#### VERSION DESCRIPTION

Version 6.4. The datasets contain selected variables from the original census microdata plus harmonized variables from the IPUMS-International database.

In v6.4, the research team continued to carry out improvements to geography, providing harmonized geographic units for the second administrative level for roughly half the countries. More information about IPUMS geography variables is available [here](https://international.ipums.org/international/geography_variables.shtml). Also, approximately 100 integrated variables were renamed. Affected variables with their current and previous names are listed [here](https://international.ipums.org/international/resources/misc_docs/renamed_variables_sept2015.pdf). Geography variable also underwent wholesale renaming.

In this update, IPUMS added 19 new samples for Armenia, Austria, Costa Rica, Ethiopia, France, Ghana, Mozambique, Paraguay, Portugal, Puerto Rico, South Africa, and Spain. Ethiopia, Mozambique, and Paraguay were newly added countries to IPUMS. Samples for other countries extend pre-existing series for those countries.

#### ABSTRACT

IPUMS-International is an effort to inventory, preserve, harmonize, and disseminate census microdata from around the world. The project has collected the world's largest archive of publicly available census samples. The data are coded and documented consistently across countries and over time to facilitate comparative research. IPUMS-International makes these data available to qualified researchers free of charge through a web dissemination system.

The IPUMS project is a collaboration of the Minnesota Population Center, National Statistical Offices, and international data archives. Major funding is provided by the U.S. National Science Foundation and the Demographic and Behavioral Sciences Branch of the National Institute of Child Health and Human Development. Additional support is provided by the University of Minnesota Office of the Vice President for Research, the Minnesota Population Center, and Sun Microsystems.

#### KIND OF DATA

Census/enumeration data [cen]

#### UNITS OF ANALYSIS

Dwellings, households and persons

#### UNITS IDENTIFIED:

- Dwellings: yes
- Vacant units: no
- Households: yes
- Individuals: yes

- Group quarters: yes
- Special populations: no

## UNIT DESCRIPTIONS:

- Dwellings: A structurally separate and independent place enclosed by walls and a roof with direct access from the street, or through a courtyard, hallway, or stairs used as lodging at the time of the census, even if it was not intended for habitation when constructed. A private dwelling is occupied by a family or private household.
- Households: One or more related or unrelated persons who live together and share a food budget.
- Group quarters: A guesthouse or other dwelling that is intended for habitation by a group of people for health, disciplinary, or related reasons. Collective and institutional households are not included in the sample.

## DDI DOCUMENT VERSION

- v6.4 April 2016

Documentation of census data and harmonized variables as found in IPUMS-International. The International Household Survey Network (IHSN) contracted IPUMS International for generating DDI and Dublin Core-compliant metadata related to population and housing census datasets from developing countries. The objective was to provide countries with detailed metadata in a format compatible with the DDI standard used by most of these countries, with a view to guarantee the preservation of the data and metadata, and the publishing of metadata.

The intellectual rights (including copyright) for the data and metadata in IPUMS are retained by the countries under a Memorandum of Understanding with the contributing countries. IPUMS-International has distribution rights to the metadata and data. The XML documents generated by this process are viewed as a distribution of the metadata.

Fields edited by the World Bank are: DDI ID and study ID to match World Bank study naming convention, as well as DDI Document Version and Version Description to reflect changes included in version 6.4.

Previous version documented in the World Bank Microdata Library:

- v6.3 (August 2014)

## Sampling

### Sampling Procedure

---

MICRODATA SOURCE: Centro Latinoamericano de Demografia (CELADE)

SAMPLE UNIT: Households (not in collective dwellings)

SAMPLE FRACTION: 8.5%

SAMPLE SIZE (person records): 475,829

### Response Rate

---

COVERAGE: 92.4%

### Weighting

---

Weights computed by census agency should be used for most types of analysis.

# Questionnaires

## Overview

---

Single enumeration form printed by Westinghouse and processed by optical reader. The form requested information on dwellings, households and individuals.

## Data Collection

### Data Collection Dates

---

Start	End	Cycle

## Record type (RECTYPE)

File: DOM1981-H-H

### Overview

Type: Discrete	Valid cases: 0
Format: character	Invalid: 0
Width: 1	

### Description

RECTYPE identifies the type of record for the case: household or person.

NOTE: RECTYPE is an alphabetic (character string) variable with a value of 'H' for household records and 'P' for person records. RECTYPE will not appear as a variable in the default rectangular extracts produced by the data extract system. It is only available in hierarchical extracts, to distinguish between the two record types.

## Year (YEAR)

File: DOM1981-H-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 4	
Decimals: 0	
Range: 1960-2011	

### Description

YEAR gives the year in which the census was taken.

## IPUMS sample identifier (SAMPLE)

File: DOM1981-H-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 9	
Decimals: 0	
Range: 32197001-894201001	

### Description

SAMPLE identifies the IPUMS sample from which the case is drawn. Each sample receives a unique 9-digit code. The code is structured as follows:

The first 3 digits are the ISO/UN codes used in COUNTRY

The next 4 digits are the year of the census/survey

The final 2 digits identify the sample within the year. For the last two digits, censuses or large census-like surveys have a value "0" (e.g, 01) in the second-to-last digit, household surveys have a value of "2" (e.g., 21), and employment surveys have a value of "4" (e.g., 41).

