# Sampling

## Sampling Procedure

---

The sample for 2016 Honduras ES was selected using stratified random sampling.

Three levels of stratification were used in this country: industry, establishment size, and region.

Industry stratification was designed as follows: the universe was stratified into Manufacturing industries (ISIC Rev. 3.1 codes 15- 37), Retail industries (ISIC code 52) and Other Services (ISIC codes 45, 50, 51, 55, 60-64, and 72).

For the Honduras ES, size stratification was defined as follows: small (5 to 19 employees), medium (20 to 99 employees), and large (100 or more employees).

Regional stratification for the Honduras ES was done across three regions: Tegucigalpa, San Pedro Sula and Rest of the Country.

Given the stratified design, sample frames containing a complete and updated list of establishments as well as information on all stratification variables (number of employees, industry, and region) are required to draw the sample. Great efforts were made to obtain the best source for these listings.

The sample frame consisted of listings of firms from two sources: The panel firms list of 360 firms from the Honduras 2010 ES was used. For fresh firms (i.e., firms not covered in 2010), firm data from Servicio de Administracin de Rentas, SAR was used.

## Response Rate

---

Survey non-response must be differentiated from item non-response. The former refers to refusals to participate in the survey altogether whereas the latter refers to the refusals to answer some specific questions. Enterprise Surveys suffer from both problems and different strategies were used to address these issues.

Item non-response was addressed by two strategies:

- a- For sensitive questions that may generate negative reactions from the respondent, such as corruption or tax evasion, enumerators were instructed to collect the refusal to respond (-8) as a different option from don't know (-9).
- b- Establishments with incomplete information were re-contacted in order to complete this information, whenever necessary. However, there were clear cases of low response. Please, note that for this specific question, refusals were not separately identified from "Don't know" responses.

Survey non-response was addressed by maximizing efforts to contact establishments that were initially selected for interview. Attempts were made to contact the establishment for interview at different times/days of the week before a replacement establishment (with similar strata characteristics) was suggested for interview. Survey non-response did occur but substitutions were made in order to potentially achieve strata-specific goals; whenever this was done, strict rules were followed to ensure replacements were randomly selected within the same stratum. Further research is needed on survey non-response in the Enterprise Surveys regarding potential introduction of bias.

The share of rejections per contact was 0.21.

## Weighting

---

Three sets of assumptions on establishment eligibility are used to construct sample adjustments using the status code information.

Strict assumption: eligible establishments are only those for which it was possible to directly determine eligibility. The resulting weights are included in the variable wstrict.

Median assumption: eligible establishments are those for which it was possible to directly determine eligibility and those that rejected the screener questionnaire or an answering machine or fax was the only response. The resulting weights are included in the variable wmedian.

Weak assumption: in addition to the establishments included in points a and b, all establishments for which it was not possible to contact or that refused the screening questionnaire are assumed eligible. This definition includes as eligible establishments with dead or out of service phone lines, establishments that never answered the phone, and establishments with incorrect addresses for which it was impossible to find a new address. Under the weak assumption only observed non-eligible units are excluded from universe projections. The resulting weights are included in the variable wweak.

# Questionnaires

## Overview

---

The structure of the data base reflects the fact that 2 different versions of the survey instrument were used for all registered establishments. Questionnaires have common questions (core module) and respectfully additional manufacturing- and services-specific questions.

The eligible manufacturing industries have been surveyed using the Manufacturing questionnaire (includes the core module, plus manufacturing specific questions).

Retail firms have been interviewed using the Services questionnaire (includes the core module plus retail specific questions) and the residual eligible services have been covered using the Services questionnaire (includes the core module).

Each variation of the questionnaire is identified by the index variable, a0.

The last complete fiscal year is January to December 2015. For questions pertaining to monetary amounts, the unit is the Honduran Lempira.

#### DATA COLLECTION NOTES

Private contractors conduct the Enterprise Surveys on behalf of the World Bank. Due to sensitive survey questions addressing business-government relations and corruption-related topics, private contractors are preferred over any government agency or an organization/institution associated with government, and are hired by the World Bank to collect the data.

