Response Rate

85%

Weighting

The results of this year's Country Survey were compared to those of the Country Surveys conducted in FY '13 (response rate was 90%, N = 192) and FY '16 (response rate was 70%, N = 141). The data were weighted to reach similar stakeholder compositions across the three survey years, allowing for more statistically reliable comparisons. Note, there were insufficient numbers of respondents from local government and the media to be included in these analyses. Also, stakeholders who identified themselves as "Other" in the stakeholder category options were not included in these comparisons. As a result, mean ratings, percentages of respondents, and the total number of respondents in both years are slightly different from those of the original data reported in the FY '13 and FY '16 COS reports and the non-weighted data presented in this report. For the weighted stakeholder breakdown and year comparison results, please refer to Appendix E (see page 80) in the Related Materials.
