Sampling

Sampling Procedure

Since the MICS is a household based survey the sample unit is a household. The sample was designed to provide estimates on a number of indicators on the situation of children, women and men at the national level, for urban and rural areas, and for the regions.

The five regions (Western, Khangai, Central, Eastern and Ulaanbaatar) were identified as the main sampling domains and a sample was selected using the probability proportional to population size. Bags in soums and khoros in Ulaanbaatar were taken as the primary sampling units. Altogether 420 bags and khoros in the country were selected with probability proportional to size. 25 households within each of these selected units were sampled using the systematic sampling method, and a total of 10,500 households were selected. For reporting national level results, sample weights are used.

Response Rate

In total 10,500 households selected for the sample, of these 10,092 households were successfully interviewed for a household response rate of 98 percent. Of the listed household members in the interviewed households, 91 percent of women aged 15-49, 96 percent of mothers and caretakers of children under age of 5, 78 percent of men aged 15-54, and 97 percent of mothers and caretakers of children aged 2-14 successfully interviewed.

DATA COLLECTION NOTES

15 days training for the field staff was conducted in 4-18, August, 2010. Training included lectures on the contents of the questionnaires, practicing and after the training was complete, trainees had a test after which field staff was selected.

The data were collected by 10 teams. Each team comprised of a supervisor, an editor and 5 interviewers (3 women and 2 men).

Fieldwork began on 27 August 2010 and was concluded on 20 December 2010. NSO and UNICEF staff, an international consultant from the UNICEF Regional Office and the members of MICS Steering committee participated in field monitoring. Field worker's achievements and disadvantages had been discussed during the monitoring visit and necessary actions had been taken accordingly.

SUPERVISION

There is one supervisor for each of the 10 survey teams in the field.

Data Processing

Data Editing

Data collected from households were entered on computers using (CSPRO 4.0) program adjusted to Mongolian questionnaires by 10 data operators between October-December, 2010. In order to ensure quality control, all questionnaires were double entered, internal consistency checks were performed and database was finalized.

Data were analyzed using the SPSS 18.0 (Statistical Package for Social Sciences) software program, and the model syntax and tabulation plans developed by UNICEF were customized for this purpose according to the modified questionnaire.

Birth year and month of the child must be recorded. If the mother/ caretaker knows the exact day of birth, enter the day. Otherwise, circle 98 for Day.

Age (AG2)

File: ch

Overview

Type: Discrete	Valid cases: 3956
Format: numeric	Invalid: 158
Width: 1	
Decimals: 0	
Range: 0-4	

Source of information

The mother or caretaker of the child under five.

Literal question

How old is (name)?

Interviewer instructions

Age (AG2)

File: ch

After having obtained the child's date of birth, ask the child's age in completed years, and record in the space provided. Remember, ages must refer to the last birthday. Probe if necessary by asking "How old was (name) at his/her last birthday?"

If the mother/primary caretaker does not know the current age of the child, try asking "How many years ago was (name) born?" You may help the respondent by relating the child's age to that of other children or to some important event or to the season of birth, by asking, for example, "How many wet seasons ago was (name) born?"

Record age in completed years. Record '0' if the child is less than 1 year old.

Ask AG1 and AG2 independently. Then, check for consistency between the date of birth and completed age.

File: ch

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 3956
Invalid: 158

Source of information

The mother or caretaker of the child under five.

Literal question

Does (name) have a birth certificate?

Interviewer instructions

This question aims to provide an estimate of the extent of birth registration in your country. Respondents must be assured that the information about individual families will never be given to authorities, and that they cannot be identified in any way.

If the answer is yes, ask "May I see it?" and circle the appropriate corresponding code, noting whether or not the certificate was seen. If the child has a birth certificate and it was seen, circle '1' and go to next module. If the child has a birth certificate but the mother/primary caretaker is unable to show you the certificate, circle '2' and go to next module. If the child does not have a birth certificate '3' or the respondent does not know '8' continue to the next question.

Do you know how to register a child's birth (BR3)

File: ch

Overview

Type: Discrete	Valid cases: 36
Format: numeric	Invalid: 4078
Width: 1	
Decimals: 0	
Range: 1-9	

Source of information

The mother or caretaker of the child under five.

Literal question

Do you know how to register your child's birth?

Interviewer instructions

The purpose of this question is to assess how important lack of knowledge (of the process of registering or, if applicable, the place to go to register) may be among the reasons for non-registration. This information can inform advocacy efforts and help in the formulation of education campaigns.

