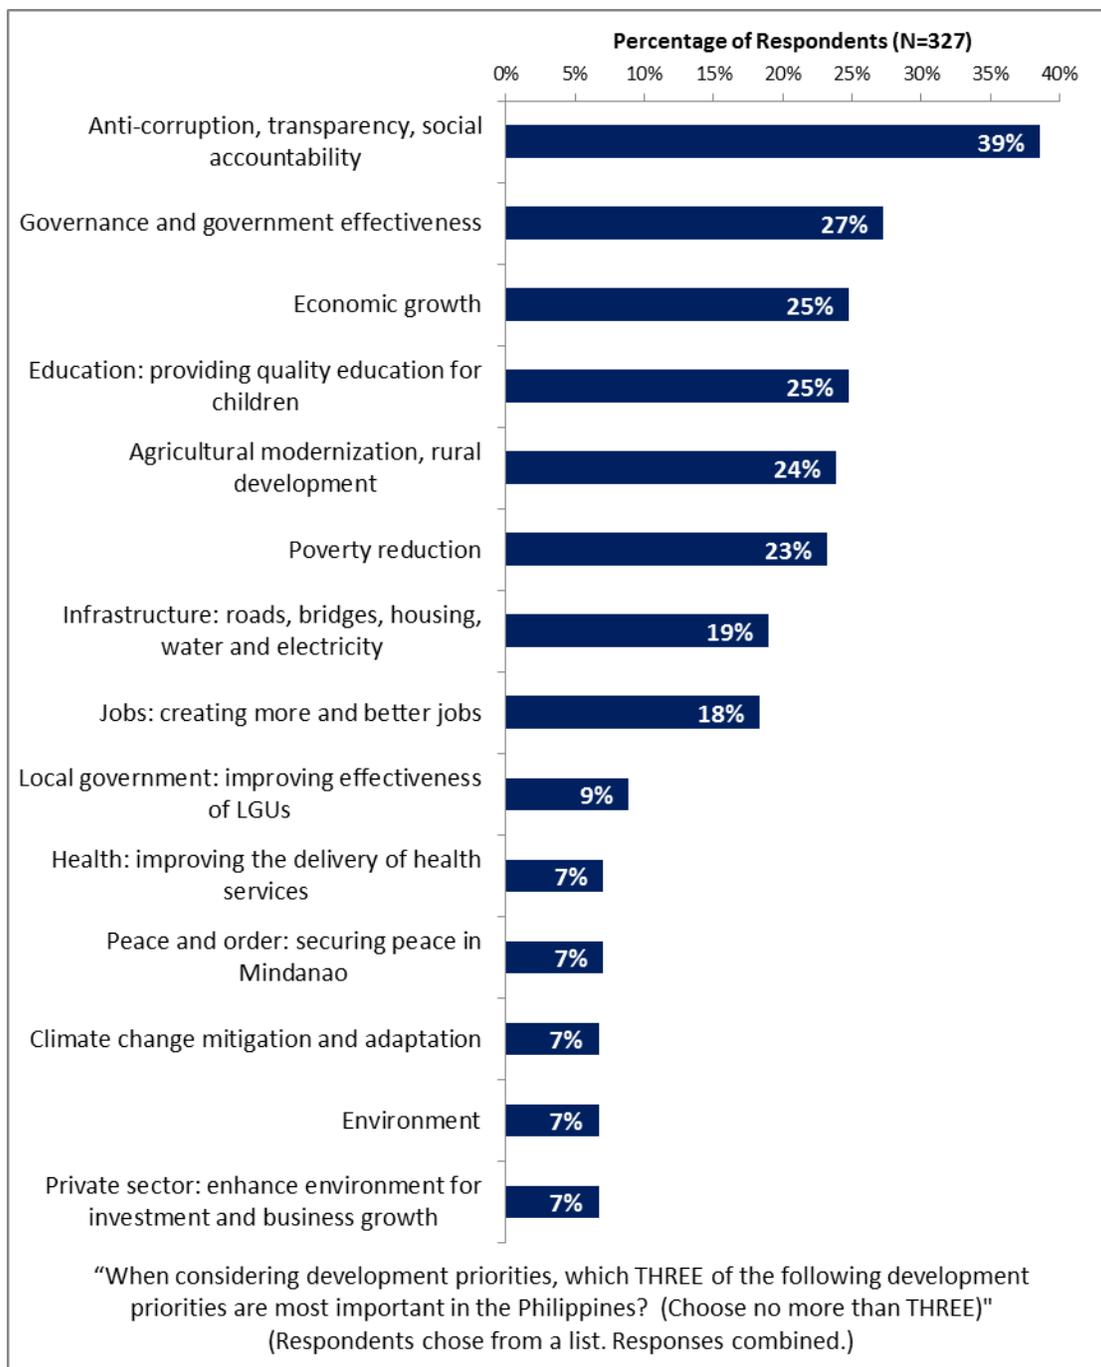

- When asked whether the Philippines was headed in the right or wrong direction, 85% of respondents indicated that the Philippines was headed in the right direction, significantly more than in the FY '09 and FY '05 country surveys.

IV. General Issues facing the Philippines (continued)

Development Priorities

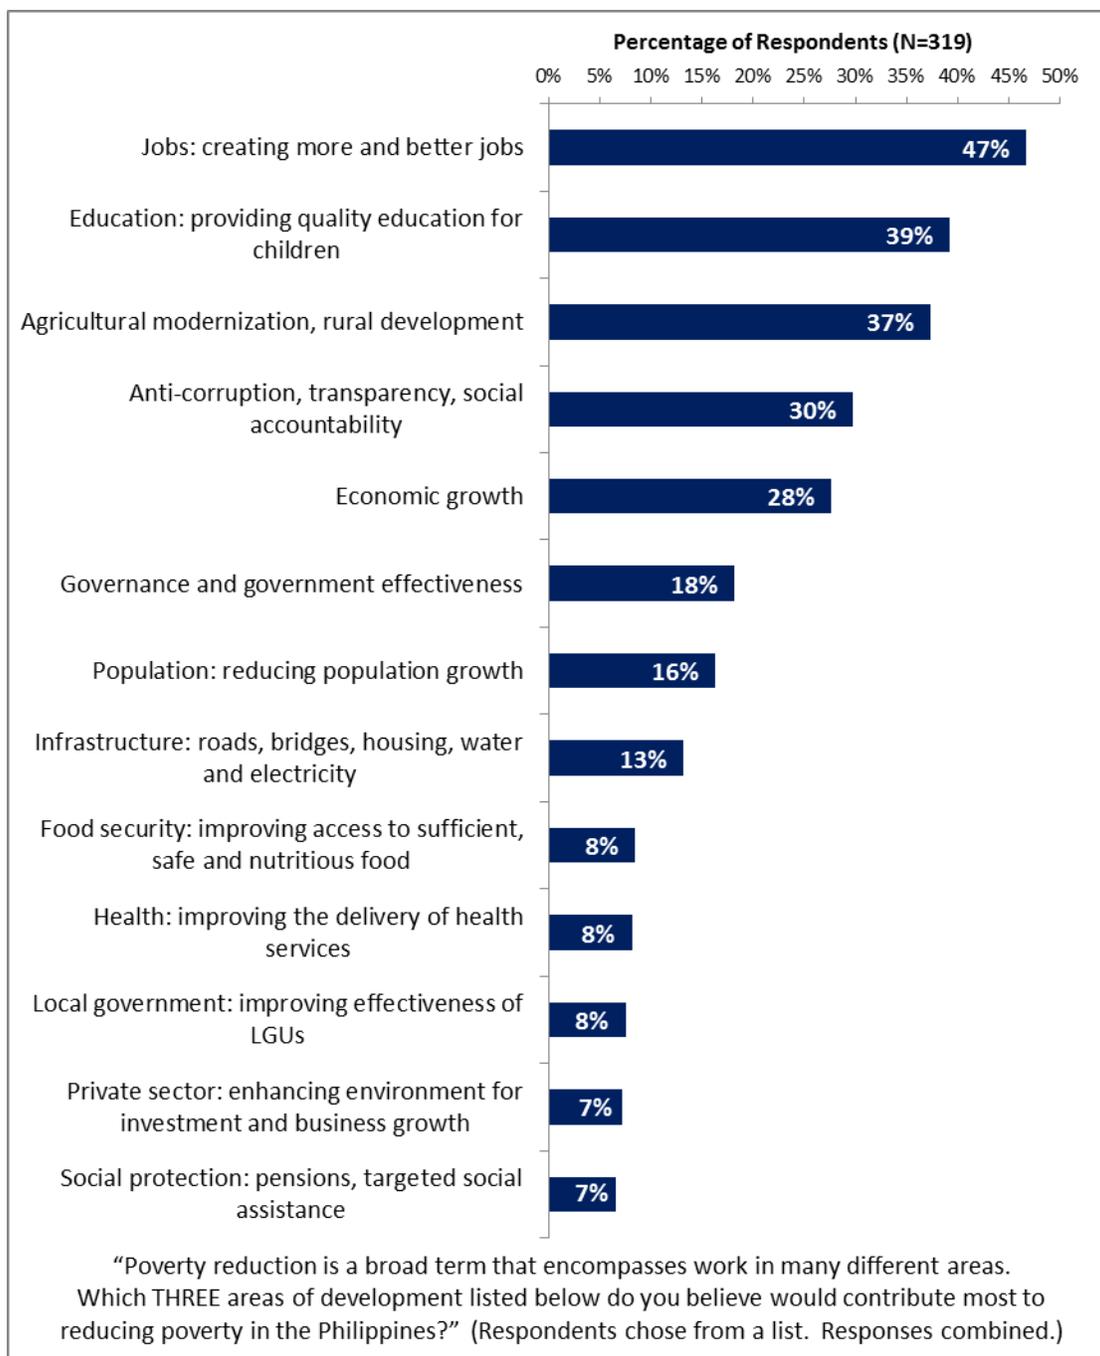

- Respondents in the FY '09 and FY '05 country surveys indicated that reducing poverty (32% and 32%, respectively) and reducing corruption (32% and 29%, respectively) were the most important development priorities for the Philippines.

