## 1 Introduction

This report serves as a summary of changes, amendments, recodes and corrections made during the data validation process for the fourth Quality of Life survey implemented by the Gauteng City Region Observatory (GCRO).

The report should be reviewed in conjunction with the completed SPSS dataset.

## 2 Data collection background

### 2.1 Research instrument

The research instrument was designed by the GCRO. The final questionnaire included 228 questions, of which 224 were closed ended and 4 open ended questions. In addition, 32 questions contained 'other specify' response options which were coded back into the original response frame after the fieldwork was completed. The 12 sections of the questionnaire included:

1) Dwelling and household information, access to services, satisfaction with services;
2) Migration into Gauteng;
3) Community/suburb;
4) Transport;
5) Internet access and household characteristics;
6) Public participation, satisfaction with government, social and political views/opinions;
7) Personal life;
8) Employment;
9) Crime and safety;
10) Community participation, protest activity;
11) Health; and
12) Demographic and household information.

The final questionnaire was translated into Afrikaans, Sesotho, isiZulu, and isiXhosa by a professional linguistic and translation agency.

### 2.2 Questionnaire programming

The questionnaire was programmed using the SurveyToGo software on the Dooblo platform, which supports question branching, skipping and looping, and GPS location capturing.

Furthermore, some of the questions were randomised to avoid possible response bias, which can occur when a number of similar questions are asked in sequence. A number of groups of
questions were differently ordered for each respondent (e.g. for Q6.6-Q6.8 the order for one respondent may have been Q6.6; Q6.8, followed by Q6.7, whereas another respondent may have seen the following order: Q6.7; Q6.6, followed by Q6.8.). Randomisation was applied to the following questions:

- Q6.6-6.8 "How satisfied are you with the performance of:
- Q6.6 The National Government,
- Q6.7 The Gauteng Provincial Government and
- Q6.8 The Local Municipality where you live."
- Q11.20-11.22 were also randomised: "The following questions ask about how you felt yesterday on a scale from 0 to 10 . Zero means you did not experience the feeling "at all" yesterday while 10 means you experienced the feeling "all of the time" yesterday.
- Q11.20 How about happy?
- Q11.21 How about worried?
- Q11.21 How about depressed?"

A number of logic checks were programmed into the questionnaire to ensure consistency across respondent responses. In each case where a logic check was violated an error message would be activated and the interviewer was required to review these responses with the respondent and to adjust the selections where appropriate. The following checks were included:

- Q1.3 and Q5.6: Respondents that selected that they were paying off a bond (Q1.3), were given an error message if they later identified that they were not in debt (Q5.6).
- Q4.4: Although Q4.4 was a spontaneous response question, respondents were prompted by the interviewer about whether they walked as one of the modes in their most frequent trip. This was done because many respondents in the past have not thought of walking as a mode of transport and have thus neglected to include it in the range of modes that they utilise.
- Q5.2 and Q5.7: Respondents that selected that they accessed the Internet from home, on a cell phone/tablet or laptop in Q5.2 were given an error/check message if they later then indicated that they do not have a cell phone, computer, laptop or Tablet, or Internet connection (Q5.7).
- Q6.4 and Q6.25: Respondents that indicated that they had attended an Integrated Development Plan (IDP) meeting (Q6.4) were given an error message if they later indicated that they had never heard of IDP (Q6.25).

Initially the age variable was captured only during the respondent selection process of the questionnaire. In some cases the person that reported the respondents age was not the
respondent themselves, which led to some inaccuracies. In light of this, an additional age question was added later on in the questionnaire for the respondent to answer directly (this change was implemented on 12 October 2015).

### 2.2.1 Changes made to Sub-place list for 8.7 and 8.8

Due to issues in previous Quality of Life surveys, the following changes were made to the subplace list that was used in the questionnaire for Q8.7 and Q8.8:

1) All sub-places with 'NU' (non-urban) in the sub-place name were removed as per Table 1.