Circle the code corresponding to the response.

In your household, how many children's books or picture book (EC1)

File: ch

Overview

Type: Discrete	Valid cases: 3956
Format: numeric	Invalid: 158
Width: 2	
Decimals: 0	
Range: 0-99	

Source of information

The mother or caretaker of the child under five.

Literal question

In your household, how many children's books or picture books have for (name)?

Interviewer instructions

This question asks specifically about children's books or picture books for the child. This excludes schoolbooks (appropriate for or belonging to older children), as well as other books for adults that are present in the household.

Record the number of books in the space provided. There is no need to make an actual count of books yourself. Rely on the respondent's answer, and avoid asking to see and count the books yourself, since this is likely to require extra time. If the respondent is unsure about the number of children's books or picture books and is not able to provide an answer the first time you ask the question, ask her/him if there are more than 10 such books. If yes, circle '10'. If she/he says that there are less than 10 such books, probe further to get an exact number. If there are no such books in the household, record '00'.

Source of information

The mother or caretaker of the child under five.

Literal question

During the school year of 2010/2011, is (name) attending a pre-school or any other alternative forms for early childhood education?

Interviewer instructions

This question aims to find out if the child is participating in early learning activities. Baby-sitting or child-minding, even if done in a special place such as a day-care centre, does not qualify as such a programme unless it includes organized learning activities. You must ensure that the mother or primary caretaker understands the meaning of 'Early Childhood Education Programme', explaining it as instructed.

Circle the appropriate code. Skip to EC7 if the answer to this question is 'No' or 'DK'.

The mother or caretaker of the child under five.

Literal question

Does (name) kick, bite or hit other children or adults?

Interviewer instructions

Circle the code corresponding to the response. A 'Yes' answer means that the parent has noticed that the child can physically hurt (kick, bite, hit) other children while a 'No' answer means that the child does not do it. Do not concern yourself with what may be the reason of such behaviour (e.g., if parent tries to explain the reasons, or excuse the child).

'Being breastfed' is defined as putting the child to the breast at least once a day.

Circle the code corresponding to the response.

The questions BF3-BF18 asks about what the child was fed in the preceding 24 hours. The purpose of these questions is to determine what liquids or foods the child was given. Make sure that the respondent understands the question, particularly what is meant by 'yesterday, during the day or night'.

Circle the code corresponding to the response. If the mother/primary caretaker does not know the answer, repeat the question using other local words for the fluid or food. If the answer is still not known, circle '8' for 'DK'.

Note that for infant formula, milk, yogurt, and solid/semi-solid mushy food, the number of times the child had the food is also asked.

Diarrhoea is determined by the perception of the mother or caretaker, or by three or more loose or watery stools per day, or by blood in stool.

Record the mother's/primary caretaker's answer by circling the corresponding code. If a respondent is not sure what is meant by diarrhoea, tell her/him it means "three or more loose or watery stools per day, or blood in the stool." Make sure the respondent understands what is meant by 'in the last 2 weeks'. If the child has not had diarrhoea in the last 2 weeks or the caretaker doesn't know, skip to CA7.

Literal question

I would like to know how much (name) was given to drink breast milk or any other liquids and to eat any food during the time he/she had diarrhoea.

During the time (name) had diarrhoea, was he/ she given less than usual to drink or more than usual?

Interviewer instructions

If dehydrated, a child may take more fluids than usual. We want to know if the pattern of fluid consumption changed during diarrhoea. The focus in this question is on how much fluid was actually consumed by the child.

Ask the question just as it is worded here. Read out the entire question and circle the appropriate code for the caretaker's response. Get the respondent's best judgement of the relative amount of total fluids actually consumed by the child. All fluids are included, not just special ones given during diarrhoea. For example, water, tea, fruit juice, breastmilk and formula are included as well as special fluids such as ORS.

If the child was given less drink than usual during the diarrhoea, probe: "much less than usual or somewhat less than usual?"

Try to find out what actually happened, not what the respondent thinks ought to have happened. An answer such as, "A child with diarrhoea (or 'a child who is ill') needs more fluids" is not satisfactory. You would need to ask, "But how much did your child actually drink during this diarrhoea?"

It may be difficult to estimate the relative amount of breastmilk taken by the child. The respondent may make an estimate based on whether the child nursed longer or more frequently.

Literal question

During the time (name) had diarrhoea, was he/she given less than usual to eat, about the same amount, more than usual, or nothing to eat?