IV. General Issues facing the Philippines (continued)

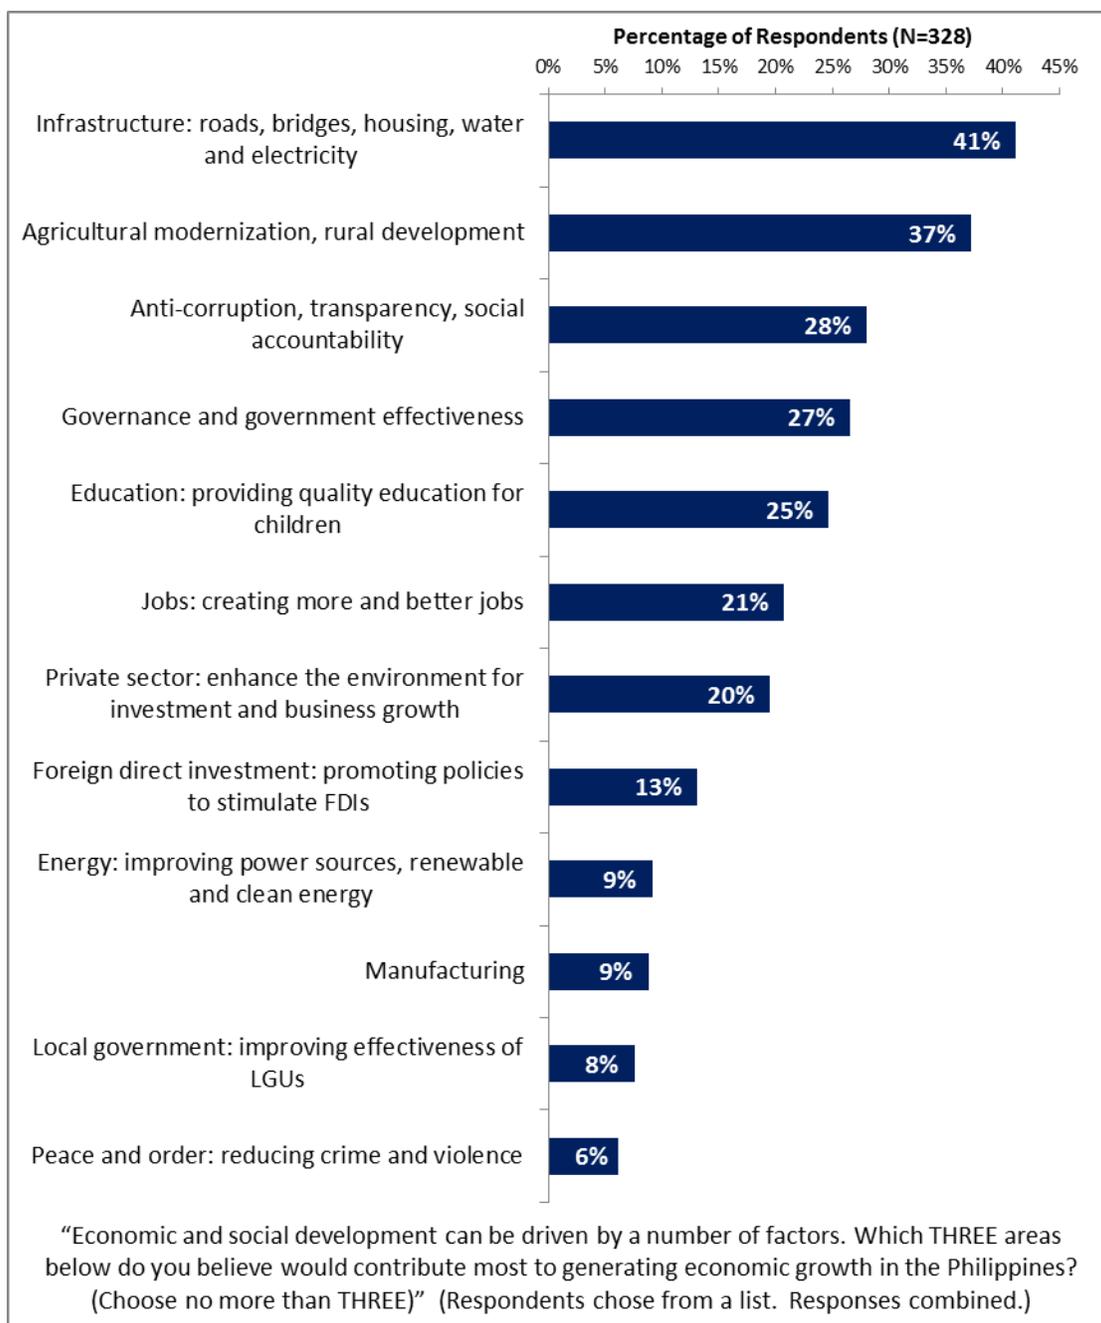

Factors Contributing to Poverty Reduction

- Respondents in the FY '09 country survey indicated that reducing corruption (37%), increasing employment (34%), improving governance (31%), education (26%), and agriculture development (23%) would contribute most to poverty reduction in the Philippines.

IV. General Issues facing the Philippines (continued)

Factors Contributing to Economic Growth

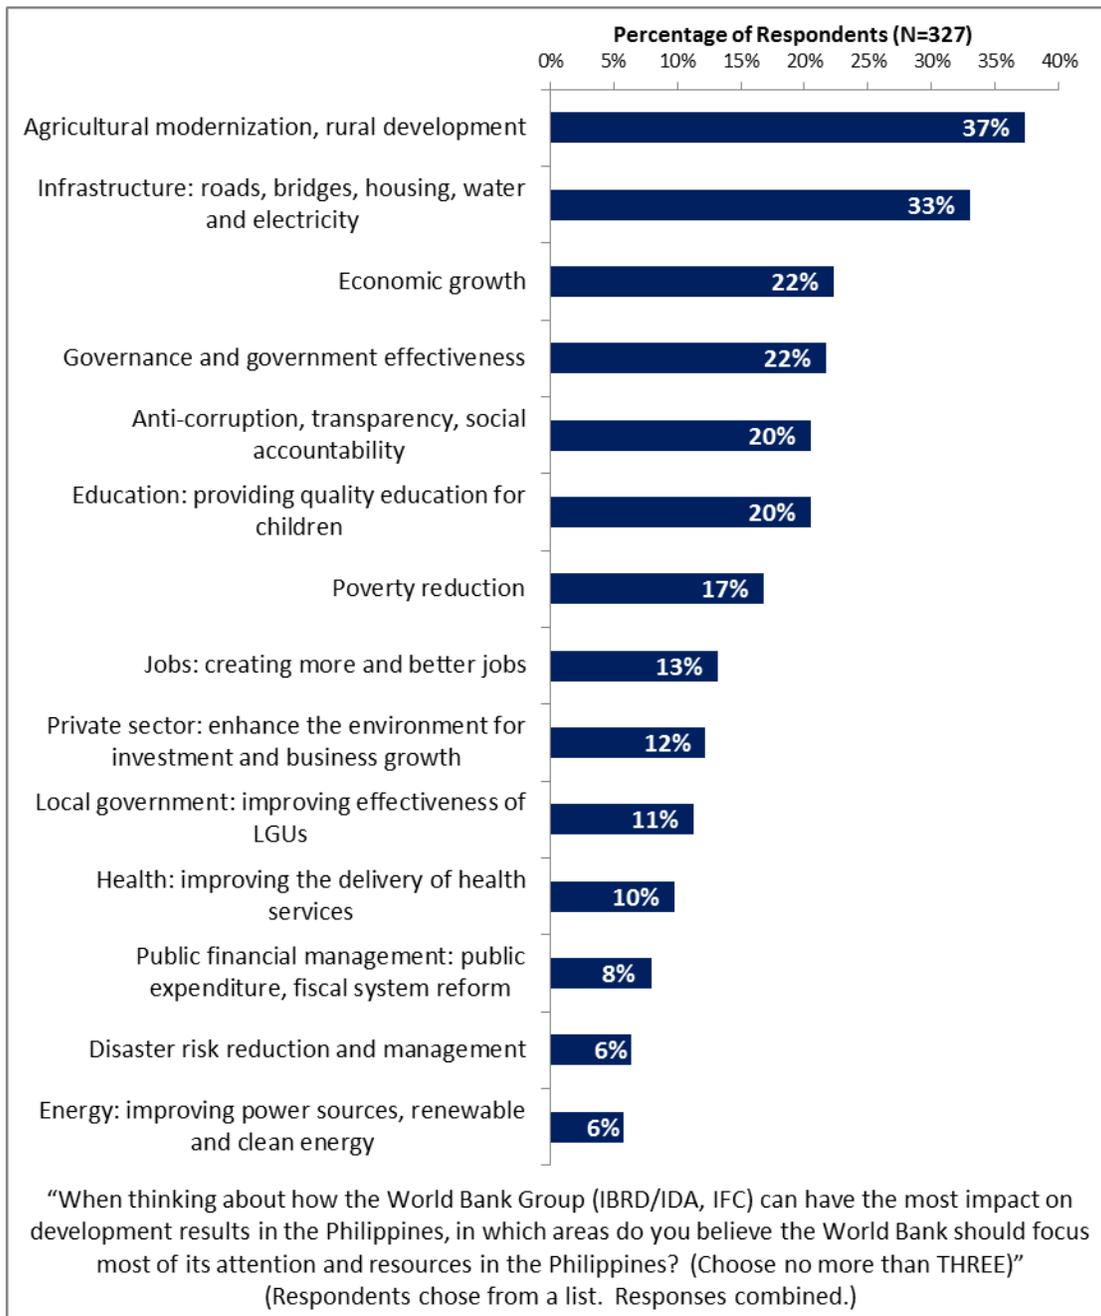

V. Overall Attitudes toward the World Bank

As noted in the “Methodology” section, the indicator questions referred to throughout the survey report are questions that are asked in every country that engages in the Country Survey. These will be aggregated for the Bank’s annual Corporate Scorecard.

Focusing World Bank Resources

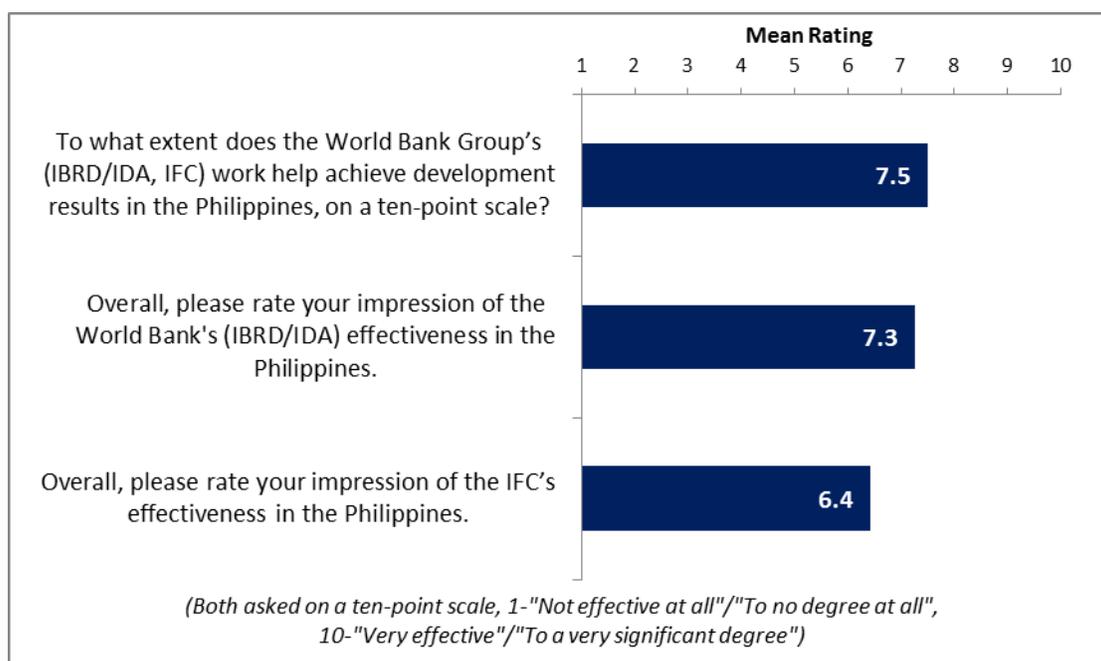

- Respondents in the FY '09 country survey indicated that it would be most productive for the Bank to focus most of its resources on reducing corruption (27%) and reducing poverty (23%) in the Philippines.