## Household serial number (SERIAL)

File: DOM1981-H-H

### Overview

Type: Continuous  
 Format: numeric  
 Width: 10  
 Decimals: 0

Valid cases: 0  
 Invalid: 0

### Description

SERIAL is an identifying number unique to each household in a given sample. All person records are assigned the same serial number as the household record that they follow. (Person records also have their own unique identifiers -- see PERNUM.) The combination of SAMPLE and SERIAL provides a unique identifier for every household in the IPUMS-International database; SAMPLE, SERIAL and PERNUM uniquely identify every person in the database.

SERIAL can be used to identify dwellings in some samples. In these samples, the first 7 digits of SERIAL provide the dwelling number common to all households that were sampled from the same structure. The last three digits give the sequence of the household within the dwelling. The following is a list of samples in which dwellings can be inferred:

Chile 1970, 1992, 2002  
 Colombia 1993, 2005  
 Costa Rica 1984, 2000  
 Cuba 2002  
 Dominican Republic 1981, 2002, 2010  
 Ecuador 1990, 2001  
 Germany 1971  
 Hungary 1980, 1990, 2001  
 Jamaica 1982, 1991, 2001  
 Malaysia 1970, 1991, 2000  
 Mexico 1995, 1990, 2000, 2005  
 Nigeria 2006  
 Panama 2000  
 Peru 1993, 2007  
 Portugal 1981, 1991, 2001  
 Spain 1991  
 Uruguay 2011  
 Venezuela 1990, 2001  
 Vietnam 1989

In all other samples, the last 3 digits are always zeroes.

SERIAL was constructed for IPUMS-International, and has no relation to the serial number in the original datasets.

## Number of person records in the household (PERSONS)

File: DOM1981-H-H

### Overview

Type: Continuous  
 Format: numeric  
 Width: 3  
 Decimals: 0

Valid cases: 0  
 Invalid: 0

### Description

PERSONS indicates how many person records are included in the household (i.e., the number of person records associated with the household record in the sample). These person records will all have the same serial number (SERIAL) as the household record. The information contained in the household record will normally apply to all of these persons.

1st subnational geographic level, world [consistent boundaries over time] (GEOLEV1)

File: DOM1981-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 6  
 Decimals: 0  
 Range: 32002-894010

Valid cases: 0  
 Invalid: 0

### Description

GEOLEV1 indicates the major administrative unit in which the household was enumerated. The variable incorporates the geographies for every country, to enable cross-national geographic analysis over time. First administrative units in GEOLEV1 have been spatiotemporally harmonized to provide spatially consistent boundaries across samples in each country.

## Water supply (WATSUP)

File: DOM1981-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

### Description

WATSUP describes the physical means by which the housing unit receives its water. The primary distinction is whether or not the household had piped (running) water.

## Trash disposal (TRASH)

File: DOM1981-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

### Description

This variable indicates whether the household's waste or garbage is collected by a sanitation service or disposed of in some other manner.

## Automobiles available (AUTOS)

File: DOM1981-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

### Description

AUTOS records whether a member of the household owned or had use of a vehicle and, in many samples, the number of such vehicles.

## Clothes washing machine (WASHER)

File: DOM1981-H-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

**Description**

WASHER indicates whether the household had a clothes washing machine.

## Number of rooms (ROOMS)

File: DOM1981-H-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0

## Number of families in household (NFAMS)

File: DOM1981-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

### Description

NFAMS is a constructed variable that indicates the number of families within each household. A "family" is any group of persons related by blood, adoption, or marriage. An unrelated individual within the household is considered a separate family. Thus, a household consisting of a widow and her servant contains two families; a household consisting of a large, multiple-generation extended family with no lodgers or servants would count as a single family.

NFAMS is constructed from information in RELATE (relationship to head) and from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father). See those variable descriptions for more detail.

## Head's location in household (HEADLOC)

File: DOM1981-H-H

### Overview

Type: Continuous  
 Format: numeric  
 Width: 3  
 Decimals: 0

Valid cases: 0  
 Invalid: 0

### Description

HEADLOC gives the person number of the head of household in samples in which persons are organized into households.

## Household classification (HHTYPE)

File: DOM1981-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

### Description

HHTYPE is a constructed variable that describes the composition of households. HHTYPE is constructed from information in RELATE (relationship to head), from the constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father), and from information on group quarters status, GQ.

## Continent and region of country (REGIONW)

File: DOM1981-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 11-54

Valid cases: 0  
 Invalid: 0

### Description

REGIONW identifies the continent and region of each country.

## Group quarters (collective dwelling) status (GQ)

File: DOM1981-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

### Description

GQ identifies households as vacant dwellings, group quarters, or private households. Group quarters -- collective dwellings -- are generally institutions and other group living arrangements such as rooming houses and boarding schools.

Institutions often retain persons under formal supervision or custody, such as correctional institutions, military barracks, asylums, or nursing homes. Educational and religious group dwellings (e.g., boarding schools, convents, monasteries, etc.) are also included in the institutional classification.

Group quarter designations are often useful for understanding the universe of households that answered questions about household characteristics. Censuses will often exclude group quarters from such questions.

## Subsample number (SUBSAMP)

File: DOM1981-H-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

### Description

SUBSAMP allocates each case to one of 100 subsample replicates, randomly numbered from 0 to 99. Each subsample is nationally representative and preserves any stratification of the sample from which it is drawn. Users who need a representative subset of a sample can use SUBSAMP to select their cases. For example, to randomly extract 10% of the cases from a sample, select any 10 of the 100 subsamples.

