Sampling

Sampling Procedure

Primary health care facility: the survey targeted 500 primary healthcare facilities participating in the first phase of the SURE-P MCH program and additional 500 primary healthcare facilities in Phase 2.

Midwife: 1,285 midwives from the 500 primary healthcare facilities enrolled the first phase (during 2013/14) and additional 2180 midwives from the 500 primary healthcare facilities enrolled in the second phase from the additional 500 SURE-P MH.

Ward development committee: the survey targeted all 500 ward development committees operating in areas with a SURE-P MCH primary healthcare facility in Phase 1 and additional 500 ward development committees operating in areas with a SURE-P MCH primary healthcare facility in Phase 2.

Household/individual: within the catchment area of each SURE-P MCH Phase 1 and Phase 2 primary healthcare facility, the survey was administered to five randomly selected households containing a woman that had given birth in the past three months for a total of 5000 households/women.

Response Rate

- Midwife: phase 1 response rate: 100%; Phase 2 response rate: not defined
- Primary health care facility target: 1,000; achievement: 912; response rate: 91%
- Ward development committee target: 1,000; achievement: 928; response rate: 93%
- Household target: 5,000; achievement: 4,950; response rate: 99%