Table 1: Sub-places including 'NU' that were removed from the questionnaire version of Q8.7 and Q8.8

| Subplace code | Subplace name |
| :---: | :--- |
| 798002003 | City of Johannesburg NU |
| 797002003 | Ekurhuleni NU |
| 760006002 | Emfuleni NU |
| 762004002 | Lesedi NU |
| 766002002 | Merafong City NU |
| 761002002 | Midvaal NU |
| 763001002 | Mogale City NU |
| 764003001 | Randfontein NU |
| 799026001 | Tshwane NU |
| 765004002 | Westonaria NU |

2) Some sub-places with 'SP' were removed to avoid confusion with the actual central areas within each main place, as per Table 2.
3) A number of sub-places were renamed to avoid confusion and ensure that the central/CBD was selected where appropriate. Names were changed in the questionnaire as per Table 3. The original sub-place names and codes are used in the final dataset.

Table 2: Sub-places including 'SP' that were removed from the questionnaire version of Q8.7 and Q8.8

| Subplace code |  |
| :---: | :--- |
| 799059090 | Centurion SP1 Subplace name |
| 799059089 | Centurion SP2 |
| 799059002 | Centurion SP3 |
| 799059012 | Centurion SP4 |
| 799035104 | Pretoria SP |
| 764002031 | Randfontein SP1 |
| 760009006 | Vereeniging SP1 |
| 760009026 | Vereeniging SP2 |

Table 3: Sub-places that were renamed to include 'Central/CBD' in the questionnaire version of Q8.7 and Q8.8

| Sub-place code | Sub-place Original name | Sub-place name to appear in drop down list |
| :---: | :--- | :--- |
| 798015089 | Johannesburg SP | Johannesburg central/CBD |
| 797006020 | Kempton Park SP | Kempton Park Central/CBD |
| 760009032 | Vereeniging Central | Vereeniging Central/CBD |
| 762014004 | Heidelberg Central | Heidelberg Central/ CBD |
| 766004009 | Carletonville Central | Carletonville Central/CBD |
| 761006012 | Meyerton Central | Meyerton Central/CBD |
| 763004038 | Krugersdorp Central | Krugersdorp Central/CBD |
| 764002017 | Randfontein SP | Randfontein central/CBD |
| 799035058 | Pretoria Central | Pretoria Central/CBD |
| 765008001 | Westonaria SP 1 | Westonaria Central/CBD |
| 797007010 | Edenvale SP | Edenvale Central/CBD |
| 797026002 | Tsakane SP | Tsakane Central/CBD |

### 2.2.2 Interview Length:

On average interviews took 45 minutes. Figure 1 presents the distribution of interview length. Some $11 \%$ of the interviews were recorded at more than two hours in length. The extended interview length can be attributed to a range of factors including:

- Fieldworkers not closing the interviews properly on the devices after completing an interview.
- Interviews that began, but were completed at a later stage, as arranged by the fieldworker and respondent.
- Tablet times not synchronized back to the start of the interviews.

Please refer to Appendix 1 for an indication of the interview lengths.

Figure 1: Distribution of interview length

## 3 Universal codes used

## 1. -1 No response due to skip scenario

The code -1 was used to indicate that a variable field was not populated in the other specified response options. When the previous question did not warrant an answer in the next question, the code -1 was used. This was only relevant to the verbatim answers.

## 2. 1004 No response due to skip scenario

The code 1004 was used to indicate that a variable field was not populated. This occurred when the answer/ option in the previous question did not warrant an answer in the skip question.

## 3. 1005 Fieldwork error

The code 1005 was used when a question/skip question was not activated due to a development error in the digital collection instrument and when a valid response could not be determined during the call backs. The code was also used for nonsensical verbatim responses. Table 4 lists the questions, and number of instances per question, where fieldwork errors were found.