## Number of unrelated persons (UNREL)

Question 3: Of these groups: How many have an independent exit? How many do not have an independent exit?

On the line corresponding to "How many have an independent exit?", the number of groups of persons or individual persons who do not have to pass through rooms occupied, in any way, by another household in order to exit to the street, patio, or stairway is recorded.

This means that each group or individual inhabits a different census dwelling.

On the line corresponding to "How many do not have an independent exit?" the number of groups or individuals of this house or apartment (who have their own food budget) without a direct exit to the street, hallway, or stairway is recorded.

Question 4: Order number of the household in the dwelling.

Question 4 is left blank for those groups who have an independent exit (question 3).

If the answer to the previous question was that the groups do not have an independent exit, the order number of the census household interviewed in the enumerated dwelling is recorded: #1 for the first household, #2 for the second, #3 for the third, etc.

## Shared food budget (DO1981A\_0034)

 6 Barracks and prisons  
 7 Hospital, health center or clinic  
 8 Religious institutions and boarding schools

**Interviewer instructions**

Question 7: Type of dwelling

a) Private dwellings

The type of dwelling is identified and the corresponding circle is filled in.

The circle Others is filled in when dealing with dwellings such as boats, tents, caves, wagons, old vehicles, granaries, warehouses, garages, etc.

[p. 28]

b) Collective dwellings

In the case of collective dwellings, the corresponding circle is filled in.

In the "bateys", the houses of unmarried persons are classified as guesthouses.

[Definition of "batey" from the 1970 Dominican Republic enumerator's manual: "A "batey" is a place of abode usually constructed in the coastal style (surplus pine) with a corrugated iron ["zinc"] or asbestos roof, dirt or stone (limestone) floor, and usually in the form of a rectangular barracks with two opposite fronts and a dividing wall in the center. Each barracks contains approximately 20 dwellings with 2 rooms each (bedroom and living room), without a kitchen, bathroom, or running water in the rooms. A "batey" will sometimes have electric lighting, depending on the proximity of the sugar plantation ["ingenio"] that has constructed it. It has two or three latrines for common use. The kitchen is a stove on the patio, shared by two or three dwellings. As far as a shower facility ["baño"], the only facility is provided by a close-by stream or river. This type of place of abode is generally found in rural areas because it serves sugar companies in housing workers who participate in the harvest."]

8. Occupancy status

a) Occupied

1 With people present

2 With people absent

b) Unoccupied

3 For sale

4 For rent

9 Others

**Interviewer instructions**

## Question 8: Occupancy

## a) Occupied

Circle 1 -- "with persons present" -- is filled in if the members of the household are in the dwelling.

If there are only minors present, a return visit should be made when an adult is present.

Circle 2 -- "with persons who are absent" -- is filled in if the household members are not present but the neighbors can verify that the dwelling is occupied. (If the absence is verified to be temporary, a return visit should be made at the end of the enumeration)

## b) Unoccupied

Circle 3 is filled in if the house is for sale.

Circle 4 is filled in if the house is for rent.

The circle "other" is filled in when the dwellings are either unoccupied, under repair, under construction, or abandoned.

Note: The information for questions 7 (dwelling type), 8 (occupancy), 9 (summer or occasional use), 10(walls), 11 (roof), and 12 (floor), is collected for unoccupied dwellings and then the next dwelling is enumerated.

Question 24: Appliances

Which of the following appliances does this household have?

The appliances for this question are read, one by one; if the household has the appliance, the circle is filled in according to whether it is electric or not.

If the household does not have the appliance, the circle in the corresponding column is filled in.

For quantity, the circle corresponding to the number of appliances of the same type owned by the household is filled in. If in any case there are more than 3, the circle 3 is filled in.

Chapter VI. Composition of the household

Write the name and surname of each of the people in the household who habitually live in this dwelling. Write as well the name and surname of people who do not habitually live in this dwelling, but who slept here the night before the day of the census. (Be sure to include children, newborn infants, and elderly persons.)

Column 1 Person number

**Interviewer instructions**

## Chapter VI. Household composition

The instructions given in form and in this manual should be followed rigorously in filling out this chapter.

This chapter consists of 6 columns: the first is for recording the order number of the persons to be listed in the next column: 1 for the head of household, 2 for the second person, 3 for the third person, and so on successively.

In the second column, beginning with the head of household and following the order indicated on the census form, the name of each person making up the household who usually resides in the dwelling is recorded (the usual residents should be recorded whether they were present or not the night prior to the Census).

[p. 44]

Once the usual residents are recorded, those persons who are not residents but who slept in the dwelling the night prior to the census day are recorded.

The residency of each household member is recorded in Column 3.

## Resident:

A resident is one who has normally lived in the enumerated dwelling for the last 6 months or more; or, having lived there for a shorter time, who has the intention of staying.

If a resident slept in the dwelling the night prior to the census day, he is marked as Present, whether present or not at the time of enumeration.

If the resident did not sleep in the dwelling the night prior to the census day, he is marked as Absent, whether present or not at the time of enumeration.

Residents considered to be absent:

- a) Those who are temporarily absent for business, vacation, work, sickness, etc.
- b) Those who are detained [imprisoned], serving a sentence of less than 6 months.