The surveys are usually implemented following a two-stage procedure. In the first stage, a screener questionnaire is applied over the phone to determine eligibility and to make appointments; in the second stage, a face-to-face interview takes place with the Manager/Owner/Director of each establishment. Sometimes the survey respondent calls company accountants and human resource managers into the interview to answer questions in the sales and labor sections of the survey.

All Enterprise Surveys are conducted in the local languages.

# Data Processing

## Data Editing

---

Data entry and quality controls are implemented by the contractor and data is delivered to the World Bank in batches (typically 10%, 50% and 100%). These data deliveries are checked for logical consistency, out of range values, skip patterns, and duplicate entries. Problems are flagged by the World Bank and corrected by the implementing contractor through data checks, callbacks, and revisiting establishments.

### Description

## Legal Status Of The Firm (b1)

File: honduras\_2016\_full\_data

-Shareholding company with shares traded in the stock market: a firm's shares are publicly traded on the stock market. Firms in this category have limited liability.

-Shareholding company with shares traded privately: shares are not traded or they are traded only privately. Firms in this category have limited liability.

-Sole proprietorship is a business owned and operated by one individual natural person; that is a real human being, as opposed to an artificial legal entity such as a corporation or organization that the law treats as if it were a person distinct from its members or owner(s). This is regardless of whether or not the establishment has limited liability.

-Partnership allows two or more people to share profits and liabilities, with or without privately held shares. Parties can be individuals, corporations, trusts, or a combination of the above. Partners have unlimited liability in these firms.

-Limited partnership includes general partners and one or more limited partners who invest capital into the partnership, but do not take part in the daily operation or management of the business. Limited partners limit their amount of liability to the amount of capital invested in the partnership. The general partners personally shoulder all debts and obligations of the partnership.

-Other must be specified in writing. This variable should be codified after field work is finished to make sure that "other" does not include establishments that can be included in forms 1-5

### Interviewer instructions

ENUMERATORS DO NOT NEED TO KNOW THE DEFINITION OF EACH TYPE OF LEGAL STATUS.

If an establishment is part of a larger firm, this question applies to the whole firm.

Shareholding company with shares traded in the stock market: a firm's shares are publicly traded on the stock market.

Firms in this category have limited liability.

Shareholding company with shares traded privately: shares are not traded or they are traded only privately. Firms in this category have limited liability.

Sole proprietorship is a business owned and operated by one individual natural person; that is a real human being, as opposed to an artificial legal entity such as a corporation or organization that the law treats as if it were a person distinct from its members or owner(s). This is regardless of whether or not the establishment has limited liability.

Partnership allows two or more people to share profits and liabilities, with or without privately held shares. Parties can be individuals, corporations, trusts, or a combination of the above. Partners have unlimited liability in these firms.

Limited partnership includes general partners and one or more limited partners who invest capital into the partnership, but do not take part in the daily operation or management of the business. Limited partners limit their amount of liability to the amount of capital invested in the partnership. The general partners personally shoulder all debts and obligations of the partnership.

Other must be specified in writing. This variable should be codified after field work is finished to make sure that "other" does not include establishments that can be included in forms 1-5.

### Pre question

READ ONLY IF A7=1 (yes)  
I want to proceed by asking you about this establishment only.

### Literal question

In what year did this establishment begin operations?

### Interviewer instructions

- PROVIDE FOUR DIGITS FOR YEAR

The year the establishment began operation refers to the year in which the establishment actually started producing (or providing services), not to the year in which it was registered for the first time. The answer is independent of ownership at the time.

If the establishment was privatized, then the date provided should refer to when the original government-owned establishment began operations.

If the establishment changed its production significantly to change sector classification, then the year when that took place should be provided.

-9 -> GO TO QUESTION C.10

### Interviewer instructions

Power outages occur when there is equipment malfunction from the failure of adequate supply of power. Brownouts that cause some, but not all, equipment to malfunction are also considered power outages.

Note that if power outages are planned, i.e. "load shedding", this is considered a power outage if the scheduled outage interrupts the operations of the establishment.

