Sampling

Sampling Procedure

The sample for 2017 Uruguay ES was selected using stratified random sampling, following the methodology explained in the [Sampling Note](#).

Three levels of stratification were used in Uruguay: industry, establishment size, and region. The original sample design with specific information of the industries and regions chosen is described in “The Uruguay 2017 Enterprise Surveys Data Set” report, Appendix C.

Industry stratification was designed as follows: the universe was stratified into Manufacturing industries (ISIC Rev. 3.1 codes 15-37), Retail industries (ISIC code 52) and Other Services (ISIC codes 45, 50, 51, 55, 60-64, and 72).

For the Uruguay ES, size stratification was defined as follows: small (5 to 19 employees), medium (20 to 99 employees), and large (100 or more employees).

Regional stratification was done across two regions: Montevideo and Canelones.

Note: See Sections II and III of “The Uruguay 2017 Enterprise Surveys Data Set” report for additional details on the sampling procedure.

Questionnaires

Overview

Two questionnaires - Manufacturing and Services were used to collect the survey data.

The Questionnaires have common questions (core module) and respectfully additional manufacturing- and services-specific questions. The eligible manufacturing industries have been surveyed using the Manufacturing questionnaire (includes the core module, plus manufacturing specific questions). Retail firms have been interviewed using the Services questionnaire (includes the core module plus retail specific questions) and the residual eligible services have been covered using the Services questionnaire (includes the core module).

DATA COLLECTION NOTES

The survey was implemented following a 2-stage procedure. Typically, first a screener questionnaire was applied over the phone to determine eligibility and to make appointments. Then a face-to-face interview took place with the Manager/Owner/Director of each establishment. However, sometimes the phone numbers were unavailable in the sample frame, and thus the enumerators applied the screeners in person.