[p. 45]

The following residents are not considered to be absent and are not included in the census form of their respective families:

- a) Students who are living in another city of the country for more than 6 months.
- b) Families living abroad for more than 6 months.
- c) Military personnel living on bases, doctors or nurses living in a hospital or clinic, or domestic employees living with a family.
- d) Permanent patients in sanatoriums, asylums, or other similar establishments.
- e) Detainees serving a sentence of more than 6 months.

If any of these persons slept in the dwelling the night prior to census day they are recorded as Non-residents.

Students who are living in another city or town, in country or abroad, for more than 6 months are considered to be Present Residents or Absent Residents in the place where they study.

Non-residents:

Non-residents are all of those who slept in the enumerated dwelling the night prior to the census day and who are not usual residents in the dwelling.

[p. 46]

Important note:

All those born before 12 midnight the night prior to the census day and all those who passed away after 12 midnight the night prior to the census day should be enumerated.

## Household weight (HHWT)

File: DOM1981-H-H

### Overview

Type: Continuous	Valid cases: 0
Format: numeric	Invalid: 0
Width: 8	
Decimals: 2	

### Description

HHWT indicates the number of households in the population represented by the household in the sample.

For the samples that are truly weighted (see the comparability discussion), HHWT must be used to yield accurate household-level statistics.

NOTE: HHWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

## Dominican Republic, Province 1960 - 2010 [Level 1; consistent boundaries, GIS] (GEO1\_DO)

File: DOM1981-H-H

Type: Discrete  
 Format: numeric  
 Width: 6  
 Decimals: 0  
 Range: 214001-214027

Valid cases: 0  
 Invalid: 0

**Description**

GEO1\_DO identifies the household's province within the Dominican Republic in all sample years. Provinces are the first level administrative units of the country. GEO1\_DO is spatially harmonized to account for political boundary changes across census years. Some detail is lost in harmonization; see the comparability discussion. A GIS map (in shapefile format), corresponding to GEO1\_DO can be downloaded from the GIS Boundary files page in the IPUMS International web site.

The full set of geography variables for the Dominican Republic can be found in the IPUMS International Geography variables list. For cross-national geographic analysis on the first and second major administrative level refer to GEOLEV1, and GEOLEV2. More information on IPUMS-International geography can be found here.

At the present moment, IPUMS International is only releasing integrated geography for the first level of geography for Dominican Republic. Year specific geography and maps along with variables that are spatially harmonized at the second level of geography and account for political boundary changes across census years will become available in the near future.

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-9	

### Description

YRSIMM2 indicates the number of years since a foreign-born person immigrated to the country. The number of years is grouped into intervals.

## School attendance (SCHOOL)

File: DOM1981-P-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

**Description**

SCHOOL indicates whether or not the person attended school at the time of the census or within some specified period of time prior to the census.

## Literacy (LIT)

File: DOM1981-P-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

**Description**

LIT indicates whether or not the respondent could read and write in any language. A person is typically considered literate if he or she can both read and write. All other persons are illiterate, including those who can either read or write but cannot do both.

## Activity status (employment status) [general version] (EMPSTAT)

File: DOM1981-P-H

**Overview**

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

**Description**

EMPSTAT indicates whether or not the respondent was part of the labor force -- working or seeking work -- over a specified period of time. Depending on the sample, EMPSTAT can also convey further information.

The first digit of EMPSTAT is fully comparable, and classifies the population into three groups: employed, unemployed, and inactive. The combination of employed and unemployed yields the total labor force. The second and third digits of EMPSTAT preserve additional information available for some countries and census years but not for others.

Employment status is sometimes referred to in other sources as "activity status".

## Status in employment (class of worker) [general version] (CLASSWK) File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0  
Invalid: 0

### Description

CLASSWK refers to the status of an economically active person with respect to his or her employment -- that is, the type of explicit or implicit contract of employment with other persons or organizations that the person has in his/her job. In general, the variable indicates whether a person was self-employed, or worked for someone else, either for pay or as an unpaid family worker. CLASSWK is related to EMPSTAT, which is used to define the universe in many samples.

Class of worker is often referred to as "status in employment" in other sources.

## Mental disability (DISMNTL) File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-9

Valid cases: 0

### Description

DISMNTL indicates whether the person suffered a mental disability in the form of diminished capacity.

## Municipality of birth, Dominican Republic (BPLDO)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 4  
Decimals: 0  
Range: 101-9998

Valid cases: 0  
Invalid: 0

### Description

BPLDO indicates the person's municipality of birth within Dominican Republic.

BPLDO is harmonized by name, not by boundary changes.

## Educational attainment, Dominican Republic (EDUCDO)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 3  
Decimals: 0  
Range: 0-998

Valid cases: 0  
Invalid: 0

### Description

EDUCDO indicates the person's educational attainment in terms of the level of schooling completed.

## Municipality of residence 5 years ago, Dominican Republic (MIGDO)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 4  
Decimals: 0  
Range: 101-9999

Valid cases: 0  
Invalid: 0

### Description

MIGDO indicates the province in Dominican Republic where the person lived 5 years ago.

MIGDO is harmonized by name, not boundary changes.

## Age (AGE)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 3  
Decimals: 0  
Range: 0-999

Valid cases: 0  
Invalid: 0

### Description

AGE gives age in years as of the person's last birthday prior to or on the day of enumeration.

