Sampling

Sampling Procedure

The program operated woredas of five regions of Ethiopia: Tigray, Amhara, Oromia, Addis Ababa and SNNPR. Only eligible applicants were considered at the time of the random allocation into the "program" or "control" groups. The implementer used pre-established selection criteria and the responses to long-from questions to determine the eligibility of applicants. Women who met the eligibility criteria for participating in the WALN program, who completed the application form to provide at least one letter of recommendation and nominate five to eight mentees were considered in the pool of mentors who receive the leadership training module. Mentees were selected from amongst the nominated candidates who met the corresponding eligibility criteria. Mentees were assigned only to the mentors who nominated them. To minimize non-compliance and maximize the effectiveness of existing network ties, if multiple mentors nominated the same mentee, the mentee were allowed to pick the mentor.

The baseline survey covered the entire sample of applicants to the program. That is, the mentors and the recommended mentees were all interviewed at the end of the application phase, but before the announcement of selection results.

The objective of the WALN baseline survey was to build a comprehensive dataset, which would serve as a reference point for the entire sample, before treatment and control assignment and program implementation. To get a better understanding of the context of the survey, this section describes the survey preparation steps and methodology.

DATA COLLECTION NOTES

The program implementer ACDI/VOCA launched a recruitment phase in December 2013. In major towns of the four regions targeted by the program-Amhara, Oromia, SNNPR and Tigray-women were invited to orientation sessions, during which they were introduced to the WALN program and handed out application forms. In addition to radio and newspaper advertisements, the staff in charge of the program also used their professional networks to reach out to influential Ethiopian agri-businesswomen who might be interested in participating.

All women who had sent a proper application form to become a WALN mentor to ACDI/VOCA were registered in our database with all the information filled in the form. They were then given a unique identification code, to be kept for the duration of the IE. The form required all applicants to provide the names of up to eight female agribusiness entrepreneurs that they knew and whom they would be willing to mentor; all mentees identified through this procedure were also recorded and associated with a unique ID. This record has served as a roster of all the respondents surveyed at baseline. The total of 231 mentors and 1,363 (potential) mentees, including those who later dropped out of the program or were ineligible because of some criteria.