V. Overall Attitudes toward the World Bank (continued)

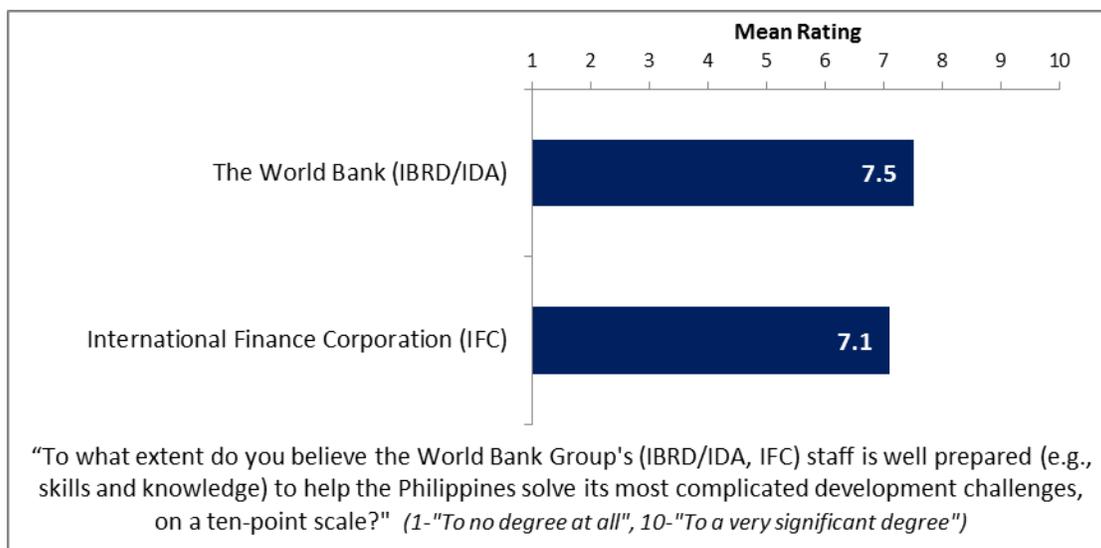

The World Bank Group's Overall Effectiveness in the Philippines (*Indicator Question*)

- Ratings of the World Bank's work achieving sustainable development results in the Philippines received a mean rating of 7.5 across all respondents.
 - Respondents across all stakeholder groups and geographic locations gave statistically similar ratings for the extent to which the Bank's work achieves sustainable development results in the Philippines.
- Respondents' ratings for the World Bank's (IBRD/IDA) overall effectiveness in the Philippines (7.3) were significantly higher than their ratings for the IFC's overall effectiveness (6.4).
 - Respondents in this year's survey gave significantly higher ratings for the World Bank's overall effectiveness compared to respondents in the FY '09 and FY '05 country surveys (6.6 and 6.5, respectively).
 - Respondents across all stakeholder groups and geographic locations gave statistically similar ratings for the World Bank's and IFC's overall effectiveness in the Philippines.

V. Overall Attitudes toward the World Bank (continued)

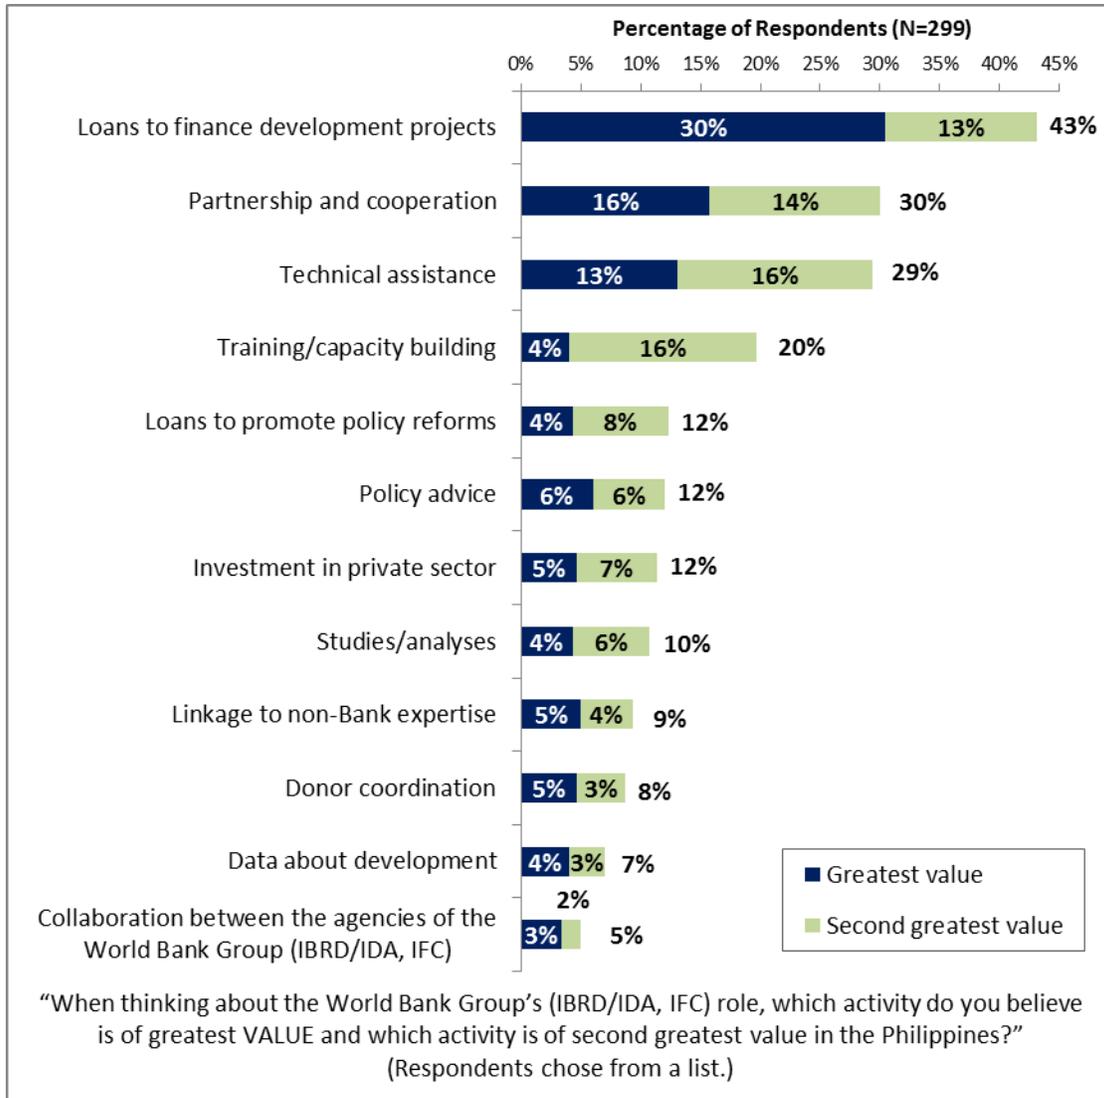

Bank Staff are Well Prepared to Help the Philippines

V. Overall Attitudes toward the World Bank (continued)

The World Bank’s Greatest Value in the Philippines

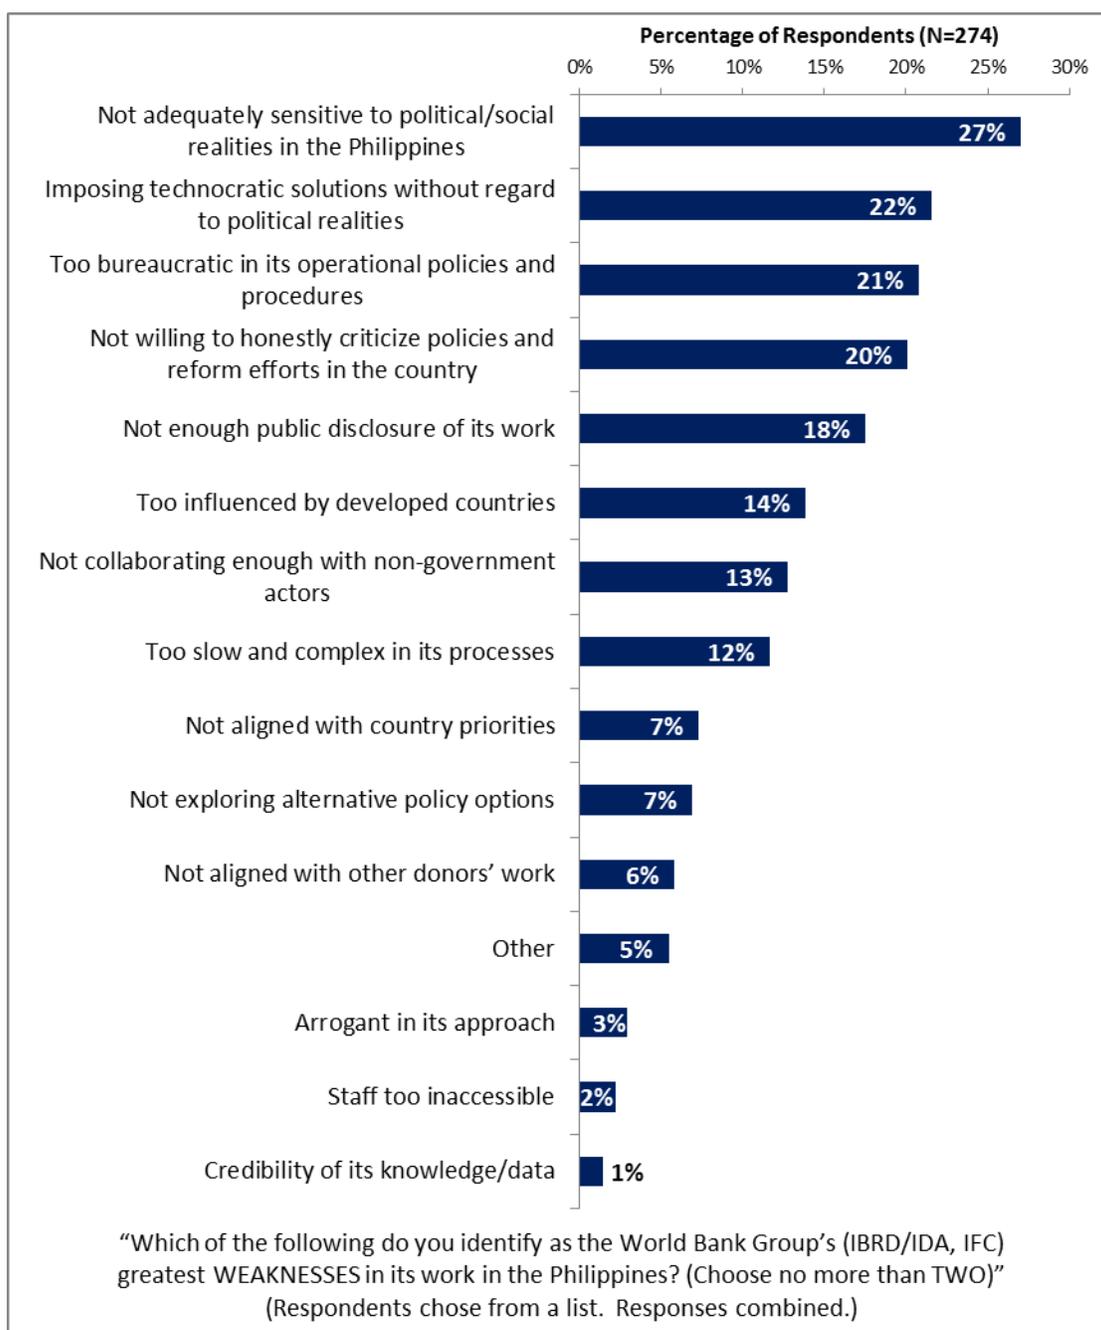

- Respondents in the FY '09 and FY '05 country surveys indicated that the Bank providing loans to finance development projects was its greatest value to the Philippines (62% and 65%, respectively).