## Mortality status of mother (MORTMOT)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 1-9

Valid cases: 0  
Invalid: 0

### Description

MORTMOT indicates whether the person's biological mother was still living at the time of the census.

## Mother's location in household (MOMLOC)

File: DOM1981-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

MOMLOC is a constructed variable that indicates whether or not the person's mother lived in the same household and, if so, gives the person number of the mother (see PERNUM). MOMLOC makes it easy for researchers to link the characteristics of children and their (probable) mothers.

The method by which probable child-mother links are identified is described in PARRULE.

The general design of MOMLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: MOMLOC identifies social relationships (such as stepmother and adopted mother) as well as biological relationships. The variable STEPMOM is designed to identify some of these social relationships.

## Father's location in household (POPLOC)

File: DOM1981-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

POPLOC is a constructed variable that indicates whether or not the person's father lived in the same household and, if so, gives the person number of the father (see PERNUM). POPLOC makes it easy for researchers to link the characteristics of children and their (probable) fathers.

The method by which probable child-father links are identified is described in PARRULE.

The general design of POPLOC and other constructed variables follows the methods developed for IPUMS-USA "Family Interrelationships," but the details vary significantly.

Note: POPLOC identifies social relationships (such as stepfather and adopted father) as well as biological relationships. The variable STEPPOP is designed to identify some of these social relationships.

## Spouse's location in household (SPLOC)

File: DOM1981-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 3  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

SPLOC is a constructed variable that indicates whether or not the person's spouse lived in the same household and, if so, gives the person number (PERNUM) of the spouse. SPLOC makes it easy for researchers to link the characteristics of (probable) spouses.

The method by which probable spouse-spouse links are identified is described in SPRULE.

The general design of SPLOC and other constructed variables is modeled on the methods developed for IPUMS-USA "Family Interrelationships", but the details vary significantly.

## Rule for linking parent (PARRULE)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-52

Valid cases: 0  
Invalid: 0

### Description

PARRULE describes the criteria by which the IPUMS-International variables MOMLOC and POPLOC linked the person to a probable mother and/or father.

IPUMS-International establishes child-parent links according to five basic rules, and PARRULE gives the number of the rule that applied to the link in question. A link to any parent automatically generates a second link to that parent's spouse or partner, so only one rule is needed to describe both MOMLOC and POPLOC.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

## Rule for linking spouse (SPRULE)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-6

Valid cases: 0  
Invalid: 0

### Description

SPRULE explains the criteria by which the IPUMS-International variable SPLOC linked the person to his/her probable spouse.

IPUMS-International establishes spouse-spouse links according to five basic rules, and SPRULE gives the number of the rule that applied to the link in question. A sixth rule identifies sample-specific linking procedures only imposed in selected instances.

The design of the interrelationship variables is described in this paper on IPUMSI family linking methodology.

## Probable stepmother (STEPMOM)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-6

Valid cases: 0  
Invalid: 0

### Description

STEPMOM indicates whether a person's mother, as identified by MOMLOC, was most probably not the person's biological mother. Non-zero values of STEPMOM explain why it is probable that the person's mother was a step- or adopted mother. A value of 0 indicates no likely stepmother because (1) the mother identified in MOMLOC was probably the biological mother or (2) there is no mother of this person present in the household.

The codes for STEPMOM are as follows:

- 0 = Biological mother or no mother of this person present in household.
- 1 = Mother has no children borne or surviving.
- 2 = Child reports mother is deceased.
- 3 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner, stepchild/child-in-law).
- 4 = Mother reports no children in the home.
- 5 = Age difference between mother and child was less than 12 or greater than 54 years.
- 6 = Child exceeds known fertility of mother.

See PARRULE for a description of the linking process.

Users should note that there are many stepmothers and adopted mothers in the population that cannot be identified with information available in the censuses. Therefore, STEPMOM will always under-represent their actual number in the population.

## Probable stepfather (STEPPOP)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-3

Valid cases: 0  
Invalid: 0

### Description

STEPPOP indicates whether a person's father, as identified by POPLOC, was most probably not the person's biological father. Non-zero values of STEPPOP explain why it is probable that the person's father was a step- or adopted father. A value of 0 indicates no likely stepfather because (1) the father identified in POPLOC was probably the biological father or (2) there is no father of this person present in the household.

The codes for STEPPOP are as follows:

- 0 = Biological father or no father of this person present in household.
- 1 = Child reports father is deceased.
- 2 = Explicitly identified relationship (stepchild, adopted child, child of unmarried partner; stepchild/child-in-law).
- 3 = Age difference between father and child was less than 12 or greater than 54 years.

See PARRULE for a description of the linking process.

Users should note that there are many stepfathers and adopted fathers in the population that cannot be identified with information available in the censuses. Therefore, STEPPOP will always under-represent their actual number in the population.

## Man with more than one wife linked (POLYMAL)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-1

Valid cases: 0  
Invalid: 0

### Description

POLYMAL indicates if a man had more than one wife linked to him in the constructed IPUMS variable SPLOC -- Spouse's Location in Household.

The point of POLYMAL is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

## Woman is second or higher order wife (POLY2ND)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 0-1

Valid cases: 0  
Invalid: 0

### Description

POLY2ND indicates if a woman was the second or higher order wife linked to a husband in the constructed IPUMS variable SPLOC -- Spouse's Location in Household. The variable does not suggest the actual marital order of wives, only their relative positions in the person order of the household as it was enumerated.

