Sampling

Sampling Procedure

The randomization had three dimensions of stratification: geographical district, sector and the type of gift received by the participants. The entrepreneurs were spread across four districts in or around Dar-es-Salam. To be eligible for the program, the applicants were required to: (1) be at least 18 years-old; and (2) have an established business at the time of application during baseline. After the initial screening, interviews were conducted and the selected applicants were randomly assigned to a control group (group 1), a basic training group (group 2), or an enhanced training group (group 3).

The overall attrition was 14 percent from the baseline survey, which means that out of the 821 initial entrepreneurs who were selected, 702 were interviewed in the follow-up survey. Further, there are no significant differences in attrition rates across the three groups.

Questionnaires

Overview

The endline survey questionnaire consisted of two modules: household module and enterprises module.

Data Collection

Data Collection Dates

Start	End	Cycle
2012-07-01	2012-08-01	Endline Survey

Data Collection Mode

Computer Assisted Personal Interview [capi]

DATA COLLECTION NOTES

Much effort was put into the wording in order to adapt the survey to local and cultural context. A team of researchers from Tanzania Gatsby Trust, AIDO and the World Bank worked together to finalize the questionnaire instrument for the two separate modules, which were then piloted prior to the survey.
