Version

VERSION DESCRIPTION

Version 6.4. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

In v6.4, the research team continued to carry out improvements to geography, providing harmonized geographic units for the second administrative level for roughly half the countries. More information about IPUMS geography variables is available [here](https://international.ipums.org/international/geography_variables.shtml). Also, approximately 100 integrated variables were renamed. Affected variables with their current and previous names are listed [here](https://international.ipums.org/international/resources/misc_docs/renamed_variables_sept2015.pdf). Geography variable also underwent wholesale renaming.

In this update, IPUMS added 19 new samples for Armenia, Austria, Costa Rica, Ethiopia, France, Ghana, Mozambique, Paraguay, Portugal, Puerto Rico, South Africa, and Spain. Ethiopia, Mozambique, and Paraguay were newly added countries to IPUMS. Samples for other countries extend pre-existing series for those countries.

Overview

ABSTRACT

IPUMS-International is an effort to inventory, preserve, harmonize, and disseminate census microdata from around the world. The project has collected the world's largest archive of publicly available census samples. The data are coded and documented consistently across countries and over time to facilitate comparative research. IPUMS-International makes these data available to qualified researchers free of charge through a web dissemination system.

The IPUMS project is a collaboration of the Minnesota Population Center, National Statistical Offices, and international data archives. Major funding is provided by the U.S. National Science Foundation and the Demographic and Behavioral Sciences Branch of the National Institute of Child Health and Human Development. Additional support is provided by the University of Minnesota Office of the Vice President for Research, the Minnesota Population Center, and Sun Microsystems.

UNITS OF ANALYSIS

Household

UNITS IDENTIFIED:

- Dwellings: No
- Vacant units: No
- Households: Yes
- Individuals: Yes

- Group quarters: Yes
- Special populations: No

UNIT DESCRIPTIONS:

- Dwellings: Accommodations/rooms
- Households: A household comprises all persons living and keeping house together. Persons keeping house alone are regarded as separate households. Persons having more than one dwelling will be allocated to a household in each dwelling.
- Group quarters: All individual persons in community residences that do not keep house for themselves compose a collective household.

DDI DOCUMENT VERSION

- v6.4 April 2016

Documentation of census data and harmonized variables as found in IPUMS-International. The International Household Survey Network (IHSN) contracted IPUMS International for generating DDI and Dublin Core-compliant metadata related to population and housing census datasets from developing countries. The objective was to provide countries with detailed metadata in a format compatible with the DDI standard used by most of these countries, with a view to guarantee the preservation of the data and metadata, and the publishing of metadata.

The intellectual rights (including copyright) for the data and metadata in IPUMS are retained by the countries under a Memorandum of Understanding with the contributing countries. IPUMS-International has distribution rights to the metadata and data. The XML documents generated by this process are viewed as a distribution of the metadata.

Fields edited by the World Bank are: DDI ID and study ID to match World Bank study naming convention, as well as DDI Document Version and Version Description to reflect changes included in version 6.4.

What is the total space of the entire dwelling? (including kitchen, bathroom, WC, corridor/hall, garret rooms and the like, as well as sublet or commercially used rooms in the dwelling) ____ full square meters