The point of POLY2ND is to facilitate using SPLOC in samples that identify polygamy. Some statistical matching procedures expect to find only one matching record for each subject record.

## Family unit membership (FAMUNIT)

File: DOM1981-P-H

### Overview

Type: Continuous  
Format: numeric  
Width: 2  
Decimals: 0

Valid cases: 0  
Invalid: 0

### Description

FAMUNIT is a constructed variable indicating to which family within the household a person belongs.

All persons related to the household head receive a 1 (see RELATE). Each secondary family or secondary individual receives a higher code. For purposes of FAMUNIT, secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

## Number of own family members in household (FAMSIZE)

File: DOM1981-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 1-99

Valid cases: 0  
 Invalid: 0

### Description

FAMSIZE counts the number of the person's own family members living in the household with her/him, including the person her/himself. These include all persons related to the person by blood, adoption, or marriage as indicated by the census forms or inferred from them.

FAMSIZE is calculated from the units identified in the IPUMS constructed variable FAMUNIT (family unit membership). The primary family is defined as all persons related to the head in the RELATE variable. Secondary families are individuals or groups of persons linked together by the IPUMS constructed pointer variables SPLOC, MOMLOC, and POPLOC (location of spouse, mother, and father).

## Number of own children in household (NCHILD)

File: DOM1981-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

### Description

NCHILD provides a count of the person's own children living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

## Number of own children under age 5 in household (NCHLT5)

File: DOM1981-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

### Description

NCHLT5 provides a count of the person's own children under age five living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

## Age of eldest own child in household (ELDCH)

File: DOM1981-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

### Description

ELDCH gives the age of the person's oldest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

ELDCH is top-coded at age 50 or older.

## Age of youngest own child in household (YNGCH)

File: DOM1981-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 0-99	

### Description

YNGCH gives the age of the person's youngest own child living in the household with her or him. These include all children linked to the person via the constructed IPUMS pointer variables MOMLOC or POPLOC -- mother's and father's location in the household.

YNGCH is top-coded at age 50 or older.

## Relationship to household head [general version] (RELATE)

File: DOM1981-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-9	

### Description

RELATE describes the relationship of the individual to the head of household (sometimes called the householder or reference person).

## Relationship to household head [detailed version] (RELATED)

File: DOM1981-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 4	
Decimals: 0	
Range: 1000-9999

RELATED describes the relationship of the individual to the head of household (sometimes called the householder or reference person).

## Marital status [general version] (MARST)

File: DOM1981-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

#### Description

[program universe for et,mz samples.

MARST describes the person's current marital status according to law or custom. Individuals who remarried should report the status relevant to their most recent marriage. Census instructions rarely explicitly limit marital status to strictly legal unions.

Note regarding universe: The lowest age at which a person can be anything but "never married" varies among samples.

## Marital status [detailed version] (MARSTD)

File: DOM1981-P-H

## Number of children dead (CHDEAD)

File: DOM1981-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

#### Description

CHDEAD reports how many of the children ever born to a woman were no longer living at the time of the census. Women were to consider all live births by all fathers; they were to exclude still births.

## Occupation, ISCO general (OCCISCO)

File: DOM1981-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 1-99

Valid cases: 0  
 Invalid: 0

#### Description

OCCISCO records the person's primary occupation, coded according to the major categories in the International Standard Classification of Occupations (ISCO) scheme for 1988. For someone with more than one job, the primary occupation is typically the one in which the person had spent the most time or earned the most money.

## Occupation, unrecoded (OCC)

File: DOM1981-P-H

### Overview

Type: Continuous	Valid cases: 0
Format: numeric	Invalid: 0
Width: 4	
Decimals: 0	

### Description

OCC records the person's primary occupation, classified according to the system used by the respective national census office at the time. For someone with more than one job, the primary occupation is usually the one in which the person spent the most time or earned the most money, although this may not have been explicit in the instructions for a specific census.

To ensure confidentiality, very small occupations are recoded to a residual category indicating the persons had an occupation, but the job title is not identified. The number of cases recoded should be too small to affect analyses.

## Total income (INCTOT)

File: DOM1981-P-H

### Overview

Type: Continuous	Valid cases: 0
Format: numeric	Invalid: 0
Width: 7	
Decimals: 0	

### Description

INCTOT reports the person's total personal income from all sources in the previous month or year.

## Wage and salary income (INCWAGE)

File: DOM1981-P-H

### Overview

Type: Continuous	Valid cases: 0
Format: numeric	Invalid: 0
Width: 7	
Decimals: 0	

### Description

INCWAGE reports the respondent's weekly, monthly or annual wage and salary income.

## Mute or speech impaired (DISMUTE)

File: DOM1981-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

### Description

DISMUTE indicates if the person could not speak or had a significant speech impediment.

## Consensual union (CONSENS)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 1  
Decimals: 0  
Range: 1-9

Valid cases: 0  
Invalid: 0

### Description

CONSENS indicates whether the respondent was in a consensual union -- a de facto marriage.

## Children surviving (CHSURV)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

### Description

CHSURV reports the number of children born to a woman who were still living at the time of the census.

## Number of female children surviving (CHSURVF)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 2  
Decimals: 0  
Range: 0-99

Valid cases: 0  
Invalid: 0

### Description

CHSURVF indicates the number of female children ever born to a woman who were still living at the time of the census.