Table 4: Instances of fieldworker errors per question

| Question <br> number | Question wording | Number of <br> instances |
| :--- | :--- | :--- |
| 1.10 | Satisfaction with pre-paid electricity | $\mathrm{n}=1$ |
| 2.3 | Which country did you move into Gauteng from? | $\mathrm{n}=5$ |
| 2.4 | When did you move into Gauteng? | $\mathrm{n}=1$ |
| 6.12 | Why do you have this opinion of your local councillor? | $\mathrm{n}=3$ |
| 8.2 | How old is the business? | $\mathrm{n}=45$ |
| 8.8 | Thinking about the main thing you need for your business to <br> operate (e.g. raw materials, goods in bulk, machines etc.). From <br> which area do you get this thing? | $\mathrm{n}=1$ |
| 8.10 | If ever tried to start a business, did it fail or succeed? | $\mathrm{n}=2$ |
| 8.23 | What is your employment status? | $\mathrm{n}=1$ |
| 8.24 | Which sector are you employed in? | $\mathrm{n}=1$ |
| 8.25 | Satisfaction: Working conditions in your job <br> $11.7 \_1$For people on a medical aid, have you gone to a state facility <br> while on medical aid? - Yes, hospital | $\mathrm{n}=1$ |
| $11.7 \_2$ | For people on a medical aid, have you gone to a state facility <br> while on medical aid? - Yes, state clinic | $\mathrm{n}=1$ |
| $11.7 \_3$ | For people on a medical aid, have you gone to a state facility <br> while on medical aid? - No | $\mathrm{n}=1$ |
| 11.8 | Given that you have medical aid cover; why did you use a public <br> health facility? | $\mathrm{n}=1$ |

## 4 Unique record identifier

The digital data collection instrument automatically generated a unique record identifier code for each completed questionnaire. This code was used as a primary key in the SPSS dataset. The field label for this unique identifier is SbjNum.

## 5 Data corrections

This section pertains to data corrections during the data cleaning process.

### 5.1 Data corrections on Age and Gender questions

Due to a questionnaire programming issue some respondents' age ( $\mathrm{n}=297$ records) and sex ( $n=215$ records) information were not recorded. This occurred because of programming maintenance that was done on the relevant section of the questionnaire during fieldwork. All the missing data was retrieved through call backs.

During the call backs, some respondents noted that their age was captured incorrectly, and they provided their correct age. These errors were due to a programming issue, which is described in more detail in section 2.2.1. Appendix 2 provides a comprehensive list of changes that were made to the Gender and Age variables.

### 5.2 Recoding of Q1: Which type of dwelling does this household occupy?

Due to a questionnaire programming error, 'Semi-detached house not in a complex' was programmed as 'Semi -detached house in a complex'. This error remained throughout the duration of fieldwork. A total of $\mathrm{n}=175$ respondents selected this option, and their responses were recoded from 'Semi -detached house in a complex' into 'Cluster house in a complex'. There were 2 open-ended responses that indicated dwelling type was 'Semi-detached house not in a complex', these were coded into the 'Semi-detached house not in a complex' category.

### 5.3 Recoding of Q1.9 Electricity

There were instances where respondents did not indicate that they use prepaid electricity, but nonetheless issued a satisfaction rating for this type of electricity. These satisfaction ratings were removed from the final data file to ensure alignment. Refer to Appendix 3 for these changes.

### 5.4 Recoding of Q2.1 Were you born in Gauteng or did you move into Gauteng from another province or country?

There were 13 fieldwork errors where the incorrect question logic was followed. These instances include:

1. Respondents indicating in Q2.1 that they had 'Migrated into Gauteng from a province in South Africa'. However, in the follow up question (Q2.2 From which province did you move into Gauteng?) they indicated that they had moved to Gauteng from another country.
2. Respondents indicating in Q2.1 that they had 'Migrated into Gauteng from another country'. However, in the follow up question (Q2.3 Which country did you move into Gauteng from?) they indicated that they had moved from a province within South Africa.

In both situations, the original response in Q2.1 was changed to correspond with the detailed responses provided in the subsequent questions.

In one instance a respondent noted that they migrated to Gauteng from 'Europe' in Q2.3. This response was removed and marked as a "Fieldwork Error".

### 5.5 Recoding of Q5.1 Do you access the internet (e.g. a web site, e-mail, Facebook, WhatsApp, WeChat or other app)?

Q5.1 was a multiple response question where options were either selected or not, as appropriate. The data format requires both 'Yes' and 'No' options, thus the options that were not selected were coded as "No"..

### 5.6 Recoding of Q6.19 Which department/service did you most recently interact with?

Q6.19 was an open ended question that asked respondents who had indicated they had interacted with government in the past 3 months, with which department they had interacted. There were 29 instances where respondents answered 'none' to this question. In these instances their responses to the previous question, Q6.18 (In the last 3 months, have you contacted or visited a government department?) were changed to ' No ', and the Q6.19 responses were recoded as 'No response due to skip scenario'. Their verbatim responses were left unchanged.