V43	DE1987A_0044	Dwelling subsidized with funds for publicly assisted housing	discrete	numeric	<p>Question 8: Is the dwelling subsidized with budget funds for publicly assisted housing? Only dwellings which have been completed after the currency reform (June 20, 1848) and for which public funds (of the Federation, the state or the municipality) were granted for the construction of low-cost dwellings (the so-called primary assistance) are considered as subsidized with budget funds for publicly assisted housing. These include loans to cover the construction costs (as a rule, public building loans, also known as state building loans) and loans or grants to meet current expenditure (assistance in the form of annuities, grants or loans for specific expenditures, the subsidizing of interest charges). For publicly subsidized dwellings new tenants have to submit a housing certificate from the respective municipality or "Kreis" administration (e.g. housing office, welfare office). If the assistance funds for apartment buildings were paid back ahead of time, most of these dwellings are still considered publicly subsidized for up to 8 years. As far as owner-occupied houses and condominiums are concerned, the public control ends upon repayment or redemption of the assistance funds; in the case of dwellings converted into condominiums, the public control ends only if the owners themselves are using the condominium as persons eligible according to the regulations of publicly assisted housing. On the termination of public control, owners receive a letter of confirmation from the respective agency. Not considered public funds in the above sense are: loans for expenditures according to the regional program of the Federation (the so-called secondary assistance), reconstruction loans according to the Law on the Equalization of Burdens, housing assistance payments for persons employed in public service of the Federation, the states or the communities, means to further the modernization of housing or for measures designed to save heating energy, article 7b depreciation allowances and other tax benefits, premiums on building loan contracts. Main tenants who do not know whether their dwelling was subsidized with budget funds for publicly assisted housing need not answer this question. Data on dwelling Subtenants are not required to answer any further questions in the dwelling questionnaire [Questions 2-10 were optional for subtenant occupants] 8. Is the dwelling subsidized with budget funds for publicly assisted housing? [] 1 No [] 2 Yes</p>
V44	DE1987A_0045	Monthly rent (in Deutsche Marks)	contin	numeric	<p>Data on dwelling Subtenants are not required to answer any further questions in the dwelling questionnaire [Questions 2-10 were optional for subtenant occupants] 9. How much is the monthly rent? The rent also comprises the monthly charges for water, sewerage, street cleaning, garbage collection, staircase lighting, chimney sweeping. Not to be included in the rent are amounts charged for central heating, hot water supply, garage rental, extra charge for subletting, extra charge for furnishing. ____ full DM</p>

V45	DE1987A_0046	Employer provided dwelling	discrete	numeric	Data on dwelling Subtenants are not required to answer any further questions in the dwelling questionnaire [Questions 2-10 were optional for subtenant occupants] 10a. Is the present dwelling provided/subsidized by the employer or is it a combined dwelling/office for professional or commercial use and the like? <input type="checkbox"/> 1 No <input type="checkbox"/> 2 Yes
V46	DE1987A_0047	Subsidized rent	discrete	numeric	Data on dwelling Subtenants are not required to answer any further questions in the dwelling questionnaire [Questions 2-10 were optional for subtenant occupants] 10b. Is the dwelling let by the owner at a reduced rate or free of charge, or is the rent reduced because of any advance payments made (e.g. tenant's loan)? <input type="checkbox"/> 1 No <input type="checkbox"/> 2 Yes
V47	DE1987A_0048	Type of building 1	discrete	numeric	Question 1: Type of building Residential buildings are buildings used at least 50% for residential purposes; in other buildings with space used for residential purposes, less than half of the total floor space is used for residential purposes, whereas the largest part serves commercial, social, cultural or administrative purposes. Other types of accommodation are makeshift buildings for temporary use including: barracks, temporary homes, permanently-anchored houseboats, railway construction trains and arbors. Residential homes provide for the housing needs of certain sections of the population, e.g. students and elderly people. A building can be used exclusively as a residential home, such as student dormitories, nursing homes, nurses' dormitories and shelters for mothers and children. There are, however, also buildings that are only partly used as residential homes (e.g. centers for elderly people). V180	DE1987A_0450	Socio-economic indicator for employed persons (German)	discrete	numeric	<p>Question 10: What is the highest level at a vocational school or university? a) Full-time vocational schools are attended either in preparation for a specific trade or for a complete vocational training. They include (among others): commercial schools, schools for higher commercial studies, administrative schools, language schools and interpreters' schools, housekeeping schools, nursemaids' schools, schools for medical assistants, schools of arts and schools of dramatic arts. Compulsory part-time vocational schools or special part-time vocational schools must not be indicated under "full-time vocational school". Advanced full-time vocational schools provide a further education for specific occupations. They may be attended on a part-time or a full-time basis. The advanced full-time vocational schools are normally designated as "special schools for... (occupational objective or field of interest)" -- e.g., advanced full-time technical schools (also schools for technicians), advanced full-time vocational schools for economics, agriculture, home economics, textiles and clothing, social pedagogy. These schools also include master schools. The vocational colleges mainly emerged from the former engineering schools and higher advanced full-time vocational schools. Their objective is to provide an education on a scientific or artistic basis by means of schooling especially focused on practical training, thereby enabling the students to perform an independent activity in their professional life. The vocational colleges also include the administrative vocational colleges where junior staff is trained for the upper-grade non-technical service of the Federation and the states. Studies at universities, teacher training colleges, theological colleges and colleges of arts as well as in scientific courses of studies at the Gesamthochschulen should be indicated under "institution of higher education."</p> <p>b) Indicated here is the occupational emphasis towards which the successful completion of a full-time vocational school, advanced full-time vocational school, vocational college or university that was orientated -- e.g., agriculture, mechanical engineering electrical engineering, business management, economics, surface ground construction, underground construction, trade in goods, transport and communications, banking and insurance. If a commercial school was completed, please enter "commercial school." Question 15: Are you presently working as? Persons doing civilian alternative service please indicate "civilian service". Apprentices should enter the profession/occupation they are trained in. Question 18: Do you pursue some additional economic activity? This includes all further activities (also assisting in the establishment of a family member) which -- even if only occasionally -- are performed at the present -- e.g., part-time activity of a mechanic on his own supplementary income agriculture holding. Work in own household is, however, not considered additional economic activity. Record type (RECTYPE)