V. Overall Attitudes toward the World Bank (continued)

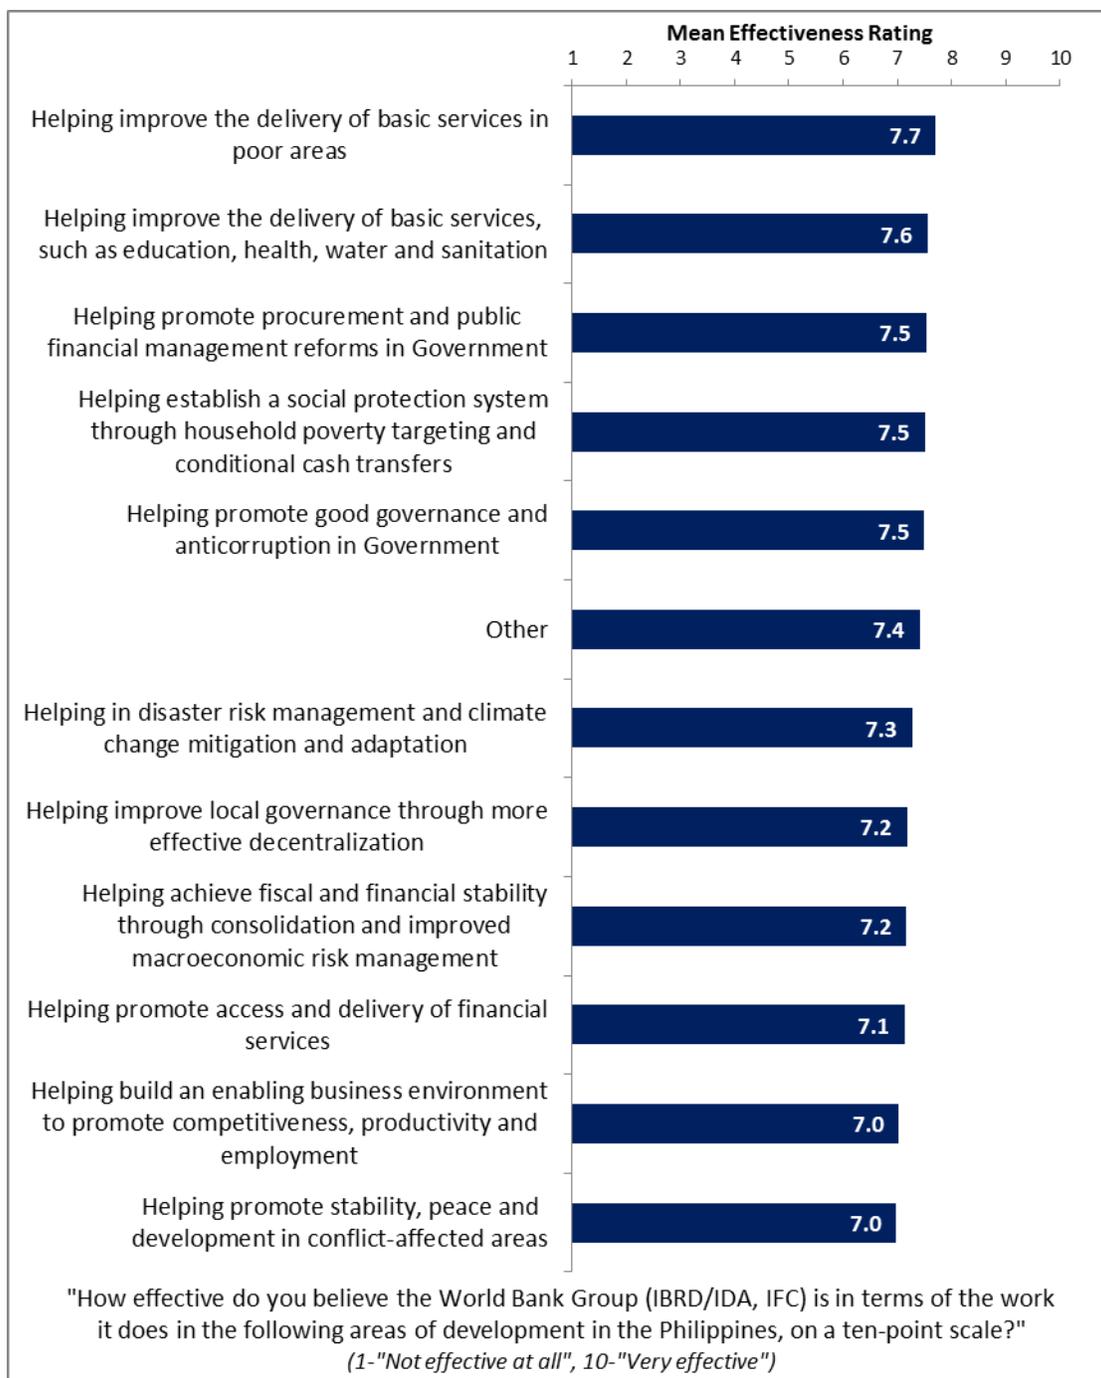

Greatest Weakness

- Respondents in the FY '09 country survey indicated that the Bank's greatest weaknesses in its work in the Philippines were imposing technocratic solutions without regard to political realities (48%) and being too bureaucratic in its operational policies and procedures (34%). Similarly, respondents in the FY '05 country survey indicated that the Bank's greatest weaknesses were imposing technocratic solutions without regard to political realities (17%), being too bureaucratic in its operational policies and procedures (13%), and imposing solutions which aren't practical (13%).

VI. Sectoral Effectiveness

Specific Areas of Effectiveness

VI. Sectoral Effectiveness (continued)

Specific Areas of Effectiveness (continued)

- There were significant stakeholder group differences in their ratings of the Bank's effectiveness across several of these development areas.
 - Respondents from PMUs had the highest ratings for the Bank's effectiveness at "Helping in disaster risk management and climate change mitigation and adaptation" and "Helping promote good governance and anticorruption in Government" whereas respondents from other organizations had significantly lower ratings.
 - Respondents from PMUs had the highest ratings for the Bank's effectiveness at "Helping promote stability, peace and development in conflict-affected areas" whereas respondents from the House of Representatives or the Senate, CSOs, the media, the private sector, and other organizations had significantly lower ratings.
 - Respondents from PMUs had the highest ratings for the Bank's effectiveness at "Helping promote procurement and public financial management reforms in Government" whereas respondents from the House of Representatives or the Senate, CSOs, government-owned corporations, and the media had significantly lower ratings.
 - Respondents from PMUs had the highest ratings for the Bank's effectiveness at "Helping improve local governance through more effective decentralization" whereas respondents from CSOs and the media had significantly lower ratings.

VI. Sectoral Effectiveness (continued)

Drivers of Effectiveness

To determine the key drivers of respondents' ratings of the Bank's overall effectiveness and ratings of its ability to help achieve sustainable development results in the Philippines, bivariate correlational analyses were conducted using respondents' ratings of the twelve specific areas of effectiveness.

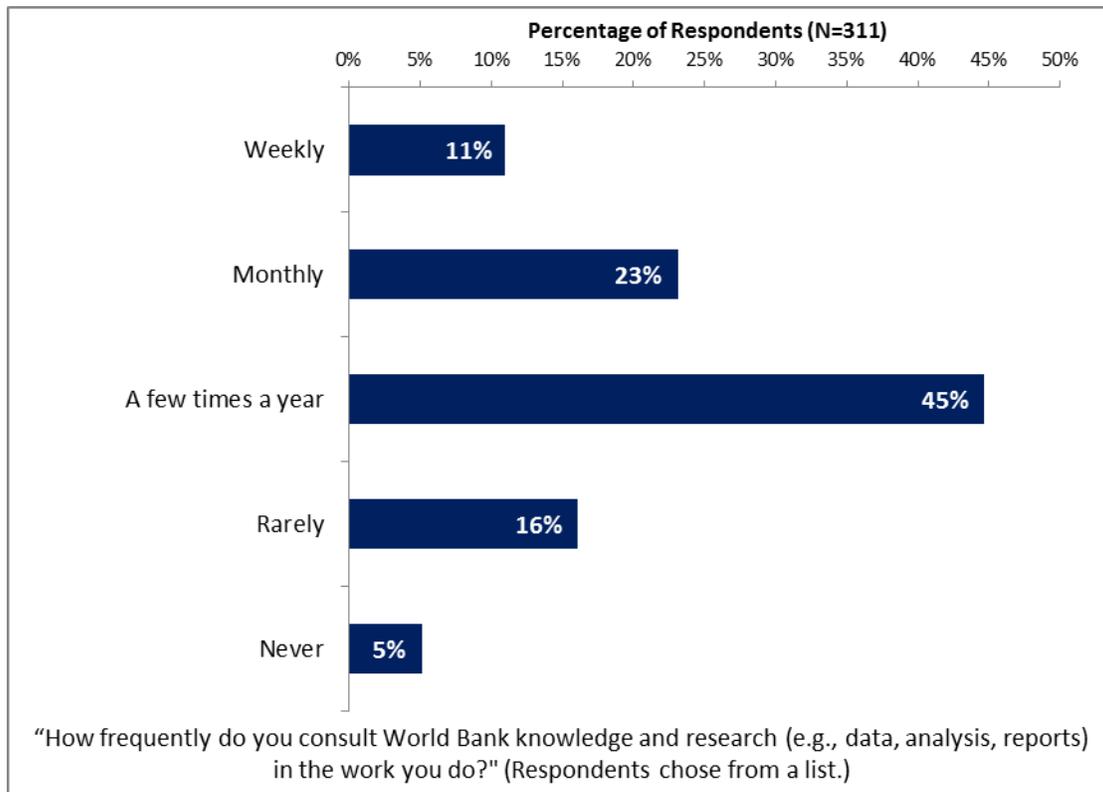

Correlational analyses, however, are not able to tell us exactly what is causing respondents' ratings of the Bank's overall effectiveness or ratings of its ability to help achieve sustainable development results. Rather, these analyses tell us that as ratings of effectiveness in one area increase, respondents' ratings of the Bank's overall effectiveness increase, or as ratings of effectiveness in one area increase, ratings of the Bank's ability to help achieve sustainable development results increase. Thus, it can be inferred that respondents' perceptions of effectiveness in one specific area are related to, or drive, respondents' perceptions of the Bank's overall effectiveness or perceptions of the Bank's ability to help achieve sustainable development results.

- **Overall Effectiveness:** Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the Bank's overall effectiveness, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the Bank's overall effectiveness in the Philippines.
 - The areas determined to be key drivers of the World Bank's (IBRD/IDA) overall effectiveness from these analyses were:
 - The World Bank Group's effectiveness at "Helping improve the delivery of basic services, such as education, health, water and sanitation" and "Helping promote good governance and anticorruption in Government".
 - The areas determined to be key drivers of the IFC's overall effectiveness from these analyses were:
 - The World Bank Group's effectiveness at "Helping improve the delivery of basic services, such as education, health, water and sanitation" and "Helping improve the delivery of basic services in poor areas".
- **Achieving Sustainable Development Results:** Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the Bank's ability to help achieve sustainable development results in the Philippines, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the Bank's ability to help achieve sustainable development results. The areas determined to be key drivers from these analyses were the World Bank Group's effectiveness at:
 - "Helping promote access and delivery of financial services";
 - "Helping improve local governance through more effective decentralization";
 - "Helping build an enabling business environment to promote competitiveness, productivity and employment"; and
 - "Helping promote procurement and public financial management reforms in Government".