### 5.7 Recoding of sub-place codes in Q8.7 and 8.8 (business location and location of business 'supplies')

Various responses that were captured during fieldwork did not align with the StatsSA subplace list, and thus a number of changes were required to ensure proper alignment. These changes are presented in Table 5. In addition, some instances a mainplace was selected as the location for a business instead of the relevant subplace. To ensure that these variables can be easily mapped using GIS software, these mainplaces were recoded to a subplace within the mainplace which was the most logical position for a business to be located Table 6.

Table 5: Changes that were made to the captured data to ensure alignment with StatsSA sub-place coding

| Captured Sub-place name | Recoded Sub-place aligned to StatsSA <br> sub-place codes | StatsSA sub-place <br> code |
| :---: | :---: | :---: |
| Bronkhorstspruit Central/CBD | Bronkhrstspruit SP | 799072002 |
| Nkangala | Ekangala SP | 799054001 |
| Marlboro | Marlboro Gardens | 798013043 |
| Kudung | Midvaal NU | 761002002 |
| Movhango | Bophelong SP | 760013001 |
| Pennyville | Consolidated Main Reef Gold Mine | 798016100 |
| Randburg CBD | Ferndale | 798016034 |
| Sandton SP | Sandown | 798013045 |

| Kibler Park | Asiatic Bazaar | 798015221 |
| Marabastad |  | 799035057 |

### 5.8 Other specify' coding

The questionnaire contained 224 closed ended and 4 open ended questions. In 32 of the closed ended questions contained 'other specify' options where verbatim responses were captured. The verbatim responses were coded back into the original question options where possible, and where not possible the responses remained coded as 'other'. There were a few instances where the response frame was adjusted based on the 'other specify' responses. Table 7 indicates the total number of 'other specify' options, the number of responses that remained as 'other' after coding and the percentage of verbatim responses that was backcoded to the original response options.

Additional codes were created and added to the response frame where the 'other specify' responses indicated that there was a critical gap in the original response frame. In Q6.19 a new response frame was created based on the range of verbatim responses. Table 8 provides the additional codes that were added to relevant questions.

Q8.4 was an open-ended question in which respondents were asked "What does your business do". The verbatim responses were coded according to the seventh edition of the 'Standard industrial classification of all economic activities' (SIC7) (StatsSA, 2012). The responses were classified according to the first four levels of SIC7, including Section, Division, Group and Class. (For further detail on SIC7 see 'Standard Industrial Classification of all

Economic Activities (SIC) Seventh Edition/ Statistics South Africa. Pretoria: Statistics South Africa, 2012')

Table 6: The sub-place name and code allocated to each captured mainplace in Q8.7 and Q8.8

| Captured main-place name | Recoded Sub-place | StaisSA sub-place code |
| :---: | :---: | :---: |
| Atteridgeville | Atteridgeville SP | 799056001 |