File: DEU1987-H-H

Overview

Type: Discrete
Format: character
Width: 1

Valid cases: 0
Invalid: 0

Description

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

Household serial number (SERIAL)

File: DEU1987-H-H

Overview

Type: Continuous
Format: numeric
Width: 10
Decimals: 0

Valid cases: 0
Invalid: 0

Description

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002
Colombia 1993, 2005
Costa Rica 1984, 2000
Cuba 2002
Dominican Republic 1981, 2002, 2010
Ecuador 1990, 2001
Germany 1971
Hungary 1980, 1990, 2001
Jamaica 1982, 1991, 2001
Malaysia 1970, 1991, 2000
Mexico 1995, 1990, 2000, 2005
Nigeria 2006
Panama 2000
Peru 1993, 2007
Portugal 1981, 1991, 2001
Spain 1991
Uruguay 2011
Venezuela 1990, 2001
Vietnam 1989

In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

Year (YEAR)

File: DEU1987-H-H

Overview

Type: Discrete
 Format: numeric
 Width: 4
 Decimals: 0
 Range: 1960-2011

Valid cases: 0

Description

YEAR gives the year in which the census was taken.

IPUMS sample identifier (SAMPLE)

File: DEU1987-H-H

Overview

Type: Discrete
 Format: numeric
 Width: 9
 Decimals: 0
 Range: 32197001-894201001

Valid cases: 0
 Invalid: 0

Description

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g., 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

Description

REGIONW identifies the continent and region of each country.

Number of person records in the household (PERSONS)

File: DEU1987-H-H

Overview

Type: Continuous
 Format: numeric
 Width: 3
 Decimals: 0

Valid cases: 0
 Invalid: 0

Description

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

Subsample number (SUBSAMP)

File: DEU1987-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

Group quarters (collective dwelling) status (GQ)

File: DEU1987-H-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-99

Valid cases: 0
Invalid: 0

Description

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings - are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

NUTS1 Region, Europe (ENUTS1)

File: DEU1987-H-H

Overview

Type: Discrete
Format: numeric
Width: 4
Decimals: 0
Range: 101-9999

Valid cases: 0
Invalid: 0

Description

ENUTS1 identifies the Nomenclature of Territorial Units for Statistics (NUTS) within Europe in which the household was enumerated. NUTS1 is the first level territorial units within countries. NUTS is a standard administrative division of the European Union, and was developed by the EU. The European Free Trade Association extends the NUTS system to several additional countries outside of the EU, and they are also incorporated into this variable.

The code labels include the standard code for the NUTS1 system and the name of the NUTS1 region, separated by a slash.

The full set of geography variables for the countries can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

Literal question

Question 8: Is the dwelling subsidized with budget funds for publicly assisted housing?

Only dwellings which have been completed after the currency reform (June 20, 1848) and for which public funds (of the Federation, the state or the municipality) were granted for the construction of low-cost dwellings (the so-called primary assistance) are considered as subsidized with budget funds for publicly assisted housing.

These include loans to cover the construction costs (as a rule, public building loans, also known as state building loans) and loans or grants to meet current expenditure (assistance in the form of annuities, grants or loans for specific expenditures, the subsidizing of interest charges).

For publicly subsidized dwellings new tenants have to submit a housing certificate from the respective municipality or "Kreis" administration (e.g. housing office, welfare office).