Interviewer instructions

During an episode of diarrhoea or other illness, a child may change the amount usually eaten. The focus in this question is on how much food was actually consumed by the child.

Ask the question just as it is worded here. Read out the entire question and circle the code corresponding to the caretaker's response. Get the caretaker's best judgement of the relative amount of total food actually consumed by the child.

Try to find out what actually happened, not what the caretaker thinks ought to have happened. An answer such as, "A child with diarrhoea (or 'a child who is ill') needs more food" is not satisfactory. You would need to ask, "But how much did your child actually eat during this diarrhoea?"

If the caretaker replies that the child took only fluids (that is, the child did not 'eat'), circle '5' for 'Stopped food'. If the child was given less than usual to eat during the diarrhoea, probe: "Was he/she given much less than usual to eat, or somewhat less?". Then circle the appropriate code. If the mother/primary caretaker offered more food than usual, but the child ate much less, the answer is 'much less'; circle '1'.

Make sure that the respondent understands that this includes breastmilk, if the child is still being breastfed. If the child is very young and the caretaker replies that he/she takes only fluids or breastmilk (that is, has not started 'eating' yet), there is no need to probe, since 'drinking' and 'eating' count as the same for this child. Circle the answer for this question (eating) that comes closest to the answer you circle for CA4 (drinking).

This question asks the mother or caretaker whether the child received any (other) treatment for diarrhoea other than those mentioned in CA4 for this episode of diarrhoea. If in CA4 you learned that the child was given fluid from an ORS packet, sugar and salt solution, or pre-packaged ORS fluid, then phrase CA5 by saying, "Was anything else given to treat the diarrhoea?" If none of the liquids was given, ask CA5 by saying, "Was anything given to treat the diarrhoea?"

Literal question

During the time (name) had an illness with cough, did he/ she breathe faster than usual with short or rapid breaths or have difficulty breathing?

Interviewer instructions

The question aims to find out if the child has or had an illness requiring assessment by a health professional.

If the respondent asks "What do you mean by 'fast breathing'?" you may say "noticeably faster than normal when the child is rested." If the respondent asks "What do you mean by 'difficulty breathing'?" you may say "The child sounded/looked as if he/she was having trouble breathing." You may give other explanations that were developed and tested during the adaptation and pre-testing of the questionnaire. Circle the code corresponding to the response. Literal question

Did you seek any advice or treatment for (name)'s illness from any source?

Interviewer instructions

'Seeking care outside the home' means going outside the family or household for advice or treatment. Seeking care could include anything from asking a neighbour for advice, to holding a religious ceremony on the child's behalf, to going to a hospital. If a physician or other provider visits the household to give care, this counts as seeking care outside the home. The child may or may not have accompanied the respondent when he/she sought care. For example, going to buy medicine without the child counts as seeking care.

When the last time passed stools, what was done to dispose t (CA15)

File: ch

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-99

Valid cases: 2634

Source of information

The mother or caretaker of the child under five.

Literal question

When the last time (name) passed stools, what was done to dispose the stools?

When the last time passed stools, what was done to dispose t (CA15)

File: ch

Interviewer instructions

The purpose of this question is to know what was done with the most recent stools passed by the child in the household. The safe disposal of children's stools is of particular importance because children's stools are the most likely cause of faecal contamination to the immediate household environment. Correct disposal of stools is linked with lower risks of diarrhoea.

Respondents are asked where they usually dispose of their children's stools if the child did not use the toilet facility. Circle the most appropriate code.

If the respondent states that diapers are used, then probe to establish how the diapers are disposed of.

Does have an immunization card (IM1)

File: ch

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 3956
Invalid: 158

Source of information

The mother or caretaker of the child under five.

Literal question

Does (name) have an immunization card?
If yes, ask: Please show it to me.

Interviewer instructions

If the respondent reports that there is a vaccination card for the child, ask to see it. You should have obtained vaccination cards at the beginning of the interview. If you did not already obtain the card for the child, now is the time to ask for it again.

In some cases, the respondent may not be willing to take time to look for the vaccination card, thinking that you are in a hurry. Encourage the respondent to look for the vaccination card for the child. It is critical to obtain written documentation of the child's immunization history. Therefore, be patient if the respondent needs to search for the card.

If the respondent does not have a vaccination card but the vaccine doses are registered in another document (for example, a booklet with records of clinic visits), ask to see it. If the card or other document is seen, circle '1' and skip to IM3. If the child has a vaccination card or other document but the respondent is unable to show you, circle '2' and skip to IM6 - you will be asking the respondent to recall the child's vaccinations. If the respondent does not have a vaccination card or any other document where the vaccine doses are registered for the child, circle '3' and continue to next question.

