## I. Objectives

This survey was designed to assist the World Bank Group (WBG) in gaining a better understanding of how stakeholders in Cameroon perceive the WBG. The survey explored:

- *General Issues Facing Cameroon*
- *Overall Attitudes toward the World Bank Group*
- *World Bank Group's Effectiveness and Results*
- *The World Bank Group's Knowledge Work and Activities*
- *Working with the World Bank Group*
- *The Future Role of the World Bank Group in Cameroon*
- *Communication and Information Sharing*
- *Background Information*

## II. Methodology

From May to June 2016, 607 stakeholders of the WBG in Cameroon were invited to provide their opinions on the WBG's work in the country by participating in a country opinion survey. Participants were drawn from the Office of the President, Prime Minister; office of a minister; office of a parliamentarian; ministries/ministerial departments/implementation agencies; Project Management Units (PMUs) overseeing implementation of WBG projects; consultants/contractors working on WBG-supported projects/programs; local governments; bilateral/multilateral agencies; private sector organizations; private foundations; the financial sector/private banks; NGOs/community based organizations; the media; independent government institutions; trade unions; faith-based groups; youth groups; academia/research institutes/think tanks; the judiciary branch; and other organizations. A total of 394 stakeholders participated in the survey (65% response rate).

Some respondents received and returned the questionnaires via courier or email; others completed the questionnaire with the presence of an independent research consultant. Respondents were asked about: general issues facing Cameroon; their overall attitudes toward the WBG; the WBG's effectiveness and results; the WBG's knowledge work and activities; working with the WBG; the WBG's future role in Cameroon; and the WBG's communication and information sharing.

Every country that engages in the Country Opinion Survey (COS) must include specific indicator questions that will be aggregated for the World Bank Group's annual Corporate Scorecard. These questions are identified throughout the survey report.

The results in this year's Country Survey were compared to those in the Country Survey conducted in FY'13 (response rate is 71%, N=403). Data were weighted to reach the same stakeholder composition in two years, which allows for year comparisons. Stakeholder groups which were not present in both fiscal years were not included in the comparison. Respondents who belonged to the "other" stakeholder category were not included either. As a result, mean ratings, percentages of respondents, and the total number of respondents in both years are slightly different from those of the original data reported in the FY'13 COS report and the non-weighted data presented in appendices A, B, C, D, and F. For the weighted stakeholder breakdown and year comparison results, please refer to Appendix E (page 89).

- Respondents' levels of familiarity with the WBG were significantly, strongly correlated with their ratings of the WBG's overall effectiveness in Cameroon, and significantly, moderately correlated with the extent to which the WBG plays a relevant role in development in Cameroon, and the extent to which the WBG contributes to the country's development results.

**"How familiar are you with the work of the World Bank Group in Cameroon?"**  
(1 - "Not familiar at all", 10 - "Extremely familiar")

## IV. General Issues Facing Cameroon

### Headed in the Right Direction<sup>2</sup>

- **Year comparison:** This year's respondents were significantly more likely to believe that Cameroon is headed in the wrong direction compared to respondents in the FY'13 Country Survey.
- **Stakeholder groups:** In this year's Country Survey, respondents from the private sector/financial sector/private banks were more likely to indicate that Cameroon is headed in the right direction, while respondents from the media and academia were significantly less positive about the prospect of Cameroon.

## VI. Sectoral Effectiveness (continued)

### Drivers of Effectiveness

To determine the key drivers of respondents' ratings of the World Bank Group's overall effectiveness and ratings of its ability to help achieve development results in Cameroon, bivariate correlational analyses were conducted using respondents' ratings of the twenty six specific areas of effectiveness.

Correlational analyses, however, are not able to tell us exactly what is causing respondents' ratings of the World Bank Group's overall effectiveness or ratings of its ability to help achieve development results. Rather, these analyses tell us that as ratings of effectiveness in one area increase, respondents' ratings of the WBG's overall effectiveness increase, or as ratings of effectiveness in one area increase, ratings of the WBG's ability to help achieve development results increase. Thus, it can be inferred that respondents' perceptions of effectiveness in one specific area are related to, or drive, respondents' perceptions of the WBG's overall effectiveness or perceptions of the WBG's ability to help achieve development results.

- Overall Effectiveness: Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the WBG's overall effectiveness, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the WBG's overall effectiveness in Cameroon. The areas determined to be key drivers from these analyses were:
  - The WBG's effectiveness at rural development; and
  - The WBG's effectiveness at poverty reduction.
- Achieving Development Results: Those specific areas with the highest Pearson Product-Moment correlations were determined to be the most closely related to perceptions of the WBG's ability to help achieve development results in Cameroon, suggesting that ratings of effectiveness in those specific areas are drivers of perceptions of the WBG's ability to help achieve development results. The area determined to be key driver from these analyses was:
  - The WBG's effectiveness at poverty reduction;
  - The WBG's effectiveness at economic growth;
  - The WBG's effectiveness at health;
  - The WBG's effectiveness at urban development; and
  - The WBG's effectiveness at rural development.