If the assistance funds for apartment buildings were paid back ahead of time, most of these dwellings are still considered publicly subsidized for up to 8 years. As far as owner-occupied houses and condominiums are concerned, the public control ends upon repayment or redemption of the assistance funds; in the case of dwellings converted into condominiums, the public control ends only if the owners themselves are using the condominium as persons eligible according to the regulations of publicly assisted housing. On the termination of public control, owners receive a letter of confirmation from the respective agency.

Not considered public funds in the above sense are: loans for expenditures according to the regional program of the Federation (the so-called secondary assistance), reconstruction loans according to the Law on the Equalization of Burdens, housing assistance payments for persons employed in public service of the Federation, the states or the communities, means to further the modernization of housing or for measures designed to save heating energy, article 7b depreciation allowances and other tax benefits, premiums on building loan contracts.

Main tenants who do not know whether their dwelling was subsidized with budget funds for publicly assisted housing need not answer this question.

Question 1: Type of building

Residential buildings are buildings used at least 50% for residential purposes; in other buildings with space used for residential purposes, less than half of the total floor space is used for residential purposes, whereas the largest part serves commercial, social, cultural or administrative purposes.

Other types of accommodation are makeshift buildings for temporary use including: barracks, temporary homes, permanently-anchored houseboats, railway construction trains and arbors.

Residential homes provide for the housing needs of certain sections of the population, e.g. students and elderly people. A building can be used exclusively as a residential home, such as student dormitories, nursing homes, nurses' dormitories and shelters for mothers and children. There are, however, also buildings that are only partly used as residential homes (e.g. centers for elderly people).

Question 8: Your main source of livelihood

The source of subsistence which provides the largest part of livelihood must be marked solely by direct recipients or persons entitled, but not by family members. If applicable, they should mark, "support, maintenance by parents, husband/wife, etc." Scholarships should be marked as "other benefits" (e.g., social assistance, Federal Law on the Promotion of Education/Training); the same applies to the maintenance grants provided under the work promotion law for retraining and further education as well as for employment and occupation for the promotion of handicapped persons.

8. Your main source of livelihood?

- ☐ 1 Economic/occupational activity
- ☐ 2 Unemployment benefits or relief
- ☐ 3 Pension, etc.
- ☐ 4 Own property, letting leasing, provision for aged persons
- ☐ 5 Support, maintenance by parents, husband/wife, etc.

Question 7: Are you economically active, unemployed?

Persons who are part of an employment/service relationship, pursue an independent trade, practice a liberal profession, or work as family workers are considered economically active. Persons participating in programs aimed at further education, retraining/reeducation and rehabilitation and are in possession of a work contract should also mark "economically active". Services performed on an honorary basis are not considered an economic activity.

"Economically active up to 36 hours per week" should also be marked if work is performed by the hour, half days or on certain days of the week only.

Unemployed persons who are earning some money on the side should mark "economically active up to 36 hours per week" in addition to "unemployed, looking for work."

Juveniles in their first year of vocational training who do not have a contract of employment/training should mark both "not economically active" and "pupil, student".

7. Are you:

Several answers are possible

- ☐ Economically active (1) full-time (over 36 hours (2) per week)
- ☐ Economically active (1) part-time (up to 36 hours (2) per week)
- ☐ Unemployed, looking for work

Question 9: What is the highest level of general education you have completed?

For this question, only the level of schooling completed should be marked. Pupils who are still attending a school of general education need not answer question 9.

In an intermediate school or a high school was not attended up to the completion of the 10th grade, mark "elementary school, post-primary school." If the person left school after the 10th grade but before the final high school examination, mark "intermediate school."

Persons who have completed a course of schooling for adults to obtain high school equivalency (e.g., evening high school/institution leading to university qualification) mark either "intermediate school" or "qualification for higher education (final high school examination)", according to the level completed.

For persons between 15 and 65 years of age

[Questions 9-11 were asked of persons between 15 and 65 years]

If you have completed education at a school/university of general/vocational education:

9. What is the highest level of general education you have completed?

Question 10: What is the highest level at a vocational school or university?

a) Full-time vocational schools are attended either in preparation for a specific trade or for a complete vocational training. They include (among others): commercial schools, schools for higher commercial studies, administrative schools, language schools and interpreters' schools, housekeeping schools, nursemaids' schools, schools for medical assistants, schools of arts and schools of dramatic arts.

