I. Objectives

This survey was designed to achieve the following objectives:

- Assist the World Bank Group in gaining a better understanding of how stakeholders in Gabon perceive the Bank Group;
- Obtain systematic feedback from stakeholders in Gabon regarding:
 - Their views regarding the general environment in Gabon;
 - Their overall attitudes toward the World Bank Group in Gabon;
 - Overall impressions of the World Bank Group's effectiveness and results, knowledge work and activities, and communication and information sharing in Gabon;
 - Perceptions of the World Bank Group's future role in Gabon.
- Use data to help inform Gabon country team's strategy.

II. Methodology

In January 2014, 250 stakeholders of the World Bank Group in Gabon were invited to provide their opinions on the World Bank Group's assistance to the country by participating in a country survey. Participants in the survey were drawn from the office of the President; the office of the Prime Minister; office of a minister; office of a parliamentarian; ministries, ministerial departments, or implementation agencies; consultants/contractors working on World Bank Group-supported projects/programs; project management units (PMUs) overseeing implementation of a project; local government officials; bilateral and multilateral agencies; private sector organizations; private foundations; the financial sector/private banks; NGOs; community based organizations; the media; independent government institutions; trade unions; faith-based groups; academia/research institutes/think tanks; the judiciary branch; and other organizations. A total of 222 stakeholders participated in the survey (89% response rate).

Respondents either completed questionnaires with a representative of the fielding agency or they received the questionnaire via email and returned it accordingly. Respondents were asked about: general issues facing Gabon; their overall attitudes toward the World Bank Group (WBG); the WBG's effectiveness and results; the WBG's knowledge work and activities; working with the WBG; the WBG's future role in Gabon; and the WBG's communication and information sharing in Gabon.

Every country that engages in the Country Opinion Survey must include specific indicator questions that will be aggregated for the World Bank Group's annual Corporate Scorecard. These questions are identified throughout the survey report.

- A. General Issues Facing Gabon: Respondents were asked to indicate whether Gabon is headed in the right direction, what they thought were the top three most important development priorities in the country, which areas would contribute most to reducing poverty and generating economic growth in Gabon, and how "shared prosperity" would be best achieved in Gabon.