However if power outages are planned and the scheduled outage does NOT interrupt the operations of the establishment, this is not considered a power outage. Situations where the electricity/lights flicker and the experiences of both workers and/or customers are not affected are not considered power outages

### Literal question

In fiscal year 2015, as a proportion of all material inputs or supplies purchased that year, what percentage of this establishment's material inputs or supplies were:

- Material inputs, supplies, or finished goods and materials purchased to resell of domestic origin

### Interviewer instructions

- SHOW CARD 5

- CHECK THAT TOTAL SUMS TO 100% (UNLESS RESPONDENT DOES NOT KNOW)

Inputs are materials that go through a mechanical, physical, or chemical transformation that will ultimately make up some portion of the final good produced. E.g. lumber in a furniture factory.

Supplies are materials or products that are used, expended, consumed, but will not comprise the final good produced. Pencils and writing paper are good examples of a supply.

Materials and goods for resale: includes goods and final materials purchased by retailers or wholesalers for sale without further modifications.

The calculation is done as a percent of all purchases of supplies, inputs and goods purchased by the establishment for the fiscal year.

The origin of the inputs, supplies, materials, or goods, matters regardless of whether the establishment directly imports those or not.

## Num. Full-Time Employees At End Of Last Fiscal Yr: Non-Production Workers (l3b)

File: honduras\_2016\_full\_data

Number of permanent, full-time production workers are all workers directly involved in the production process. Typically they are physically located in the plant of the manufacturing establishment, separate from administration and sales. They are engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with these production operations. Plant supervisors and production managers are considered production workers.

Number of permanent, full-time non-production workers are those workers employed in sales (including driver-salespersons), sales delivery (highway truck drivers and their helpers), janitorial and guard services, advertising, credit, collection, installation and servicing of own products, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria, medical, etc.) are included.

Non-production workers are NOT engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with these production operations. Typically they are physically located in adjacent or separate premises to the production plant.

### Literal question

At the end of fiscal year 2015, how many permanent, full-time individuals working in this establishment were:

- Highly skilled production workers, professionals whose tasks require extensive theoretical and technical knowledge

### Interviewer instructions

Highly skilled production workers. Highly skilled production workers are those workers involved in the production process whose main tasks and duties involve complex problem solving, decision making and creativity, technical and practical tasks requiring extensive body of theoretical, technical, procedural, and factual knowledge in a specialized field. A highly skilled worker usually has attended a higher educational institution for at least one year or more after completing secondary school. Skill is defined based on the occupation or tasks the individual performs rather than his/her qualifications. This type of skills corresponds to skill level 3 and 4 in the ILO classification.

Semi-skilled production workers. Semi-skilled production workers are those workers involved in the production process whose main tasks and duties involve operating and maintaining mechanical and electrical equipment, driving vehicles, manipulating, ordering and storing information. A semi-skilled worker may have completed some secondary level education or vocational training to acquire the skills required for the job. A semi-skilled skilled worker may also have learned the skills on the job through experience or on the job-training. Skill is defined based on the occupation or tasks the individual perform rather than his/her qualifications This level of skills corresponds to skill level 2 in the ILO classification.

Unskilled production workers are workers engaged in production operations and whose main tasks and duties involve the performance of simple and routine physical or manual task, such as cleaning, digging, lifting, packaging, and carrying materials by hand, etc. These workers are unskilled in that the tasks they perform don't require special training, education, or skills to be performed. This type of skills corresponds to skill level 1 in the ILO classification.

### Interviewer instructions

## Net Book Value Of Machinery Vehicles, And Equipment In Last Fiscal Year (n6a)

File: honduras\_2016\_full\_data

Net book value equals the purchase value minus depreciation. The net book value represents the actual cost of assets at the time they were acquired, including all costs incurred in making the assets usable (such as transportation and installation) minus depreciation accumulated since the date of purchase. Included in the assets are all machinery and equipment (production, office, and transportation equipment) for which depreciation reserves are maintained. Accordingly, the value of assets at the end of the year includes the value of construction in progress.

- Machinery, vehicles, and equipment

### Interviewer instructions

This question is designed to ascertain the market value of the establishment's capital, regardless of ownership. You can ask the manager to estimate the market value if all of the equipment were purchased on the open market. If the respondent states that there is no market, ask how much the respondent would be willing to pay for the capital, knowing what it can produce in its current condition. Estimate how much it would cost to buy machinery in the current market which is similar in terms of age and characteristics. Keep in mind that it is one of the most important questions on the questionnaire.