Compulsory part-time vocational schools or special part-time vocational schools must not be indicated under "full-time vocational school".

Advanced full-time vocational schools provide a further education for specific occupations. They may be attended on a part-time or a full-time basis.

The advanced full-time vocational schools are normally designated as "special schools for... (occupational objective or field of interest)" -- e.g., advanced full-time technical schools (also schools for technicians), advanced full-time vocational schools for economics, agriculture, home economics, textiles and clothing, social pedagogy. These schools also include master schools.

The vocational colleges mainly emerged from the former engineering schools and higher advanced full-time vocational schools. Their objective is to provide an education on a scientific or artistic basis by means of schooling especially focused on practical training, thereby enabling the students to perform an independent activity in their professional life. The vocational colleges also include the administrative vocational colleges where junior staff is trained for the upper-grade non-technical service of the Federation and the states.

Studies at universities, teacher training colleges, theological colleges and colleges of arts as well as in scientific courses of studies at the Gesamthochschulen should be indicated under "institution of higher education."

b) Indicated here is the occupational emphasis towards which the successful completion of a full-time vocational school, advanced full-time vocational school, vocational college or university that was orientated -- e.g., agriculture, mechanical engineering electrical engineering, business management, economics, surface ground construction, underground construction, trade in goods, transport and communications, banking and insurance. If a commercial school was completed, please enter "commercial school."

For persons between 15 and 65 years of age
[Questions 9-11 were asked of persons between 15 and 65 years]

If you have completed education at a school/university of general/vocational education:

10a. What is the highest level at a vocational school or a university you have completed?

- [] Full-time vocational school (e.g., commercial or administrative school)
- [] Advanced full-time vocational school
- [] Higher technical college (engineering school, vocational college)
- [] Institution of higher education (including teacher training)

GEO1_DE identifies the household's state (Land) within Germany in all sample years. States (Lands) are the first level administrative units of the country. GEO1_DE is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1_DE can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for Germany can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found [here](#).

At the present moment, IPUMS International is only releasing integrated geography for the first level of geography for Germany. Year specific geography and maps will become available in the near future.

Number of families in household (NFAMS)

File: DEU1987-H-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-9

Valid cases: 0
Invalid: 0

Description

NFAMS is a constructed variable that indicates the number of families within each household. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and her servant contains two families; a household consisting of a large, multiple-generation extended family with no lodgers or servants would count as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

Head's location in household (HEADLOC)

File: DEU1987-H-H

Overview

Type: Continuous
Format: numeric
Width: 3
Decimals: 0

Valid cases: 0

Status in employment (class of worker) [general version] (CLASSWK)

File: DEU1987-P-H

Overview

Type: Discrete
 Format: numeric
 Width: 1
 Decimals: 0
 Range: 0-9

Valid cases: 0
 Invalid: 0

Description

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

Father's location in household (POPLOC) File: DEU1987-P-H

Overview

Type: Continuous
 Format: numeric
 Width: 3
 Decimals: 0

Valid cases: 0
 Invalid: 0

Description

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPPOP is designed to identify some of these social relationships.

Spouse's location in household (SPLOC) File: DEU1987-P-H

Overview

Type: Continuous
 Format: numeric
 Width: 3
 Decimals: 0

Valid cases: 0
 Invalid: 0

Description

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly.

Rule for linking spouse (SPRULE)

File: DEU1987-P-H

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 0-6

Valid cases: 0
 Invalid: 0

Description

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS-International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Mother's location in household (MOMLOC)

File: DEU1987-P-H

Overview

Type: Continuous
 Format: numeric
 Width: 3
 Decimals: 0

Valid cases: 0

Description

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships.

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

Activity status (employment status) [general version] (EMPSTAT)

File: DEU1987-P-H

Overview

Type: Discrete
 Format: numeric
 Width: 1
 Decimals: 0
 Range: 0-9

Valid cases: 0
 Invalid: 0

Description

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

Industry, general recode (INDGEN) File: DEU1987-P-H

Overview

Type: Discrete
Format: numeric
Width: 3
Decimals: 0
Range: 0-999

Valid cases: 0
Invalid: 0

Description

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

Occupation, unrecoded (OCC) File: DEU1987-P-H

Overview

Type: Continuous
Format: numeric
Width: 4
Decimals: 0

Valid cases: 0
Invalid: 0

Description

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

Description

EMARST describes for the European samples the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. European census instructions generally limit marital status to legal unions, but there are exceptions.

