# FAMILY QUESTIONNAIRE

(Write the start time of interview:      hour,      min.)

INTERVIEWER: My name is ( *TELL YOUR FIRST NAME, PATRONYMIC AND SURNAME*). *IF NEEDED SHOW YOUR INTERVIEWER DOCUMENT AND LEGAL PERSONAL IDENTIFICATION DOCUMENT*)

May be you already know that we do household survey.

This is not a usual survey. The idea of the survey is to get information about all members of the household without exception. It is important to collect such information to study the population's living standard and to make governmental decisions to improve the population's living standard. That's why we ask you to give detailed answers to the questions of our questionnaire.

Your household as well as two thousand other households in Kazakhstan were selected by computer, so the selection of your household was absolutely random. Information, collected during the survey will be used only in average figures to obtain the general situation of people's life and welfare in Kazakhstan.

All data collected will be processed only by a foreign company. We say in advance that all obtained information is strictly confidential and is not used by third parties for any purposes.

First I would like to explain briefly what we are going to talk. In our talk we shall touch upon issues dealing with the everyday life of your household: household activities, child .

We shall also talk about housing conditions and problems connected with your work and about your income and expenditures.

For all the questions dealing with household in general I would like to discuss with the person who best knows all the routine of your household.

As we realize that you have to spend a part of your spare time for this talk - to answer our questions is work - we are ready to pay within our ability.

But before we start our talk I would like to clear up the meanings of the words "family" and "household" which you often be ... in our questionnaire. Under "family" or in other words "household", in this survey we mean all people living together with you and sharing income and expenditures.