## Industry, general recode (INDGEN)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 3  
Decimals: 0  
Range: 0-999

Valid cases: 0  
Invalid: 0

### Description

INDGEN recodes the industrial classifications of the various samples into twelve groups that can be fairly consistently identified across all available samples. The groupings roughly conform to the International Standard Industrial Classification (ISIC). The third digit of INDGEN retains important detail among the service industries that could not be consistently distinguished in all samples.

"Industry" refers to the activity or product of the establishment or sector in which a person worked.

## Blind or vision-impaired (DISBLND)

File: DOM1981-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

### Description

DISBLND indicates whether the person was blind or had limited vision.

File: DOM1981-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

### Description

DISDEAF indicates whether the person was deaf or had limited hearing.

## Number of male children surviving (CHSURVM)

File: DOM1981-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 0-99	

### Description

CHSURVM indicates the number of male children ever born to a woman who were still living at the time of the census.

## Residence status: de facto, de jure (RESIDENT)

File: DOM1981-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 1-9	

### Description

RESIDENT identifies whether an enumerated person is a household resident or a visitor and whether she or he was present at the time of enumeration. This variable is available only in samples that enumerated both de facto and de jure residents. It can be used to eliminate the double-counting of persons who were enumerated both at their permanent residence and at the residence they were visiting on census night.

De jure population: present residents and absent residents.

De facto population: present residents and visitors/non-residents.

## Chapter VII. Personal characteristics

The information of all persons listed in the previous section is gathered in this chapter.

One sheet (two pages) is used to record the information of each person.

The interviews are carried out, starting with the Head of Household and continuing with the other persons, in the same order in which they were listed on page 4.

When there are more than 8 persons in the same household, another form is used for the other household members and the instructions for additional forms given on page 70 of this manual are followed.

In the upper box of this chapter, the identification information of this person is copied from Chapter VI. Household composition:

- a) The number corresponding to the person from the list is written down and the corresponding circles are filled in.
- b) The name is copied.
- c) The residency condition circle is filled in, taking the information from the data already recorded in the previous chapter.

### Interviewer instructions

**Resident:**

A resident is one who has normally lived in the enumerated dwelling for the last 6 months or more; or, having lived there for a shorter time, who has the intention of staying.

If a resident slept in the dwelling the night prior to the census day, he is marked as Present, whether present or not at the time of enumeration.

If the resident did not sleep in the dwelling the night prior to the census day, he is marked as Absent, whether present or not at the time of enumeration.

Residents considered to be absent:

- a) Those who are temporarily absent for business, vacation, work, sickness, etc.
- b) Those who are detained [imprisoned], serving a sentence of less than 6 months.

[p. 45]

The following residents are not considered to be absent and are not included in the census form of their respective families:

- a) Students who are living in another city of the country for more than 6 months.
- b) Families living abroad for more than 6 months.
- c) Military personnel living on bases, doctors or nurses living in a hospital or clinic, or domestic employees living with a family.
- d) Permanent patients in sanatoriums, asylums, or other similar establishments.
- e) Detainees serving a sentence of more than 6 months.

If any of these persons slept in the dwelling the night prior to census day they are recorded as Non-residents.

Students who are living in another city or town, in country or abroad, for more than 6 months are considered to be Present Residents or Absent Residents in the place where they study.

Non-residents:

Non-residents are all of those who slept in the enumerated dwelling the night prior to the census day and who are not usual residents in the dwelling.

[p. 46]

Important note:

All those born before 12 midnight the night prior to the census day and all those who passed away after 12 midnight the night prior to the census day should be enumerated.

Question 32: What is your date of birth?

The day, month, and year of birth are recorded. The age, in completed years, is recorded and the circles corresponding to the recorded age are filled in.

On pages 76 and 77 of this manual, two tables are given that will facilitate the calculation of age, given the month and year of birth.

Either the table June to November or December to May, according to the month of birth, should be used.

If the date of birth is unknown, only the age in completed years is recorded and the corresponding circles are filled in.

Some informants cannot remember their exact age or their date of birth but they know, however, that they were born in conjunction with important historical event. On page 75 of this manual there is a list of events to be used as a guide that will allow the approximate age to be estimated.

[p. 52]

For those younger than 1 year of age: the date of birth is recorded, the number of months is recorded, and the circles corresponding to the number of completed months are filled in.

For those younger than one month: the date of birth is recorded and 0 (zero) is recorded for months and the circles 00 (zero, zero) are filled in.

## Economic activity (DO1981A\_0464)

File: DOM1981-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 1-9

Valid cases: 0  
 Invalid: 0

### Description

This variable indicates the person's employment status.

### Universe

Persons age 10+

### Literal question

Economic activity

## Person weight (PERWT)

File: DOM1981-P-H

### Overview

Type: Continuous  
 Format: numeric  
 Width: 8  
 Decimals: 2

Valid cases: 0  
 Invalid: 0

### Description

PERWT indicates the number of persons in the actual population represented by the person in the sample.

For the samples that are truly weighted (see the comparability discussion), PERWT must be used to yield accurate statistics for the population.

NOTE: PERWT has 2 implied decimal places. That is, the last two digits of the eight-digit variable are decimal digits, but there is no actual decimal in the data.