EMARST has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses.

Question 6: Do you occupy an additional dwelling?

The term "this dwelling" refers to the dwelling for which the present personal questionnaire is completed.

The term "another dwelling" (accommodation/room) may also refer to furnished rooms at the place of work or training/education.

For persons completing compulsory military service and those called up for military exercises, the barracks are not to be considered another dwelling. Persons having an additional dwelling or accommodation aboard a ship should mark "no" for question 6 (exception: permanently anchored houseboats).

For married persons who are not permanently living separate, the dwelling predominantly used by the family must be considered the main dwelling, according to the registration law. This applies to weekend or monthly commuters and workers at distant construction sites. For all other persons (singles, widowed, divorced and married persons living permanently separate) the registration law specifies that the dwelling predominantly used is the main dwelling. In cases of doubt, the predominately used dwelling is the one constituting the focus of a person's life.

The term "this dwelling" refers to the dwelling for which the present personal questionnaire is completed.

The term "another dwelling" (accommodation/room) may also refer to furnished rooms at the place of work or training/education.

For persons completing compulsory military service and those called up for military exercises, the barracks are not to be considered another dwelling. Persons having an additional dwelling or accommodation aboard a ship should mark "no" for question 6 (exception: permanently anchored houseboats).

For married persons who are not permanently living separate, the dwelling predominantly used by the family must be considered the main dwelling, according to the registration law. This applies to weekend or monthly commuters and workers at distant construction sites. For all other persons (singles, widowed, divorced and married persons living permanently separate) the registration law specifies that the dwelling predominantly used is the main dwelling. In cases of doubt, the predominately used dwelling is the one constituting the focus of a person's life.

Question 7: Are you economically active, unemployed?

Persons who are part of an employment/service relationship, pursue an independent trade, practice a liberal profession, or work as family workers are considered economically active. Persons participating in programs aimed at further education, retraining/reeducation and rehabilitation and are in possession of a work contract should also mark "economically active". Services performed on an honorary basis are not considered an economic activity.

"Economically active up to 36 hours per week" should also be marked if work is performed by the hour, half days or on certain days of the week only.

Unemployed persons who are earning some money on the side should mark "economically active up to 36 hours per week" in addition to "unemployed, looking for work."

Juveniles in their first year of vocational training who do not have a contract of employment/training should mark both "not economically active" and "pupil, student".

Question 9: What is the highest level of general education you have completed?

For this question, only the level of schooling completed should be marked. Pupils who are still attending a school of general education need not answer question 9.

In an intermediate school or a high school was not attended up to the completion of the 10th grade, mark "elementary school, post-primary school." If the person left school after the 10th grade but before the final high school examination, mark "intermediate school."

Persons who have completed a course of schooling for adults to obtain high school equivalency (e.g., evening high school/institution leading to university qualification) mark either "intermediate school" or "qualification for higher education (final high school examination)", according to the level completed.

Question 10: What is the highest level at a vocational school or university?

a) Full-time vocational schools are attended either in preparation for a specific trade or for a complete vocational training. They include (among others): commercial schools, schools for higher commercial studies, administrative schools, language schools and interpreters' schools, housekeeping schools, nursemaids' schools, schools for medical assistants, schools of arts and schools of dramatic arts.

Compulsory part-time vocational schools or special part-time vocational schools must not be indicated under "full-time vocational school".

Advanced full-time vocational schools provide a further education for specific occupations. They may be attended on a part-time or a full-time basis.

The advanced full-time vocational schools are normally designated as "special schools for... (occupational objective or field of interest)" -- e.g., advanced full-time technical schools (also schools for technicians), advanced full-time vocational schools for economics, agriculture, home economics, textiles and clothing, social pedagogy. These schools also include master schools.

The vocational colleges mainly emerged from the former engineering schools and higher advanced full-time vocational schools. Their objective is to provide an education on a scientific or artistic basis by means of schooling especially focused on practical training, thereby enabling the students to perform an independent activity in their professional life. The vocational colleges also include the administrative vocational colleges where junior staff is trained for the upper-grade non-technical service of the Federation and the states.