VII. World Bank Knowledge and Instruments

Knowledge: Frequency of Use

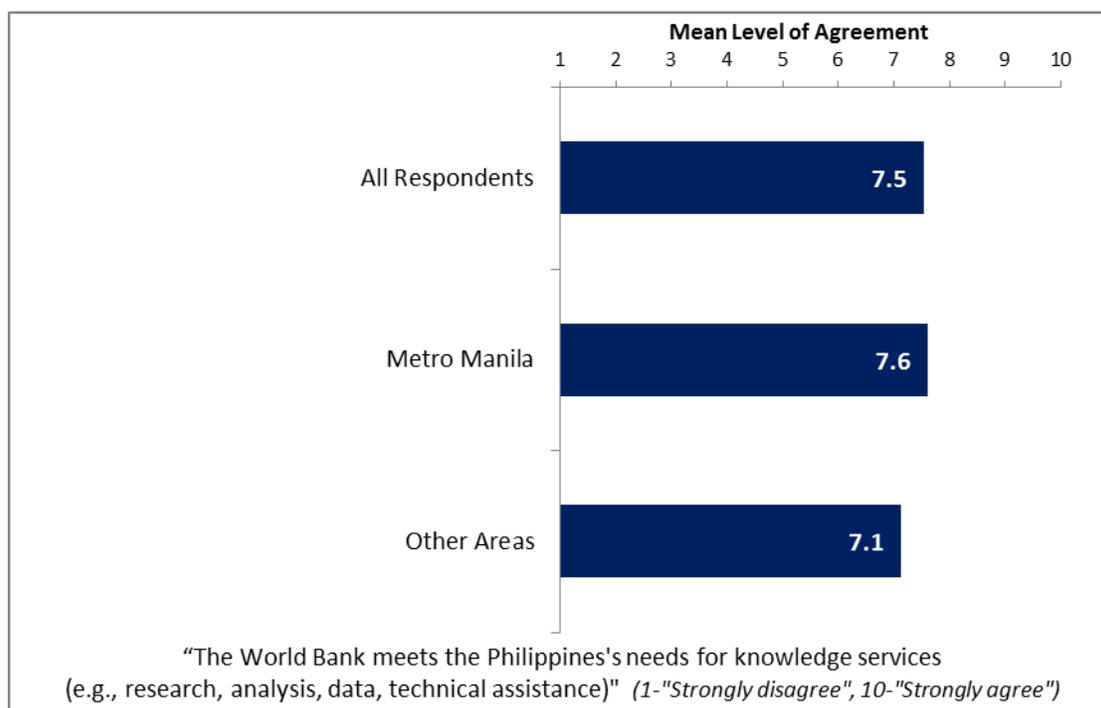

- There were some interesting stakeholder group differences in their usage of the World Bank’s knowledge and research.
 - A plurality of respondents from the House of Representatives or Senate indicated that they consult World Bank knowledge and research weekly.
 - A majority of respondents from PMUs indicated that they consult World Bank knowledge and research monthly.
 - A plurality of respondents from local government, the national executive branch, government-owned corporations, the media, and private sector indicated that they consult World Bank knowledge and research a few times a year.
 - Respondents from CSOs and other organizations tended to be split between consulting World Bank knowledge and research monthly, a few times a year, and rarely.
 - Donors tended to be split between consulting World Bank knowledge and research monthly and a few times a year.

VII. World Bank Knowledge and Instruments (continued)

Knowledge: Meeting the Philippines' Knowledge Needs (*Indicator Question*)

- Respondents from Metro Manila had significantly higher levels of agreement that the Bank meets the Philippines' needs for knowledge services compared to respondents from other areas.
- Respondents across all stakeholder groups had statistically similar levels of agreement that the Bank meets the Philippines' needs for knowledge services.

VII. World Bank Knowledge and Instruments (continued)

Knowledge: Effectiveness

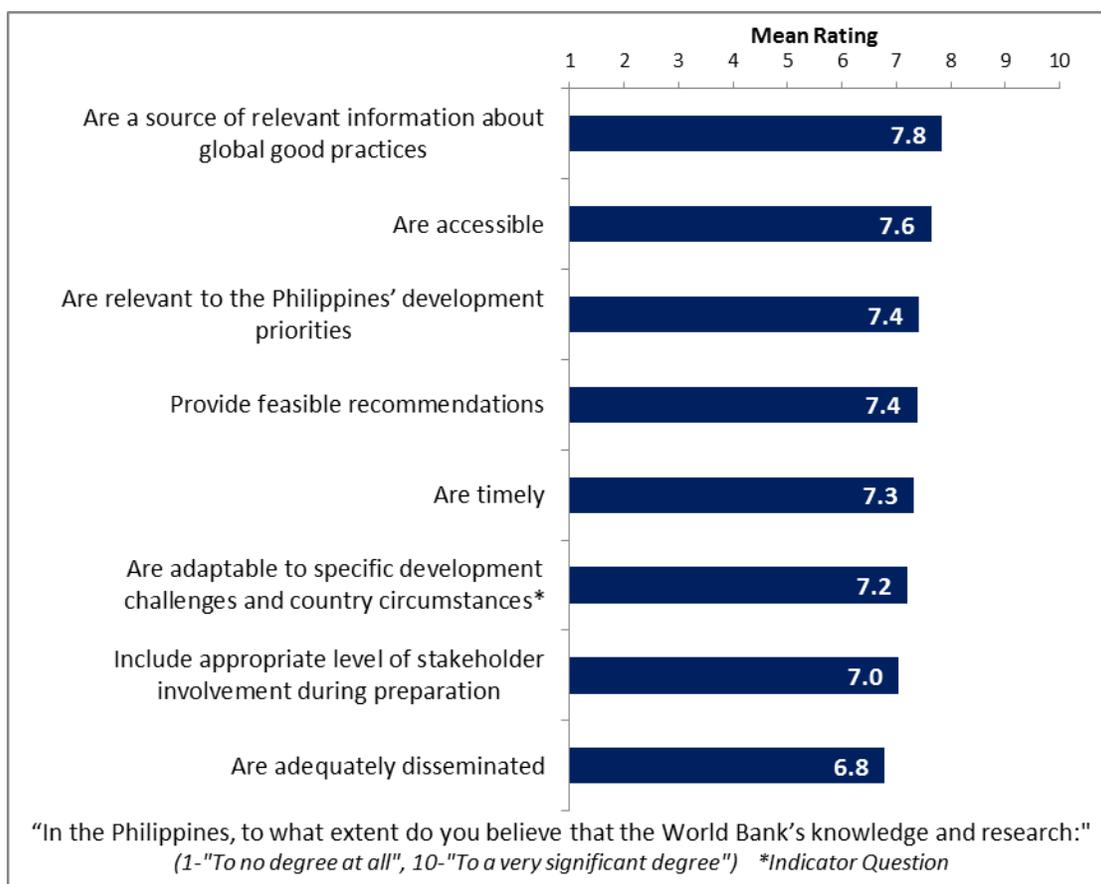

- Respondents from PMUs had the highest ratings for the effectiveness of the World Bank Group's knowledge and research to enhance knowledge and/or skills whereas respondents from other organizations had significantly lower ratings.
- Respondents from PMUs had the highest ratings for the effectiveness of the World Bank Group's knowledge and research to provide support for program implementation whereas respondents from local government and other organizations had significantly lower ratings.

VII. World Bank Knowledge and Instruments (continued)

Knowledge: Qualities

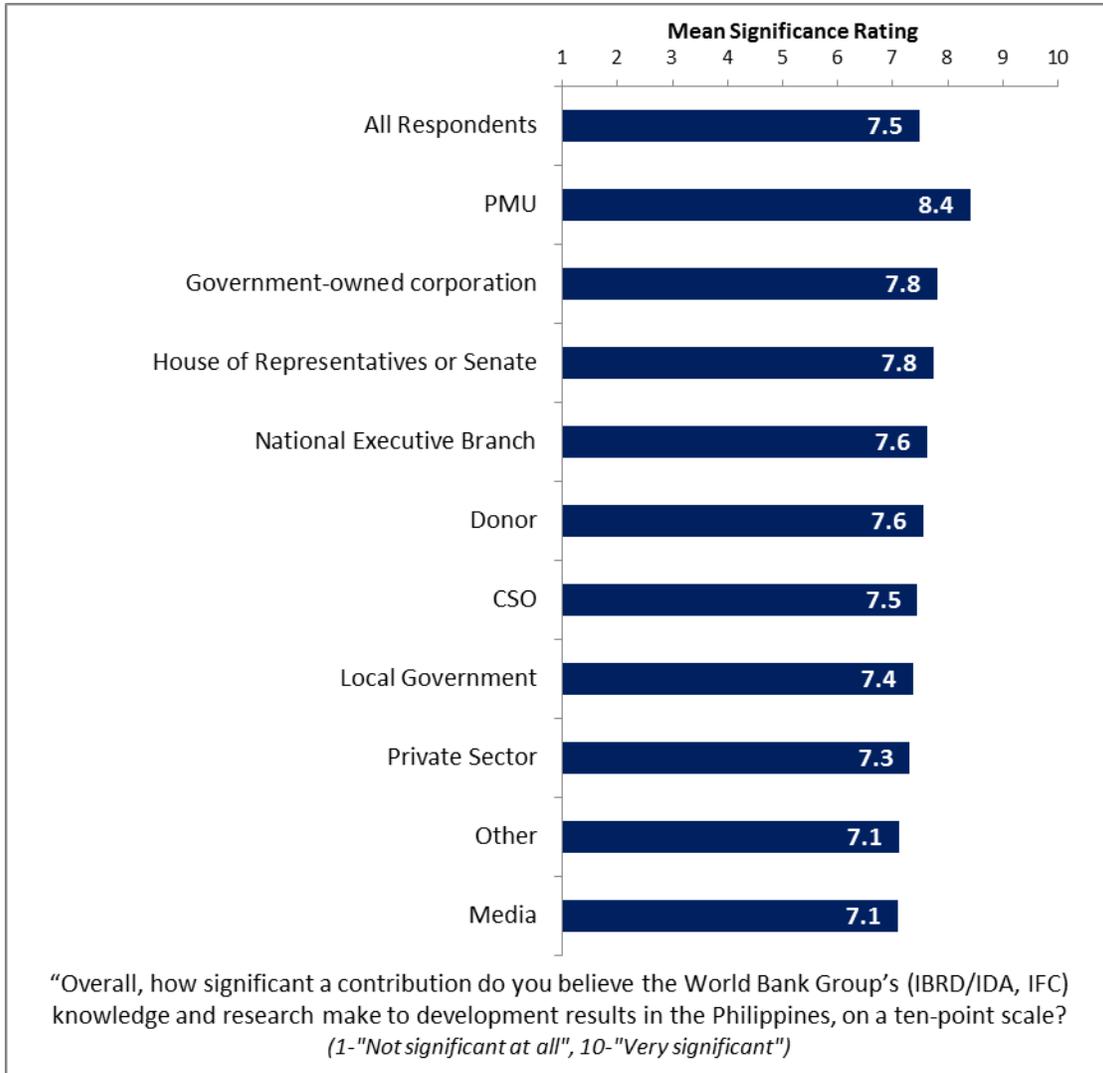

- Respondents in this year's country survey had significantly *higher* ratings for the extent to which the Bank's knowledge and research are adaptable to the Philippines' challenges compared to respondents from the FY '05 country survey (6.8). In comparison to respondents from the FY '09 country survey, respondents in this year's survey had statistically similar ratings for the extent to which the Bank's knowledge and research are a source of relevant information about global good practices and adaptable to the Philippines' challenges (7.7 and 6.9, respectively).
- Respondents from PMUs had the highest ratings that the Bank's knowledge and research are a source of relevant information about global good practices, are accessible, are relevant to the Philippines' development priorities, and include an appropriate level of stakeholder involvement during preparation whereas respondents from (in order) other organizations; local government; local government, CSOs, the media, and other organizations; and the media had significantly lower ratings for these areas.
- Donors and respondents from PMUs had the highest ratings that the Bank's knowledge and research are adequately disseminated whereas respondents from local government had significantly lower ratings.

