## Overview

---

- Long Household Questionnaire (LHS): Conducted in a representative sample of villages from the 67 rural subdistricts that received BRA-KDP, as well as in a representative sample of villages in 67 matched subdistricts (described in Section 2). Five households were randomly sampled in sampled villages, and main respondents were selected randomly from all males and females between the ages of 18-65 who had lived in the household for at least one month. The LHS is a representative sample of men and women from BRA-KDP treatment and control subdistricts. It is not representative of other subdistricts and is not representative at the district level.
- Short Household Questionnaire (SHS): Implemented in a representative sample of all subdistricts not included in the LHS. The main goal of this survey is to provide, in conjunction with the LHS, an Aceh-wide representative control group of adult males between the ages of 18-65 for the ex-combatant survey. Male respondents were sampled from two randomly sampled households in selected rural villages and eight randomly sampled households in urban villages. A representative sample of male respondents can be achieved by combining the SHS and the male sub-population of the LHS.
- Ex-TNA Questionnaire: An Aceh-wide representative sample of ex-combatants. Eligible respondents included anyone who fought with GAM-TNA, or was in the GAM-TNA command structure, for at least one month since 1998. A full list of ex-TNA was enumerated in each of the 754 villages and ex-TNA were sampled with a 6 in 10 probability.
- Village Head Questionnaire (VHS): A survey of village-head characteristics, as well as village-level characteristics in all sampled villages.
- Household Rosters: In the LHS, SHS and Ex-TNA surveys, data was collected on every member of the respondent's 1998 and 2008 households. The roster includes demographic, welfare, recruitment and conflict data on all members in the household at those times.

You have a choice between keeping the money for yourself or contributing any amount to the Bupati's office. You can choose to contribute 0, 1000, 2000...up to 10,000. We are asking several other randomly selected households in this district to make the same decision. Money contributed will be combined from all the households and delivered to the Bupati's office. The Bupati's office will be told that these are funds from villagers in its district and the district government should use the money in whatever way it thinks is best for the kabupaten. The choice you make about whether to contribute is private. None of the other households will know what decision you make. And the Bupati's office will not be told your identity. You can make any decision you please. I will now step out of the room. Put any money you would like to keep for yourself in your pocket and put any money you would like to give to the Bupati's office back in the envelope. When you have finished making your decision, seal the envelope shut. Then call me back into the room. [To district Government (Bupati's office)]

I want you to think about your household today. Your household includes everyone who is currently living here (for at least 1 month). Please tell me the names of all persons who normally live and eat together in this household. First, list the head of the household. Then list the spouse of the head followed by their children. List any other spouses, also followed by their children. Finally list any other household members. For each person, I will ask a series of questions.

**Literal question**

[Taxation I] I would now like to learn how you feel about the district government (Bupati's office). I have an envelope here with 10,000 rupiah inside. Consider this money to be income you have earned from a job. I will now ask you to make a real decision about how to allocate these finances. You have a choice between keeping the money for yourself or contributing any amount to the Bupati's office. You can choose to contribute 0, 1000, 2000...up to 10,000.

We are asking several other randomly selected households in this district to make the same decision. Money contributed will be combined from all the households and delivered to the Bupati's office. The Bupati's office will be told that these are funds from villagers in its district and the district government should use the money in whatever way it thinks is best for the kabupaten.

The choice you make about whether to contribute is private. None of the other households will know what decision you make. And the Bupati's office will not be told your identity. You can make any decision you please. I will now step out of the room. Put any money you would like to keep for yourself in your pocket and put any money you would like to give to the Bupati's office back in the envelope. When you have finished making your decision, seal the envelope shut. Then call me back into the room. [To district Government (Bupati's office)]

#### Pre question

I am now going to ask you about two different time periods during the conflict. The first period is from August 1998 (the end of DOM) to January 2001 (the end of the Humanitarian Pause/Jeda). The second period is from February 2001 (the end of the Humanitarian Pause/Jeda) through August 2005 (when the MOU was signed). For the next series of questions, I want you to think back to each time period when you give your answers.

#### Literal question

For each of these time periods, please describe which statement best describes what the conflict was like in your village? Let's start with Period 1 [PERIOD I Aug 1998 [End of DOM]-January 2001 [End of Humanitarian Pause/Jeda]
