I. Objectives

This survey was designed to assist the World Bank Group (WBG) in gaining a better understanding of how stakeholders in Myanmar perceive the WBG. The survey explored:

- *General Issues Facing Myanmar*
- *Overall Attitudes toward the World Bank Group*
- *World Bank Group's Effectiveness and Results*
- *The World Bank Group's Knowledge Work and Activities*
- *Working with the World Bank Group*
- *The Future Role of the World Bank Group in Myanmar*
- *Communication and Information Sharing*
- *Background Information*

II. Methodology

From February to April 2017, 300 stakeholders of the WBG in Myanmar were invited to provide their opinions on the WBG's work in the country by participating in a country opinion survey. Participants were drawn from the Office of the President, Prime Minister; office of a minister; office of a parliamentarian; ministries/ministerial departments/implementation agencies; Project Management Units (PMUs) overseeing implementation of WBG projects; consultants/contractors working on WBG-supported projects/programs; local governments; bilateral/multilateral agencies; private sector organizations; private foundations; the financial sector/private banks; NGOs/community based organizations; the media; independent government institutions; trade unions; faith-based groups; youth groups; academia/research institutes/think tanks; the judiciary branch; and other organizations. A total of 117 stakeholders participated in the survey (39% response rate).

Respondents received and returned the questionnaires via courier. Respondents were asked about: general issues facing Myanmar; their overall attitudes toward the WBG; the WBG's effectiveness and results; the WBG's knowledge work and activities; working with the WBG; the WBG's future role in Myanmar; and the WBG's communication and information sharing.

Every country that engages in the Country Opinion Survey (COS) must include specific indicator questions that will be aggregated for the World Bank Group's annual Corporate Scorecard. These questions are identified throughout the survey report.

The results in this year's Country Survey were compared to those in the Country Survey conducted in FY'14 (response rate was 26%, N=173). Data were weighted to reach the same stakeholder composition in two years, which allows for year comparisons. Stakeholder groups which were not present in both fiscal years were not included in the comparison. Respondents who belonged to the "other" stakeholder category were not included either. As a result, mean ratings, percentages of respondents, and the total number of respondents in both years are slightly different from those of the original data reported in the FY'14 COS report and the non-weighted data presented in appendices A, B, C, D, and F. For the weighted stakeholder breakdown and year comparison results, please refer to Appendix E (page 93).

III. Demographics of the Sample

Current Position

- For further analyses, respondents from the Office of the President/Prime Minister were combined with respondents from the office of a minister; respondents from PMUs were combined with consultants working on WBG projects and employees of ministries, respondents from the financial sector/private banks were combined with those from private sector organizations; NGOs/community based organizations were renamed as in the “CSO” category; and the small number of respondents from local governments, bilateral/multilateral agencies, and other organizations were included in the “Other” category. There were no respondents from private foundations, independent government institutions, trade unions, faith-based groups, youth groups or the judiciary branch.