VII. World Bank Knowledge and Instruments (continued)

Knowledge: Contribution (Indicator Question)

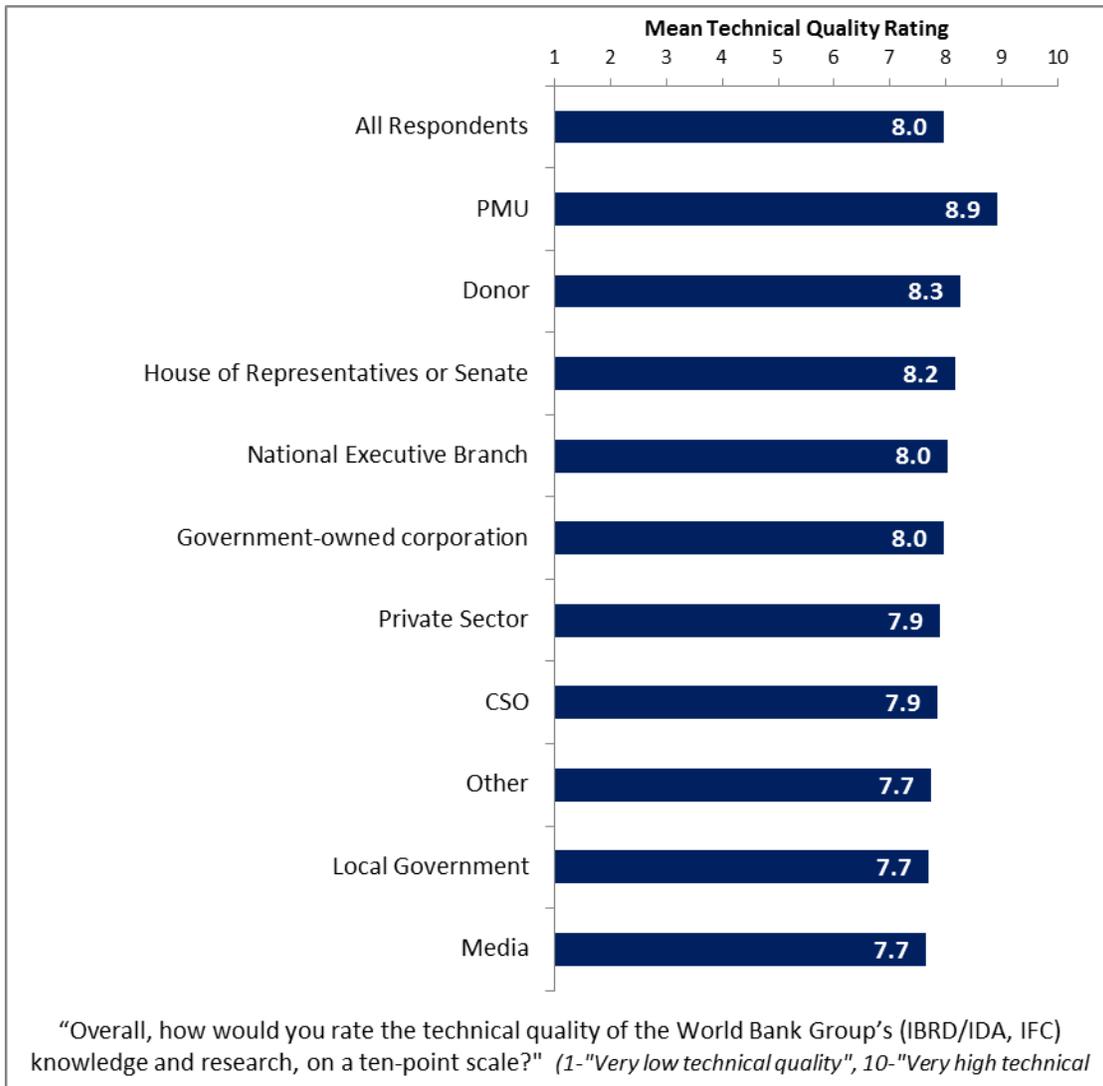

- Respondents across all stakeholder groups and geographic locations had statistically similar ratings for the significance of the contribution that the World Bank Group’s knowledge and research make to development results in the Philippines.

VII. World Bank Knowledge and Instruments (continued)

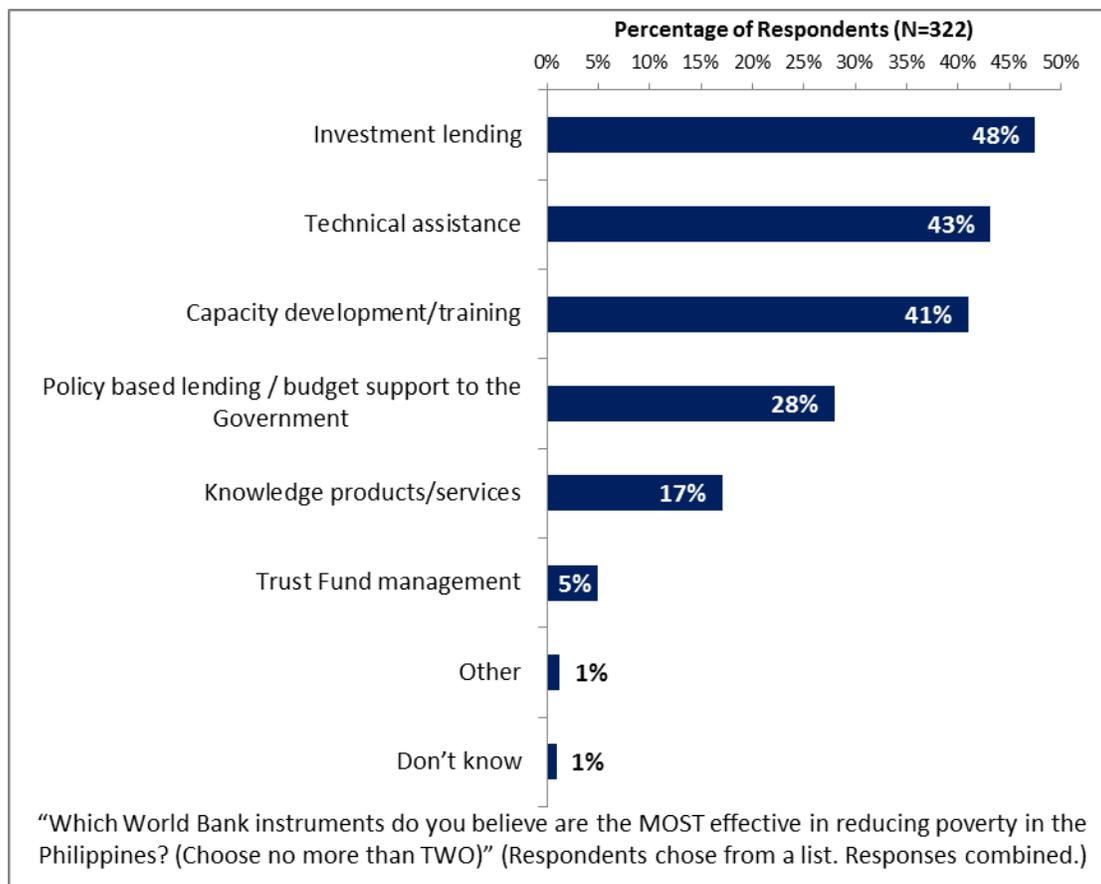

Knowledge: Technical Quality (*Indicator Question*)

- Respondents across all stakeholder groups and geographic locations had statistically similar ratings for the technical quality of the World Bank’s knowledge and research.

