Sampling

Sampling Procedure

Similar to the studies done in 2015 and 2016, this year methodology of the study has been based on multistage stratified and cluster sampling. At the primary stage of sampling the research group has determined that unit of observation is a household. The sample size: 2100 households.

Questionnaires

Overview

The main instrument of the study is the survey questionnaire, which consists of the Tittle Page and 5 sections:

Section 1. Welfare and remittances

Section 2. Socio-demographic and economic characteristics of household members

Section 3. The schedule of migration departures and arrivals from the given settlement of present and absent h/h members since 2014

Section 4. Returnees from abroad

Section 5. Those who are abroad
