### Definition of household

*A group of people who live in the same homestead (which may consist of more than a single dwelling) and share food and other items bought from a common household budget. This includes people who are away temporarily (e.g. herding or at boarding school)*

We need to know about each person who uses this household as their main place of residence, even if they may be away for long periods of time to work, receive education or visit relatives.

### Head of Household

In most cases, *the head of the household is the one who manages the income earned and expenses incurred by the household, and who is the most knowledgeable about other members of the household.* He/she will be the person named when you ask the question “Who is the head of this household?”
