			<p>.....</p> <p>.....</p>
<p><b>2.3.Laboratory investigations</b></p>	<p>Take body temperature during examination: 39<sup>0</sup>C, no chest indrawing, respiratory rate 42 strokes per minute, sporadic bubbling and rattling rales. What tests will you use for diagnosing?</p>	<p>1. Straight cardiopulmonary X-ray</p> <p>2. Complete blood count</p>	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>
<p><b>2.4.Diagnosing</b></p>	<p>With the collected information, what initial diagnosis will you give?</p>	<p>1. Pneumonia / bronchitis</p>	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>
<p><b>2.5.Standard treatment</b></p>	<p>If the clinic is unable to take bacteriological or antibiotic susceptibility testing, what drugs will you use to treat the patient?</p>	<p>1. Amoxicillin/Amoxicillin + acid clavulanic</p> <p>2. Co-trimoxazol</p> <p>3. Azithromycin</p> <p>4. Clarithromycin</p> <p>5. Cephalosporin group: cephalexin/cefadroxil/cefazolin/cefradin/cefuroxim/Cefaclor/cefotaxim/cefixim/ceftazidim/ceftriaxon</p>	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>

Condition / Procedure	Question/scenario	Answer for coding <i>(Surveyor to ask the questions and circle the selected answers)</i>	Addition information/answers <i>(Surveyor to take notes in details)</i>
			<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>
<b>3.3.Indicated tests</b>	If the patient has been smoking for the last ten years, and physical examination does not reveal any specific symptoms, what laboratory tests will you give?	<ol style="list-style-type: none"> <li>1. Complete blood count</li> <li>2. Sputum test (AFB)</li> <li>3. Front and side cardiopulmonary X-rays</li> </ol>	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>
<b>3.4.Diagnosing</b>	X-ray films show cloudy parts on the top of the right lung. What initial diagnosis do you give?	<ol style="list-style-type: none"> <li>1. Pulmonary TB</li> <li>2. Pulmonary cancer/tumor observation</li> </ol>	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>
<b>3.5.Standard treatment</b>	If the diagnosis is pulmonary tuberculosis, what treatment will you give?	<ol style="list-style-type: none"> <li>1. DOTS strategy</li> <li>2. Regimen I: 2S (E)HRZ/6HE or 2S(E)RHZ/4RH</li> <li>3. Regimen II: 2SHRZE/1HRZE/5H 3 R3 E3</li> </ol>	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>

Condition / Procedure	Question/scenario	Answer for coding (Surveyor to ask the questions and circle the selected answers)	Addition information/answers (Surveyor to take notes in details)
		4. Regiment III: 2HRZE/4HR or 2HRZ/4HR	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>

**IV. CASE 4**

Condition / Procedure	Question/scenario	Answer for coding (Surveyor to ask the questions and circle the selected answers)	Addition information/answers (Surveyor to take notes in details)
4.1.Ask	A 58-year female patient recently has weight loss (3 kg in two months) and a feeling of hunger like energy loss despite eating more. She doesn't know why so she came in for a check-up. What more will you ask the patient?	<p><b>Nature of weight loss</b></p> <p>1. Often feeling thirsty?</p> <p>2. Urinate more often?</p> <p><b>Other symptoms</b></p> <p>3. Fever?</p> <p>4. Cough?</p> <p>5. Blurry sight?</p> <p>6. Arm/leg numbness?</p> <p>7. Other signs?</p> <p><b>History</b></p> <p>8. Does the person have any other conditions (hypertension,</p>	<p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p> <p>.....</p>

Condition / Procedure	Question/scenario	Answer for coding (Surveyor to ask the questions and circle the selected answers)	Addition information/answers (Surveyor to take notes in details)
		dyslipidemia)? 9. Anyone in the family with diabetes?	..... ..... ..... ..... ..... ..... ..... ..... .....
<b>4.2.Physical examination</b>	The patient has no coughing or fever, looks a bit fat, sometimes has lightheadedness and dizziness. What do you do in physical examination?	<b>Systemic examination / vital sign check</b> 1. Counting pulse 2. Taking blood pressure 3. Taking body temperature 4. Counting respiratory rate 5. Measuring weight 6. Height <b>Cardiovascular-respiratory check</b> 7. Cardiopulmonary sounds <b>Eye check</b> <b>Peripheral neuropathy check:</b> Legs and feet	..... ..... ..... ..... ..... ..... ..... ..... .....