File: ch

Overview

Type: Discrete	Valid cases: 3204
Format: numeric	Invalid: 910
Width: 1	
Decimals: 0	
Range: 1-9	

Source of information

The mother or caretaker of the child under five.

Literal question

In addition to what is recorded on this card, did (name) receive any other vaccinations – including vaccinations received in campaigns or immunization days?

Interviewer instructions

It is possible that some of the vaccinations received by the child were not recorded. For example, the respondent may have forgotten to bring the card to the health facility or the respondent may have taken the child to a National Immunization Day.

If the answer is 'Yes', circle '1' only if the respondent mentions vaccines included in the questionnaire. You can refer to the information already obtained from the vaccination card to make sure that the mother/primary caretaker is referring only to these vaccines. Write '66' in the corresponding 'Day' column for IM3, and leave the month and year columns blank. For example, if two doses of DPT were recorded on the card, and another dose was given but not recorded, there should be '66' in the 'Day' column.

Do not ask the respondent to supply dates from memory. Enter a date only if the card or other document is available and lists a date for the immunization dose.

Once you have probed for any other vaccination, skip to IM18.

Literal question

Has (name) ever received any vaccinations?

Interviewer instructions

Has ever received any vaccinations (IM6)

File: ch

Only ask IM6-IM17 to obtain the child's vaccination status if a vaccination card or other document is not available (that is, if the answer to IM1 was '2' for 'Yes, not seen' or '3' for 'No card'). Describe the vaccination techniques in detail to the caretaker and provide further explanations if needed. When mentioning the vaccines or the specific diseases, use local synonyms if needed. We are not interested in injections for treating a disease - antibiotics, anti-malarials, etc. - but only in vaccines.

Circle the code corresponding to the response. If the answer is 'Yes', continue to the next question, to start asking about each of the vaccines. If the answer is 'No' or 'DK', skip to IM18.

Head of household or other responsible household member

Literal question

Is (name) male or female?

Interviewer instructions

Circle '1' for 'Male' and '2' for 'Female'. Do not guess the sex of the household member from the name provided to you. When the respondent is listing everyone in the household, he/she may indicate the sex of the person at the same time, by saying "My sister Mary," for instance. In this case, you do not need to ask the sex of the household member again, since it is already obvious that the person is a female. However, when a name is mentioned that can be used for both males and females, never use your judgement. Even in cases when you think that the name would most likely be a male's (or a female's) name, have the respondent confirm the sex. This column should never be left blank.

Head of household or other responsible household member

Literal question

Is (name) male or female?

Interviewer instructions

You should begin by saying:

First, please tell me the name of each person who usually lives here, starting with the head of the household.

List the head of the household in line 01. List all household members (HL2), their relationship to the household head (HL3), and their sex (HL4). Then ask:

Are there any others who live here, even if they are not at home now? If yes, complete the listing for questions HL2-HL4. Then, ask questions starting with HL5 for each person at a time.

Circle '1' for 'Male' and '2' for 'Female'. Do not guess the sex of the household member from the name provided to you. When the respondent is listing everyone in the household, he/she may indicate the sex of the person at the same time, by saying "My sister Mary," for instance. In this case, you do not need to ask the sex of the household member again, since it is already obvious that the person is a female. However, when a name is mentioned that can be used for both males and females, never use your judgement. Even in cases when you think that the name would most likely be a male's (or a female's) name, have the respondent confirm the sex. This column should never be left blank.

Once you have a complete list of names, relationship codes and sex, move across this page to ask and record answers to questions about individual persons starting from HL5. Start with the household head on line 01. When you have finished asking all questions HL5 to HL14 for the person on line 01, continue to the person listed on line 02, etc.

Head of household or other responsible household member

Literal question

Has (name) ever attended school or pre-school?

Interviewer instructions

For household members age 5 and above, ask ED1-ED8:

Circle '1' if the answer is 'Yes' and continue with question ED4A. If the answer is 'No', circle '2' and go to the household member on the next line.

The term 'school' includes primary, secondary and post-secondary schooling, as well as any other intermediate levels of schooling in the formal school system. It also includes technical or vocational training beyond the primary-school level, such as long-term courses in mechanics or secretarial work.

Schools that carry out non-standard curriculum (non-formal education) are not included here. A non-standard curriculum includes religious schools, such as Koranic schools, that do not teach a full, standard school curriculum. If a school teaches religious courses but also includes the standard curriculum - such as many Catholic schools - it would be coded as a standard (formal) school.