Studies at universities, teacher training colleges, theological colleges and colleges of arts as well as in scientific courses of studies at the Gesamthochschulen should be indicated under "institution of higher education."

b) Indicated here is the occupational emphasis towards which the successful completion of a full-time vocational school, advanced full-time vocational school, vocational college or university that was orientated -- e.g., agriculture, mechanical engineering electrical engineering, business management, economics, surface ground construction, underground construction, trade in goods, transport and communications, banking and insurance. Question 11: Practical occupational training, length of training

a) Considered the conclusion of practical vocational training is the successful completion of an apprenticeship / on-the-job training, the accomplished practical training as a nurse or male hospital attendant. Occupational promotion courses for soldiers that were concluded by passing an examination certifying the qualification as a skilled worker, journeyman, commercial clerk, etc. should also be indicated.

Improvership, student traineeships as well as the practical training of an official or the completion of a vocational school or college should not be indicated.

In case of practical vocational training for more than one occupation, state only the occupation for which the last training was intended and its length.

b) The length of training should always be rounded up to full years. For example:

2 years and 1 month = 3 years

2 years and 10 months = 3 years

3.5 years = 4 years

Question 6: Do you occupy an additional dwelling?

The term "this dwelling" refers to the dwelling for which the present personal questionnaire is completed.

The term "another dwelling" (accommodation/room) may also refer to furnished rooms at the place of work or training/education.

For persons completing compulsory military service and those called up for military exercises, the barracks are not to be considered another dwelling. Persons having an additional dwelling or accommodation aboard a ship should mark "no" for question 6 (exception: permanently anchored houseboats).

For married persons who are not permanently living separate, the dwelling predominantly used by the family must be considered the main dwelling, according to the registration law. This applies to weekend or monthly commuters and workers at distant construction sites. For all other persons (singles, widowed, divorced and married persons living permanently separate) the registration law specifies that the dwelling predominantly used is the main dwelling. In cases of doubt, the predominately used dwelling is the one constituting the focus of a person's life.

6. Do you occupy a further dwelling (accommodation/room) in the Federal Republic of Germany, including Berlin (West)?

- ☐ 1 No
☐ 2 Yes

If yes:

a) For married persons who are not permanently living separate: Is this dwelling here the one which is predominantly used by the family

- ☐ 1 No
☐ 2 Yes

b) For all other persons: Is this dwelling here the one which is predominantly used?

- ☐ 1 No
☐ 2 Yes

c) Additional question for economically active persons, pupils/students: Do you predominantly go to work or school/university from this dwelling?

- ☐ 1 No
☐ 2 Yes

Question 7: Are you economically active, unemployed?

Persons who are part of an employment/service relationship, pursue an independent trade, practice a liberal profession, or work as family workers are considered economically active. Persons participating in programs aimed at further education, retraining/reeducation and rehabilitation and are in possession of a work contract should also mark "economically active". Services performed on an honorary basis are not considered an economic activity.

"Economically active up to 36 hours per week" should also be marked if work is performed by the hour, half days or on certain days of the week only.

Unemployed persons who are earning some money on the side should mark "economically active up to 36 hours per week" in addition to "unemployed, looking for work."

Juveniles in their first year of vocational training who do not have a contract of employment/training should mark both "not economically active" and "pupil, student".

7. Are you:

Several answers are possible

- ☐ Economically active (1) full-time (over 36 hours (2) per week)
- ☐ Economically active (1) part-time (up to 36 hours (2) per week)
- ☐ Unemployed, looking for work

Question 10: What is the highest level at a vocational school or university?

a) Full-time vocational schools are attended either in preparation for a specific trade or for a complete vocational training. They include (among others): commercial schools, schools for higher commercial studies, administrative schools, language schools and interpreters' schools, housekeeping schools, nursemaids' schools, schools for medical assistants, schools of arts and schools of dramatic arts.

Compulsory part-time vocational schools or special part-time vocational schools must not be indicated under "full-time vocational school".

Advanced full-time vocational schools provide a further education for specific occupations. They may be attended on a part-time or a full-time basis.

The advanced full-time vocational schools are normally designated as "special schools for... (occupational objective or field of interest)" -- e.g., advanced full-time technical schools (also schools for technicians), advanced full-time vocational schools for economics, agriculture, home economics, textiles and clothing, social pedagogy. These schools also include master schools.

