Aim and use of the survey

The National Household Travel Survey will provide information to help the National Department of Transport (NDOT) to understand how and why people travel and to gain strategic insight into the transport problems and travel patterns of people of South Africa. The aim of the survey is to understand the transport needs and behaviour of households at all times of the day, to assess the effectiveness of the existing public transport subsidy mechanism, to assess attitudes towards transport services and transport facilities and to ascertain the cost of transport and assess level of affordability.

Write figures very carefully

Close the zeros (0) so that they will **not** be mistaken for the sixes (6).
 When there is more than one zero (0), as for instance in the value 1 000, do **not** connect the zeros on top, which is very common. Don't write the figures sideways or diagonally.
 Never use decimal points (or decimal commas).

Your figures should be made like this:

1	2	3	4	5
6	7	8	9	0

Your crosses should **not** touch the sides:

X

FLAP This section covers particulars of each person in the household

The following information must be obtained for every person who is considered to be a member of the household.
Do not forget babies. If there are more than 10 persons in the household, use a second questionnaire.