'Preschool' is listed for children who do not attend grade 1, but do attend some form of organized learning or early childhood education programme, whether or not such a programme is considered part of the school system. The definition of organized early learning programme does not refer to programmes offering only babysitting or child-minding.

Head of household or other responsible household member

Literal question

How old is (name)?

Interviewer instructions

Age (HL6)

File: ch214

Enter each person's age in completed years, that is, his/her age at his/her last birthday. Completed age is also defined as 'the number of completed years since birth'. With this definition, since a 6-month-old baby has not completed a full year, his/her age will be entered as '00'. Note that you will be obtaining more accurate estimates of children's ages later.

This column should never be left blank.

Even after you have probed and asked all the necessary information from the respondent and you still have difficulty obtaining the ages of elderly members of the household, you may enter the code '98', meaning 'Doesn't know/over age 50'. For household members younger than 50, completed ages must be entered. However, you should still indicate, with a note, what age range the person in question might be, so that your editor or supervisor can have an idea of the eligibility of the person to administer the individual questionnaires.

If the age of the member of the household is 95 or higher enter the code '95' for all such cases.

Interviewer instructions

This is the number used to identify each person listed. You must obtain a complete list of all persons who usually live in the household, but you do not need to fill in or do anything in this column since the numbers are already provided. This is a very important number since, once household members are assigned these line numbers after the Household Listing Form is completed, all members are identified with these line numbers throughout the questionnaires administered in this household.

Probe for additional household members.

Probe especially for any infants or small children not listed, and others who may not be members of the family (such as servants, friends) but who usually live in the household.

Insert names of additional members in the household list and complete form accordingly.

Head of household or other responsible household member

Literal question

What is the relationship of (name) to the head of the household?

Interviewer instructions

You should begin by saying:

First, please tell me the name of each person who usually lives here, starting with the head of the household.

List the head of the household in line 01. List all household members (HL2), their relationship to the household head (HL3), and their sex (HL4). Then ask:

Are there any others who live here, even if they are not at home now? If yes, complete the listing for questions HL2-HL4.

Then, ask questions starting with HL5 for each person at a time.

Enter the code corresponding to how the person listed is related to the head of the household. Use the codes at the bottom of the Household Listing Form. Be particularly careful in doing this if the respondent is not the head of the household. Make sure that you record the relationship of each person to the household head, not the relationship to the respondent. For example, if the respondent is the wife of the head of the household and she says that Sola is her brother, then Sola should be coded as '09' ('Brother-in-law / Sister-in-law'), not as '08' ('Brother / Sister'), because Sola is a brother-in-law of the head of the household. Be very careful in obtaining this information correctly, since respondents tend to provide the relationship of the person to themselves, rather than to the head of the household.

If the head of the household is married to a woman who has a child from a previous marriage, that child's relationship to the head of the household should be coded as '13' ('Adopted/foster/stepchild'). If a household member is not related to the head of household, such as a friend who lives with the household, enter '14' ('Not related'). Enter '98' if the respondent doesn't know the relationship of a household member to the head of household.

Head of household or other responsible household member

Literal question

Is (name) male or female?

Interviewer instructions

Sex (HL4)

File: hl

You should begin by saying:

First, please tell me the name of each person who usually lives here, starting with the head of the household.

List the head of the household in line 01. List all household members (HL2), their relationship to the household head (HL3), and their sex (HL4). Then ask:

Are there any others who live here, even if they are not at home now? If yes, complete the listing for questions HL2-HL4.

Then, ask questions starting with HL5 for each person at a time.

Circle '1' for 'Male' and '2' for 'Female'. Do not guess the sex of the household member from the name provided to you. When the respondent is listing everyone in the household, he/she may indicate the sex of the person at the same time, by saying "My sister Mary," for instance. In this case, you do not need to ask the sex of the household member again, since it is already obvious that the person is a female. However, when a name is mentioned that can be used for both males and females, never use your judgement. Even in cases when you think that the name would most likely be a male's (or a female's) name, have the respondent confirm the sex. This column should never be left blank.

Once you have a complete list of names, relationship codes and sex, move across this page to ask and record answers to questions about individual persons starting from HL5. Start with the household head on line 01. When you have finished asking all questions HL5 to HL14 for the person on line 01, continue to the person listed on line 02, etc.

Head of household or other responsible household member

Literal question

How old is (name)?