Table 7: 'Other specify' coding

| Question | No. of Verbatim Responses | Remainder left as other | \% back-coded to main question |
| :---: | :---: | :---: | :---: |
| 1 - Dwelling type | 343 | 10 | 97\% |
| 1.3- Dwelling ownership | 1274 | 778 | 39\% |
| 1.4 - Main water source | 229 | 149 | 35\% |
| 1.7-Type of toilet facility | 57 | 3 | 95\% |
| 1.8 - How is rubbish disposed? | 149 | 16 | 89\% |
| 1.12 - Main energy source for lighting | 60 | 25 | 58\% |
| 3.2 - Biggest problem in community | 1284 | 284 | 78\% |
| 3.3 - What is the most important reason why you live in your suburb | 1224 | 410 | 67\% |
| 3.4 - If you could move in the next year, what type of dwelling would you want to move into? | 394 | 60 | 85\% |
| 4.4 - Type of transport used for most frequent trip: | 28 | 26 | 7\% |
| 5.2 - From where do you access the Internet? | 132 | 20 | 85\% |
| 6.3 - If not, why not vote? | 318 | 149 | 53\% |
| 6.5 - If there is a problem in the area where you live, who do you talk to first to sort it out? | 755 | 581 | 23\% |
| 6.28 - When would you prefer your municipal public meetings to take place? | 2361 | 342 | 86\% |
| 6.59 - Which of the following do you most strongly identify with? | 205 | 174 | 15\% |
| 8.6 - What was the primary source of your startup capital for your business: | 116 | 49 | 58\% |
| 8.9 - What is the main constraint experienced by your business? | 185 | 148 | 20\% |
| 8.24 - Which sector are you employed in? | 1966 | 203 | 90\% |
| 8.26 - What factor is/was most important to you when you look/looked for a job? | 353 | 147 | 58\% |
| 10.3-What was the protest about? | 241 | 92 | 62\% |
| 11.3 - What was the main reason you did not start at a clinic? | 133 | 99 | 26\% |
| 11.4 - If not using public healthcare facilities, what is the main reason? | 235 | 165 | 30\% |
| 11.6 - Are you personally covered by medical aid or medical insurance? | 179 | 61 | 66\% |
| 11.8 - Given that you have medical aid cover, why did you use a public health facility? | 171 | 165 | $4 \%$ |
| 11.10 - What was the main reason that they didn't get the healthcare? | 70 | 34 | 51\% |
| 11.13 - What is the biggest health problem facing your community? | 1336 | 428 | 68\% |

Table 8: Additional codes included in the response frame, based on 'other specify' options

| Question | Addifional/New code: Value Number | Additional/New code: value label |
| :---: | :---: | :---: |
| Q3.2 What is the biggest problem facing your community? Additional code | 29 | None/don't know |
| Q6.19 Which department/service did you most recently interact with? New response frame | 1 | Clinic / hospital / health services |
|  | 2 | Court / justice / correctional services |
|  | 3 | Education |
|  | 4 | Home affairs |
|  | 5 | Housing |
|  | 6 | Labour |
|  | 7 | Municipal services / billing / customer care centre |
|  | 8 | None |
|  | 9 | Police / safety |
|  | 10 | SARS |
|  | 11 | SASSA / social grants |
|  | 12 | Social services / welfare |
|  | 12 | Traffic dept / licensing / transport |
|  | 13 | Other |
| Q6.28 When would you prefer your municipal public meetings to take place? Additional codes | 3 | Weekend |
|  | 4 | Saturday |
|  | 6 | N/A / I don't plan to attend |
| Q11.13 Let us think about particular health problems that are facing your community. Which ONE health problem do you think is the biggest facing your community? Additional codes | 19 | None |
|  | 20 | Don't know |

## 6 Misinterpretation by fieldworkers / respondents

Fieldworkers/respondents provided inappropriate answers to certain instances, where they did not understand the question. These instances include:

- In Q1.9 fieldworkers captured more than one type of electricity source which could not be used in conjunction with each other for example:
- Electricity with prepaid card
- Electricity with smart meter
- Electricity with conventional meter

These errors were kept in the data file. Refer to Appendix 4 for respondents who indicated that they used a conventional meter, as well as a Prepaid Meter or Smart Meter.

- Q12.9 "Is your household registered with your municipality (e.g. on an indigency register) for rates, rebates or for more free/subsidised services like water, electricity, waste etc.?" was misinterpreted by the respondents, which led to an inflated number of 'Yes' responses. It is likely that people misunderstood the question to refer to whether the household was registered with the municipality (e.g. for municipal services)
- Fieldworkers misinterpreted the dwelling type questions. These errors were identified during the post-fieldwork quality assurance processes, which utilised Google Maps' street view function. In some instances the following answers were misinterpreted as 'House, brick or concrete structure on a separate stand':
- Cluster house in a complex
- Semi-detached house not in a complex
- House, flat or room separate from main dwelling in backyard
- Unit in a retirement home or barracks etc.

The original responses were left unchanged in the data file.

## 7 Geographic Coordinates

The research instrument (tablet devices) had built in GPS functionality which obtained the coordinates of each successfully completed interview. The questionnaire required the interviewer to capture the GPS location using the automatic functionality at up to four occasions during the interview.

