# Sampling

## Sampling Procedure

The sampling frame was designed according to the database of addresses for the 2001 Population Census, which was developed with the World Bank technical assistance. The database of addresses of all households in Armenia was divided into 32 strata including 12 communities of Yerevan city. The households from other regions (marzes) were grouped according to two categories: towns and villages. The villages and towns formed by 10 strata.

According to that division, a random, two-step sample stratified at the marz level was developed. All marzes, as well as all urban and rural settlements were included in the sample population according to the share of households residing in those settlements as percent to the total households in the country. In the first step, using the PPS method the enumeration units (i.e., primary sample units to be surveyed during the year) were selected.

2006 sample included 29 towns out of 48 (59% of all towns in Armenia were surveyed during the year) and 112 villages out of 950 (12% of all villages). In the second step, the respondent households were selected. The number of surveyed households was 5,184 (3,672 from urban and 1,512 from rural settlements). The sample was stratified according to the share of each PSU in the total population. Since 2004, the survey data has been representative at the marz level.

## Response Rate

The average national refusal rate was 6.9%. The refusal rates, defined as the number of refusals divided by the total number of addresses used, differed significantly by marzes. The highest refusal rate was in Yerevan (14.1%), while in Tavoush and Vayots Dzor marzes no refusals were recorded. The overall refusal rate has decreased by 34% compared to 2004 and by 16% compared to 2005. Refuses were lower across all marzes, except for Aragatsotn and Ararat regions.

# Questionnaires

## Overview

To conduct the survey the following tools were developed: a questionnaire, a diary and an interviewers' manual.

The questionnaire is completed by an interviewer who visites a surveyed household minimum five times within a month. During face-to-face interviews with the head of the household or another adult member, the interviewer collected information on the composition and housing conditions of the household, level of education and health status of household members, their employment status, land ownership, availability and utilization of cattle and agricultural equipment, money and goods flow between households, and other information. The list of sections included in the questionnaire has been modified. Sections on "Occupation and Self Employment", "Social Capital" and "Services Used" were taken out of the questionnaire in 2005, while new section on "Activities of households for own use" was added. Section on "Health (general) and Healthcare" was completely modified. Few modifications were applied to sections on "Migration" and "Transfers between households". The 2006 survey questionnaire has the following sections: (1) Household roster, (2) Migration, (3) Housing conditions, (4) Education, (5) Agriculture, (6) Transfers between households, (7) Health (general) and healthcare, (8) Savings and loans, (9) Self assessment of wellbeing, (10) Social assistance, and (11) Activities of households for own use.

The diary is completed by the household during the month. Every day the households recorded all their expenses on food, non-food products and services with detailed description of what they bought, such as the name of the product, its quantity, cost and the place of purchase. In addition, the households recorded the consumption of products, which were received and utilized from their own or other farms as well as products which were received from other households. Households recorded also what income they receive during the month. At the end of the month, the information on rarely used food products, durable goods and ritual (funeral, wedding and etc.) services was recorded as well. The records in the dairy were verified by the interviewer. The survey diary has the following sections: (1) Food products purchased during the day; (2) Food consumed at home during the day; (3) Expenditures on food consumed outside; (4) Non food products purchased and services received; (5) All other non food products and services received free of charge; (6) Household income and revenues; (7) List of real estate, durable goods and ritual services.

The Interviewers' Manual provides detailed instructions for filling out the questionnaire and the diary.

# Data Collection

## Data Collection Mode

Face-to-face [f2f]

**DATA COLLECTION NOTES**

The fieldwork of the 2006 survey was conducted by a team of 48 interviewers and 6 supervisors. The total survey activities were monitored by the supervisors. Prior to the survey a training session was arranged for the field team. Each interviewer was working in 12 PSU (enumeration area) during a year, visiting nine households every month. Once the interviewer finished the work in a given cluster he/she presented the completed questionnaires and diaries for data control and coding together with a report on sample results. Each interviewed household received AMD 1000 for keeping a diary during the month of the survey. The field work was under thorough supervision and numerous control interviews were conducted. The collected information was coded, logically tested and the information was entered into the database using special software for data entry, and afterwards the data entered were verified, passed logical test and corrected according to the list of mistakes recorded. As a result, a database containing information on 5,184 households was formed. During the field work the interviewers visited 8,452 addresses.

**Overview**

Type: Continuous
Format: numeric
Width: 2
Decimals: 0
Range: 1-31

Valid cases: 2708
Invalid: 18445
Minimum: 0
Maximum: 31
Mean: 14.3
Standard deviation: 10.7

## did you stop your usual activities in the last 1 month because of illness, injur (i1_4)
File: mem

**Overview**

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 2708
Invalid: 18445

## if yes: for how many days? (i1_5)
File: mem

**Overview**

Type: Continuous
Format: numeric
Width: 2
Decimals: 0
Range: 0-31

Valid cases: 1360
Invalid: 19793
Minimum: 1
Maximum: 31
Mean: 11
Standard deviation: 9.2

## how far is the nearest helth care establishment located? (i1_6)
File: mem

**Overview**

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-5

Valid cases: 19810
Invalid: 1343

## did you apply for a doctors advice or did you go to health care establishment in (i1_7)
File: mem

**Overview**

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 1184
Invalid: 19969

## if yes, what was the reason for your visit? (i1_8)
File: mem

**Overview**

# if yes, what was the reason for your visit? (i1_8)
## File: mem

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-9

Valid cases: 1184
Invalid: 19969

# where did you get the consultancy or medical care (i1_9)
## File: mem

**Overview**

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-6

Valid cases: 126
Invalid: 21027

# where did you get the consultancy or medical care (i1_10)
## File: mem

**Overview**

Type: Discrete