II. Methodology (continued)

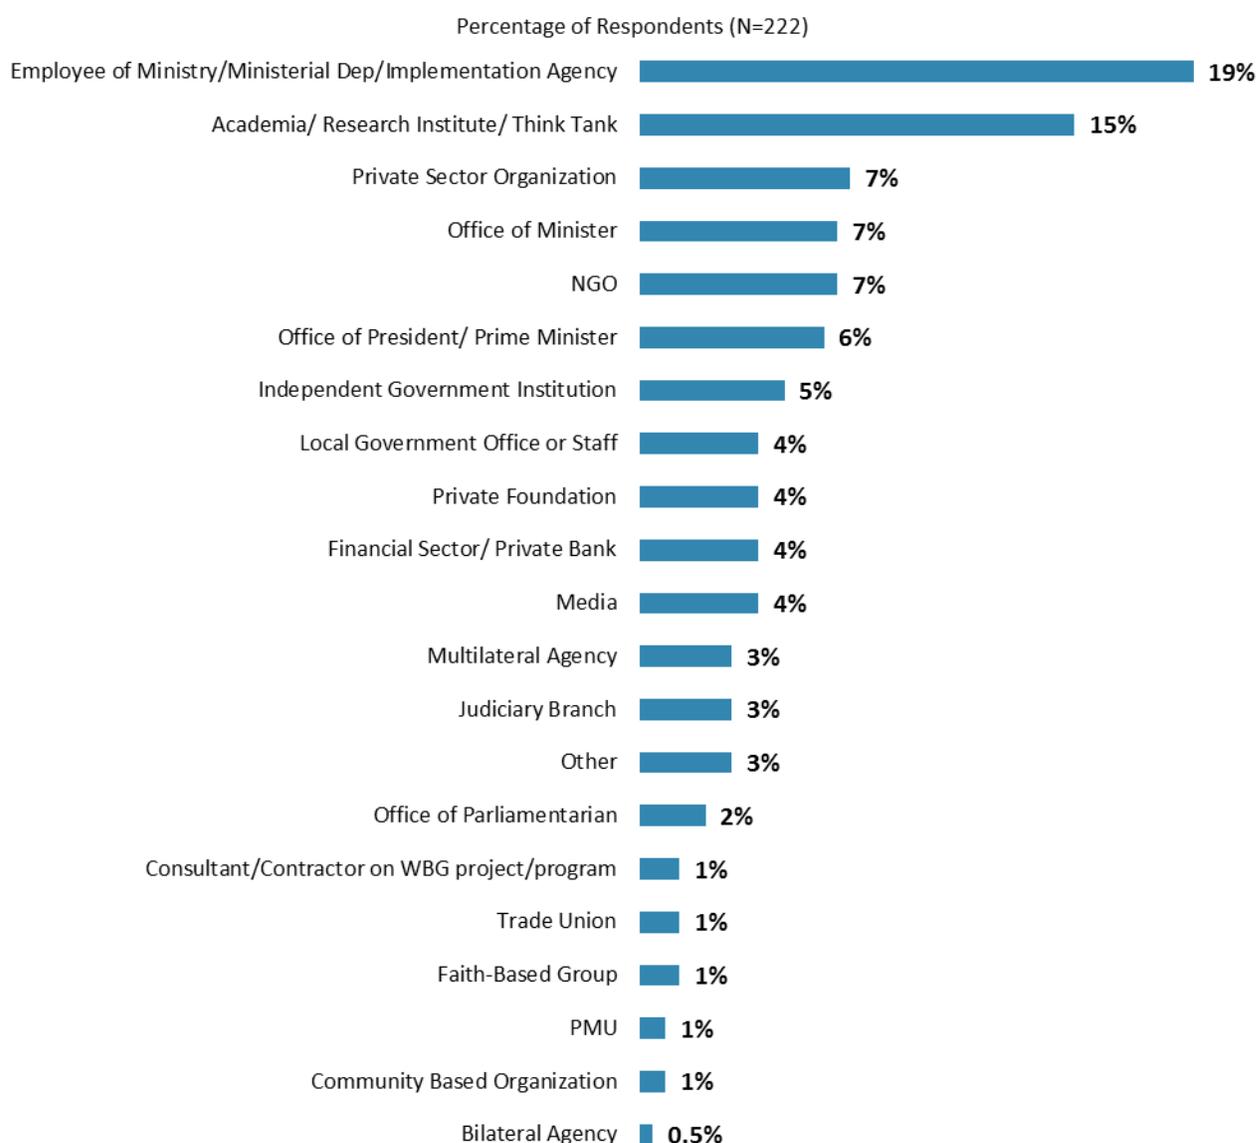

- B. Overall Attitudes toward the World Bank Group (WBG): Respondents were asked to rate their familiarity with the WBG, the WBG's effectiveness in Gabon, WBG staff preparedness to help Gabon solve its development challenges, their agreement with various statements regarding the WBG's work, and the extent to which the WBG is an effective development partner. Respondents were asked to indicate the WBG's greatest values and weaknesses, the most effective instruments in helping reduce poverty in Gabon, with which stakeholder groups the WBG should collaborate more, in which sectoral areas the WBG should focus most of its resources (financial and knowledge services), and to what reasons respondents attributed failed or slow reform efforts.
- C. World Bank Group's Effectiveness and Results: Respondents were asked to rate the extent to which the WBG's work helps achieve development results in Gabon, the extent to which the WBG meets Gabon's needs for knowledge services and financial instruments, and the WBG's level of effectiveness across thirty one development areas, such as economic growth, governance, private sector development, education, and job creation.
- D. The World Bank Group's Knowledge Work and Activities: Respondents were asked to indicate how frequently they consult WBG's knowledge work and activities and to rate the effectiveness and quality of the WBG's knowledge work and activities, including how significant of a contribution it makes to development results and its technical quality.
- E. Working with the World Bank Group: Respondents were asked to rate their level of agreement with a series of statements regarding working with the WBG, such as the WBG's "Safeguard Policy" requirements being reasonable, the WBG imposing reasonable conditions on its lending, disbursing funds promptly, and providing effective implementation support.
- F. The Future Role of the World Bank Group in Gabon: Respondents were asked to indicate what the WBG should do to make itself of greater value in Gabon, and which services the WBG should offer more of in the country.
- G. Communication and Information Sharing: Respondents were asked to indicate how they get information about economic and social development issues, how they prefer to receive information from the WBG, and their usage and evaluation of the WBG's websites. Respondents were also asked about their awareness of the WBG's Access to Information policy, past information requests from the WBG, and their level of agreement that they use more data from the WBG as a result of the WBG's Open Data policy.
- H. Background Information: Respondents were asked to indicate their current position, specialization, whether they professionally collaborate with the WBG, their exposure to the WBG in Gabon, which WBG agencies they work with, and their geographic location.