There were instances where inaccurate coordinates were obtained due to the triangulation of the cell phone towers (GSM network), or a loss of signal etc. In other instances, interviews were not conducted at appropriate locations (e.g. taxi ranks, fast food outlets etc.). All interview coordinates were checked against a range of criteria, and those that failed were identified as invalid interviews and were redone. For accepted interviews, the GPS coordinates that were used in the dataset were chosen based on a verification process that ascertained the most accurate coordinate.

## 8 Weighting

Due to the differences in population sizes, a two-step process of weighting was implemented after the data collection and cleaning processes:

1. Weighting to adjust for the sample design; and
2. Benchmarking to adjust for demographic distribution.

For any probability sample, such as the Quality of Life IV survey, the design weight is first calculated to ensure the sample represents the target population as closely as possible. Weights are usually developed in different stages to compensate for:

- unequal inclusion probabilities (design weight);
- non-response (substitution in field);
- non-coverage and skewedness resulting from sample design and fieldwork.

After the design weights were calculated, a second phase of weighting was implemented, namely benchmarking. The design weights were benchmarked to adjusts for demographics and correct for oversampling. Since some population variables will be over/under sampled, it is necessary to make adjustments to 'reduce' the contribution of the smaller variables and 'increase' the contribution of the larger ones. Adjusting for demographics (ward, race and gender) is necessary because some demographic groups will be over or underrepresented in the sample. Census 2011 results were used as the population demographic frame.

Two sets of weights were applied to the dataset:

1. Weights which reflect the adult population in each Ward. These weights sum to the population total of $8,849,063$, which reflects the adult population for Gauteng as per the 2011 Census. This weight is provided as a variable in SPSS: 'Bench_wgt'.
2. The weights calculated for set 1 were proportionally down-scaled to the sample total of 30,002 . These weights reflect the adjusted total interviews from the survey. This weight is provided as a variable in SPSS: 'Bench_wgt_30002'. This is the default weight that is applied to the data.

Please refer to the weighting document for more information.

## 9 Recodes

The following lists provide detail about the composition of the recoded variables that are included in the QoL IV dataset.

### 9.1 Recodes for categorical responses

### 9.1.1 Q1-Dwelling type

| Value | Label | Recoded <br> Value | Recoded Label |
| :--- | :--- | :--- | :--- |
| 1 | House, brick or concrete structure on a separate stand | 1 | Formal |
| 2 | Traditional dwelling, hut or structure made of traditional <br> materials | 3 | Other |
| 3 | Flat or apartment in a block of flats | 1 | Formal |
| 4 | Cluster house in a complex | 1 | Formal |
| 5 | Townhouse | 1 | Formal |
| 6 | Semi -detached house not in a complex | 1 | Formal |
| 7 | House, flat or room separate from main dwelling in <br> backyard | 1 | Formal |
| 8 | Informal dwelling or shack in backyard | 2 | Informal |
| 9 | Informal dwelling NOT in backyard, e.g. in informal squatter <br> settlement or on a farm | 2 | Informal |
| 10 | Room or flat which is part of main dwelling or property | 1 | Formal |
| 11 | Caravan or tent | 1 | Other |
| 12 | Unit in a retirement home or barracks etc. | 3 | Formal |
| 13 | Hostel | 3 | Other |
| 14 | Other | Other |  |

### 9.1.2 Q2.1 Origin

| Value | Label | Recoded <br> Value | Recoded Label |
| :--- | :--- | :--- | :--- |
| 1 | Born in Gauteng | 1 | Born in Gauteng |
| 2 | Migrated into Gauteng from a province in South <br> Africa | 2 | Migrated into Gauteng |
| 3 | Migrated into Gauteng from another country | 2 | Migrated into Gauteng |

9.1.3 Q8.17 Employment Status

| Value | Label | Recoded <br> Value | Recoded Label |
| :--- | :--- | :--- | :--- |
| 0 | No | 2 | Unemployed |
| 1 | Yes | 3 | Other |
| 1004 | No response due to skip scenario | 1 | Employed |