VII. World Bank Knowledge and Instruments (continued)

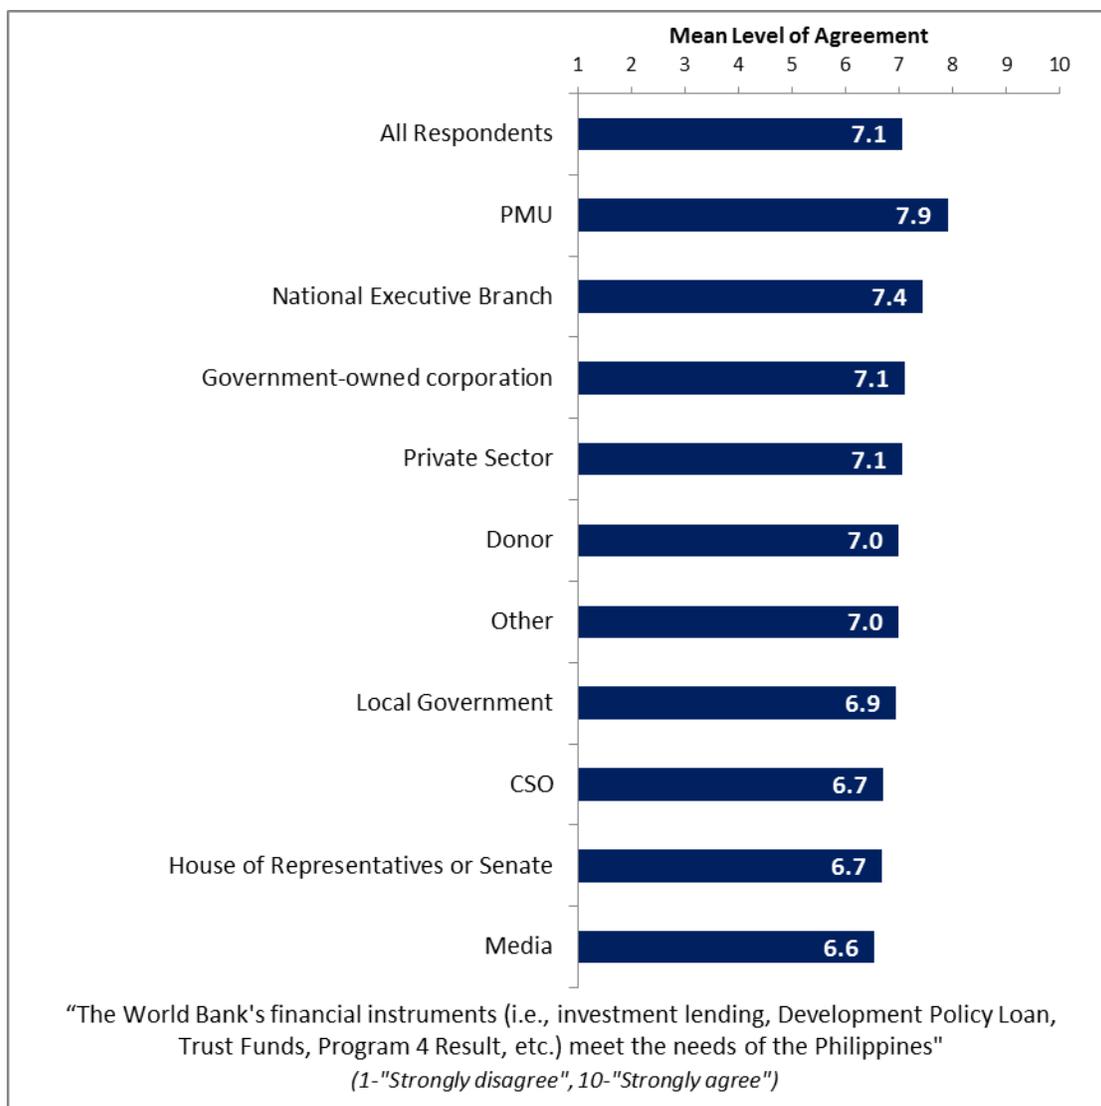

Instruments: Most Effective

VII. World Bank Knowledge and Instruments (continued)

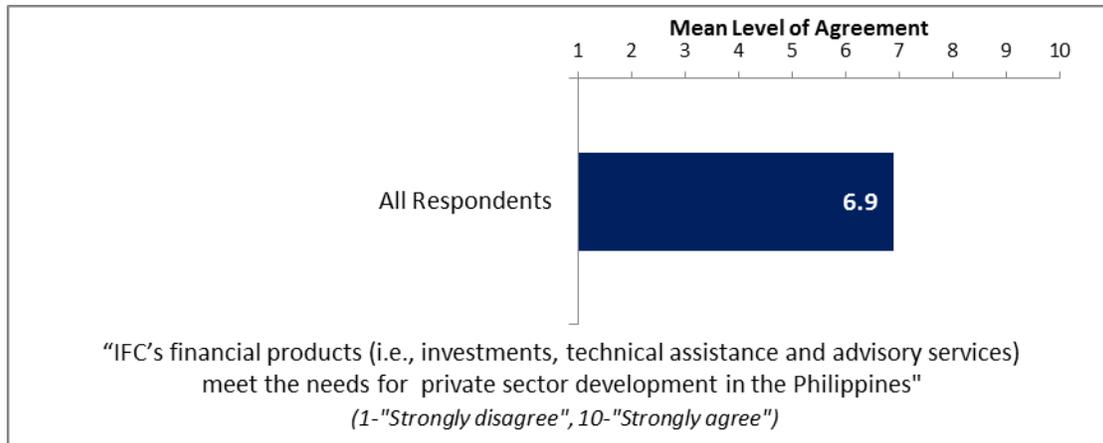

Instruments: Meeting the Philippines' Needs (*Indicator Question*)

- Respondents across all stakeholder groups and geographic locations had statistically similar levels of agreement that the World Bank's financial instruments meet the needs of the Philippines.

VII. World Bank Knowledge and Instruments (continued)

Instruments: Meeting the Philippines' Needs for Private Sector

VIII. How the World Bank Operates

The World Bank's Work in the Philippines

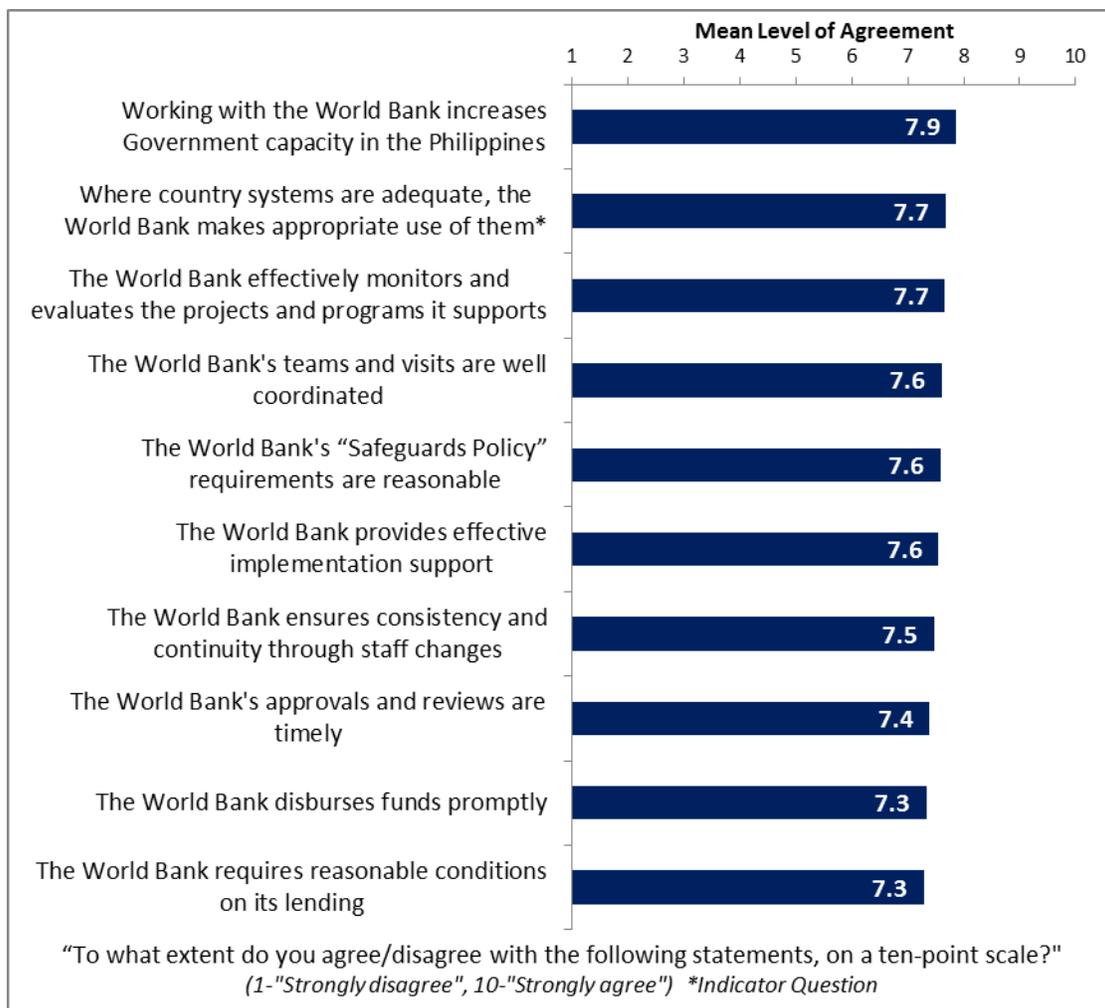

- Respondents in this year's country survey had significantly *higher* levels of agreement that the World Bank Group currently plays a relevant role in development in the Philippines compared to respondents from the FY '09 country survey (7.2), but statistically similar levels of agreement in comparison to respondents from the FY '05 country survey (7.3).
- Respondents in this year's country survey had significantly *higher* levels of agreement that the World Bank Group's work is aligned with respondents' priorities for the Philippines compared to respondents from the FY '09 and FY '05 country surveys (6.8 and 6.8, respectively).
- Donors and respondents from PMUs had the highest levels of agreement that the World Bank Group's work is aligned with respondents' priorities for the Philippines whereas respondents from the House of Representatives or Senate and the media had significantly lower levels of agreement.

VIII. How the World Bank Operates (continued)

Overall Perceptions

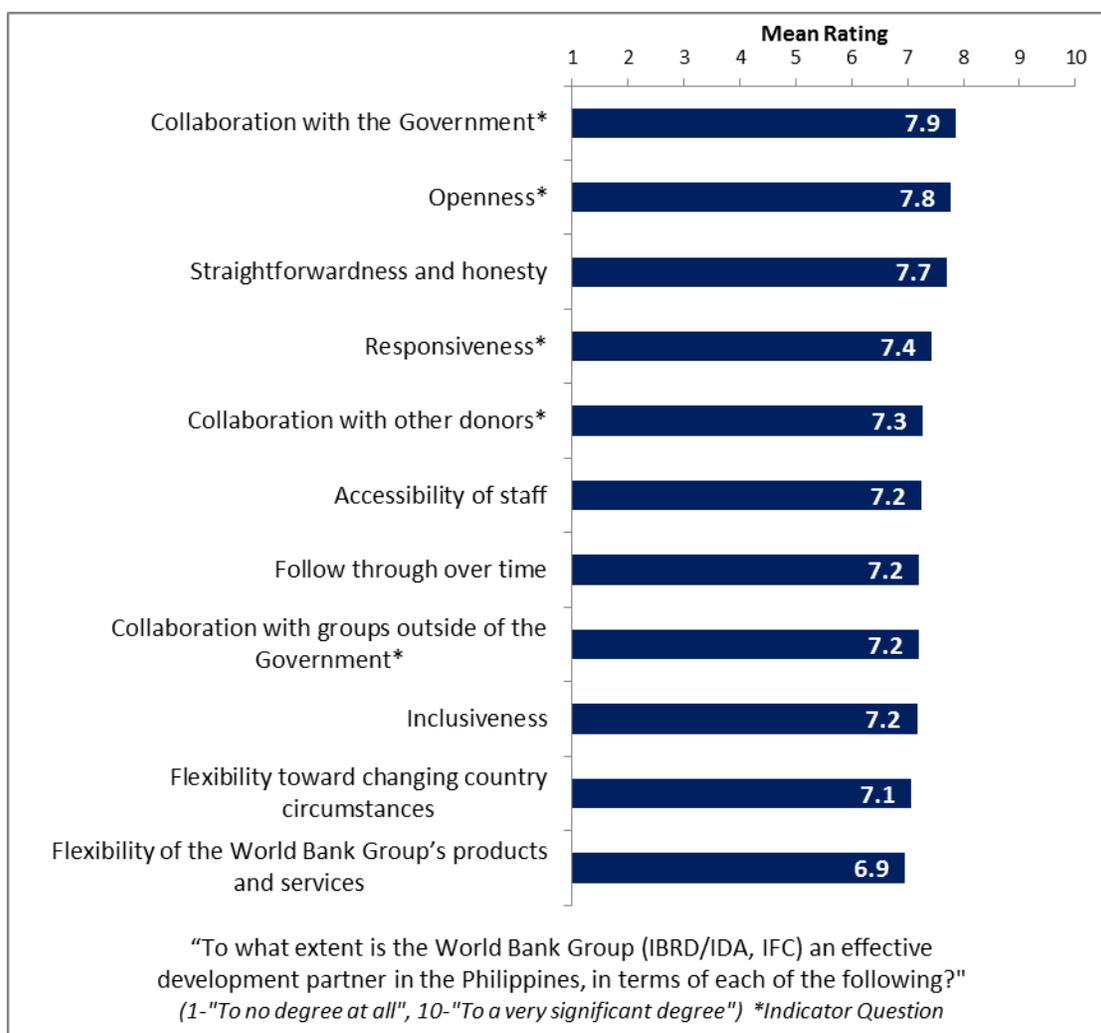

- There were significant stakeholder group differences in their levels of agreement that the World Bank disburses funds promptly, that the Bank effectively monitors and evaluates its projects, that the World Bank provides effective implementation support, that approvals and reviews are done in a timely fashion, and that the World Bank’s teams and visits are well coordinated. For the most part, respondents from PMUs had the highest levels of agreement across these areas whereas donors and respondents from private sector and the media tended to have significantly lower levels of agreement.