Condition / Procedure	Question/scenario	Answer for coding <i>(Surveyor to ask the questions and circle the selected answers)</i>	Addition information/answers <i>(Surveyor to take notes in details)</i>
			.....
<b>4.3.Indicated tests</b>	The patient has blood pressure measurement of 130/80 mmHg, pulse of 80 strokes per minute. What other essential tests will you give to inform diagnosing?	<ol style="list-style-type: none"> <li>1. Blood glucose test</li> <li>2. HbA1C</li> <li>3. Blood lipids</li> <li>4. Urine test</li> <li>5. Electrocardiogram</li> <li>6. Cardiopulmonary check</li> </ol>	..... ..... ..... ..... ..... ..... .....
<b>4.4.Diagnosing</b>	The patient has been prescribed several tests, including normal blood count, (random) blood glucose - measured at 8.6 mmol/l, ECG and front X-ray, with normal results. What initial diagnosis do you give?	<ol style="list-style-type: none"> <li>1. Diabetes Type 2 observation</li> </ol>	..... ..... ..... ..... ..... .....
<b>4.5.Standard treatment</b>	If the diagnosis is diabetes Type II, what drug therapy will you give?	<ol style="list-style-type: none"> <li>1. Hypoglycemia drugs</li> <li>2. Hypoglycemic sulphamids (Diamicon, Daonil, Maninil,</li> </ol>	..... .....

Condition / Procedure	Question/scenario	Answer for coding (Surveyor to ask the questions and circle the selected answers)	Addition information/answers (Surveyor to take notes in details)
		Glucotrol etc.) 3. Meglitinides (Repaglinide, Nateglinide) 4. Biguanides – Metformins (Glucophage, Glucofast, Siofor) 5. $\alpha$ inhibitors - glucosidase (Acarbose, Glucobay, Miglitol etc.)	..... ..... ..... ..... ..... ..... .....

**V. CASE 5**

Condition / Procedure	Question/scenario	Answer for coding (Surveyor to ask the questions and circle the selected answers)	Addition information/answers (Surveyor to take notes in details)
5.1.Ask	A 65-year male patient comes in to check why he sometimes has headache and feels hot on the face. What more will you ask him to inform diagnosing?	<i>Nature of headache</i> 1. Since when? 2. In what parts (all over or a specific spot)? 3. Is vomiting involved? 4. Is there lightheadedness and dizziness?  <i>Others symptoms</i>	..... ..... ..... ..... .....

Condition / Procedure	Question/scenario	Answer for coding (Surveyor to ask the questions and circle the selected answers)	Addition information/answers (Surveyor to take notes in details)
		<b>Abdomen exam</b> <b>Eye check</b> <b>Cerebral – meningeal syndromes</b> <b>Neurological exam</b> (sensors and motor)	..... ..... ..... .....
<b>5.3.Indicated tests</b>	Physical examination shows a pulse rate of 80 beats per minute, HA of 155/95mmHg, and no anomalies with other organs. What more tests will you give?	<ol style="list-style-type: none"> <li>1. Straight cardiopulmonary X-ray</li> <li>2. Electrocardiogram</li> <li>3. Blood lipids</li> <li>4. Blood glucose</li> <li>5. Electrolyte test</li> <li>6. Urine tests</li> </ol>	..... ..... ..... ..... ..... ..... ..... ..... ..... .....
<b>5.4.Diagnosing</b>	Tests results are normal. What initial diagnosis will you give? Severity?	<ol style="list-style-type: none"> <li>1. Hypertension level I</li> </ol>	..... ..... ..... .....
<b>5.5.Standard treatment</b>	If hypertension level I is given, what 1st line drug treatment	<b>One of the following antihypertensive drugs:</b>	.....