Interviewer instructions

Enter each person's age in completed years, that is, his/her age at his/her last birthday. Completed age is also defined as 'the number of completed years since birth'. With this definition, since a 6-month-old baby has not completed a full year, his/her age will be entered as '00'. Note that you will be obtaining more accurate estimates of children's ages later.

This column should never be left blank.

Even after you have probed and asked all the necessary information from the respondent and you still have difficulty obtaining the ages of elderly members of the household, you may enter the code '98', meaning 'Doesn't know/over age 50'. For household members younger than 50, completed ages must be entered. However, you should still indicate, with a note, what age range the person in question might be, so that your editor or supervisor can have an idea of the eligibility of the person to administer the individual questionnaires.

If the age of the member of the household is 95 or higher enter the code '95' for all such cases.

Pre question

Eligibility for individual modules: Questions HL7, HL7A and HL9 concern eligibility information.

Literal question

Who is the mother or primary caretaker of this child?

Interviewer instructions

If the household member is a child under the age of five (this includes those just born and those age 4, but not children who have completed 5 years of age), record the line number of his/her mother or primary caretaker in this column. Ask this question to the respondent if necessary. Later, you will be interviewing the person you are recording her/his line number here about the child you are collecting information.

Is natural mother alive (HL11)

Literal question

Is (name)'s natural mother alive?

Interviewer instructions

Is natural mother alive (HL11)

File: hl

For children age 0-17 years ask HL11-HL14:

For all children under age 18, we want to know whether their own (natural) parents are listed in the Household Listing Form, and their survival status. This information can be used to measure the prevalence of orphanhood and child fostering in the population. For everyone age 18 and older, HL11-HL14 will be left blank.

By 'natural' we mean the biological mother. In many cultures, people consider other people's children whom they are raising as their own, especially children of their husband or sisters, etc. You should be certain that the respondent understands that you are asking about the woman who gave birth to the child.

Record whether or not the child's natural mother is still alive by circling the code corresponding to the response given. If the child's natural mother is not alive or if the respondent does not know, skip to HL13. Otherwise, continue to the question in the next column.

Literal question

Does (name's) natural mother live in this household?

Interviewer instructions

For children age 0-17 years ask HL11-HL14:

For all children under age 18, we want to know whether their own (natural) parents are listed in the Household Listing Form, and their survival status. This information can be used to measure the prevalence of orphanhood and child fostering in the population. For everyone age 18 and older, HL11-HL14 will be left blank.

If the natural mother is still alive, we want to know whether she lives in the household. If the mother does live in the household, ask who she is (she should be listed in the Household Listing Form if she lives in the household) and record her line number in the space provided. If the mother is not a member of the household (not listed in the Household Listing Form), record '00'.

File: hl

Overview

Type: Discrete	Valid cases: 31633
Format: numeric	Invalid: 4114
Width: 1	
Decimals: 0	
Range: 1-9	

Source of information

Head of household or other responsible household member

Literal question

Has (name) ever attended school or pre-school?

Interviewer instructions

For household members age 5 and above, ask ED1-ED8:

Circle '1' if the answer is 'Yes' and continue with question ED4A. If the answer is 'No', circle '2' and go to the household member on the next line.

The term 'school' includes primary, secondary and post-secondary schooling, as well as any other intermediate levels of schooling in the formal school system. It also includes technical or vocational training beyond the primary-school level, such as long-term courses in mechanics or secretarial work.

Schools that carry out non-standard curriculum (non-formal education) are not included here. A non-standard curriculum includes religious schools, such as Koranic schools, that do not teach a full, standard school curriculum. If a school teaches religious courses but also includes the standard curriculum - such as many Catholic schools - it would be coded as a standard (formal) school.

'Preschool' is listed for children who do not attend grade 1, but do attend some form of organized learning or early childhood education programme, whether or not such a programme is considered part of the school system. The definition of organized early learning programme does not refer to programmes offering only babysitting or child-minding.

Interviewer instructions

For household members age 5 and above, ask ED1-ED8:

Circle the code corresponding to the answer given. If 'Yes', continue to the next question. If 'No', skip to ED7.

If the interview is carried out during the school year, then the question should be worded to refer to the current school year. If the interview is carried out between school years, then the question should refer to the last school year that has ended.

Take the example of a country where the school year ends in June and the new school year begins in September: If the interview is carried out in July 2012 (between school years), then the question should refer to the 2011-2012 school year; if the interview is carried out in October 2012 (during the new school year), then the question should refer to the 2012-2013 school year.