VIII. How the World Bank Operates (continued)

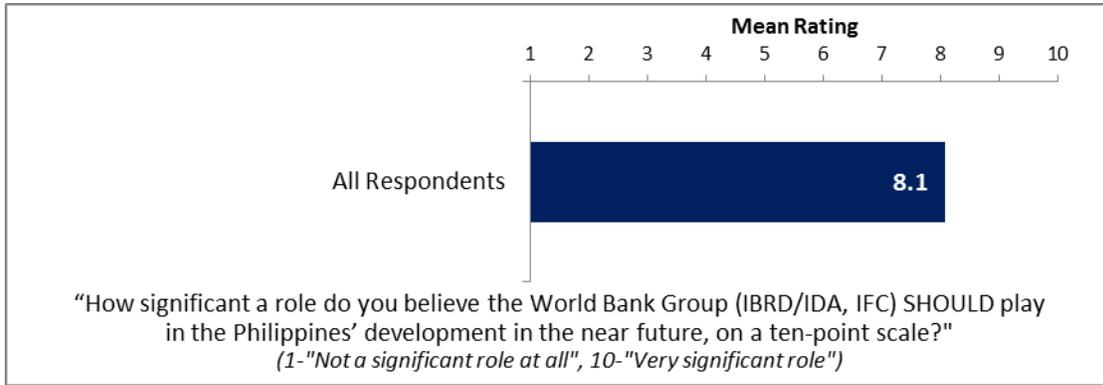

The World Bank as an Effective Development Partner

- Respondents in this year's country survey had significantly *higher* ratings for the accessibility of the Bank's staff compared to respondents from the FY '09 and FY '05 country surveys (6.7 and 6.4, respectively), but statistically similar ratings for the Bank's collaboration with other donors compared to FY '09 and FY '05 respondents (7.4 and 7.2, respectively).
- Respondents from PMUs had the highest ratings regarding accessibility of the Bank's staff and the Bank's flexibility toward changing country circumstances whereas respondents from the media had significantly lower ratings.
- Respondents from PMUs had the highest ratings for the Bank's follow through over time and inclusiveness whereas respondents from CSOs, government-owned corporations, the media, private sector, and other organizations had significantly lower ratings.
- Respondents from PMUs had the highest ratings regarding the Bank's responsiveness whereas respondents from CSOs, the media, private sector, and other organizations had significantly lower ratings.

- Respondents from local government were significantly *less* likely to have used the Bank’s websites compared to respondents from other stakeholder groups.

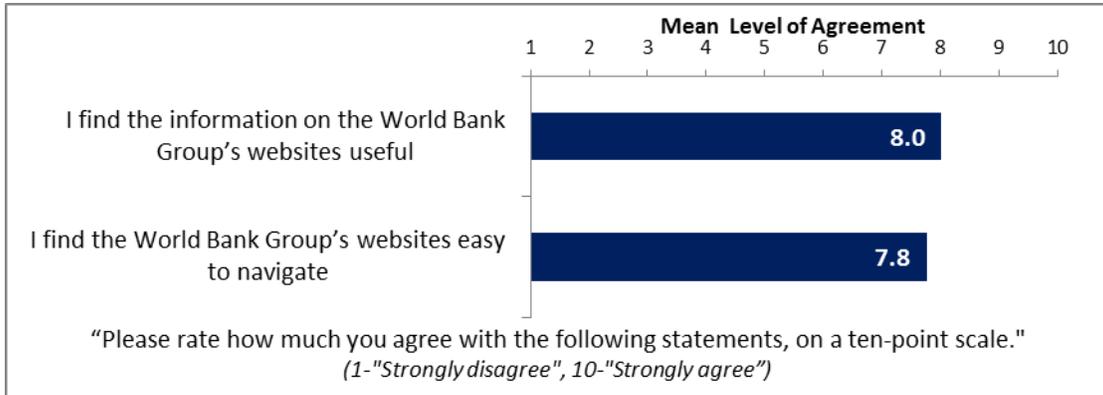

- Respondents in this year’s country survey were significantly *more* likely to have used the Bank’s main website compared to respondents from the FY ’09 and FY ’05 country surveys.

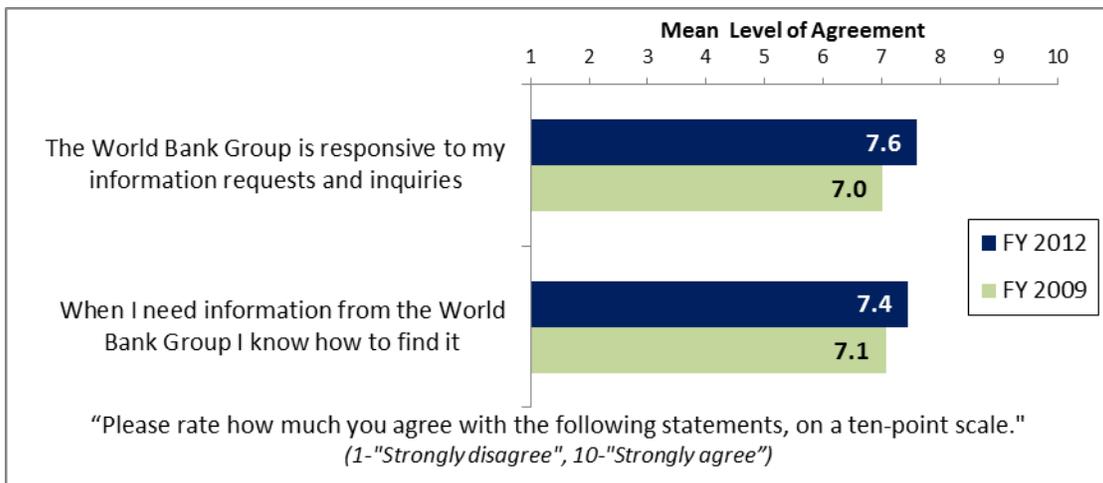

X. Communication and Openness (continued)

Website Evaluation

Information Sharing

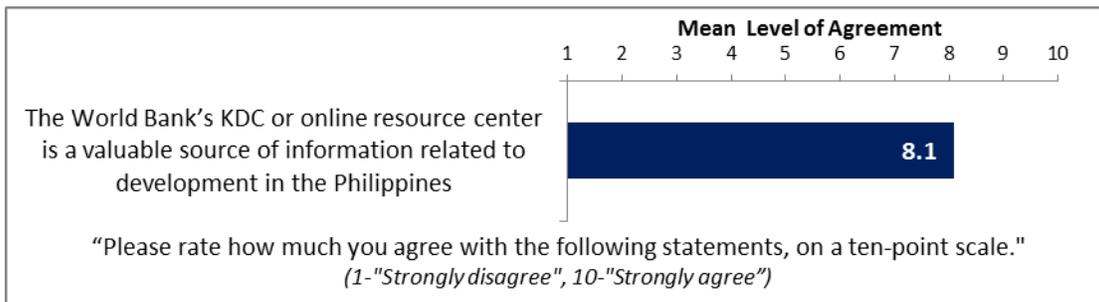

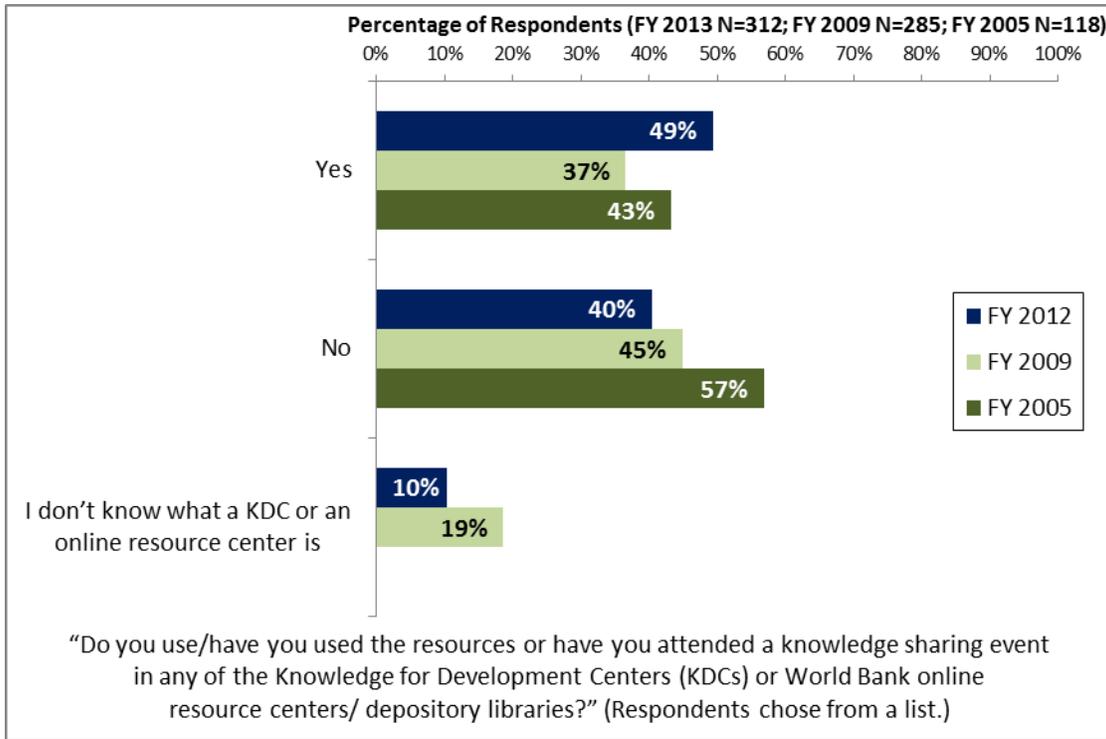

- Respondents in this year's country survey had significantly higher levels of agreement that the World Bank Group is responsive to their information requests and inquiries and that when they need information from the World Bank Group they know how to find it compared to respondents from the FY '09 country survey.
- Respondents from PMUs had the highest levels of agreement that the World Bank Group is responsive to their information requests and inquiries whereas donors had significantly lower levels of agreement.

X. Communication and Openness (continued)

Knowledge Development Centers (KDCs)

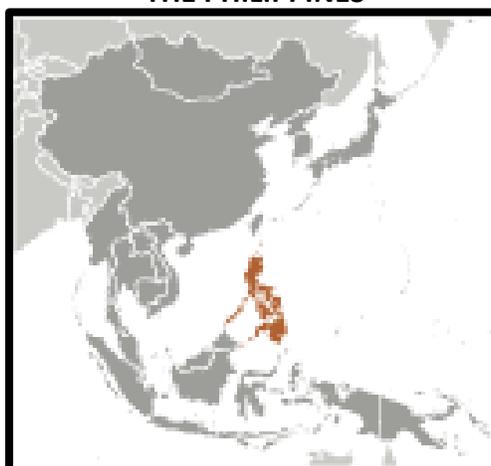

- Respondents in this year’s country survey were significantly *more* likely to have used the Bank’s KDCs or online resource centers compared to respondents from the FY ’09 and FY ‘05 country surveys.

Appendix G: The Philippines FY 2013 Questionnaire

World Bank Group Country Survey FY13 – PHILIPPINES

The World Bank Group is interested in gauging the views of clients and partners who are either involved in development in the Philippines or who observe activities related to social and economic development. The following survey is meant to give the World Bank Group's team that works in the Philippines, greater insight into how the Group's work is perceived. This is one tool the World Bank Group uses to assess the views of its critical stakeholders. With this understanding, the World Bank Group hopes to develop more effective strategies, outreach and programs that support development in the Philippines.

The World Bank Group commissioned an independent firm to oversee the logistics of this effort in the Philippines. This ensures anonymity and confidentiality. We hope you'll be candid. To complete the survey, please circle or check the response that most accurately reflects your opinion. **If you prefer not to answer a question, please leave it blank.**
