Sampling

Sampling Procedure

The samples for 2003, 2006, 2010 and 2016 Honduras Enterprise Surveys were selected using stratified random sampling, following the methodology explained in the [Sampling Note](#).

Three levels of stratification were used in Honduras ES: industry, establishment size, and region.

In 2006 ES, the population was stratified into 3 manufacturing industries, one services industry - retail-, and one residual sector as defined in the sampling manual. Each industry had a target of 120 interviews.

In 2010 ES, industry stratification was designed in the way that follows: the universe was stratified into 1 manufacturing industry, 1 service industry -retail -, and 1 residual sector as defined in the sampling manual. The manufacturing industry, service industry, and residual sectors had a target each of 120 interviews. Regional stratification was defined in three locations (city and the surrounding business area): Tegucigalpa, San Pedro Sula, and the Rest of the Country.

In 2016 ES, industry stratification was designed as follows: the universe was stratified into Manufacturing industries (ISIC Rev. 3.1 codes 15- 37), Retail industries (ISIC code 52) and Other Services (ISIC codes 45, 50, 51, 55, 60-64, and 72). Regional stratification was done across three regions: Tegucigalpa, San Pedro Sula and Rest of the Country.

Questionnaires

Overview

Two questionnaires - Manufacturing and Services were used to collect the survey data.

The Questionnaires have common questions (core module) and respectfully additional manufacturing- and services-specific questions. The eligible manufacturing industries have been surveyed using the Manufacturing questionnaire (includes the core module, plus manufacturing specific questions). Retail firms have been interviewed using the Services questionnaire (includes the core module plus retail specific questions) and the residual eligible services have been covered using the Services questionnaire (includes the core module).

DATA COLLECTION NOTES

Private contractors conduct the Enterprise Surveys on behalf of the World Bank. Due to sensitive survey questions addressing business-government relations and corruption-related topics, private contractors are preferred over any government agency or an organization/institution associated with government, and are hired by the World Bank to collect the data.

The surveys are usually implemented following a two-stage procedure. In the first stage, a screener questionnaire is applied over the phone to determine eligibility and to make appointments; in the second stage, a face-to-face interview takes place with the Manager/Owner/Director of each establishment. Sometimes the survey respondent calls company accountants and human resource managers into the interview to answer questions in the sales and labor sections of the survey.

All Enterprise Surveys were conducted in the local languages.

Description

-Shareholding company with shares traded in the stock market: a firm's shares are publicly traded on the stock market. Firms in this category have limited liability.

-Shareholding company with shares traded privately: shares are not traded or they are traded only privately. Firms in this category have limited liability.

-Sole proprietorship is a business owned and operated by one individual natural person; that is a real human being, as opposed to an artificial legal entity such as a corporation or organization that the law treats as if it were a person distinct from its members or owner(s). This is regardless of whether or not the establishment has limited liability.

-Partnership allows two or more people to share profits and liabilities, with or without privately held shares. Parties can be individuals, corporations, trusts, or a combination of the above. Partners have unlimited liability in these firms.

-Limited partnership includes general partners and one or more limited partners who invest capital into the partnership, but do not take part in the daily operation or management of the business. Limited partners limit their amount of liability to the amount of capital invested in the partnership. The general partners personally shoulder all debts and obligations of the partnership.

-Other must be specified in writing. This variable should be codified after field work is finished to make sure that "other" does not include establishments that can be included in forms 1-5
