Sampling

Sampling Procedure

The IAPP endline survey was implemented in Rangpur and Barisal districts only. However, the Baseline Household Survey was implemented in all eight project districts: Rangpur, Kurigram, Nilfamari, and Lalmonirhat districts in the North and Barisal, Patuakhali, Barguna, and Jhalokathi districts in the South.

IAPP interventions are based at the level of the farmer group. Eligibility was determined by IAPP targeting criteria, prioritizing crop farmers with marginal or small landholdings, and fishermen with access to ponds between 15-50 decimals. After sampling, the IAPP teams reached out to sampled farmers and attempted to involve them in IAPP groups. However, very few sampled farmers ended up joining livestock groups.

For the endline survey, the household sample was increased to reflect the project team's request for additional data on fisheries and livestock. The fisheries treatment sample at endline consists of 73 households, from the districts of Rangpur, Barisal, Kurigram, and Lalmonirhat. Out of the 73 households, 45 are sampled in baseline. The livestock treatment sample at endline consists of 298 households. These households were not sampled in the baseline round.

The extra samples for fisheries and livestock can be found in data files.

Baseline Household Survey Report

Title Baseline Household Survey Report
 Date 2013-09-01
 Country Bangladesh
 Language English
 Contributor(s) Development Impact Evaluation (DIME) & Global Agriculture & Food Security Program (GAFSP)
 Description This report presents the main findings from a baseline survey for the impact evaluation of the Bangladesh Integrated Agricultural Productivity Project (IAPP), conducted between August - October 2012. After a brief introduction to IAPP, the IAPP Impact Evaluation, and the baseline data collection exercise, the report provides descriptive statistics on the following topics: socioeconomic profile of the households, access to agricultural extension services, agricultural production and commercialization, household income and expenditures, access to and use of rural financial services, food security and women's dietary diversity, and irrigation.