## Industry, unrecoded (IND)

File: DOM1981-P-H

### Overview

Type: Continuous  
 Format: numeric  
 Width: 5  
 Decimals: 0

Valid cases: 0  
 Invalid: 0

### Description

"Industry" refers to the activity or product of the establishment or sector in which the person worked. IND is classified according to the system used by the respective national census office at the time, and is not recoded by IPUMS-International.

## Disability status (DISABLED)

File: DOM1981-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

### Description

DISABLED indicates whether the person reported a disability of any kind.

## Year of last birth (LASTBYR)

File: DOM1981-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 4	
Decimals: 0	
Range: 1900-9999	

### Description

LASTBYR indicates the year of birth of the last child borne by the respondent. The data refer to live births.

## Years of schooling (YRSCHOOL)

File: DOM1981-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 0-99	

### Description

YRSCHOOL indicates the highest grade/level of schooling the person had completed, in years. Only formal schooling is counted. YRSCHOOL accounts for the number of years of study, regardless of the track or kind of study. Information on degree and/or technical track is available in EDATTAIN. Years of schooling for Israel, categorized into intervals, are given in YRSCHOOL2.

Users should pay close attention to the top-codes in each sample, as discussed in the comparability section.

## Migration status, 5 years (MIGRATE5)

File: DOM1981-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 2	
Decimals: 0	
Range: 0-99	

### Description

MIGRATE5 indicates the person's place of residence 5 years ago. The first digit records movement across major administrative divisions and countries. The second digit reports movement across minor administrative divisions, for samples in which that detail is available.

## Educational attainment, international recode [general version] (EDATTAIN)

File: DOM1981-P-H

### Overview

Type: Discrete	Valid cases: 0
Format: numeric	Invalid: 0
Width: 1	
Decimals: 0	
Range: 0-9	

### Description

EDATTAIN records the person's educational attainment in terms of the level of schooling completed (degree or other milestone). The emphasis on level completed is critical: a person attending the final year of secondary education receives the code for having completed lower secondary only -- and in some samples only primary.

EDATTAIN does not necessarily reflect any particular country's definition of the various levels of schooling in terms of terminology or the number of years of schooling. EDATTAIN is an attempt to merge -- into a single, roughly comparable variable -- samples that provide degrees, ones that provide actual years of schooling, and those that have some of both. In addition to EDATTAIN, a country-specific education classification is provided which loses no information and reflects the particular educational system of that country (for example EDUCBR for Brazil, EDUCCL for Chile, and EDUCUS for the United States). As always, users can refer to the original education source variables for each sample, if they wish.

Many samples also give single years of schooling completed, recorded in YRSCHOOL. Some samples provide educational information in a form that could not be incorporated into EDATTAIN.

## Hours worked per week (HRSWORK1)

File: DOM1981-P-H

### Overview

Type: Discrete  
Format: numeric  
Width: 3  
Decimals: 0  
Range: 0-999

Valid cases: 0  
Invalid: 0

### Description

HRSWORK1 indicates the number of hours the respondent worked per week at all jobs.

## Hours worked per week, categorized (HRSWORK2)

File: DOM1981-P-H

### Overview

Type: Discrete  
 Format: numeric

#### Description

BPLCOUNTRY indicates the person's country of birth.

## Month of last birth (LASTBMO)

File: DOM1981-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 1-99

Valid cases: 0  
 Invalid: 0

#### Description

LASTBMO indicates the month of birth of the last child borne by the respondent. The data refer to live births.

## Mortality status of last birth (LASTBMORT)

File: DOM1981-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

#### Description

LASTBMORT indicates the mortality status of the last child born to a woman. There is no constraint on how long ago the child may have been born. Only live births are considered.

## Number of own female children living abroad (ABROADFEM)

File: DOM1981-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

#### Description

ABROADFEM indicates the number of a woman's biological female children who are living abroad.

## Number of own male children living abroad (ABROADMALE) File: DOM1981-P-H

#### Overview

Type: Discrete  
 Format: numeric

#### Description

ABROADCHD indicates the number of a woman's biological children who are living abroad, regardless of gender.

## Country of residence 5 years ago (MIGCTRY5) File: DOM1981-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 5  
 Decimals: 0  
 Range: 0-99999

Valid cases: 0  
 Invalid: 0

#### Description

MIGCTRY5 indicates the country of residence 5 years ago for international migrants. Persons who did not live abroad 5 years earlier are coded to the "non-migrant" category.

## Nativity status (NATIVITY) File: DOM1981-P-H

#### Overview

Type: Discrete  
 Format: numeric  
 Width: 1  
 Decimals: 0  
 Range: 0-9

Valid cases: 0  
 Invalid: 0

### Description

NATIVITY indicates whether the person was native- or foreign-born.

## Number of female children dead (CHDEADFEM)

File: DOM1981-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0  
 Invalid: 0

### Description

CHDEADFEM indicates the number of female children ever born to a woman who are no longer living. Stillbirths are not counted.

It is possible to calculate total child deaths for samples that have both the "Female children ever born" and "Female children surviving" variables. That is not done in CHDEADFEM, which includes only the samples that directly reported the information in the appropriate form.

## Number of male children dead (CHDEADMALE)

File: DOM1981-P-H

### Overview

Type: Discrete  
 Format: numeric  
 Width: 2  
 Decimals: 0  
 Range: 0-99

Valid cases: 0