The vocational colleges mainly emerged from the former engineering schools and higher advanced full-time vocational schools. Their objective is to provide an education on a scientific or artistic basis by means of schooling especially focused on practical training, thereby enabling the students to perform an independent activity in their professional life. The vocational colleges also include the administrative vocational colleges where junior staff is trained for the upper-grade non-technical service of the Federation and the states.

Studies at universities, teacher training colleges, theological colleges and colleges of arts as well as in scientific courses of studies at the Gesamthochschulen should be indicated under "institution of higher education."

b) Indicated here is the occupational emphasis towards which the successful completion of a full-time vocational school, advanced full-time vocational school, vocational college or university that was orientated -- e.g., agriculture, mechanical engineering electrical engineering, business management, economics, surface ground construction, underground construction, trade in goods, transport and communications, banking and insurance. If a commercial school was completed, please enter "commercial school."

Question 15: Are you presently working as?

Home workers indicate either "other wage earner" or "skilled worker" in accordance with the activity pursued. Skilled workers also include journeymen.

Trainees and improvers are considered apprentices.

Tradesmen/women working from home, work agents or persons having a contract for work, and labor should mark "self-employed".

Rule for linking parent (PARRULE)

File: DEU1987-P-H

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 0-52

Valid cases: 0
Invalid: 0

Description

PARRULE describes the criteria by which the IPUMS-International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS-International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

Probable stepmother (STEPMOM)

File: DEU1987-P-H

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 0-6

Valid cases: 0
Invalid: 0

Description

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children borne or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

Description

STEPPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPPOP will always under-represent their actual number in the population.

Family unit membership (FAMUNIT)

File: DEU1987-P-H

Overview

Type: Continuous
Format: numeric
Width: 2
Decimals: 0

Valid cases: 0
Invalid: 0

Description

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

File: DEU1987-P-H

Overview

Type: Discrete
Format: numeric

Description

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

Description

ELDCH gives the age of the person's oldest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

ELDCH is top-coded at age 50 or older.

Person weight (PERWT)

File: DEU1987-P-H

Overview

Type: Continuous	Valid cases: 0
Format: numeric	Invalid: 0
Width: 8	
Decimals: 2	

Description

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

Educational attainment, international recode [general version] (EDATTAIN)

File: DEU1987-P-H

Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

Description

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

Educational attainment, Europe (EEDATTAIN)

File: DEU1987-P-H

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 0-99

Valid cases: 0
 Invalid: 0

Description

EEDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone) for the European samples. The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary. All education that was relevant to the completion of a level should be taken into account even if it was provided outside of schools and universities.

EEDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EEDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EEDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country.

Hungary 1980 and 1990 also give single years of schooling completed, recorded in YRSCHOOL.

EEDATTAIN has been classified according to the recommendations of the Conference of European Statisticians for the 2010 Population and Housing Censuses. EEDATTAIN presents a less detailed version of EDATTAIN for the European Samples.

Activity status (employment status), Europe (EEMPSTAT)

File: DEU1987-P-H

Overview

Type: Discrete
 Format: numeric
 Width: 3
 Decimals: 0
 Range: 0-999

Valid cases: 0
 Invalid: 0

Description

EEMPSTAT indicates for the European samples whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EEMPSTAT can also convey further information.

EEMPSTAT has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses. "Employment Status" is referred to as "Activity Status" in the CES recommendations, but the former term is used to maintain consistency with IPUMS practices.

The economically active population constitutes the total labor force: employed and unemployed persons.

Status in employment (class of worker), Europe (ECLASSWK)

File: DEU1987-P-H

Overview

Type: Discrete
 Format: numeric
 Width: 1
 Decimals: 0
 Range: 0-9

Valid cases: 0
 Invalid: 0

Description

ECLASSWK refers in European Samples to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker.

ECLASSWK is related to EEMPSTAT (employment status), which is used to define the universe for the variable in many samples.

ECLASSWK has been classified according to the recommendations given by the Conference of European Statisticians for the 2010 Population and Housing Censuses. "Class of worker" is referred to as "Status in Employment" in the CES recommendations. The former term is used to maintain concordance with IPUMS practice.