### 9.2 Q12.1 Education

| Value | Label | Recoded <br> Value | Recoded Label |
| :--- | :--- | :--- | :--- |
| 0 | No Education | 1 | No Education |
| 1 | Grade 0 or Grade R | 2 | Primary only |
| 2 | Grade 1 or Sub A | 2 | Primary only |
| 3 | Grade 2 or Sub B | 2 | Primary only |
| 4 | Grade 3, Std 1 or L1 | 2 | Primary only |
| 5 | Grade 4, Std 2 or L2 | 2 | Primary only |
| 6 | Grade 5, Std 3 or L3 | 2 | Primary only |
| 7 | Grade 6, Std 4 or L4 | 2 | Primary only |
| 8 | Grade 7, Std 5 or L5 | 2 | Primary only |
| 9 | Grade 8, Std 6, L6 or Form 1 | 3 | Secondary incomplete |
| 10 | Grade 9, Std 7, L7 or Form 11 | 3 | Secondary incomplete |
| 11 | Grade 10, Std 8, L8, FIII, NTC 1, or RCE higher | 3 | Secondary incomplete |
| 12 | Grade 11, Std 9 or F IV | 3 | Secondary incomplete |
| 13 | Grade 12, Std 10, Matric | 4 | Matric |
| 14 | A certificate from a college, technikon or | 5 | More |
| 15 | Aniversity | diploma from a college, technikon or university | 5 |
| 16 | Technikon or university degree | 5 | More |
| 17 | Post graduate degree - e.g. Hons, MA, PhD | 5 | More |
| 18 | Unspecified | 6 | Unspecified |

### 9.3 Recoding of numeric responses to ranges

### 9.3.1 Q2.4_Recode: When did you move into Gauteng?

| Recoded <br> Value | Ranges | Recoded Label |
| :--- | :--- | :--- |
| 1 | $1921-1984$ | Up to 1984 |
| 2 | $1985-1994$ | $1985-1994$ |
| 3 | $1995-2004$ | $1995-2004$ |
| 4 | $2005-2009$ | $2005-2009$ |
| 5 | 2010 | 2010 |
| 6 | 2011 | 2011 |
| 7 | 2012 | 2012 |
| 8 | 2013 | 2013 |
| 9 | 2014 | 2014 |
| 10 | 2015 | 2015 |
| 1004 |  | No response due to skip scenario |
| 1005 |  | Fieldwork error |

### 9.3.2 Q8.2_Recode: How old is your business?

| Recoded <br> Value | Ranges | Recoded Label |
| :--- | :--- | :--- |
| 1 | $0-1$ year | Up to 1 year |
| 2 | 2 years | 2 years |
| 3 | $3-4$ years | $3-4$ years |
| 4 | $5-6$ years | $5-6$ years |
| 5 | $7-10$ years | $7-10$ years |
| 6 | $11-15$ years | $11-15$ years |
| 7 | $16-60$ | $16+$ years |

### 9.3.3 Q12.3_Recode: Current Age

| Recoded <br> Value | Ranges | Recoded Label |
| :--- | :--- | :--- |
| 1 | $18-19$ | $18-19$ |
| 2 | $20-24$ | $20-24$ |
| 3 | $25-29$ | $25-29$ |
| 4 | $30-34$ | $30-34$ |
| 5 | $35-39$ | $35-39$ |
| 6 | $40-44$ | $40-44$ |
| 7 | $45-49$ | $45-49$ |
| 8 | $50-54$ | $50-54$ |
| 9 | $55-59$ | $55-59$ |
| 10 | $60-64$ | $60-64$ |
| 11 | $65-100$ | $65+$ |

9.3.4 Q12.5 recode: How many people live in this household

| Recoded <br> Value | Range | Recoded Label |
| :--- | :--- | :--- |
| 1 | 1 | 1 |
| 2 | 2 | 2 |
| 3 | 3 | 3 |
| 4 | 4 | 4 |
| 5 | 5 | 5 |
| 6 | 6 | 6 |
| 7 | $7-66$ | $7+$ |

9.3.5 Q12.7 recode: How many household numbers are under 18 years old?

| Recoded Value | Ranges | Recoded Label |
| :--- | :--- | :--- |
| 1 | 0 | 0 |
| 2 | 1 | 1 |
| 3 | 2 | 2 |
| 4 | 3 | 3 |
| 5 | 4 | 4 |
| 6 | 5 | 5 |
| 7 | 6 | 6 |
| 8 | 7 | 7 |
| 9 | 8 | 8 |
| 10 | 9 | 9 |
| 11 | $10-64$ | $10+$ |