When possible, responses from respondents completing this year's country survey were compared to responses from 116 respondents (73% response rate) who completed the survey in FY 2011 and 181 respondents (60% response rate) who completed the survey in FY 2005. Notations and/or charts are included when these comparisons were possible.

VI. Sectoral Importance and Effectiveness (continued)

Drivers of Effectiveness

To determine the key drivers of respondents' ratings of the World Bank Group's overall effectiveness and ratings of its ability to help achieve development results in Gabon, bivariate correlational analyses were conducted using respondents' ratings of the thirty-one specific areas of effectiveness.

Correlational analyses, however, are not able to tell us exactly what is causing respondents' ratings of the WBG's overall effectiveness or ratings of its ability to help achieve development results. Rather, these analyses tell us that as ratings of effectiveness in one area increase, respondents' ratings of the WBG's overall effectiveness increase, or as ratings of effectiveness in one area increase, ratings of the WBG's ability to help achieve development results increase. Thus, it can be inferred that respondents' perceptions of effectiveness in one specific area are related to, or drive, respondents' perceptions of the WBG's overall effectiveness or perceptions of the WBG's ability to help achieve development results.

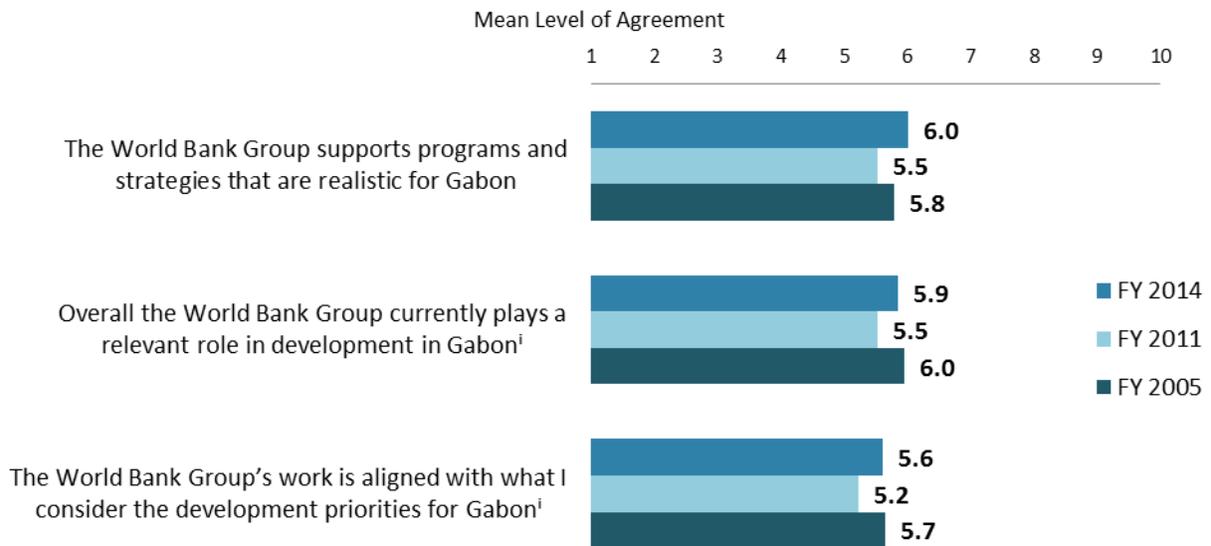

- Overall Effectiveness: Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the WBG's overall effectiveness, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the WBG's overall effectiveness in Gabon. The areas determined to be key drivers from these analyses were:
 - The WBG's effectiveness at economic growth;
 - The WBG's effectiveness at education;
 - The WBG's effectiveness at information and communications technology; and
 - The WBG's effectiveness at poverty reduction.

- Achieving Development Results: Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the WBG's ability to help achieve development results in Gabon, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the WBG's ability to help achieve development results. The areas determined to be key drivers from these analyses were:
 - The WBG's effectiveness at urban development;
 - The WBG's effectiveness at agricultural development; and
 - The WBG's effectiveness at education.
