Preamble

Hello, my name is [___] and I work with BISAM, a national social research company based in Almaty. [*Show official BISAM letter*]. Our team is working in this community with the permission of the akim to conduct social research. The research is being done across Almaty Oblast.

My colleagues visited this household a year ago and informed you that we would come back again. I would like to ask your views on a few subjects in more detail. The main purpose of the research is to collect information from communities to better understand how families care for young children. This will inform policy and programmes.

All of the information that you share with me will be kept **confidential**. This means that this information will not be shared with anybody, including your neighbours and local government authorities. This information will also be **anonymous**, which means that all of the information we collect from you and other families will only be analysed in a general way, and your individual details will never appear anywhere. Nobody will be able to tell that you have participated in our research.

Please understand that you will not receive any direct benefit from talking to us apart from a small token of appreciation that we will give you in return for your time.

Your participation is very important to our research, and there will be no negative consequences for talking to us. But if you would like me to leave, please feel free to tell me at any time and I will go. The research should take up about 1 hour of your time.

If you decide to participate in this research, I will be asking you questions and making notes of your answers in this questionnaire. We will also give you a signed document that guarantees the confidentiality of the information that you share with us. This document will also provide the names and contact information of the project manager in the BISAM head office in Almaty who you can contact in case you have any questions of concerns. If you have any further questions, please feel free to ask anything later in the interview.

Do you have any questions about this research or your participation in this research? Do I have your permission to continue with this interview?

Interviewer: If this is a TREATMENT okrug you may explain the BOTA programme to the respondent using the following description:

The BOTA CCT programme distributes monthly cash to parents of 4-6 year old children in pre-school, to pregnant women and lactating mothers, and to parents of children with disabilities. It also organises volunteers to assist these groups, to ensure 4-6 year olds attend pre-school, and to provide training on good pregnancy practice and home-based care. While we are working with BOTA CCT, we are independent of them so feel free to be totally honest.
