This survey was designed to assist the World Bank Group (WBG) in gaining a better understanding of how stakeholders in XXXX¹ perceive the WBG. The survey explored:

- *Overall Attitudes toward the World Bank Group*
- *World Bank Group's Effectiveness and Results*
- *The World Bank Group's Knowledge Work and Activities*
- *Working with the World Bank Group*
- *The Future Role of the World Bank Group in XXXX*
- *Communication and Information Sharing*
- *Background Information*

II. Methodology

From February to April 2018, 711 stakeholders of the WBG in four GCC countries (109 in Bahrain; 269 in Kuwait; 173 in Oman, and 160 in UAE) were invited to provide their opinions on the WBG's work in the country by participating in a Country Opinion Survey. Participants were drawn from the Office of a Minister; Office of a Parliamentarian; employees of ministries/ministerial departments/implementation agencies; Project Management Units (PMUs) overseeing implementation of WBG activities and consultants/contractors working on WBG-supported activities; bilateral and multilateral agencies; private sector organizations; private foundations; the financial sector/private banks; NGOs and community-based organizations (CBOs); the media; independent government institutions; chambers of commerce; academia/research institutes/think tanks; the judiciary branch; and other organizations.

A total of 260 stakeholders participated in the survey (37% response rate); 39 were located in Bahrain (36% response rate), 119 in Kuwait (44% response rate), 58 in Oman (34% response rate), and 58 in UAE (28% response rate). Respondents completed the questionnaires via the online survey platform, Qualtrics.

Every country that engages in the Country Opinion Survey (COS) must include specific indicator questions that will be aggregated for the World Bank Group's annual Corporate Scorecard. These questions are identified throughout the survey report.

The results in this year's Country Survey were compared to those in the Country Survey conducted in FY '15 (response rate was 29%, N=231). The data were weighted to reach similar stakeholder compositions across both survey years, allowing for more statistically reliable comparisons. Note, stakeholders who identified themselves as "Other" in the stakeholder category options were not included in these comparisons. As a result, mean ratings, percentages of respondents, and the total number of respondents in both years are slightly different from those of the original data reported in the FY '15 COS report and the non-weighted data presented in this report. For the weighted stakeholder breakdown and year comparison results, please refer to Appendix E (see page 102).

¹ Throughout this report, XXXX refers to the individual country, either Bahrain, Kuwait, Oman, or United Arab Emirates, referred to in the individual Country Opinion Survey.

¹ In FY 2015, Kuwait had one category related to energy - "Energy/energy efficiency," while Bahrain, Oman and UAE had two - "Energy (e.g., electricity production, gas prices)" and "Energy efficiency (e.g., energy savings, building insulation)." FY 2018 had only one energy category - "Energy." To prepare the year comparison, in FY 2015, the three categories were combined into one variable that was then compared to FY 2018 "Energy" category. This variable had a mean of "Energy (e.g., electricity production, gas prices)" and "Energy efficiency (e.g., energy savings, building insulation) scores for Bahrain, Oman and UAE, and the same scores as in "Energy/energy efficiency" for Kuwait.

² In FY 2015, in Kuwait, the category was "Labor market/job creation/employment."

³ In FY 2015, the category was "Economic growth and diversification of income."
